

THE WORLD'S OUTCASTS ON THE LEPER ISLAND OF MOLOKAI.

The three pictures herewith reproduced show something of the present condition of affairs on the leper island of Molokai, one of the Hawaiian group. Its only link with the outside world is the small steamer which makes weekly trips to Honolulu. The church recalls Father Damien's heroic sacrifice, who devoted himself to the education of lepers for twenty years, finally succumbing to the loathsome malady. The group of outcasts in the Baldwin home, a charity which has been of the greatest benefit to the hopeless victims of the dread disease. In spite of the certainty of their deplorable fate the dwellers on Molokai are singularly resigned and often cheerful. The boys have organized a brass band and have learned to play quite well.

FLOODS IN MONTANA

Are Very Threatening, Assuming Unprecedented Proportions.

Butte, Mont., June 8.—A heavy special to the Miner says:

The flood situation in northern Montana has assumed unprecedented proportions. Strenuous efforts are being made by the officials to rescue a half dozen passenger trains on the Great Northern that are stranded by the washouts to the east of Havre. Washouts to the west of Havre make the train predicament more complicated. Despite a number of wrecks of freight trains and work trains, the railway officials have not received notifications of loss of life or personal injury. A relief train sent out of Glasgow could reach a point only nine miles west. It reported that the work train with a pilot driver that it was sent to succor was "out of sight."

Between Savoy and Montana, a work train consisting of 11 cars of gravel is definitely reported ditched. Beaver creek, near Havre is a mile wide and has washed out the bridge at Pacific Junction, preventing any possible progress of trains from the west to this point, and of southern trains on the Montana Central. A Montana Central train due here at 6:40 a. m., arrived at the Junction tonight. Many of the passengers have walked into the city.

VOTE FOR STATEHOOD.

Washington, June 8.—A basis of compromise, if not the exact form, which is said to be the subject of a majority of the senators for the settlement of differences on the statehood question, has been submitted by Senator Carter. This provides for a vote at the next regular territorial elections of Arizona and New Mexico to be held in November of delegates to a constitutional convention to frame a constitution for a proposed new state and a vote on the question of statehood to be submitted in this form:

"Shall Arizona and New Mexico be united as one state?"

After a majority in both of the territories vote in favor of joint statehood, then the delegates to a constitutional convention will be called together. If a majority in either territory is recorded against statehood, then the convention will not assemble. It eliminates the expense of holding a constitutional convention in the event the decision of either territory is against statehood and avoids the confusion of the statehood question with an election for state officers.

SMELTERMAN BURNED ALIVE.

Tacoma, Wash., June 8.—Herbert M. Smith fell into a pot of molten metal at the smelter last night and was burned to death.

BRIG-GEN. ALDEN DIES.

Padena, Cal., June 8.—Brigadier-General Charles H. Alden, United States army, retired, died at his home here at night. General Alden was 70 years old.

BOY ELECTROCUTED.

San Francisco, June 8.—Ed Kelly, an eighteen-year-old boy employed by the Standard Electric company, was electrocuted shortly before the noon hour today at the company's works, 34 Kansas street. He was working on a transformer in the tower and missed his footing. He was clutching a live wire and 2,200 volts of electricity passed through his body.

Physicians were called and they worked over the electrician for several hours, but were obliged to give the case up as hopeless.

GOV. FOLK ACCEPTS.

Jefferson City, Mo., June 8.—Gov. Folk tonight telegraphed acceptance of the invitation extended by Harvey Walker of New York to preside over the meetings which will welcome William Jennings Bryan when he returns from his trip around the world.

STORM IN ONTARIO, CANADA.

Chatham, Ont., June 8.—Thousands of dollars' damage was done by a terrific wind and rain storm which swept this city early this afternoon. Houses and buildings were twisted out of plumb, chimneys were torn down, and the streets blocked with trees and other debris. So far as known, however, no one was seriously injured.

The Collegiate institute, the wind tore the skylights from the building, throwing the girl pupils into a panic. Wires of all descriptions are down, and traffic on the trolley line to Wallaceburg is suspended.

AID FOR MOYER ET AL.

