

## BATTLE RAGED ALL THE DAY LONG

Russians Confident That Gen. Kuropatkin Will Come Off Victorious.

## JAPANESE CHARGES REPULSED.

Conflict Has Not Been Decided—When It Is, It Will Be Very Decisive.

St. Petersburg, Aug. 31, 3:55 a. m.—The great battle of Liao Yang, which began early Tuesday morning, raged throughout the day with increasing intensity, but up to this hour no further official details beyond the two brief telegrams given out in the afternoon have been received by the war office.

Every confidence is expressed in Gen. Kuropatkin's ability to meet the Japanese assault on ground of his own choosing, but the city is hungrily awaiting further news of the progress of the fight.

The Japanese forces engaged in this battle can only be estimated here, but they are believed to number about 200,000 men. Gen. Kuropatkin is known to have six army corps, besides 147 squadrons of cavalry, in which great confidence is reposed, bringing up the Russian total to about the same number as the Japanese. How the armies compare with regard to artillery is not definitely known, though throughout the war the Japanese have shown great preference for this arm and great skill in its use. Reports from the front credit the Japanese with having about 1,200 guns and many mountain batteries, and it is known that they recently shipped 24 heavy guns to Yinkow. Four of these guns already have been mentioned in these dispatches as being in action.

Gen. Kuropatkin, in addition to his field batteries, has a number of very heavy guns emplaced at important positions at Liao Yang, where the Russians have been strongly fortifying for some time. The Japanese claim to have captured two field batteries during the past two days. Russian official accounts admit the loss of only six guns.

It is stated that a Japanese battery was captured south of Anshunhan during the preliminary fighting and that several Japanese guns have been destroyed since then.

Little of the strategic situation has developed so far. Official news from the front says that there was desperate fighting on the southern center, while from information from other sources it appears that the Japanese are endeavoring to turn the Russian right from the neighborhood of the junction of the railways and Sakhe rivers. The fighting on the western flank appears to have approached within three miles of Liao Yang.

The news from Port Arthur up to Aug. 28 was reassuring. The account of the battleship Sevastopol having gone out on Aug. 23 to bombard the Japanese in Taishan bay does not mention that vessel striking a mine.

A dispatch from Vladivostok mentions the presence there of Gen. Rennenkampf, who recently left the hospital at Liao Yang on sick leave.

JAP ATTACK REPULSED.

London, Aug. 31.—A dispatch from Liao Yang to a news agency dated Aug. 30 says:

The Japanese artillery fire only ceased at 8 o'clock this evening. The casualties have not yet been ascertained.

The Third Russian corps repulsed a Japanese assault, the Japanese being hurled back by bayonet charges first by the Twenty-third and then by the Twenty-fourth regiments, which repulsed and repulsed the enemy no less than six times.

Two Japanese companies which succeeded in occupying a Russian position were mistaken for Russians and annihilated by Japanese artillery fire.

If you want a good food for your baby, a food that is endorsed by physicians, a food that contains a large amount of digestible constituents, a food that feeds, a food that will nourish, sustain and promote the growth of your baby, try Mellin's Food. We will send a sample for you to try.

MELLIN'S FOOD CO., BOSTON, MASS.

At 4 o'clock in the afternoon the Japanese concentrated their fire on a Russian southern detachment, and also tried to outflank the detachment from the right under the protection of the batteries.

One company after another was noticed running swiftly to the westward in an attempt to outflank the positions, but a Russian regiment and a battery were ordered to advance, and succeeded in forcing the enemy to retreat in disorder, evacuating positions they previously had gained.

There has been an immense expenditure of ammunition throughout the day, especially on the southern front against the Russian Third corps.

It is believed that the Russian losses so far have not been very heavy except to the regiments which sustained bayonet charges. All the men serving one Russian gun except one were killed by shrapnel. The survivor, who was badly wounded, heroically brought his gun to headquarters, and even then refused to quit his place until the general peremptorily ordered him into the hospital.

A more energetic attack is expected tomorrow.

It seems that Gen. Kuropatkin's force did not participate in today's engagement. The morale of the Russian troops is excellent.

HUNDREDS OF CANNON.

Liao Yang, Aug. 30.—A Russian correspondent of the Associated Press supplies the following news:

The historical moment has arrived, and the battle of Liao Yang is in progress.

It was not 8 o'clock this morning when the first gun was fired, but soon afterward hundreds of cannon were thundering along our southern and eastern fronts.

The position of our position is located near the famous tower of Liao Yang, about seven miles to the southeast. The fighting there was of the most desperate character but is now going on nearer at hand.

The hissing of shells is distinctly audible, and from the city it is easy to see the shells bursting.

Heavy guns were brought into action by both sides today and their dull roar was discernible above the sharper detonation of field and mountain guns.

