Coos Bay Once More Bobs Up as a Rallroad Goal.

Twenty years ago last Wednesday the Danver papers were exploiting the building of the Burlington through from Colorado to Salt Lake with the grave statement attached that work would commence at once. Some five would commence at once. Some avery years ago Coos Bay bid fair to knock out the Burlington annual hot weather story. Since that time it has bobbed up at frequent intervals and shared honors with the Burlington. This week our old friend the C. B. & Q. came to trans in a now guise and now sure town in a new guise and now sure enough there are rumors from Coos Bay again.

Bay again. Seriously, however, engineers are now at work in the vicinity of Coos Bay on some mysterious railroad project and are working south. The rumor is to the effect that it is the Santa Fe this time. The Coos Bay field and the coast rail-way question is an alluring one, so say all railway men. It is estimated by way question is an attention of the set of the set of standing timber on the slopes of the coast mountains, and most of this is on the western side. It would take 18,000,000 cars to haul this lumber to move the set of th market.

But aside from the hauling that the road might get out of the country it is argued by the Portland Oregonian that it is to the interest of the Santa Fe to build into Oregon, provided it comes as near as the Eureka country, for which locality it is now headed. The system has at least 10,000 miles of track throughout its length, most of which is through a treeless and timberless is through a treeless and timberless country, where ties have to be sent long distances. Most of the bridge ma-terial and ties, as well as the lumber for the buildings has to be sent over rival lines. If by building a short line to tap a new country, as rich as that of Coos Bay, an unlimited timber sup-ply could be obtained, it would be of great advantage to the company to make the extension.

great advantage to the company to make the extension. No plans have been announced as yet from the railroad offices, but rumors that are persistent are floating through railroad circles that the extension is contemplated as soon as the present extension into Humboldt county is com-pleted and the railway fairly in operapleted and the railway fairly in opera-

USED THE FLAG EOR BAIT.

"Seems to me you are beginning your preparations for the great and glorious Fourth a little early," observed the fat clubman to his thin brother, when the latter took from his pocket-book what appeared to be a half dozen

"Fourth of July nothing," said the thin man, "I am going up to the Ar-irondacks for a few weeks' fishing." "Where do the flags come it?"

"That's where the fish bite, I hope," smiled the thin man. "They are files, as carefully made as any gray hackle or Silverton you ever cast, and something entirely new in the fish hook line

"Do you dope it out that the Adiron-dack trout have taken on a patriotic streak?" asked the fat man, taking one of the American flag novelties and

one of the American hag novelles and examining it. "Whose idea." "The first one," explained the owner of the files, "was made for the British Fly Fishers' club, and presented to Am-bassador Choate at a dinner which the club gave him. It was just a conceit, a pretty compliment, and no one thought of really using the fly. Then one of the members tried it on the Tay one of the members tried it on the Tay, and got rise after rise for the American fag when the fish had scorned every-thing else. If British trout will bite simply out of their regard for the new hands-across-the-sea spirit what won't the American do for their own emblem? Anyway, I'm going to give them a try, and we'll hope they have sense enough to follow the flag-swallow it, I mean." New York Tribune.