Federation Thanks Labor Unions That Contributed.

Denver, Colo., June 8.—The Western Federation of Miners today adopted a resolution thanking the various labor unions of the country for the financial assistance given the Federation in its defense of Charles H. Moyer, William D. Haywood and G. A. Pettibone, under arrest in those charged with the assassination of former Gov. Steiensenberg. The morning session of the convention was adjourned early and the delegates returned to their homes. The incoming delegates from Butte, who had been elected to take the place of those who bolted the convention early in its session.

The afternoon session was given to the consideration of questions of jurisdiction and constitutional amendments. Sen. Keirwin said tonight he thought the convention would close next Tuesday, when officers will be elected and a place of meeting and headquarters chosen.

HAARON'S CORONATION.

Sweden Will Have no Representative At the Ceremony.

Christiania, June 8.—Sweden will not be represented at the coronation of King Haakon on June 22. The Swedish government desires that it be understood that this decision is not the result of ill-will or as a breach of friendly intercourse, but it is dictated out of regard for King Oscar's personal feelings.

The situation has no historic parallel, but it is considered here as quite natural that King Oscar should not permit a member of his dynasty to assist at the coronation of his successor in the sovereignty of a portion of his former kingdom.

NEGRO LYNCHED.

Omaha, Pa., June 8.—James Davis, the negro who it is charged, murdered Mr. Russell and his negro servant at Independence, Mo., was lynched at Independence last night by masked men. The lynch mob sent to protect him arrived too late.

BRISON ELECTED PRESIDENT.

Paris, June 8.—Henri Brisson, formerly premier, who was elected president of the chamber of deputies June 7, was today definitely elected president of the house.

WHO MURDERED MRS. L. M. KINNAN?

She Was Called to the Door and Struck Fatal Blow With A Gaspipe.

NOT A SINGLE WORD WAS SAID

Motive of Crime Unknown, But May Have Been Jealousy or Revenge.

New York, June 8.—The identity of the murderer of Mrs. Alice Kinnan, who was struck down on the stoop of her home in the borough of the Bronx last night, was still a mystery today.

Mrs. Kinnan lived with her mother, Mrs. Louise M. Stanton, aged 85, in an old and decaying mansion. At 3 o'clock last night she was called to the door by an unknown person who without a word struck her a fatal blow on the head with a gas pipe. The murderer then disappeared but left the gas pipe.

That jealousy or revenge may have been the motive which prompted the result was suggested by the discovery that a contractor named Clinchy died in Mrs. Kinnan's home while calling upon her two weeks ago and also that Mrs. Kinnan had employed a lawyer to bring suit for divorce from her husband from whom she separated eight years ago. The police today were trying to find a man who is said to have been a frequent caller on Mrs. Kinnan.

It was said today that Clinchy had been a visitor at Mrs. Kinnan's home for five years against the wishes of his family.

The mystery is deepened by the fact that the whereabouts of Mrs. Kinnan's husband is unknown. After trying in vain for two years to find him and bring suit against him, Mrs. Kinnan believed him to be dead until three weeks ago when he was reported to be in Brooklyn. The search for him was renewed by Mrs. Kinnan's lawyer but without result.

The police took up the search for him today in the hope that he could give them a clue.

THE MODERN WOMAN.

To Her Marriage Is an Incident, Man An Appendage.

Chicago, June 8.—Marriage has become a mere incident in the life of woman; man is but an appendage, an adjunct, a corollary of woman. In short man is not nearly as important as he, with his famous self-conceit, imagines himself. So speaks Mrs. J. C. Watson, of the National Business Women's League in the Palmer House declared yesterday—all the speakers being women.

In art, in music, in literature, in medicine, on the stage, as nurses, as court reporters, and in numerous other vocations, professions, trades, or crafts men are by no means the whole thing. Most startling of all a man as a husband does not summarize the entire universe. A husband is an incident, not a creation.