The Russians are using big ordnance, which is in position in the inner ring of the Liao Yang forts.

The noisy Chinese population has suddenly become quiet. The main street of Liao Yang, always the scene of the busiest traffic and usually resounding with the sound of thousands of shrill voices from sunrise to sunset is now as silent as if it were night.

"The inhabitants are watching the distant battle from the housetops and watch towers or are wandering gloomily in the streets.

"We are asking ourselves if the tide of battle is going to swamp the city, what is to become of the houses and other property?"

"I am going to the southern front."

THE HILLS TREMBLED.

St. Petersburg, Aug. 31.—A dispatch to the Official Messenger from Liao Yang under date of Aug. 30, says:

"All around Liao Yang the hills are trembling today from the artillery fire, which has not ceased for a moment. Liao Yang has become the center of a terrific, sanguinary engagement, but we are prepared for it. Hospital trains are in readiness and other trains are bringing in reserves, stores and forage, together with artillery and life ammunition.

"Today's battle seems to be devoted by the Japanese to an artillery fight with the object of searching out our positions.

"The Japanese advance has continued uninterruptedly since Aug. 24. Yesterday, it led to a number of brilliant actions as the Russians drew in upon their defenses, but these actions were not compared with today's encounter."

replied in a friendly spirit, and the foundation of a lasting friendship was laid. Last summer, while the Roosevelts were at Oyster Bay, the president and Mrs. Roosevelt one night about 9 o'clock boarded the naval sloop yacht Sylph and ascended the North river.

So carefully was the plan guarded and so many were the precautions that not even the officers of the secret service on duty at Sagamore Hill were aware of the scheme.

The run from Oyster Bay to West Park was made in about nine hours. Early next morning Mr. Burroughs and his son Julian, who resembles his father to the verge of ludicrousness, met the president and his wife at the little dock and escorted them to Slabside, the naturalist's forest retreat in the Catskill foothills, about two miles from the river. During the tramp Mr. Burroughs observed that it would have been easier for Mrs. Roosevelt if she had been contented to remain at Riverby, and he entertained by Mrs. Burroughs. Mrs. Roosevelt declared that she must see famous Slabside at any cost.

On arriving at Slabside, which was reached about 7 o'clock, Mr. Burroughs and his son set about preparing breakfast. The post of nature broiled beefsteak on hot stones, and Julian fried potatoes and made a pot of excellent coffee. Mrs. Roosevelt offered to assist, but her services were politely declined.

so the party returned to Riverby, the Roosevelts remaining there until 4 o'clock, when they boarded the Sylph and sailed for Oyster Bay. It was after this episode that Mr. Burroughs accompanied the president to the Yosemite.

Riverby—where Mrs. Burroughs, who is as domestic and devoted to the mysteries of housewifery as her noted husband is to the secrets of the woodland thickets, remains the year round—is a beautiful home. The estate consists of about seventeen acres, which slope down to the Hudson river. On one of the numerous terraces which Burroughs has adorned with his hand, half concealed in a grove of tow-

## BLUE LAWS, RIOT AND MURDER.

Attempt in Allegheny, Pa., to Enforce First Soon Results In the Latter.

## THREE DETECTIVES ON TRIAL

Charged With Perjury in Securing Convictions—Mob Made a Rush For Them.

Pittsburg, Aug. 30.—The crusade carried on by the Allegheny County Sabbath Observance association in the past three weeks to enforce the "blue laws" of 1894, resulted in riot and murder Allegheny tonight. The man who was killed was identified at midnight as Harry D. Knox, driver of an ice wagon.

The enforcement of the old laws, which prohibit the sale on Sunday of ice, soda water, candy, cigars and every other article of merchandise called a luxury, has aroused intense feeling throughout the country, and many threats have been made against the prosecutors. Tonight the chief detective for the association, P. T. Gamble, and two of his force, Nelson C. and Harry W. Starkey, were on trial for perjury, the charge being that they secured the conviction of a storekeeper who proved that his store had not been open for business on Sunday.

About 1,000 persons had gathered about the afternoon office and when the hearing was concluded the mob made a rush for the detectives. Gamble was knocked down and rendered unconscious for a time, and the other detectives were roughly handled. Some time later the detectives left the office under the escort of constables, and the crowd renewed hostilities.

Nelson Starkey, it is said, fired into the crowd twice, the first shot wounding one man in the hand and the second bullet entering the abdomen of Knox. The police dispersed the mob with difficulty, after arresting the detectives and a number of the mob. Knox died while being taken to the hospital.

CONSCIENCE MONEY PAID.

Albany, N. Y., Aug. 31.—State Treasurer Wickham has received a check for \$200 from a firm of New York attorneys with a note saying that it is for the "conscience fund." The sender said that it had been placed in their hands by Attorney John T. Doyle of San Francisco, acting for a client. The check is drawn on the First National bank of San Francisco.

