He was an industrious young man of excellent character, and his untimely demise has brought sorrow not only to his relatives but to a host of friends. The funeral services will be held Sunday at 2 o'clock at the Mount Ford ward meetinghouse. The remains may be viewed on date of funeral between the hours of 10 a. m. and 1 p. m. Huntsville is now entirely free from diphtheria, despite the fact that the whole town was exposed on Jan. 10 at the funeral of Charles Jensen, who died of that disease. It was supposed at the time that the cause of death was diphtheria, but when another child of the same family came down with the same disease, Dr. Allen of Ogden had pronounced it that; but when another child of the same family came down with the same disease, Dr. Allen made a more thorough examination and found it to be diphtheria. NO PREFERENCE FOR WALL STREET

Special Correspondence.

Washington, Feb. 13.—George B. Corley, now postmaster general, is expected to commence a thorough overhauling of the treasury department when he becomes secretary of the treasury next month. Mr. Corley is universally credited with having done good work in his present position, and the application of the methods he has used so effectively in handling postal affairs is depended on to bring about some needed reforms in the financial establishment of the government. It is admitted that certain interests in New York have long been enabled to secure information regarding money matters far in advance of other interests which have the same right to such information. Although Mr. Corley positively declines to discuss his plans, there is excellent reason for the belief that as soon as he becomes secretary of the treasury he will have the assistance of Frank H. Hitchcock, at present first assistant postmaster general, who has

been connected with Mr. Corley for some years. Mr. Hitchcock will be made an assistant secretary of the treasury succeeding Arthur H. Statter.

NO ACTION ON POSTAL REPORT.

No action will be taken at the present session of Congress on the recommendations of the postal commission appointed to investigate and report on a plan looking to the curtailment of second class mail privileges. Among other things, the commission recommended that newspapers with Sunday magazines and other "features" not complimentary to the news sections and printed on different paper should not be carried at second class rates and that those rates should be denied also to papers more than 50 per cent of the superficial area of which is devoted to advertisements. The report of the commission is so comprehensive and the issues involved promise such determined opposition that the postoffice committee of the two houses have decided it will be useless to attempt to do anything in the remaining three weeks of the session. A positive announcement to this effect has been made by Chairman Overstreet of the house committee. A long step toward reform in the postal service has been taken, however, in a section of the house bill which provides for a more equitable system of payment for the transportation of mail by the post roads. It is estimated that at least \$5,000,000 a year will be saved the government as a result of this new plan, for which Kansas deserves the most credit.

"JOKER" IN FOOD LAW.

The people's lobby thinks it has discovered a "joker" in that portion of the agricultural bill which makes provision for the enforcement of the pure food law enacted by the last session of Congress. The paragraph objected to is an amendment offered by Chairman Sawyer of the house appropriations committee, and stipulates that no part of the appropriation of \$500,000 for the purpose named shall be used for the payment of compensation or expense to any officer or other person employed by a state, county or municipal government. It is alleged that this amendment, if enacted into law, would greatly hamper and delay the work sought to be done under the pure food law, as it would necessitate the employment and training of a large force of federal employees whose services would not be necessary if there was co-operation between the state and national authorities and if state, county and municipal officials could be trusted to enforce the law. Such independent action on the part of the government, it is estimated by Representative Mann of Illinois, would cost \$5,000,000 a year instead of the \$500,000 provided in the agricultural bill.

BEVERIDGE'S SPEECH LONGEST.

Senator Beveridge's speech on his anti child labor bill, the delivery of which consumed the greater part of three legislative days, has just been published in the Congressional Record and is shown to have been one of the longest ever made on the floor of either house. It occupies about 56 pages of the Record. Its unusual length is largely due to the many extracts from statistics, reports and other data, most of which the Indiana read in the course of his speech. There is little or no chance of the enactment of a child labor law into law at this session, but it is obvious that Senator Beveridge has attracted wide attention to the subject and has created a very healthy sentiment in favor of the proposed legislation.

PURITY
OF THE
SYSTEM
Is the Secret of
COMPLETE HEALTH.

Doesn't it stand that for perfect health, the human system must be kept pure and clean, inside as well as outside?

Then take Cascarets, the world-famous Bowel Medicine and system-cleaners, that will help you KEEP CLEAN INSIDE.

The body of man is the most perfect and delicate mechanism in existence, and the least OBSTRUCTION or accumulation of filth in any part of it, will make it hobble, move IRREGULARLY and SPASMODICALLY, and if not attended to promptly may stop the machine altogether.

Isn't that plain common sense to any person that has had any experience with machinery of human invention, from the sewing machine to the triple-expansion engine? All the parts, joints, connections, gears, must be kept absolutely pure and clean to get the best results. A careless, untidy engineer is a failure and will lose his job.

Nature has been kind to us by handing over to us to be occupied during our earthly existence, an almost automatic, elastic mechanism, that will run itself if only properly cared for.

All that she asks, is that the body be supplied with "Pure Food" fuel of the right kind, applied in the right way,—that a lubricant be furnished for the joints, muscles, nerves through the marvelous distributing and collecting system of arteries and veins,—and that all parts of the engine be used for the purposes intended without undue strain.

But, when little mistakes are made in eating and drinking, with perhaps excessive exertion, there is a liability of a stoppage in the natural cleansing process, and you are liable to become UNCLEAN INSIDE.

That means obstruction, stoppage of the normal functions, fermentation, poisoning of the blood by your own decaying sewage, and a liability of the development of any of hundreds of serious diseases.

Cascarets Candy Cathartic are fragrant, sweet, mild but effective little tablets that were first compounded from pure, harmless, vegetable substances, under a Pure Drug of their own, in 1896. These tablets proved to be the greatest lubricators for the Bowels ever discovered, and at the same time a destroyer of disease germs in the whole alimentary (food) canal. They have now a sale of over a million boxes a month.

They are a pure, reliable, means of keeping the system clean, preventing all diseases arising from accumulations in Constipation, and also relieving and aiding the cure of chronic conditions after they have developed from neglect.

Begin today to watch your conditions, be careful of your food and general methods of living and learn to take precaution of "Keeping Clean Inside" with Cascarets. Buy a little 10c. box from your own druggist TODAY, be convinced and join our MILLIONS OF FRIENDS.

Be sure to "Get What You Ask For"—the Genuine, every tablet stamped "C C C."

are commenting on the odd coincidence of the death of Representative Black of New York on the same day that the house devoted to eulogies of the late Senator Gorman of Maryland. Under ordinary circumstances the house would have adjourned immediately after the announcement of Mr. Black's death was made; but, as it was, the Gorman eulogies were continued, and then adjournment was had as a mark of respect to both the deceased statesmen.
