EDITORIAL NOTES.

The Chicago News says: There were 32,000 arrests in Chicago last year, more than 20,000 of them being for crimes and disturbances directly traceable to whisky.

Reports prepared by the British Circumpolar Expedition show that Fort Rae, in British North America, is sixty miles nearer the pole than has been hitherto supposed, being in sixty-four degrees north latitude.

The Tennessee Legislature, among its last acts, passed a bill making the keeping of gambling houses a felony, punishable by severe penalties. But it also passed a bill allowing pools to be sold on races controlled by blood-horse associations or fairs, in or out of the State, forbidding, however, the selling of pools to minors or drunken persons.

The Legislature of Tennessee has passed a bill "pensioning all Confederate soldiers who lost one or both eyes during the war, and all Federal soldiers not pensioned by the United States Government." This is really generous on the part of Tennessee, but it would seem, there is very little state-manship in the legislature, or it would be just before it is generous. It will be remembered that this is the State which repudiated a large part of its debt on the ground that it was too poor to pay it.

It is remarkable (says Nature), that a disease like leprosy should flourish in Norway. From the registers just published, this appears, however, to be the case, although the number actually is decreasing. At the end of 1875, there were 3,008 patients reported in the country. At the end of 1880, the number had fallen to 1,382. The disease is stated to be due to the consumption of food in an unwholesome condition, particularly fish, and also to uncleanliness.

The new town of Birmingham, which eleven years ago was staked out by Northern men on a tract of uninhabited land in Alabama, contains a population of 10,000, and is expected to grow hereafter at the rate of 5,000 a year. Coal and iron exist in the neighborhood in great abundance, and it is said merchantable iron can be manufactured there cheaper than anywhere else in the country. It is within the possibilities that fifty years hence Birmingham in Alabama will, in many things, rival the great manufacturing town of Birmingham in England.

The Providence Star remarks: "It is a curious fact of history that religious institutions were born first, then social, and last political; but that in the development and perfection of these three the order is exactly the reverse. Living as we do in the midst of civilization, of course we now find these respective institutions mutually inter-dependent, and hard to view separately. But close study shows us that at present the most advanced political institutions of the world are perceptibly nearer our conception of idealism than are the leading social institutions, and that our religious institutions are less perfectly developed than either of the other two."

Recently compiled figures show that there are in the United States nine millions of children who are outside of all Sunday school education and influence. It is also stated that these children have no church advantages or other religious privileges to make up for the deprivation of Sunday school tuition. The churches and Sunday schools have been exerting themselves largely to occupy unevangelized districts, but it would seem that they yet have a great work to do to keep up with the religious illiteracy of the rising generation. The statement generally made by Sunday school orators a quarter of a century ago, to stimulate interest in Sunday school work, was to the effect that there were in the United States four millions of children outside of Sunday school influence. Now that the population of the country has increased, the proportion of religious juveniles is larger, and religious effort has not kept pace with it.

AN ADJUNCT OF "CHRISTIAN CIVILIZATION."

This crime disclosed by the discovery of a new-born infant's body at the mouth of the City Creek aqueduct on Wednesday afternoon, as related in the News, is, we are happy to say, very uncommon in this Territory. It is not an adjunct of polygamy, but of what is called "Christian civilization." Infanticide and foeticide are very prevalent in communities where monogamy is established by law and religion. The rarity of this crime here causes unusual excitement. In a so-called "Christian" city it would scarcely make a flutter. The indications are that the infant's life was taken in premature birth, and that the body was cast into the aqueduct to cover up two offences—to conceal a mother's shame and a father's guilt, and the crime of child-murder. If there is the slightest clue to the parties concerned in this shameful affair, it ought to be followed up persistently. Such a flagrant crime ought not to go unpunished. If there is a practitioner here who will aid and abet in such deeds of infamy it ought to be known, and the penalties of the law should be vigorously enforced.