DEMOCRATIC LITERATURE.

Requests for It Come from All Over the Country.

New York, Aug. 30.—At Democratic national headquarters a statement is issued today:

"Requests from all over the country for campaign literature have been received at the Democratic national headquarters. It is estimated that before the close of the campaign 15,000,000 copies of printed matter will have been distributed."

Chairman Taggart referred particularly to a four-page pamphlet giving quotations from the writings of President Roosevelt, to show that he had referred slightly to former presidents and to other historic figures in this country.

When Mr. Taggart's statement as to the quantity of printed matter was shown to some men of mathematical minds they got out their pencils and started to do some figuring. It was found that the pamphlets sent out today weighed about 50 tons to the pound. Fifteen million tons of them, it is computed, would supply every man, woman and child in the United States with more than 18,000 copies. The mathematicians decided that a fair average weight for the literature distributed from the Democratic national headquarters would be 20 to the pound. It was reckoned that on this basis

Shot in a Political Quarrel.

New York, Aug. 31.—John Decker, a well-to-do dealer, was shot and killed early today near his home in Glenside, a borough of Queens, by an unidentified man with whom, the police said, he had engaged in a quarrel over politics.

Decker left home early in the evening. Some hours later his wife and residents of the neighborhood were startled by three shots. Mrs. Decker ran to the street, where she found her husband lying from a bullet wound in his head. Two of the shots went wild. A posse was quickly organized, but the assassin escaped, leaving no clue.

Picnickers at Rosemount.

Kingston, N. Y., Aug. 30.—Judge Parker's candidate has caused his place at Rosemount to be visited by picnic parties in increasing numbers. Some of the parties come from long distances. They enter the grounds, usually without introduction or permission, make themselves at home with the utmost freedom, and leave the place littered with picnic leavings. One party recently stripped several of the apple trees in the orchard and committed other depredations. Judge Parker has been most cordial in his treatment of visitors, but the picnickers are causing much annoyance.

## TEA

Poor tea is poor comfort; there is no difficulty in getting it good.

15,000,000 tons of literature would mean 300,000,000,000 documents, which, divided among the 80,000,000 inhabitants of this country, would give every adult and child something like 3,750 documents, weighing about 187 pounds.

When this result was worked out the opinion was general that either Taggart was dreaming or that he had more money to spend than he knew what to do with.

It was shown, also, that the entire annual output of all kinds of paper in this country amounted to less than 2,000,000 tons.

Capt. M. A. Healy Dead.

San Francisco, Aug. 31.—Capt. M. A. Healy, one of the best known officers in the revenue cutter service, who was recently retired under the age limit, died today from heart failure after an illness of a few days. He entered the revenue cutter service as a third lieutenant, and became a captain in 1882.

H. A. C. Beaulieu Dead.

New York, Aug. 31.—Herbert Augustus Corbett Beaulieu, son of the late Lord Charles Beaulieu of Winchester, Hampshire, died at Hot Springs, Va., according to private dispatches received here. He came to America about ten years ago and assisted in introducing golf in the United States. He was well known among the golf enthusiasts of American and England.

Beaulieu is said to have lost a considerable fortune in experimental sheep farming.

Shot to Death.

Stephens, Ark., Aug. 20.—Near Mount Holly, Union county, today, one white man and two negroes were shot to death. Two negroes offered an indignity to a white woman. A mob went out on a hunt for the negroes, with a named Stover together with a negro man and woman, were killed.

Pool Rooms Must Close.

New Orleans, Aug. 30.—Tomorrow is the last day on which pool rooms may be operated in New Orleans and the owners of the several houses in the city and at other points in the state have made arrangements to displace their employees and close up shops.

The law passed at the recent session of the legislature becomes effective on Sept. 1. Arrangements, however, have been made for the opening of a large number of handbooks.

Barbers Won't Work on Sundays

New York, Aug. 31.—The question of working on Sunday has been brought to an issue by the barbers of Jersey City. Members of the union there have notified the bosses barbers that members will work on Sundays after Sept. 1. A committee from the union also has asked the chief of police to help close the shops.

GRANT'S MARVELOUS MEMORY.

Gen. Grant's retentive memory was simply marvelous, more especially to those closely associated with him from day to day. In the midst of absorbing thought, and with apparently unobtrusive manner, his quick eye seemed to hear and notice everything, and two weeks or months later the lightest details had not escaped his attention or memory.

This power was tamably demonstrated in a game of whist with his guest, Maj.-Gen. Doyle of the British army, between Baltimore and Fortress Monroe. Two staff officers completed the players. With Gen. Doyle at his right, it was simply amazing to discover Grant's ability to discover strategic points. He never failed to remember every card that had fallen, whence it came and who was to deliver it, all remaining, which he scooped in as a matter of course, although he never seemed in the least absorbed in the game. He was indeed an original composition in this as well as in other respects.—[National Magazine.]

