WORK ON CONDUIT.

It is Being Rushed by Contractor Moran

Says Engineer Bacon.

Assistant Engineer Bacon made a

trip of inspection to Big Cotonwood on

Monday and reports work on the big

conduit as progressing very satisfac-

torily. Contractor Moran has large

third miles of the conduit and every-

thing in the way of construction is moving along as rapidly as possible. Tomorrow Mr. Bacon will go out and inspect the Jordan & Salt Lake canal

with a view to making recommenda-tions for repairing it and placing it in

good condition for carrying the addi-tional exchange water which will be needed when the Big Cottonwood con-

duit is completed and the city secures the Big Cottonwood water. The sum of \$20,000 has been set apart out of the bond money for repairing the canal

pairs in a proper manner and use the money to the very best advantage.

This afternoon at 3 o'clock the board of public works will open bids for the

sewer improvements to be made under the bond issue and the contract for that great work will be jet at once and

gross value of approximately \$320,132 were consigned to the local mills or were shipped out over the railroad to the smelters. These figures are based upon data furnished the News from the They represent practically a monthly output of 9,360 tons, having a gross valuation of \$1,280,528. While these figures indicate an ore production of which any camp might well be proud they do not represent the total output of the Goldfield mining district, as no returns were received from the Goldeld Reduction company, owing to the bsence from the city of Mr. Gardner, nd the further fact that the Frank is closed down temporarily pending the arrival of an automatic sam-pler. The machine has been snipped, nowever, and will reach the plant about Oct. L. It will require five days to install it and immediately thereafter he product of that plant will add to the weekly output of the camp. Then, he weekly output of the camp. Then, gain, the plant of the American Re-luction and Mining company, which was started up for the first time a few lays since, has as yet handled but a mail amount of ore. Within a few lays, however, the mill will be running to the standard total country in the standard total.

note to the grand total.

During the period first stated 200 buting the period first stated 200 tons of ore, having an average value of \$40 per ton were treated at the Combination company's mill; 693 tons of an average value of \$104 per ton were treated at the plant of the Columbia Sampling and Ore company; 50 tons—experimental—having an average value of \$50 per ton at the plant of the of \$50 per ton at the plant of the American Reduction company; 290 American Reduction company; 290 tons of milling ore, having an average value of \$40 per ton, and 152 tons of shipping ore, having an average of \$230 per ton at the plant of the New Western Beduction company. At the latter plant there is now awaiting treatment 400 tons of milling ore and 500 tons of shipping ore.

sipping ore.
Aside from this there went out via Aside from this there went out via the railway 28 cars containing 955 tons of ore of a gross value of \$191,000. In connection with the railroad it can be stated that a flat rate of \$17 per ton has been established on ore shipments and that on first class merchandise a rate of \$3.80 per 100 pounds has been established; on other grades of merchandise a graduating scale has been adopted, these rates applying to goods en transit to and from San Francisco. The Wells Farge Express company has also made a reduction since the advent olso made a reduction since the advent of the railroad of \$1.50 on the 100 pounds to all Pacific coast points.

AN IMPORTANT SUIT.

Trial of the Bullfrog Grubstake Case Being Watched With Interest.

The term of court which began in of the most interesting that has been lield in Nevada in years, says the Goldfield Kevlew. Before it will come a number of cases in which the "grup stake" question will cut a big figure and no matter which way it is decided the cases will propagate out the state of cases will probably go to the state su-preme court for final adjudication and perhaps to the supreme court of the United States, as the interests at stake are worth milions.

