Springall's Injuries Fatal—Arthur Springall, aged 48 years, died yesterday afternoon at Holy Cross hospital from injuries received Christ-mag eve, when he fell into a pit of boiling water at Caliente, Nev. He had hong been onspaced in mining He had long been engaged in mining. He had resided in Utah about 40 years and was a native of Ealing, Middle-sex, Eng. A widow and two sons sur-vive him, as also doea isister, Mrs. Mary Shoateid.

Breeden's Retirement-Major M.A. Breeden, takes off the toga of the at-orney general's office, after eight eight years of active service, to resume re-gular practise of law. He remarked today, that in that time he had been called upon for hundreds of opinions called upon for hundreds of opinions in every conceivable question and phase of legal advice, and retired from office feeling that he had done bis duty, and performed the work to which he had been called. Major Bree-den has made many friends by his approachability and readiness to re-spond to all demands made upon him. The fact that his opinions have stood the law so well is a matter of grati-fication to him.

As the time for the gathering of the woolmen of the country in national convention at Pocatello draws near, interest in the wool storage movement waxes stronger. In fact, s even predicted by cast-buyers that the movement 18 em in Utah will not materialize, and that the annual clip of this state will be disposed of in the same old way—that is, through middle men to the big wool buying houses of Boston, Chi-cago, and other eastern centers. It is stated that representatives of

It is stated that representatives of these castern woolbuying firms are now straining every nerve in this state to secure, by paying large prices in advance, the wool crop of Utah for the coming season, some of them paying as high as 18 cents per pound for Utah and Idaho wool. When it is taken into consideration that the price of wool during the year past never taken into consideration that the price of wool during the year past never at any time exceeded 15 cents per pound, and went down as low in some instances as eight cents, the anxiety of the woolbuying houses to secure the state's wool clip and prevent the establishment of the wool storage plan, if possible, becomes more ap-parent. parent

That the fancy prices offered at the present time are tempting many growers to contract their season's arowers to contract their season's wool, these seems to be no manner of doubt. Utah is credited with produc-ing about 6,000,000 pounds of wool on an average, per annum, and it is given out that somewhere near half this amount has been contracted for already, and that consequently interest in the storage plan is not so keen in this state as in some of the other wool producing sections.

CO-OPERATIVE PLAN.

"The storage plan is simply a scheme of co-operation among the wool pro-ducers to prevent the price of their product going down to the dead level of \$\sistic cents, as it did last year. It is merely a consolidation of forces in the woolgrowing business to seek and find the best market obtainable for the wool of the west.

## **DISCUSS RATE QUESTION**

Meeting at Commercial Ciub Starts Active Effort to Land One Cent A Mile Fare.

The question of a 1-cent-a-mile rate o the Grand Army encampment at Salt Lake next summer was informally discussed yesterday afternoon at a Commercial club luncheon. There were present representatives of the railroads and of the Commercial club. The subfect discussed was relative to the prac-ticability of a 1-cent-a-mile rate, and whether the power to grant it lay with whether the power to grant it may with the agents of the road or with the traf-fic and passenger associations in the east. The meeting and luncheon lasted ove three hours, and on behalf of the Commercial club those present pointed out that the present rate of 1 cent 4 out that the present rate of 1 cent a mills would be regarded by many resi-dents of the west that the railroads were not doing their part to build up the west, and were in fact inimical to its interests. It was urged that the matter of rates was closely wrapped up matter of rates was closely wrapped up with the success of the encampment, that the present rate would mean a very small encampment if it did not actually compel an encampment of

delegates only. delegates only. The railroad men stated on their part that they would take up the matter and would do all in their power to secure a proper rate. Another meeting will be held in the near future to consider results. Those present at the luncheon were John S. Bransford, chairman of the Commercial club's executive committee; D. E. Burley, general passenger agent of the O. S. L.; D. S. Spencer, assistant general passenger agent of the same railway: Parley L. Williams, chief counsel for the O. S. L.; Col. Ira A. Benton, general representative for the Denver & Rio Grande; Col. F. M. Sterrett, executive director of the G. A. encampment; former Gov. George A. Black, member of the national trans-portation committee of the G. A. R.; Gov. William Spry; W. J. Halloran, president of the Salt Lake Commercial club; Faher Harris, secretary of the

DEVELOPING WIRE CHIEFS.

Local telephone and telegraph experts note the policy of the American Telegraph & Telephone company to secure FOR BARGAINS IN R. SEC ANDERSON-CUMMI 317 South Main and Postal Telegraph companies, as the telephone company has been for some time making it a point to lease wires for telegraph purposes to horse racing outfits, pool rooms, brokers' offices, stock exchanges, etc., and wire chiefs are wanted who are operators. So it has been found necessary to seek such men from among telegraphic experts. Telegraph companies are adverse to loging these men, and at the same time, employes of the telephona company desirous of promotion, are equally averse to see their chances diminished, if not taken marks has this theory of averse to see their chances diminished, if not taken away, by this influx of outside talent. So a move has been started among telephone clerks and em-ployes in the line of promotion in the operating and mechanical departments to learn the code, and the telegraph managements are only too glad to ald them, and thus reduce as far as possible the possibilities for lowing their ex-parts to the telephone commany. By a policy of 'bearing' the market for some length of time, the growers have been forced to sell their wool at ruinous prices, and by the establishment of the wool storage plan, as adopted by those who would like to see the scheme come to a successful issue, the wool come to a successful issue, the wool-men themselves, or their direct repre-sentatives, will handle, and store the wool, pay insurance and storage cost at minimum sums, and have the wool on hand when the manufacturer is in the market to buy.

WHAT IS CONTEMPLATED

"The plan comprehends the raising, by subscription, of \$250,000 by the voolgrowers of the west for the construction of a mammoth central wars-house in Chicago, where all the wool of the west will be shipped and stored, and shall be marketed when, in the judgment of the company, the time is propitious for its sale. When the sum of \$150,000 has been subscribed by the woolgrowers, the business men of Chi-cago will add \$150,000 to the fund, and the whole sum will be devoted to the purpose of taking care of the wool and selling it. struction of a mammoth central ware