We have heard hints of the presence in this Territory of persons who are ready to assist in the crime of pre-natal murder, and who advise

cate the suppression of human life wherever they can do so with apparent safety. Such individuals are a curse to society and a disgrace to humanity. Whether male or female, they should be hunted out and punished as the law prescribes, and their infamies should be exposed. Those who would screen them from inquiry and the law's decree, are sharers in their guilt and are unworthy to associate with good citizens.

It should be clearly understood that the Church of Jesus Christ denounces all the forms of foul destruction and suppression as murder, and sinful in the highest degree. It has no excuse for these unnatural offences any more than for the shedding of blood. It is all included in the unlawful destruction of human life, and is of the nature of shedding innocent blood, for which there is no forgiveness. Life and increase are promoted by the precepts and doctrines of this Church, and that which tends to the opposite is of the devil and leads down to hell.

We must not permit the vile practices of this professedly Christian but evil, adulterous and unnatural generation, to find a breeding place among us. It is the duty of every Latter-day Saint to strive to prevent their spread, and aid in the discovery of the guilty. Any person known to advocate them should be exposed. A physician, surgeon, midwife or other practitioner advising or aiding in abortion should be promptly informed upon and punished. Here is the statutory law on this matter as it appears in the Penal Code:

Sec. 142. Every person who provides, supplies, or administers to any pregnant woman, or procures any such woman to take any medicine, drug, or substance or uses or employs any instrument, or other means whatever, with intent to procure the miscarriage of such woman, unless the same is necessary to preserve her life, is punishable by imprisonment in the penitentiary not less than two, nor more than ten years. (Compiled Laws p. 897).

In addition to this legal penalty there awaits such sinners the judgment of a just God, who sees in secret and will punish openly, and who regards this crime as capital. It is the destruction of life, and the spirit that prompts it is cowardly and murderous. "Christian" society may wink at it, but "Mormon" ethics and discipline will not tolerate or palliate it.

We warn our people, too, against the vile and damnable practice which obtains in the most refined and pious and anti-polygamic circles, of using expedients for the prevention of natural family increase. It comes from the lowest pit, and should be abhorrent to every man and woman who has the slightest self-respect. And to a member of this Church it ought to be regarded as too impure and degrading to bear mention with any suzerainty. It is prevalent abomination in the world, but will not gain a foothold among the "Mormons" while they preserve the spirit of their faith, and keep on that higher level of personal purity which it inculcates and has led them to.

NOT HUNTING A REFUGEE.

A Boston paper speaking about Madagascar, says: "The present population is of various origin, and includes a number of races. The island would be a good place for refuge for the Mormons as polygamy prevails there, and every man can have twelve wives, and the king is no more limited than the common man. The laws favor the husband, the minority ruling."

Thank you, we are very well suited in Utah at present. The prevalence of polygamy in any place would be of no attraction to the "Mormons" nor render it a desirable habitation for them. "Mormon" plural marriage—which, by the by, is but one feature of our creed and polity and not the chief one by any means—is altogether different from the polygamy of Madagascar, of Asia and of other parts of the world where it is practiced; those who confound the two make a very grave mistake, and all their reasonings and calculations based upon it are likely to prove erroneous if not ridiculous.

The divorce laws of Madagascar, too, would have no attraction to "Mormons." It would be very difficult to find a man in "Mormondom" who has put away his wife, though there are women who have been divorced from their husbands. In this the "Mormon" system protects the weaker sex, and the advantages, if there be any in divorce, are all placed on the woman's side. As to a "place of refuge," we are not in need of any just now, and do not expect to require it. We shall not always be misunderstood and be made subject to injustice, and the "refuge" is more likely to be needed by the vagabonds who lie about us and try to bring again the troubles which we have waded through in the past, but have successfully surmounted. Utah is good enough—we don't need Madagascar.

BY TELEGRAPH.

AMERICAN.

LATEST BY LIGHTNING.