The main case to be tried is that of Zeb Kendall and Otis Johnson against

the Bullitrog Mining company of Nevada, H. H. Clark, L. E. Benson, the estate of G. W. Ladd, Senator George

Nixon and others. Johnson's suit, as claimed in his com-Johnson's suit, as claimed in his complaint, is brought upon an express contract executed between Zeb Kendall and H. H. Clark as grubstakers and otls Johnson and G. W. Ladd as prospectors, by which contract it was agreed that in consideration of a grubstake in the sum of \$75 Johnson & Ladd were to prospect for a period of two months in the interest of all the partie to the contract. It was while on partis to the contract. It was while on partis to the contract. It was while on this prospecting trip that news of the great discoveries in Builfrog reached Johnson and Ladd. Clark and Kendali had sent their representatives to the edge of Death valley to examine some mining ground which had been located by Johnson and Ladd under the conby Johnson and Ladd under the con-tract, and while Ladd and Johnson and the representatives of Kendall and lark were making their way through he desert region, word came to them if the richness of the Bullfrog discov-

Food in those days and in that desert cliark and Kandall's representatives were about exhausted and it was therefore determined that because of the scarcity of the food two only of the purpose and Johnson and Kendall's representative went on to Tenopah to await results and a report. Ladd and the representative of Clark went into the new district and while there located this alleged betrayal of the trust im-posed by the contract which Johnson seeks by his sull to correct, asking that

terest in these properties. The Kendall suit is against the same The Kendali suit is against the same parties, and practically the same questions of law and facts are raised. It will therefore be seen that these actions will probably make the law for this state on the question of the relative rights duties and trusts existing between the parties to grubsaking agreements.

TEXAS OIL MEN IN LOCAL FIELD.

Patello W. Higgins, Discoverer of The Beaumont, Texas, Region Making Investigations

SATISFIED WITH THE OUTLOOK

Came Here at the Instance of C. K Rowland and May Become Interested.

If the investigation now being carried on by one of the most prominent oil experts in the United States proves to be satisfactory, the development of the Salt Lake valley field will be undertaken again, and this time upon an extensive scale. Although his presence in the city had

not been made known, the fact came to light during the day that this examination is being conducted personally by Patello W. Higgins, the discoverer of

Patello W. Higgins, the discoverer of the Great Beaumont fields of Texas and who is at the present time at the head of the Higgins Standard Oil company, owners of some of the biggest producers in Texas.

Mr. Higgins has been in the state for more than two weeks and, to a "News" representative this afternoon stated that, as far as he has gone with the investigation, he is very well satisfied oil exists in the Salt Lake valley, but will take him fully two weeks longer to thoroughly satisfy himself as to where wells should be put down.

"At the end of that time," said Mr. Higgins, "if I find conditions as favorable here as I believe them to be, I am ready to take hold and do what I can to develop this field. Of course, a great deal will depend on whether enough land can be secured to justify expenditure of the great amount of money it will require for development purposes.

purposes.
"I will say this," continued Mr. Higgins, "that if it is decided to enter this field, there will be no stock jobbing scheme inflicted on the public; but a strong company will be organized with sufficient capital back of it to carry out

sufficient capital back of it to carry out its purposes."

Mr. Higgins is ranked as a leading authority on oil matters. When he went to the Beaumont country in 1892, he did so against the advise of others who thought oil did not exist there, or at least in paying quantities. His success there was followed by other successes and has the reputation of having made no failure in any field in which he has operated and he doesn't propose to make one here, if the development of the field is undertaken.

It has been through the diligent efforts of C. K. Rowland, the well known oil promoter, that Mr. Higgins was induced to come to this country to look it over. Mr. Rowland, as nearly every

it over. Mr. Rowland, as nearly every Salt Laker knows, has had a great deal region. He has spent a great deal of time and money in the effort to at-tract capital this way. It was through him that the Guffey-Galey syndicate undertook the sinking of a well near Farmington, but which was abendoned, many believe for a purpose other than the honest.development of the field.

SHAWMUT OF BINGHAM. Eastern Shareholders Now Conducting Examir tion of Mine.

is not at all unlikely that th property of the Shawmut Consolidated Mining company of Bingham will be

Mining company of Bingham will be operated upon an extensive scale in the very near future.

F. W. McAlear of Boston, and other prominent shareholders, are now making an investigation of the property with the view of determining the campaign for the future.

The property is equipped with a mill, but it is not of a character applicable to the ores from the mine. The plant

to the ores from the mine. The plant will probably be overhauled, enlarged and equipped with different machinery