"Marriage," asked Miss Louise Lee Hardin of Denver, president of the association. "Why marriage is no longer everything in a woman's life. It is getting reduced to the position of woman to the truth in the proportionate scale of things and is becoming an incident. Marriage is but an incident in the life of a man. Why should it not be so in the life of a woman? Women of today must have other interests in life besides the hearth, and I think it is a very good thing for woman herself and for the nation as a whole that we are becoming weaned to some extent from the idea that marriage is the all-and-all of a woman's career."

THE MARBLEHEAD SAILS.

Believed Has Gone to Guatemala Ports to Protect Americans.

Washington, June 9.—The United States cruiser Marblehead has sailed north from Panama. It is generally believed the Marblehead will stop at Guatemalan ports to protect American interests and investigate the activity of the American steamer Empire which is reported to be assisting the revolutionists at San Jose, Guatemala.

THE MYSTIC SHRINERS.

Chicago, June 8.—The thirty-second annual session of the imperial council of the Ancient Arabic Order of Nobles of the Mystic Shrine of North America will be held at Medinah temple, Walton place and Dearborn avenues, next Tuesday and Wednesday.

This session, which was to have been held at Los Angeles May 7, was postponed and transferred to Chicago on account of the earthquake. One thousand nobles from the ninety-eight temples of the United States and Canada will attend the convention which is expected to be the largest held in this country.

The sessions will be devoted entirely to business matters save for a short time before the close Wednesday, when officers for the ensuing year will be elected.

GREAT HEAT IN CHICAGO.

Chicago, June 8.—Although yesterday was appreciably cooler than the preceding day, the heat was given as a contributing cause to eight deaths reported in Chicago. In addition there were several prostrations.

The temperature reached a maximum of 81 degrees and there was a rainfall of .11 of an inch. The wind shifted a velocity of 40 miles an hour from the southwest.

The cumulative effect of the three days of warm weather was the chief element in the deaths. With little children this effect was most marked.

CADET HETRICK.

To Him Falls Honor of Graduating First at West Point.

New York, June 8.—A special to a morning paper from West Point, N. Y., says:

It was learned yesterday that to Cadet Harold S. Hetrick of Connecticut will fall the much coveted honor of being the first to graduate at the head of his class at the United States military academy. Hetrick is a member of the cadet committee on athletics, is editor in chief of the class annual, "The Howitzer" and is lieutenant of company B. A year ago he stood second in his class. His name and those of the next four men in the class will be attached in the register as the names of the most distinguished in the class of 1906.

Beside Hetrick, the other four to break into the "distinguished" quintette are W. A. Johnson of New York, James J. Loving of Arkansas, Frederick R. Downing of Virginia and Edmund L. Dy of Massachusetts. All four take rank in the order named.

All of these except Daly were the first five of this class last year. Daly was tenth last year when Hetrick was second and just behind Johnson, whom he now displaced. It has been a close race between Hetrick and Johnson all the last year, and the leadership of the class was not decided until the fall examinations had been passed. It is custom to assign the first five men of each class to whatever arm of the service they may choose. The majority of them in past years have chosen to be assigned to the engineers.

A SHOWER OF MONEY.

Chicago, June 8.—Amid scenes of wild enthusiasm, a Jewish audience of 2,200 persons, many of them women and girls, showered gold and silver coins and paper money on the platform of the West Side Auditorium, Center avenue and Taylor street, last night, in response to the appeal of the Russian refugee, Gregory Maxim, for funds in aid of the Russian revolution.

For nearly three hours the shower of money descended and rolled at the feet of the visiting Russian. It took a force of 20 collectors to gather up the coins. The count of money was not completed until after midnight and it was said to foot up a handsome amount, augmenting considerably the fund of \$5,000 that Mr. Maxim has collected during the two months of his speechmaking tour in this country.

JUDGE PARKER ADMITTED TO PRACTISE IN U. S. COURTS

New York, June 8.—Former Judge Alton B. Parker and his law partner, Judge Edward H. Hatch, were formally admitted to practise in the United States circuit court yesterday. Neither had appeared before as an attorney in the federal courts of this district, but both were qualified to do so as members of the supreme court of New York.

STATUE OF WASHINGTON.

