

AJAX WAS MUCH WEAKER. INVOLVES 100,000 SHARES.

land Mill-Conditions at the Ajax.

The control of the Alaska Mining

company, a Tintic corporation, has

passed into the hands of Messrs. J. E

Bamberger and F. J. Oswold. These

gentlemen have bought out the interests

of Mr. Webster of Onconta, Wisconsin,

and Mr. Case of Chicago, and are now

preparing for a more vigorous cam-

paign of development. The above in-

terests consisted of approximately 100,-

000 shares or one-fourth of the capital-

ization. Mr. Bamberger is understood

to control 120,000 shares in addition to

the above purchase and Mr. Oswold is known to have held a large block of

stock. In addition to the satisfaction

of seeing the ownership of the mine pass entirely to Utah people, it will cause the

stockholders to congratulate themselves that the control is in the hands of men

who are able to prosecute the neces-sary development work. For some time past two shifts have been employed driving south on the 450 level, but it is

said that another shift will shortly be put to work. The directors are also said to have talked over the proposition to sink deeper and this will probably be

decided on at no distant date. The price at which the sale was made is

GRAND CENTRAL MEETING.

The Directors Met in Provo Today

and Passed the Dividend.

Provo, March 8 .- The directors of the

Grand Central Mining company met here today and transacted routine busi-

ness. No action was taken regarding the dividend which was expected in

THE OVERLAND MILL.

Manager Duncan Expects to Treat

15,000 Tons Per Month.

Manager G. A. Duncan, of the Over-

are being handled daily, but in spite of this immense tonnage Mr. Duncan says he expects to further increase the

capacity. He wants to treat at least

15,000 tons of ore per month. The values of this ore are not stated but Mr. Duncan says they run just as expected. The management did not care

to discuss in detail the extraction, but

Grand Central and Tesora were the features on the exchange today. The former sold up to \$6.70, while the latter opened at \$1 and advanced to 90 before the call closed. Ajax was in good demand at lower prices. The opening sale was made at \$1.05, but it sold as low as \$1.00 and afterwards reacted to \$1.07% and closed with the sale of 200 shores at \$1,06%. Daly was much weaker again today in spite of the boost given it last week. A sale was made as low as \$2.10, while Daly-West made as low as \$2.10, while Dary-west was traded in at \$35.00 flat. Con. Mer-cur dropped 400 at \$3.12, while Mam-moth moved up to \$2.22. May Day was firmer at 47, as was Northern Light, which advanced to 6%. Ontario reached \$20 index, Secondaria cold up to 20 \$8.50 today. Sacramento sold up to 39, and South Swansea dropped 100 shares and South Swansea dropped 100 shares at \$1.26. Swansea was unusually active up to \$2.93, while Star Con. opened at 73 and declined to 71. Ben Butler moved up to \$4, while Boss Tweed was traded

separation, and ho ore is lost, and all of it is accounted for in bins." The following test was made by a 20-ton cepacity table in the company's factory on May Day ore: The lot weighed 966% pounds. The character of the ore was ferringing quarks con-

the ore was ferruginous quartz con-taining 8 per cent combined zinc sul-phides, lead sulphides and chlorides, and lead carbonates, assaying \$3.12 in gold and \$3.85 in silver (at 60 cents per ounce). This ore was a waste product; exhaustive wet table tests put four tons of ore to one ton of concentrates. tons of ore to one ton of concentrates, and left 3 per c.nt lead and zine sul-phides in tailings. By dry process there was obtained from sample, 198 pounds concentrates. Ratio, ten tons ore, con-taining total 1,600 pounds sulphides, etc., \$21.20 gold, \$38.50 silver to one of concentrates carrying 57 per cent lead, \$17.95 gold, 60 1-5 per cent silver, \$2.82 per cent lead. Tailings assayed 1 per cent lead (carbonate), \$1.23 gold, \$1.78 silver of which 96 per cent can be cy-anided with small loss of cyanogen, \$6 pounds (about 94, per cent) silmes, aschlorides), \$5.50 gold, \$2.80 silver. It is claimed for the process that it will work equally well on dry placer gravels, beach sands, massive ores, carried such as and so are control.

carrying sulphides, or ores carry-ing metallic particles and will be par-ticuarly of agyantage in places where there is little water.

