DESERET EVENING NEWS TUESDAY MARCH 24 1908

It can be said with equal positiveness that the Utah Copper company is not going into any consolidation deal and all one needs to do is to recall the statement made by President Charles M. MacNeill last January on the sub-pect. "You can say," said General Manager D. C. Jackling today, "that Manager D. C. Jackling today, "that the Utah Copper company, as a cor-poration, has no immediate intention of consolidating with any other com-pany. There is absolutely no change in the attitude of the company as out-lined by President MacNeill sometime ago. The Utah Copper company is making money and there is absolutely no reason why it should not go right coming involved in any alliances." With such statements as contained in the foregoing coming from head or-ficials of the company ought to be suf-ficient to set aside all fear of local shareholders of the Utah Copper, or anyone else, that there is to be an amalgamation with Ely mines. There is no good reason why there should

6

identified.

is no good reason why there should be; and besides the Utah Copper mine is regarded by some pretty competent mining engineers as being a bigger proposition than all the mines the Guggenheims control in the Ely district. The Consolidated Copper company, with a capital of \$50,000, with 10,000 shares, was brought about several months ago through a reorganization of the Ely Mines company. It is now proposed to form what is to be known proposed to form what is to be known as the Copper Mines company, with 12.000.000 shares of the par value of \$5 a share, or a total of \$60,000.000. It is to be made the holding company for the Nevada, Consolidated, Cumberfor the Nevada, Consolidated, Cumber-land Ely and Consolidated Copper companules. There is no intimation in the circular sent out to shareholders however on what basis the deal is to be made. Silas W. Eccles will become president of the new Copper Mines company. company

ON MINING EXCHANGE.

Business Light Today as Compared to Yesterday's Transactions.

Vesterday's Transactions. Sioux Consolidated, Black Jack and Colorado were the leaders during the forencon calls of the mining exchange today. Some large blocks of the for-mer came out, but they were readily absorbed and steady prices prevailed. Colorado fell to \$3.75 during the regular call, followed by a slight recovery on the open board. Black jack softened slightly while May Day wound up with a sale at 43% cents.

"When the psychological moment ar-rived, Rawhide blossomed forth in all her glory as a full-fledged town with over 6,000 fortune-hunters. The strike at Goldfiela, the closing of mines in other localities, and the fact that there had to be a mining excitement in Ne-wada, made Rawnide possible. Aside from this, it is a fact that Rawhide has some extraordinarily rich surface showings, some of which are merely kulfe-blade streaks; but the gold is there and the lessees and mine opera-tors have failt that these 'knife-blades' will open out into bonanzas or enrich the dikes sufficiently to make shipping ore. Some of these expectations have been partly realized. The dikes of quartz porphyry and andesite breecia, when sufficiently slicified, yield prof-itable ore, but the dikes are only min-eralized throughout one could figure on a certain tomage of a given class of ore, but such is not the some on the case of ore, alized throughout one could figure on a certain tonnage of a given class of ore, but such is not the case, so that good ore in one portion of a dike is no guar-ance of the same condition in other portions. As to the mineralization con-tinuing downward, there is a marked improvement to the shallow depth al-ready reached, but whether this will extend below the zone of secondary en-richment remains to be proved. "There are approximately 300 leases in force in the dsitrict, and many of the lessees are companies, whose stocks

the lessees are companies, whose stocks are on the market. Many of the leases are offered for sale at high prices; the fairly long terms of the leases, one o three years, make them attractive o traders and speculators. While much york is in progress on some of the to three

work is in progress on some of the leases, there are others apparently be-ing held for sale, and the work being done is merely to meet the agreements. C. E. Loss of the California Contract-ing Co., E. W. King, Fred Grutt, and S. D. Crump are the organizers of a company that purposes building a rail-road from Schurz to Rawhide, a dis-tance of 31 miles. It is announced that the road will be built within the next six months. J. A. Carmichael has spent some time in Rawhide making tests with a view to erecting a custom mill. He believes Rawhide will eventually be-come a great milling district.

ping ore (\$50 to \$250), but the great majority are only expending money. "The camp is an ideal one for boom purposes: high assays are common, the ore yields fine specimens, and the area over which good ore has been fo-bids fair to make a number of profit.-ble mines. As compared with Goldfield at the same age, the comparison is in favor of Rawhide; but the deposits being of a character not well under-stood, the future is difficult to predict. The sociological experience of Goldfield is likely to be repeated here, and a new is likely to be repeated here, and a new boom in some other locality in Nevada is apt to divert interest to a fresh scene of excitement." BUTTE COALITION. Officially Stated That Dividend Will

trip.