New York, June 8.—A heroic equestrian statue of George Washington will be unveiled next Saturday at the Brooklyn terminal of the new Williamsburg bridge and formally presented to the city of Brooklyn by James F. Howe, city officials, members of military organizations and government representatives from Washington will be present at the ceremonies.

Washington is represented in continental uniform as he appeared at Valley Forge.

The statue was cast in eight pieces, and is said to have cost \$30,000. It is 18 feet high, weighs seven and a half tons, and will be mounted on a granite pedestal 15 feet high.

FUNDS FOR SAN FRANCISCO.

New York, June 8.—The executive committee of the San Francisco relief committee of the Merchants' association of New York met yesterday for the purpose of winding up its affairs. It was decided that the treasurer should at once forward to James D. Phelan a draft for the funds now on hand, which, with interest to date at 3 per cent, amount to \$148,81.

WOMAN'S SINGLES.

Miss Douglas Beats Miss Mae Sutton Of California.

Liverpool, June 8.—In the final round of the women's singles, Miss Douglas beat Miss Mae Sutton, of California, 7-5, 6-2. This robe the American of the Northern Counties ladies' championship.

CHRISTIAN SCIENTISTS GATHER.

Boston, June 8.—The vanguard of more than 10,000 Christian Scientists who will attend the dedication of the new Christian Science temple here tomorrow, arrived in the city last night. They came on eight special trains from the west.

SING SING CONVICTS.

To Have Honor Marks for Good Conduct Attached to Clothing.

New York, June 8.—A special to a morning paper from Ossining says: The convicts in Sing Sing and the other prisons throughout the state will have honor marks attached to their clothing as a reward for good conduct. The new rule, which was instituted by Supt. Collins last week, is that for each year of good behavior a prisoner will get an honor bar to be worn on his coat sleeve between the shoulder and elbow, and at the end of five years these bars will be replaced by a star. Should a man be unfortunate enough to use his bars on account of a serious infraction of the rules, he may win others by subsequent good conduct.

Numerous privileges are extended to the honor men. Those wearing bars may write a letter every two weeks and may purchase articles every month. The wearers of stars may receive a box of cooked eatables from home every three months and are also allowed to take one daily, tri-weekly or semi-weekly newspaper, which must be returned to the correspondence department at the expiration of two days.

CUSTOMS INSPECTOR HELD.

New York, June 8.—David Hobbs, a former customs inspector of the Canadian Pacific railway, arrived here today, and was arraigned before a United States commissioner and remanded until Friday. He was released.

It is alleged that Hobbs is more than \$2,000 short in his accounts.

BRIGHAM YOUNG COLLEGE, LOGAN

President's Report Showing Work Of Most Successful Year Of the School.

FORTY-FIVE ARE GRADUATED.

Manual Training and Practical Work Prominent Features of the Church School.

Following is an epitome of the report of the Brigham Young college, Logan, for the school year 1905-6, read by President James H. Linford at the commencement held June 6.

The faculty as at present constituted consists of 12 professors, 8 assistant professors, 1 principal of normal training school, 22 instructors, 9 assistants—42 in all.

In point of scholarship and general preparation, they are the peers of any faculty in our state. They are devoted in their efforts to maintain the high standard of efficiency already attained by the college, and to improve upon the past whenever possible.

The present graduating class is the largest in the history of the institution. There were graduates with the degree A. B., representing seven years of work above the eighth grade, and 42 from the four-year high school courses, classified as follows: Twenty-two from the normal course, 12 from the business course, 4 from the domestic course, 2 from the science course, 1 from the English course, 1 from the agricultural course, 1 from the mechanical arts course. One student takes a certificate from the short business course.

There have been enrolled 828 students in all departments, an increase of 51 over previous year. Of the total number of students, 71 are in the college department, 56 in the high school, 33 in the missionary department, 124 in the training school. Five years ago we had eight graduates, today we graduate 45. Instruction was then given in 22 classes, last year in 105. During the five years the college has acquired the use of six rooms in the Preston block as a home of the normal training school; a six-room residence for the use of the department of music has been made available for class-room purposes two rooms in the east building, and has erected a new mechanical arts building with two shops, 50x75 each, and 11 classrooms, making a total addition of 27 rooms for class purposes.