Dr. Brunner Talks of Colorado Mines

After a tour of about two months through the mining camps of Colorado and a stay of several days in Utan, Dr. Charles H. Brunner left for his home in Fremont, Neb., today. Of the great gold camp of Cripple Creck Mr. Brunner says that it appears that it has reached its zenith. Property can now be bought at lower prices than for some time past and, in his opinion, it will not be long before Boulder county will experience another boom. This county is said to have received a black eye years ago on account of the pockety na-ture of the tellurium veins then mined. According to Mr. Brunner there are fine openings for capital in the big lower grade free gold veins of the camp, and he looks for a great deal of activity in the old camp before long.

Search for Oil in Wyoming.

Active operations are in progress in the Douglas oil fields and several new ompanies organized in New York and Pennsylvania have contracted to sink wells this season, says the Laramie (Wyo.) Boomerang, Mgr. Phillips of the La Bonte oil syndicate has brought in a force of drillers from Colorado, and they are putting in their oil rigs in order so as to begin work on Mon-day on the company's field near Ir-vine, about ten miles south of Douglas. The Superior Oil company is putting down a well about three miles cast of Douglas, and having an excellent outfit, is sinking rapidly. Stroup & Co., whose is sinking rapidly. Stroup & Co., whose tract of oil land is about twelve miles west of Douglas, have ordered a sec-ond drilling machine, which will be on the ground next week. They are arranging to sink two or three addi-tional wells this season. It is runnored that "Careyhurst,"

the big ranch owned by Judge Carey of Cheyenne, will soon be exploited for oil. Oil investors have been seeking options on the property, but the own-ers are not disposed to sell and will probably carry on their own oil deland mine, at Sunshine, came in from the camp last evening and reports things moving along quite satisfactorily at the big mill. About 450 tons of ore velopments.

faithful a portrayal of this selfish, heartless and designing creature of evil heartiess and designing creature of even that it almost makes an audience hate her even while it applauds her superb work. Much has been written about the Eugenie Blair kiss. Osculatory connoisseurs have described it as being a soul-absorbing, thrilling, throbbing long-prolonged intensity, and a lot of other senseless advertising stuff. To the other senseless advertising stuff. To the layman in the audience it looked lit-tle more than a vigorous facial contor-tion performed without either sensa-tion or grace. Her wiles as a wicked woman are cleverly worked out and the scene in the gypsy camp is thrilling and splendidly done. James Carew as Don Jose was a hun-dred per cent better than on the open-ing night though he suffered from a

ing night though he suffered from 3 severe cold which towards the close nearly robbed him of his voice. Mr. Duff played the part of Ecamillo, the Toreador in good style and sang the song of that name in excellent voice.

Phil Margetts who in the old days de-lighted innumerable Salt Lake au-diences by his quaint comicalities, will open the new opera house at Preston. Idaho, on the 16th inst. He will be as-sisted by Salt Lake talent. The citizens of Preston are waiting to make the oc-casion a red letter event.

"The Eleventh Hour" comes to the Grand for the first three nights of next week. It is not known what the at-traction will be after that until Man-ager Mulvey looks over the field.

The Grau Opera company presented "The Isle of Champagne" at the Grand last evening, and, considering the wea-ther, was greeted with a very good house. The music of the opera is bright and tuneful, and there is ample opporand tuneful, and there is ample oppor-tunity for the introduction of good comedy work, but it must be said that the gags, jokes and "business" as done at last night's performance, were some-what stale and flat, to say the least. However, the good work of the soloists was appreciated. Mr. Frank Woolley had the star comedy part and worked hard to please the audience. He succeeded fairly well. The scenery was good, and the cos-tumes, pretty. All in all, the show is well worth the price of admission.

The "Little Minister" company, headed by Manager M. A. Young, came in from Logan on a special train this morning. Mr. Young felt a little uneasy over the matter of taking the regular train for fear that it might be delayed by the heavy snow storm, and on that by the heavy snow storm, and on that account arranged for the special. The sale of seats for the show has been very good. . . .