CHICAGO, 12.—Replying to an inquiry, Senator Stanford says: "Yes, I hear considerable political gossip, but a great deal that I hear I don't believe. Washington hotels seem to be the general depositories of a great

deal of senseless political chatter. I live in my own house, and therefore don't hear all of it. As to the presidential outlook, I must say that in my opinion everything indicates that the successful candidate will be from the ranks of the democratic party. People are wearying of republican administration and in 1884 will demand a change. The last election in New York, where the State went democratic by 200,000, pretty thoroughly proves this fact. I think we will see the next President by a larger majority than we gave Tilden when we elected him in '76. As to who the candidate will be I cannot say and have no opinion in the matter. His foundation nothing but the merest guess work. The Senator was asked how the appointment of Gresham was received in Washington and replied: "I think it met with general approval. Gresham is an upright and able man and the pity is that he was not there earlier. Under him I do not think the Star route jobs and other frauds would have been possible."

An Apostle of Dynamite.

John F. Finerty, Congressman elect and Irish-American leader and dynamite advocate, was in the city this morning reviewing at Justice the wrongs of Ireland, and justifying the use of dynamite as follows: "What hope, that has Ireland from English legislation? What wonder if she is driven to fury and desperation? What wonder if she should seek to imitate ransoms among the temples of the modern Pharaohs? No matter what the English say about their indifference to dynamite, the recent explosions and alleged discoveries have set them thinking. They have also set millions of Americans thinking. What is the difference, for example, between the explosion of a mighty bombshell fired by the uniformed English butcher into the streets of Alexandria, killing men, women and children, and the dynamite cartridges exploded in the heart of London? Only this, that the English attack on the wretched Egyptians was without justification, while the Irish demonstrations against the British metropolis are the natural results of centuries of unmitigated fraud, plunder and murder."

The Murderous Cannibal Sentence.

LAKE CITY, 13.—This morning the jury in the case of Alfred G. Packer, charged with murdering his five companions in the San Juan country in 1872, returned a verdict of guilty. A motion for a new trial on the ground that the murder was committed on an Indian reservation, and therefore this court has no jurisdiction was denied this afternoon.

The Six Sisters.

CINCINNATI, 14.—At a meeting of the striking cigar-makers to-day a committee of manufacturers presented a statement that the demand for one dollar a thousand cigars was still two other demands not settled, namely the right of the cigar-maker to send on a strike, and through the workshops to collect dues, and to collect from the charge of 30 cents a month from each workman for gas consumed during the winter months. The matter was resumed upon these matters are settled.

Another Papal Bull.

MILWAUKEE, 12.—Bishop Marly of Dakota, now in this city, says: "St. Ignace, Minn., is the seat of the Catholic Church. There are now 2,000 Indians in Dakota belonging to the Catholic Church."

FOREIGN.

LATEST TRANS-ATLANTIC DISPATCHES.

Sentenced to be Hanged.

DUBLIN, 13.—The Judge finished his charge at 3.15 when the jury retired. They were absent but a short time, and when they returned to the court-room announced that they found Brady guilty of the murder of Cavendish and Burke. Brady was immediately sentenced to be hanged.

Italian Villages on Fire.

Berne, 13.—Reports have been received here to-day that the villages of Silvestre, Ticino and Salvatore in Italy are on fire.

War Probable Between France and China.

London, 10.—A telegram from Hong Kong dated the 11th says: The French minister to China had arranged the Tonquin affair satisfactorily in December, but the new French ministry rejected the arrangement, the result will probably be a long and costly war for France. China will use the best troops and they will probably be commanded by European leaders and perhaps have the assistance of a European ally.

Probable Failures.

A few months ago, large quantities of American wheat were bought for forward delivery. It has been assumed by the purchasers that the continuance of bad weather would cause a rise in prices. On the contrary, there has been a decline of five quillings per quarter. Heavy losses are thus caused, and in London and the provinces a number of failures are probable.

Unruly Rowdies.

A band of young peace-disturbers and vandals committed a number of depredations last night, near the point where the 4th, 5th, 6th and 7th Wards join. They carried off gates and dropped them into the mud, broke down bridges, and committed other disgraceful acts of hoodlumism, among which was making night hideous with their howls. A citizen living in the locality states that he has a shotgun ready for their next visit and that he will fire on them should they appear again on the same errand. We hope he will not adhere to such an intention, at the same time it will be well for the unruly boys to be careful about co-operating and annoying peaceable people. If they do not cease such things some of them will certainly run the risk of getting badly hurt.

