ONTARIO TUNNEL.

Something About the flistory of Great Park City Project.

On Saturday night, the drift being run around the Ontarlo tunnel cave had been completed to the length of 15 feet, says the Park Record;

Three shifts of eight men each are now working in the tunnel running a drift around the cave and driving 2inch pipes through the mass of earth and rock to draw the water off if pos-sible. These pipes are fitted with a long steel tip, perforated to allow the seepage water to enter and be canned out. When these pipes are sent com-pletely through the cave the tips will be shot off by a charge of electrically exploded powder. Yesterday morning one of these pipes had been driven in one of these pipes had been driven in over 55 feet and a stream of water was shooting from it a distance of 25 feet, with such force as to knock a man over. If one of the pipes is gotten through satisfactorily two others will be driven through in the same way and then the work in the drift will probably be discontinued, and the water allowed to drain off so that the tunnel may be cleared. While the work in the tunnel is considered quite dangerous the work-men themselves think little of it and Is considered quite dangerous the work-men themselves think little of it and are confident that they can do the work successfully and without mishap. It will take about a week or ten days to complete the drift. It is impossible as yet to estimate the damage done as the extent of the cave or length of this required to get the tunnel in shape again is not definitely known.

### STORY OF THE TUNNEL.

When work was commenced on the great Ontarlo drain tunnel, it was then generally considered and predicted that it would mean a great deal for the enit would mean a great deal for the en-tire camp, as indeed it has. It was estimated, when work began, that it would take three years to complete the tunnel, and that it would cost a half million dollars. It really took, how-ever, eight years to complete and cost close to a million dollars. The tunnel is twenty feet less than three miles in length and taps the mine at a denth of length and taps the mine at a depth of 1.560 feet. The work was commenced in August, 1888, under the direction of John Keetley, who stayed with the pro-

Route.

Captain Duncan McVichie of the Bingham Con, returned from the east yesterday and went out to Bingham ted this morning. Contractor Joseph Dederich has re-turned from Twin Falls, Ida., where he has commenced the construction of a

hotel building. P. J. Donahue has returned Pioche, where he reports the mill at the Abe Lincoln mine in operation and giv-ing a good account of itself.

The final payment of \$10,000 on the property of the West Mountain Placer company, purchased by the Utah Copper company, was made on Saturday

last. R. G. Andrews has returned from trip to Iowa on mining business. He will leave for the property of the Deer Lodge Mining company, near Fay, Nevada, tonight.

The anual meeting of the May Day Mining company is being held this at-ternoon. Tonight the stockholders of the Century Mining company will hold their annual session.

A. B. Greeson, manager of the Mining Review, accompanied by Corydon W. Higgins, has arrived in the Bullfrog. Nevada, district in the interest of the above named publication.

Bad roads between Acoma, Nev., and Shem City, Utah, where the smelter of the Utah & Eastern Copper com-pany is located, has greatly interfered with freighting between the two points. Manager Tony Jacobson of the Columbus Con. returned from Alta last evening. The roads between the valley and camp are in bad shape for traffic, which greatly hinders the movement or concentrates.

C. E. L. Gresh, manager of the Black Hawk Mining company, has found an abundance of water in his well on the Buster claim and will erect a ten-stamp nill as soon as the lumber can be se-cured at Las Vegas. There are two 55-foot shafts on the Buster 300 feet apart, with 12 feet of ore, said to average \$20.-Los Vegus Times.

The recent strikes on El Dorado canyon, forty miles south of here, have brought that camp into great prominence of late. Every available team at Searchlight has been pressed into service and several private rigs as well as freighters are hauling supplies from here. In addition to the regular companies operating in the district, there are 150 prospectors scouring the ad-jacent hills.-Los Vegas Times.

James Kennelly, from Goodsprings, was in town Monday. He reports that mining development in that district is progressing favorably, and the promise of a great future for that camp is as-sured. Mr. Kennelly is an old-time sured. Mr. Kennelly is an old-time mountaineer. He has followed railroad building and mining all his life. In days gone by he was an associate of Marcus Daly and was in on the devel-opment of Virginia City and Butte, Mont,-Los Vegas Times,

W. A. Dunlap, a son of the late Po-bert Dunlap of New York, who won fame in the hat manufacturing busi-ness, passed through the city today on ness, passed through the city today on his way to southern Nevada, where he will spend several months on a pleasure trip which will be spent in prospecting and otherwise investigating the mineral districts of the neighboring state. Mr. Dunlap is accompanied by Edward A. Adkinson. The combined wealth of the men is said to be considerably over a million. a million

#### May Day Shipments.

The May Day company received setthe may Day company received set-tlement today for six cars of ore, two high grade and four second class, for which a check for about \$3,000 came from the A. S. & R. During the past two weeks 10 cars have been shipped to the local smelters,

Parties having ore, the character of which they are in doubt, will be permita four-pound sample to send through Mr. Heikes, to Washington through Mr. Helkes, to Washington for analysis, the government doing the work free of charge to the sender. If the ore sent in in the manner describ-ed contains metals of sufficient value to make it worth while, the property from which it is obtained will be sub-hered jected to a thorough examination. If this proves satisfactory, the owner, while the Portland exposition is running, may send a larger lot to Portland and there the product will be subjected with the various devices to treatment assembled there during the comng summer.

ing summer. The work in respect to the rarer me-tals is likely to result in much good in being done for this state. Samples will be furnished from time to time by members of the Culmer exploration party, going into southeastern Utah, and in asmuch as that region is known to contain several species of the rarer metals, there is no telling what good may eventually come to that portion of unexplored Utah as a consequence of the survey's work.

## the survey's work. AT LOWER MAMMOTH.

### Supt. William Ball Busy Organizing His Forces.

John Dern, the new manager of the Lower Mammoth mine, returned from Tintic on Saturday evening after hav-ing installed William Ball in the posi-tion of superintendent. The latter is organizing his forces for a vigorous campaign, and, knowing the mine as he does, it is expected that he will ac-complish some good results. Manager Dern has given him a free hand to prospect wherever he pleases and that he will make things count, goes without saying. saying. Regarding Uncle Sam Consolidated, Mr.Dern says he found conditions about as they were when he last visited the

mine, that everything looks encouraging