The advance sale of seats for the great Modjeska engagement at the Theater commenced this morning.

"The Isle of Champagne" goes at the Grand tonight. At the matinee tomor-row "Pinafore" and "Cavalleria Rusti-cana" will be given. The bill for to-morrow night is the "Little Tycoon."

The advance sale for the Sembrich enthan usual interest is being taken in the appearance at the Tabernacle next Thursday of the great singer and her superb company.

BASKET BALL.

Y. M. C. A. Defeats the L. D. S. Team Last Night-Score 16:15.

Social hall was not large enough to accommodate the enthusiasts last night on the occasion of the Y. M. C. A. vs. L. D. S. basket ball function; there were dozens who were turned away on account of lack of room. Those who were fortunate enough to gain admittance, however, saw one of the best games that has been played in Salt Lake City. There was plenty of ex-Judge Stewart Commits Joseph Rousch citement on the occasion of the meet between the rival teams, and up to a minute within the call of time it wus practically anyone's game. Last night's game practically decided the champion-ship, and unless something unforeseen occurs the Christians will undoubtedly carry off the handsome silver trophy which is being striven for by the ex-ponents of the latest indoor game. The first goal was placed by the L. D. S. on which occasion Taylor scored by a well directed one-hand throw. minutes later Johnson, for the Chris-tians, evened matters. The L. D. S. led in the first half until within a minute of the call of time when Rippeto, with a splendid put scored from the middle of the field thus evening the score once more. The call of time found the tally to be 6 to 6. The second half was fast and furious with victory eventually perching on the banner of the Christians. Possibly the two stars of the competing sides were Taylor for the L, D, S., and Rippeto for the Y. M. C. A., both of whom were prime factors in the scoring and inci-dental spectacular play. The game eventually closed with the score stand-ing 15 to 16 in favor of the Christians. The following is the summary of the game: Y. M. C. A.-16 Position. L. D. S.-15 Johnson ... Right Forward Romney Tregea Smith Left Back Smith Referee, Sanders; umpires, Bodell and Walker; time keeper, Tucker; goals from field, Taylor 5; Rippeti, 5; Johndied in Big Cottonwood on Feb. 11th 1901. leaving an estate consisting of from foul, Taylor of Rippett, S. John-son, 2; Clark, Foster and Bassett; goals from foul, Taylor missed three, John-son missed 4, Clark 5, Rippeto. Time of halves, twenty minutes. about \$1,220 in Zion's Savings bank,and \$176 in the Deseret Savings bank, together with three promissory notes, of the probable value of \$350.

can see how dangerous it would be to change the law especially going back, if any change should be made it should If any change should be made it should be the other way in the shape that all inspectors should be holders of horti-cultural certificates from State or gov-erament agricultural colleges, and all deputies having passed a reason-able examination, so no political bureau could get in, as it certainly is a fact that no man gun teach another fact that no man can teach another what he doesn't know himself. Therefore instead of lowering the standard, raise it. Now all this hubub all comes from Weber county where the county commissioners and the State and councommissioners and the state and coult ty inspectors are at loggerheads, mostly on account of the expense of suppress-ing the San Jose scale. But when we consider the Niagara county in Canada spent \$250,000 in 1898 to rid itself of the San Jose scale and three-fourths of that

was paid out for the destruction of in-fested trees, and it was considered by a parliamentary commission the only a parliamentary commission the only way to do, after a most thorough inquiry enxtending over a year, we may think that Weber county should be glad to get rid or, at least control of the past at any price, especially now since the State proposes to assist them with the sum of \$5,000. This is a matter that rises far above petty local politics and should be viewed from the standpoint of should be viewed from the standpoint of the good of the whole State, and not from a small selfish standpoint of pal-J. P. S. try party patronage.

ABOLISH THE BOARD.

A Useless Appendage, An Expense for Nothing-So "Ibex" Says.

Editor Descret News:

In the early part of the session several petitions were sent to the Legislature from different parts of the State asking for the abolition of the State board of health.

