

AROUND THE COURTS.

Some Orders Made by Judge Birch This Morning.

ABSENT OF TWO DEFENDERS.

Today's Session of the County Court—An Action for Good Supplies.

Judge Birch made the following order during a very brief sitting this morning:

In the case of John A. Bissett vs. Seth W. Morrison, the complainant in intervention was dismissed without prejudice.

Edward McLaughlin, etc., vs. the Park City bank. D. C. McLaughlin was appointed special receiver trustee, the bond being fixed at \$10,000.

Henry Dunaway vs. Salt Lake City. Dunaway's quiet title suit against G. Cannon & Sons Co., was filed in August, et al. On motion of John M. Cannon, attorney for plaintiff and defendant, this case was dismissed, having been settled.

FOR SHODDIE KNOTHS:

The Kamasawas Dry Goods Co. this morning brought suit in the Third District court against Shad J. Grindal to recover \$1,000,000, for conversion and damages between June 19, 1893, and March 15th of the present year. H. L. Lewis is the plaintiff's attorney.

A dozen or two cases involved.

Sheriff McLean started for Justiceville shortly before noon today, having been authorized by a warrant, issued from Commissioner Greenough's court, for the arrest of two persons named Thomas Dyer and Andrew Johnson of that place. The commissioners said it had been impossible to get a copy of the indictment, which showed that on July 1st, and continuing thru that date until now, the defendants, as the owners of upwards of one hundred head of sheep, and themselves having employed men to drive them, had injured and destroyed their winter thursures and ruined the winter's Little Willow crop, thereby endangering the health and subsistence of the family.

AN INSPECTIVE TRIP:

The members of the County Court have arranged to go on a tour of inspection in the southern portion of the county tomorrow. They will start out early in the morning and make a long day's trip. The routes are not yet determined, but it is expected along the roads which lead into Justiceville.

STORY WOMEN OUT TO TOE:

The women of the County Court have arranged to go on a tour of inspection in the southern portion of the county tomorrow. They will start out early in the morning and make a long day's trip. The routes are not yet determined, but it is expected along the roads which lead into Justiceville.

COUNTY COURT TODAY:

The County Court has been in session this morning. There was very little business transacted of interest to the general public. Private Judge Bain presiding. Benjamin Colton, marshal and Mr. Rice were also present.

REASONS FOR DISMISSAL:

A largely signed petition was read from residents and taxpayers of Sandy previous, praying for the removal of an alleged trespasser, while building a house on the hill above the town, from his position on the edge of a cliff, overlooking irrigation and ordinary water to a number of inhabitants of Sandy previous, and asking that the court issue an injunction, by means of an order of mandamus, to dispossess him. The petitioners had been sued with the claim he was without title. As the names, if all were to continue, was liable to breed disease, they hoped the court would render a verdict in their favor.

A member of the firm above named addressed the court, the board having seated of the contemplated presentation of the petition, and asked that the court adjourn the hearing of the "petitions." He denied that they had been "neutralized" with an act of the court, but expressed their willingness to do anything that was necessary. He stated, however, that there was no cause to adjourn, and invited the members of the board to go out and inspect the place and satisfy themselves by similar and satisfactory proof.

The communication was ordered filed.

THE DOCTOR'S SUIT:

County Physician Worthington reported that there was still a difference between the city hospital and Dr. Marz's office, and Dr. Marz's was greater.

APPEAL LITIGATION:

The application of J. S. Bennett for a rehearing of the trial of the baseball game, earlier, between Mr. Marz's and Dr. Marz's, was granted.

STATES:

A number of states were examined and agreed.

WHAT WAS THE REASON?

The charge of assault and battery preferred by Colonel Page and Attorney Westervelt against George A. Knapp and M. O. Ewer, is being investigated in Commissioner Norcott's court this afternoon. It is believed that the two defendants, who are both white and black, are guilty of the offense, but that upon the arrival of one of the traps from Atlanta last Wednesday night, and just as Colon Page and Mr. Westervelt, with a party of friends, stepped off the train, the two gamblers, who were on the train, were so frightened by the arrival of the two defendants without a word of explanation, that they fled. It seems to be insisted that words of provocation had been previously given.

The trial was conducted by Judge Howes and the defense is in the hands of Attorney Conner. The defense demanded a jury trial and the examination of the gentlemen called upon to serve as jurors occupied

more time. It was going forward when the defense reporter left, nearly half a hour ago.

The Tooele ward Sunday school will have a day at Salt Lake on Wednesday next. They will be accompanied by the First M. E. Ward, which claims the honor of being the oldest unitarian church in the Territory as far as original capabilities are concerned. There will be with the school the M. E. A. girls and the girls' class at the last annual conference. Both of these organizations are invited to take part in the program. The Logan choir will be at Salt Lake the same day.

TERRITORIAL ITEMS.

At Tenth Street in Park City—News from Leslie, Brigham City, Payson, etc.

PAYSON: John Raymond Warren and wife "walked the earth" leaving three large volumes. His two brothers left the trade office yesterday (Friday) evening 3 p.m. Mrs. Warren, who is the mother of Mr. Warren's city job, and both grew on the same vines.

PAYSON DAILY: Once a week or two since we mentioned the fact that parties were negotiating for a loan of the Mexican dollar, one that has already been consummated and the amount is not yet known, the parties interested in the contract. These gentlemen are the parties who engaged and won the great work of organizing, mounting, or Montana, and the parties who are the contractors where they appear. They will put in enough time to make 100 tons a day.

Binghamton: Another log of "Cannons" are being loaded down from the mine and placed in the kiln to the main storage yard for shipment. The furnace is now in full blast, and will be burning for a few days. The first load of logs will be sent out in a few hours, and is predicted to bring in a profit of \$1000 per ton.
