## BY TELEGRAPH.

FOR THE WEEK END MARCH 17-18, 1883.

**AMERICAN.**  
Wired from Washington.

**WASHINGTON, 17.**—The President has improved very much in health during the past few days, but is not yet entirely recovered.

The President, on the recommendation of the cabinet, has appointed a commission to investigate the charges of collusion between the thieves and police of this city, and of Judge Wylie, before whom the prisoners were tried, has pardoned Murphy and Lary, the three-card monte men. The citizens' committee wanted these men pardoned so they might use them as witnesses before the grand jury in the case against the detectives.

On account of the great decrease of orders for stamp printing for the internal revenue service, and consequent reduction of work in the Bureau of Engraving and Printing, a considerable reduction of the forces employed at that bureau will soon become necessary.

Indian Agent Tait, at Muskogee, Indian Territory, telegraphs to the Commissioner of Indian Affairs that unless troops are sent Union Agent Ward there is danger of trouble between the opposing Creek Indians. The War Department has been advised of the impending danger.

The life-saving authorities are meeting with great difficulty in securing volunteers on the Lakes, in consequence of the interpretation recently placed upon the law making appropriation for that service, by the Treasury Department. According to the recent decision, volunteers cannot be paid for their service rendered in actual case of marine disaster, and saving of human life by them is not considered as entitled to remuneration.

**The Railroads.**  
New York, 17.—The Court of Common Pleas has granted an order for the Union Pacific Railway Company an order to show cause why the time for defendants, Jay Gould, Russell Sage and John A. Stewart, to answer the demurrer should not be extended until the expiration of twenty days after service of summons and complaint in a new suit in the series of actions in regard to the obligations of the Union Pacific Railway Company upon what are known as the income bonds of the Kansas Pacific Railway Company. The suit is brought against Russell Sage, Jay Gould and others.

Woodbine, 14.—An accident befell a freight train on the C. & N. W. road last night. An engine and ten cars, loaded with cattle and grain, tumbled over, making a bad wreck. Engineer L. H. Lettler, was instantly killed. Fireman L. Montgomery was badly scalded. A number of cattle were killed and several injured. The whole train was badly wrecked.

New York, 17.—At the office of the Oregon Transcontinental Co., it was stated that advice received yesterday from the London stockholders of the proposition made at the meeting of the C. & N. W. Co., regarding the completion and lease of the road. The Oregon & California road is leased to the Transcontinental Co. for 99 years, the rental to be the amount of interest charges on \$500,000 per annum in 1883 and 1884; \$100,000 the first half of 1885, and thereafter a rental of 35 per cent. of the gross earnings.

Senator Dolph informed a Mail and Express reporter this afternoon that Oregon would be affected only by two reductions in the tariff, iron and wool. This reduction in the former will be a decided benefit to the State. Oregon expects to build many miles of railroad within the next few years. We have to purchase the rails, and as the State has a tendency to make the price lower, so we will receive material benefit by the reduction. Oregon is a large producer of wool, but manufacturers do not appreciate the fact that their business will be badly affected. I may say the people would be pleased if no change had been made.

**SUNDAY NIGHT'S DISPATCHES.**  
Feetmartyr Arrests.

CHARLESTON, S. C., 18.—In Charleston, S. C., on Saturday, March 17, 1883, at 10 o'clock, a man named John Wilson, deputy U. S. Marshal, assisted by two constables, arrested nine white men and one colored man, and took them from their homes without allowing them to change their clothing or make other preparations for the journey. Wilson said they were arrested for election offenses, but he would give the prisoners no more definite information of the charges against them.

Hamilton, Ohio, 18.—A fire this afternoon, destroyed the distillery of the Miami Co., loss \$75,000 to \$100,000; well insured.

**Fatal Incendiarism.**  
Bloomington, Ind., 18.—The second incendiary fire occurred last night in the city of Bloomington. The building destroyed on Friday, burning beneath it four men and a boy, three of whom are probably fatally injured.

**A Scheming Scene of Blood.**  
New York, 18.—At a christening of the infant of the city, a quarrel ensued; razors and knives were used. When the police arrived Frank Alberto was found with his head hanging to his body by a silver chain. The body was taken to the morgue. Alberto, arrested as a murderer, was covered with blood but had no knives. One had 10 knife thrusts on him, and another two. They were children of the same family. The Times well expresses the general feeling by saying that it does not altogether regret that the Irish inreconcilables have once more shown their hand, as the public will know what it has to deal with; for if dynamite is to become the accepted instrument of Irish retribution, the day of remedial legislation is over. I have heard scores of men say yesterday that the same thing, "The Standard" to-day will say: "Irritation is reasonably felt that the general repose should be disturbed by a handful of desperadoes; but nobody dreams of having them political blackmail." But I judge that the irritation is slowly developing into deep anger, which more provocation might convert into a deeper rage for retaliation. Already there talk, though not in public, of the possibility of an Irish vespers in England.

There is not the slightest evidence that the explosion had anything to do with Ireland; that it was not the work of persons purely depraved or not a simple independent expression of opinion on the part of some wild socialist.

The alleged attempt to blow up the Times office on the same evening has not received much consideration by the public or the officials, but the guards at the Irish office and at the Bank of England have been doubled, and parties placed all the Ministerial offices. A member said in the House of Commons last evening that he did not feel safe in the buildings unless the Irish members were present. The affair has made the Government decidedly uncomfortable, and there is a general sense of uneasiness.

The telegram from America, describing the reception of the news in New York by the adherents of the Irish Land League and the Irishing funds, have created a sensation. The Tories are particularly bitter against what they describe as the public contentment and encouragement which the United States has shown to the dynamite. Public sentiment against the murderous conspiracy they say is not strong or outspoken in America, or these open manifestations on the part of New York Irishmen would be impossible.

There is also a good deal of bad blood between English and Irish members in the manufacturing districts. After the Cheltenham explosion, in 1877, it was dangerous for anyone in the metropolis, at least, to be known as a Fenian, or even to be suspected of being in sympathy with the brotherhood, while Dr. Kennedy, who is by no means quiescent or afraid of assassination, retired from the defense of the prisoners, in whose behalf the essay attempt was made, in a pathetic melodrama then running in one of the theatres.