Do you know if any action has been taken thereon? We certainly hope that the legislators will heed the voice of the people in this respect, and dispense with such an eminently useless appendix, and above all not to pass any measure giving them any more control

than they now possess. It appears as if the old formulary of the English church would be very ap-plicable to this body: "We have left undone those things which we ought to have done. And we have done those things which we ought not to have done.

I cannot find that the people who pay the bills ever asked for the appoint-ment of this board. To say it was in the interest of the public health is simply and unequivocally-Rot, as it cer-tainly has not been operated for the in-terest of the people, but has been op-pressive and a menace to human lib-

erty. The one thousand dollars a year paid to the secretary might be useful for something needful even if not quite so ornamental. IBEX.

AND REPORT OF THE REPORT

it is stated that while the tailings are considerably under \$1, they are not as low as they may be got. In this re-spect there is some room for improve-1344 ment but taken throughout Mr. Duncan says the big plant is proving fairly satisfactory. Some delays have also been experienced but in a little while 71% Mr. Duncan expects to be able to speak 3.94 with more positiveness on the operations The 10

second batch of cyanides will be ready within the next few days. RETURNS FROM THE AJAX.

Manager Weir Says Face of Cross-12% cut is Now in Mineralized Lime.

> Manager Thomas Weir of the Aiax returned from that Tintic proposition last evening after inspecting the latest developments on the 1,000 level. It is quite apparent that whatever the prospects for the future are, no change has yet taken place in the property which warrants much appreciation in the stock. Mr. Weir says there is no doubt that the mineral and quartz in the crosscut on the 1,000-level is a part of the vein or fissure for which the management has been driving. This quartz is about 12 inches wide, but it wider than that at the point where the cross cut intersects it and the crosscut is being driven ahead to prove up the actual width and value of the vein. At the present time the face of the crosscut has passed through the quartz and its face is now in mineralized lime. The crosscut will be continued further to prove whether or not the quartz en-countered is the full width of the vein or fissure at that point.

MAY DAY CONCENTRATOR.

Frest. Harrell of the Crown Gold Milling Discusses the Process.

"The plant we are now building on the May Day property at Tintic for the dry concentration of ores, will be completed within the next ninety days, and then we hope to show the public what we know ourselves-that by the dry process eres that could not be treated on account of lack of water or because of low values or difficulty in reducing profitably, can be gotten out by it with a saving of between 85 and 98 per cent of the assay value." said President A. J. Harrell of the Crown Gold Milling company, who is staying at the Knuts. ford. "The mill new being erected on the May Day property will have a daily capacity of 100 tons and the process by which the ores are reduced

s as follows: The dried ore first passes through a rock-breaker and a series of rolls which are so fed automatically that but a small percent of slimes are made and grinding in action is avoided. They are then conveyed to a "sizer," where the particles are rauddly assorted, according to size, through screens of from 40 to 80 mesh, into bins. These everal sizes of ore particles are assayed, and some containing only a small assay value are discarded. The rest goes to the concentrating table, which is 30 arranged that the table motions, air currents, inclination, and belt speed can be regulated according to the ore, and the size of the particles. From 96 to 3812 per cent of the sulphide values will be saved in the concentrates. The process is continu-out and the ores are automatically fed throughout. Sinnes are not ireated, and are avoided as much as possible. The treatment crases with the mechanical

Baldwin the shaft on the Martha Washington at Tintic is being sunk to wards the 700 level. The crowd in con-trol expect to see the stock go to 50 ents a share ere long.

P. J. Donohue, the well known mining expert, expects to leave for the Koote-nai district, Idaho, tomorrow, to examine some property for eastern capi-talists. Later on be expects to make a trip to Nevada for the same purpose, The news of the deal in Alaska stock hereby Messrs. Bamberger and Ogwald are said to have secured the control of the property was denied this afternoon by Herman Bamberger. Secretary Kimball of the company youched for its accuracy, however, and the "News" gives is as it came from parties who claim to know. Logan Journal: Mr. H. C. Hansen and the other owners of the Amazon mine, situated in the head of Logan canyon, have decided to go right ahead with the development work on that claim this summer. A contract will shortly be let

for another 100 feet of tunneling, which the owners think will bring them in contact with the main ore body. San Francisco Post: Capt. De Lamar

is in the city, having arrived from the East last night and registered at the Palace. The captain contemplates re-maining in California for about three weeks, during which he will visit his properties at Bully Hill, Shasta county possibly the Gold Mountain mine in San Bernardino county, where a 100 stamp mill is being operated.