A. G. Packer Convicted.

Our dispatches state that Alfred G. Packer, the man accused of murdering his five companion prospectors, who left this Territory for the San Juan country in 1872, and who afterward ate portions of their bodies, has been convicted of murder in the first degree, in the District Court at Lake City, Colorado. A motion for a new trial was to be interposed by the defense, on the ground that the murders were committed on the Indian Reservation.

MISREPRESENTATION.

Fair competition is respected by all honorable business men. Seldom do we find a company of men professing to be business men, resort to the misrepresentation of another's productions in order to increase the consumption of their own. The advertisement published, under the name of Dr. F. C. Baking Powder are absolutely false, and the parties publishing them know it to be so. The repeated analyses by many eminent chemists throughout

the country, show the superiority of Dr. F. C. Baking Powder. No Ammonia, nor Alum, nor Tartaric Acid is used in it. It is one of the oldest and most generally used Baking Powders in the market, and its healthfulness and effectiveness has been tested in a million homes, by the consumers' only reliable test, the test of the oven and year after year. It is to-day, as it always has been, the most healthful, perfect Fruit Acid Baking Powder.

DIED.

TENNEY.—At the residence of President George C. Cannon, at 1:40 p.m. Thursday, April 12, 1883, of old age, Elias Tenney, daughter of James Webb and Betsey Fawcett, and sister of the late Elder Wm. Tenney, aged 70 years. She was born November 17th, 1813, at Brookfield, Cheshire County, New York. She married Wm. Tenney January 19th, 1830, and with him and her oldest daughter was baptized by Elder Truman Wait into the Church of Jesus Christ of Latter-day Saints, Sept. 1836. She resided in New York until November, 1855, and they contributed both means and labor towards the erection of the Temple at that place, and were present at its dedication. In 1859 they went to Missouri, and settled near Adams-out-Arkansas; but were compelled by mob violence to abandon their newly-made home and flee to Far West, and afterwards with the rest of the Saints, to the State of Utah, where she lived until her death. She was a devoted and faithful member of the Church, and was highly respected by all who knew her. Her husband died Oct. 10th, 1854. When the Saints were driven from Nauvoo in 1846, she went as far west as Winter Quarters; but after spending the winter there, was compelled, for want of means, to defer her journey to these valleys. She returned to Quincy, and in 1848 she and her children came here, and settled in Payson. For the past fifteen years she has lived with her daughter in this city. She has been a humble, faithful, God-fearing, peace-making woman, living the principles of the Gospel, and was a true and devoted wife and mother. She is survived by her husband, and her children, and her grandchildren. Her funeral services will be held at noon on Saturday, April 14th, 1883, at the school-house of President George C. Cannon, on the Jordan river.

CLARK.—In the 17th Ward of this city, on Thursday, April 12th, of pneumonia, George Clark, aged 29 years.

Funeral services will be held at the 17th ward school house, on Saturday the 14th inst., at 11:30 o'clock.

PORN.—In the 2nd ward of this city, April 13th, 1883, of cholera infantum, Edith Maria, daughter of George and Jane Pope, aged 7 months. Her funeral services will be held at 1 o'clock on Sunday, at the 23rd Ward Schoolhouse. Friends are invited.

NIXON.—In Washington City, Washington County, of general debility, April 10th, 1883, Peter Nelson, born February 24th, 1813, at Krumpholtz, Denmark; departed March 18th, 1883, at Washington City. He was called to the October Conference, 1870, to perform a mission to his native land, to which he readily assented. He filled various positions of trust and responsibility. He was called to Bishop Marcus Pank. He was called to this in 1861, and has labored faithfully from that time to the present to develop and advance the interests of the southern portion of our Territory. He was a man of industrious and exemplary habits, and unflinching integrity to the great last-day work was respected and esteemed by those who knew him for his many good qualities. His last moments were spent in peace and contentment, inspired with faith and hope with regard to the reward of the faithful.—Com. Scandinavian Star, please copy.
