about to open the grandest saloon in Ogden. Over this saloon is a gambling hell scarcely smaller than the Royal Exchange. Maden and several others were arrested owing to Marshal Pratt's action and brought before Commissioner Cross. Maden escaped without any penalty; the others were fined in the ridiculously small sum of fifteen dollars each. Your correspondent saw them as they left the court room, making merry and laughing heartily at the whole affair. I understand Maden denies being the owner of the gam-ing hell but I believe the gamdenies being the owner of the gam-ing hell, but I believe there is a passage from his saloon to the gaming tables, and that the gam-blers' money is placed in his safe. In these gaming hells there cannot be less than 100 professional gamblers and care-takers receiving from five to seven dollars per day. Add to this 100 girls (far under the mark). Your correspondent has mark). Your correspondent has heard cries of non-"Mormon" laboring men and mechanics cursing these dens and the "Liberals" who support them, and declaring that if they got the chance they would hurl them from power and put the "Mor-mons" in again. Will they do this? I am afraid they dare not. Ogden, Sept. 20th.

The No. 7 mine is now running in good shape, with perhaps, all told. four hundred men in and outside the mine. They have just put in the Mitchell tip for dumping the coal, which works splendidly. It enables the company to put out a great deal of more coal, as it is now possible to

termined not to be outdone by their neighbors, having resolved to erect a meeting house, for which a suit-able site has been secured. It is in a central spot, and the foundation is being prepared. The structure is to be 38 by 80, and will be built of brick. If constructed according to the plan it will be a very creditable building and should prove a blessing to the people, who sadly need a house of worship. The country is still very dry; the

evenings are quite cool.

Hay in this locality is scarce, and is now selling for fifteen dollars per ton. Even at that price it is hard to get.

FOR LIFE OR DEATH.

I came to India in 185-as a private in the --th regiment; and my company formed part of the garrison at Arcot. Life in barracks in India is very dull, and I have often wondered that British soldiers out here are, on the whole, such a steady, well-behaved lot of lads. Compare a soldier's life in a small Indian station with being quartered even at Malta or Gibraltar, and either of these places will seem like paradise; though the "Rock" is by no means popular, and is always called a prison by the troops for the time being in garrison there. Well, we found Arcot terribly

dull, and it was with great satisfac-tion that we heard an order had been given for our company to march to Nellore to strengthen the garrison there, which had been very much reduced by cholera.