DEMAND FOR RAILROADS.

At Opening Were Lower but Buying of St. Louis and San Francisco Advanced Them.

Same Industrials Showed Gains-Renewed Strength and Activity in the Specialties-Bonds Irregular.

New York, March 8 .- Opening prices fractional limits. Heavy blocks of some of the more important stocks were offered. A few of the industrials showed gains. Renewed strength and activity were displayed by the special-tics, which have been recently ad-vanced, including American Ice, Sugar,

Brooklyn Union Gas, Manhattan, Peo-ple's Gas and Amalgamated Copper. There was a loss of 1% 21% in Union Pacific, National Salt and some of the steel stocks. When an advance had been effected of 21% and 31% in St. Louis and San Francisco common and sec ond preferred, a large demand developed for other railroads. The grangers rose 1@2½ under the leadership of Burlington and the Pacifics, bituminous coalers and trunk lines were bought.

h......

Had Eugenie Blair given "Carmen" as her opening bill in Salt Lake instead

of "A Lady of Quality" there is no doubt that she would have been accorded greater patronage. Not that the play is free from coarse suggestion and vulgar passage but because it gave the company greater opportunity to dis-play its ability. Little wonder that Miss Blair has gained a reputation as a that Business was less active among the specialties, but they all improved, merges her own identity and gives so INVEIGHS AGAINST BILL.

Correspondent Says that McFarland's Fruit Inspection Measure is Wrong.

Salt Lake City, March 7, 1901. To the Editor:

Ington, of Big Cottonwood, a daughter, and John Thomas Maddock, of Ogden, a nephew. Later in a codicil he gave to Mary I, Worthington a horse, har-ness, huggy, and two framed pictures of himself and wife. The will is dated February, 1889, and the codicil June 4th, 1895. The hearing on the petition is set for March 22, 1901. The House bill No. 206, by McFarland by request, proposes to go back in our horticultural progress in this, that instead of deputy inspectors being appointed by the member of the State board of the district and county in-

spector, who are responsible for their work and qualification, and who should certainly know if the men working un-der them are competent, and the best that can be obtained for the money, it proposes to put the appointment exclusively into the hands of the county commissioners, who often are men though prominent in other walks life) very little conversant with fruit raising and propagation of trees. It should not be done. The county com-missioners have now the power to re-W. E. Woods today commenced a suit against the Salt Lake City Rall-road company to recover \$2,500 for in-juries received by him while riding on move any and all inspectors for incompetency or neglect of duty, and that should be sufficient control for them to exercise, without being loaded down with the duty to say who is best sulted to instruct the people and to enforce the law. That should be left as it is at present to left as it is at present to the state board of horticulture and county inspector who are held responsi-ble for the same. When we consider there was a box containing a live elec-iric wire, so exposed that in uncon-sciously taking hold of the top of the car to prevent himself from being pushed off by others trying to alight, he touched the wire mentioned, receiving a severe shock, and burning the flesh on bis hands and rists, to heal which he has expended \$30 in doctor's bills. that the frult interests in Salt Lake county have risen from a \$20,000 yearly product six years ago to \$100,000 last year, and that the sale of nursery stock has risen in five years from \$25,000 to \$70,000, and that nursery stock is now

sent from Utah to California on the west, and as far as Philadelphia on the east, and that even in the month of east, and that even in the month of January over twenty orders, amounting to over 17.000 trees, were sent in refrig-erator cars to California and Oregon alone, and that all the nuseries petition against any change in the law. Many men, since the new law has gone into effect, have planted ten, twenty and forty acres of young orchards, and one company 160 acres, relying on that the law will be enforced and reasonable protection given to fruit raisers. We