During the past year instruction has been given in the following courses of collegiate grade. One in Arts, leading to the degree A. B., 1 in civil engineering, leading to the degree B. S. in civil engineering, 1 in domestic science, leading to the degree B. S. in domestic science, and in the following courses of high school grade, representing four years of instruction above the eighth grade of the public schools: classical, science, normal, kindergarten normal, business, domestic arts, domestic science, agricultural, mechanical arts. In addition to all these, work has been done in the short business course, extending over three years, in the nurse training course, extending over two years, and in the missionary and preparatory courses, each extending over one year.

Special attention has been given to the home life and to the punctuality of students in their class work, parents being kept informed of the irregularities of their children. One pleasing feature of the school life of the past year has been the organization of the student body to take over the discipline of the offenders against the regulations of the college with respect to conduct in general and those personal habits that would bring reproach upon the student body, and very excellent results have been obtained.

The equipment of the college, while not extended, is such that the most thorough work has been done in the various subjects taught. The domestic departments are well supplied with forms and machines for sewing and dressmaking, and with ranges and stoves, porcelain, silverware, and linen in the cooking laboratories and dining room. The equipment of departments of carpentry and forging, established through the generosity of the late Joseph Morrell, have been added to year by year until they are well supplied with tools and machinery. Good chemical, physical, and biological laboratories are maintained as aids to thorough class work. The college library is supplied with well chosen works useful in the various departments, and with the best magazines of the country and the leading newspapers of our state.

We feel that the future of the college is very bright. The faculty for next year will be strengthened very materially. Prof. W. H. Chamberlain and Prof. George C. Jensen return to the college after a leave of absence of one year and will have taken their master's degrees. Prof. Fred J. Pack, who has just received his Ph. D. in geology at Columbia, Prof. F. A. Hinckley, a former graduate of the college and for two years a student of the University of Chicago, and Frank Dulane, a graduate of the present year, have been engaged by the board of trustees.

The new Mechanic Arts building will be ready for occupancy at the opening of college in September, thus affording an excellent home for art, domestic science and art, carpentry, and forging. The removal of the domestic courses from the east building will make it possible to enlarge the library and reading room, give more space to the business department, make it possible to set aside one room for an agricultural laboratory, and a lecture room in biology. These changes will add very materially to our advancement.

The following departments have been introduced in the last five years: Business department, introduced the year previous, telegraphy, banking, commercial law, commerce and transportation; domestic arts, sewing, dressmaking, and art needle work; domestic science, cooking, three courses; science of nutrition, home nursing and hygiene; carpentry, four years of work; forging, four years of work; blacksmithing, one course; agriculture, principles of agriculture, horticulture, entomology, bacteriology, field crops, plant breeding; a college civil engineering course, offering a thorough training in the subjects usually taught in such a course in our best institutions, a kindergarten normal school, and an additional department in the normal training school.

The following auxiliary organizations have been instituted: Sabbath normal school, brass band, orchestra, opera company.

In addition to the above new departments, two sections have been added to the first year work, one to the second year, and one to the third year's work. In addition to these there have been many more elective subjects in the year just closed than in any year of the past.

To support this increase of work we receive from the Church \$22,000 as against \$14,100 five years ago.

We appreciate the support given us by all those who have so generously aided in accomplishing these gratifying results.

Respectfully submitted, JAS. H. LINFORD, WESTON VERNON, H. BULLEN, JR.

Presidency of the B. Y. College.

Pale? Thin?

How is it with the children these days? Have they plenty of grit, courage, strength? Or are they thin, pale, delicate? This reminds you of Ayer's Sarsaparilla. It does great things for children. It gives them a good appetite, improves their digestion, builds up their general health. Ask your doctor if he endorses this. We have no secrets! We publish the formulae of all our medicines. J. C. Ayer & Co., Lowell, Mass.

GARDNER DAILY STORE NEWS.

Today our attention is given principally to the needs and desires of the Boys' Department.

Here is to be seen all the newest and best in everything the little fellows wear.