Beautiful Women.

Plump cheeks, flushed with the soft glow of health and a pure complexion, make all women beautiful. Take a small dose of Herbine after each meal; it will prevent constipation and help digest what you have eaten. 50c. Mrs. Wm. M. Stroud, Midlothian, Texas, writes, May 31, 1901: "We have used Herbine in our family for eight years, and found it the best medicine we ever used for constipation, bilious fever and malaria."

PRESIDENT ROOSEVELT'S TEAM AT OYSTER BAY STATION.

The view herewith presented is a familiar sight to the dwellers in the little Long Island village of Oyster Bay. When any member of the president's family is expected to arrive at the railway station a spacious and well appointed family carriage is sent from Sagamore Hill to meet the train. The same comfortable vehicle is sent to convey invited guests to the president's hospitable country home. But whenever the speedy looking turnout shown in the cut appears at the rear of the station the loungers about the place know that the president himself is expected.

Today was one of the quietest at Rosemount since the Democratic national convention. Spencer Trask was a visitor, and was a guest at luncheon.

Lost in the Adirondacks.

Levittown, N. Y., Aug. 31.—Miss Leslie Lowe, daughter of a wealthy Dayton (Ohio) merchant, has been lost for 16 hours in the Adirondack wilderness in Lewis county. Guides and a party of visitors searched the forest with torches and after five hours' hunt, found the girl sitting on the bank of Adirondack lake, awaiting the break of day.

Miss Lowe attempted to walk to Stillwater to meet some friends. She got off the trail and night fell before she was able to find her way. She returned without food or matches with which to start a fire, but she suffered no serious injury.

DIAMONDS AND RADIUM.

The influence of radio-emissions on the constitution of matter is very curiously illustrated in some recent experiments made by Sir William Crookes. According to the results, if radium comes to be a common commodity among us, some dismay may be caused to those who wear diamonds on finding that the carbon crystal, under the influence of radium, threatens to return to its less attractive form of graphite, or crystalline black carbon. On the other hand, radium may turn out to be a "diamond improver."

It is well known that radium emanations possess the property of darkening transparent bodies upon which they impinge, and now Sir William Crookes has shown that this also holds good in the case of diamonds. The emanations not only convert the surface into graphite, but also alter the color of the body of the stone. It is therefore suggested that this observation may prove to be of commercial importance. For example, "if off-color stones can be lightened, their value will increase, while if the prolonged action of radium is to communicate to them a decided color, they would be worth much more as fancy stones." This may add considerably to the business of the jeweler who, for a consideration, might undertake to submit "off jewels" to burial in radium for a season.—London Lancet.

LIVING IN CLOVER.

There is a wonderfully clever fellow in New York who says he lives on the fat of the land, yet never buys a meal. His hosts are life insurance agents. This is his tale of glory: "Why shouldn't those cheap pay for my meals and drinks? They give me trouble enough. They hounded me nearly to death to take out \$2 policy for \$20,000, and now I'm getting even. I promise 'mamamama,' like the Mexicans, but tomorrow never comes. In the meantime they treat me to the finest in town. Agents of four companies are after me in heated rivalry, and I'm playing one against the other. Of course, I'll tumble to me after awhile, but I'm making hay while the sun shines. One generous chap has spent nearly the whole of his expected commission on me. No, they don't buy my clothes."—New York Press.

## Suffering

Will Not Help Your Disease, but Will Weaken Your Nerves.

Folk who think it is better to bear pain than soothe it are wrong. Old-fashioned doctors used to say it was better, because they had nothing with which to ease pain but dangerous, heart-paralyzing drugs.

But now, that a safe remedy has been found, Dr. Miles' Anti-Pain Pills, it is wrong to suffer, for nothing can be gained but weakened nerves.

A safe rule to remember is: When in pain, take an Anti-Pain Pill. This will soothe your quivering nerves. Dr. Miles' Anti-Pain Pills relieve pain by restoring the natural secretions, in which they differ from opium and similar narcotic drugs, which relieve pain by checking the action of the glands.

They are sure and harmless, and are the latest medical treatment for the cure of Headache, Neuralgia, Backache, Rheumatism, Dizziness, Toothache, Stomachache, Menstrual (Monthly) Pains. Also nerve irritations like Sea-Sickness, Car-Sickness, Sleeplessness, Indigestion, etc.

Pleasant to take, quick in results. "I have used Dr. Miles' Anti-Pain Pills for sick, nervous headache, and have received the best results. I heartily recommend their curative properties, for they are successful." REV. J. W. WATKINS, Jr., New York City, N. Y., by druggists at 25c. Money back if first box does not help. Never sold in bulk.