come a great milling district. "There is no doubt that with favor-able conditions, such as cheap and efflable conditions, such as cheap and effi-clent labor, cheap power and timbers, there would be ore for many large mills; but such is not the case; with high union labor, almost prohibitive timber costs, and no cheap power, only the best grades of milling ore can be worked. Some of the lessees are ship-ping ore (\$50 to \$250), but the great majority are only expending money. passed into obscurity. NEWHOUSE IN NEVADA. Leaves With Chief Engineer Today to Hunt for a Gold Mine. Samuel Newhouse and his chief en-gineer, M. M. Johnson, expect to pull out for Nevada this afternoon and acout for Nevala this afternoon and ge-cording to information coming from a trustworthy source, they will visit the camp of Rawhide and thence move on to Tonopah, Goldfield, Silver Peak and winding up at Rhyolite, where Mr. Newhouse is identified with the Montgomery Mountain property.

depth. Mr. Porter states that a 15-foot velo of iron pyrites has been cut into which is identical in character to the one found in the Columbus Con-solidated mine, just before the great value of that property was firmly es-tablished. The Rexall property is also situated near the Cardiff Mining com-pany's mine in which quite gratifying results have recently been obtained. ECCLES PROMOTED. Hill, 8 bid.

Former Salt Laker Conspicuous Figure In the Smelting World.

S. W. Eccles has been elected vice president of both the American Smells ing & Refining company and the Smelt-ers Securities company. He will have general charge of all mines and mills of the two companies. The traffic de-partment of the American Smelting &

partment of the American Smelting & Refining company, formerly under the management of Mr. Eccles, has been turned over to W. M. Sproule. George C. Kaufman has been appoint-ed general manager of the mining de-partment of the American Smelting & Refining company and the American Smelters Securities company in Mexico.

ORE AND BULLION.

The ore and bullion settlements re-ported late yesterday by McCornick & Company were: Crude ore and con-centrate, \$20,000; base bullion, \$40,000.

NEVADA HILLS STRIKE.

One Made Recently the Greatest in That Mine's History.

The recent strike made in the Ne The recent strike made in the Ne-vada Hills mine at Fairview, Nev., was declared by Secy. W. H. Clark to-day as being by far the most import-ant development ever made in that marvelous mine. The vein is about five feet in width, two feet of which contains extremely high values in gold, silver and copper. In his office in the Dooly block this norming. Mr. Clark exhibited samples which run as high as 20 ounces in

which run as high as 30 ounces in gold. 21 per cent copper, and well up into the thousands of ounces in sli-ver to the ton.

ver to the ton. The ore is a sulphide and, as stated by Prest. W. V. Rice a couple of weeks ago, the find has thoroughly demon-strated the permanency of the mine. Nevada Hills is one of the greatest mines in Nevada today, and there is little doubt but that it will be a div-idend payer when some of the boom camps of Nevada today will have passed into obscurity.

ST. LOUIS. St. Louis, March 24.-Wool steady. Ter-ritory and western mediums 30%22; fine mediums 18@49; fine 16@17.

BOSTON. Boston, March 24.-The local wool market is dull but prices are well maintained. Some improvement is reported from the mill centers although there are still many idle looms. A recent estimate placed 35 to 40 per cent of the New Eng-land looms at work on mens' weargoods. Considerable Utah clothing wool changed hands at 18% cents for fine, the scoured cost being about 51. Business in the foreign product has been checked by the opening of the London sales.

Whitney Company

CHICAGO. Chicago, March 24—The wheat market today opened weak because of moderate selling by commission houses, chiefly based upon a decline at Liverpol. May wheat opened 3 to 35c lower at 34 to 945c and sold at 955. The corn market was firm chiefly be-

wheat opened 2 to 250 lower at 34 to 545c and sold at 555. The corn market was firm chiefly be-cause of higher prices at Liverpool and moderate local receipts. May corn open-ed 4 to 15c higher at 6614 to 6614c and for a time held within these figures. The oats market was exceedingly duil, the opening quotations being the only ones for some time. The market was 4c higher at 543. Provisions were firm because of strong demand for live hogs. May pork open-ed 15c higher at 12.40. Lard was 745c high-er at 7.575. Ribs were 2450 higher at 6.7254.

er at 7.37½. Ribs were 250 maner at 6.72½. The wheat market became strong in the last hair of the day because of an im-proved demand for cash wheat, May sel-ing up to 554. The close was strong with May % bigher at 954. Corn prices gained in strength all day. The high point for May being 67%. The close was strong with May 1% c higher at 574.

VISITED BINGHAM MINES. M. B. MacKelvie, representing the Roston brokerage firm of Hayden. Stone & Company, and Max M. Fur-iaud, a Paris banker, have spent the past few days in looking over the properties of the Utah Copper and Foston Consolidated Mining compan-ies at Bingham and Garfield. They also visited the big smelter of the Am-erlean Smelting & Refining company at Garfield. Garfield.

Ight, both expressed much satisfac-tion over what they had seen and were a unit in saying that Utah Cop-per belongs in the front ranks of the copper mines of the world.
