

## PRICE OF GOLD.

Quoted daily by DEWEY NATIONAL BANK.  
SALT LAKE CITY, March 19, 1874.  
Baring at \$1.10. Selling at \$1.12.

## SPECIAL BUSINESS NOTICES.

MISS KATHERINE ROGERS will appear as "Leah" in the great drama of "Leah, the Forsaken," followed by the farce of "Turn Him Out," at the Theatre to-night. To-morrow, Miss Rogers as "Julia" in the "Hunchback."

"A SLIGHT COLD," "COUGH."—Few are aware of the importance of checking a cough or "slight cold" which would yield to a mild remedy, but if neglected, often attacks the lungs. "Brown's Bronchial Trochees" give sure and almost immediate relief.

AN OUTGROWTH OF OTHER DISEASES!—Catarrh sometimes exists alone, but is more frequently a symptom of other diseased conditions. The following letter explains it:

COLLINGWOOD,

Onondaga Co., N. Y.,

Jan. 25th, 1872.

Dr. E. V. Pierce, Buffalo, N. Y.:

DEAR SIR:—I have the honor to

acknowledge the receipt of your

kind letter of the 12th inst., in

reference to my case. I am

in my seventy-fourth year and

naturally of firm constitution. With-

in the last few years, from over-ex-

ercise, I have been afflicted with a

complication of diseases almost in-

credibly to relate. In the first

place Catarrh, to a degree that, to

me, it seemed that my voice passed

out at the ears, to which was added

its natural ally—Bronchitis; to

which, at no great length of time,

were added Neuralgic pains in the

head and shoulders and bloating of

the lower limbs, the most of which

was superinduced by a torpid state

of the liver. I had the advice of

several eminent physicians, and

tried almost every known remedy

for such complaints without relief.

A rapid loss of strength and waste

of flesh, reminded me that I could

not long withstand the continued

force of disease which was fast leav-

ing me down. I gave up all busi-

ness, made my will, had my grave-

stone placed in position and lettered

out, except date of birth and religion,

and awaited the end. I was, how-

ever, to my surprise, cured. I am

now, after the use of your medicine,

able to walk three miles with ease,

and feel that you have given me a

lease of ten or fifteen years—subject,

however, to the continuation of the

Court above. That you may live

long to do good to suffering human-

ity, is the sincere wish of

Your unknown friend,

LUTHER COLE.

WANTED.—A quantity of Dried

Herbs, such as Pennyroyal, Pile-

wort, Liverwort and Skullcap.

Apply to Dr. E. L. Plant, Office near

Meat Market, Market Row. Office

open from 11 a.m. till 3 p.m.

## LOCAL AND OTHER MATTERS.

Thermometer 39 degrees F. in the shade, at 1 p. m. to-day. Dull.

Interested.—Hon. A. P. Rockwood receives communications almost daily from parties interested in pisciculture, for reports of the fish department in Utah for 1873.

The Snowing.—We have had four or five days of it, on and off—that is all, and now it is from knee to almost deep in the streets and lots. This end of the winter is one of the old fashioned sort, and where there is any road at all, the streets are thrashed with the old, familiar, single file sheep walks, and stringing and wading and floundering along them is how the pedestrianizing citizens get about just now.

Scaffold and Elevator.—This morning we were shown, by Mr. E. F. Milhollan, the model of an Adjustable Scaffold and Elevator, patented by Mr. A. J. Heavners, the inventor, of Pittsfield, Pike County, Illinois. It is the most ingenious contrivance of the kind we have ever seen, and is suited not only for builders and painters, but for fruit gathering and a number of other purposes. By means of a crank and rope attachments the platform can be moved upwards or downwards to any desired height. The platform can be made long or short, as desired, by placing extensions at each end or removing them.

Mr. Milhollan is here for the purpose of disposing of the patent right for the Territory.

Well Boring Machinery.—On Saturday Mr. Thomas Winter received, from the East, a quantity of patent well-boring machinery. He has, as soon as the weather will permit, commencing operations with it in this city and vicinity. It is claimed that it is suitable for obtaining common wells as well as artesian wells, being similar to that used by Mr. House, of Corinne, when he struck a stream of gas at that place long since. The borer for a common well makes a hole eleven inches in diameter, which, when tubed with iron or wood, will admit a bucket eight inches across. The bucket is filled by means of a valve on the bottom. The machinery, which is known as the Jiltz Patent Well Auger, can either be manipulated by three men or by horse power.

Should the machinery do all that is claimed for it, there can be no doubt about Mr. Winter's finding plenty of employment with it, and it would prove a great boon to people living on the benches, where it is difficult to obtain wells by the ordinary process.

From Europe.—We have been permitted to peruse a letter from Elder Julius F. Wells, now on a mission to Europe, to President George A. Smith, dated Nottingham, England, Feb. 5th, from which we extract the following:

"Elder James T. Little and myself started in October for Vienna. On the way there we visited Brussels, Antwerp and Cologne, and spent a pleasant day on the Rhine. We remained in Vienna one day after the closing of the Exhibition, and were much interested in the narrow roads, vaulted underground passages, flights of street steps and picturesque houses of the old town, which stand out in strong contrast with the open boulevards, palaces, residences and extensive gardens of the new town.

"We proceeded to Munich, where we were delighted with the magnificent display of paintings and sculpture. An interesting spectacle was a procession of nobles and statesmen, headed by Prince Ludwig, uncle to the King, marching from the Jesuit church to the Parliament buildings to open the new Congress.

"After spending a day at Basel, we descended the Valley of the Jura, and arrived at Bern, where we were warmly welcomed by President Huber and Elder Henry Jones, with whom we spent Sunday. We were introduced from the pulpit to a German-Swiss congregation, and, although a considerable time was spent in translating, I think I never attended a more spirited meeting.

"We spent four days at Rome, saw all the antiquities of painting and sculpture we could in that time, and then proceeded to Naples, ascended Vesuvius, visited Pompeii and Herculaneum and enjoyed a delightful trip to the Blue Grotto of the Island of Capri.

"At Turin we were pleased to see, for once, a little desert, and order and arrangement of buildings in an Italian town. The streets are straight, being laid out at right angles and are lined with rows of trees.

"We stayed ten days in Paris. The unfavorable state of the weather prevented a number of trips to the environs, which we would have made had we not been so late in our arrival, and we therefore missed the animated appearance of the Court room, in high spirits and received our appointments to our respective fields of labor.

"I have been laboring in the Northern Conference for one month, under the direction of the President, Elder F. M. Lyman, and feel greatly blessed in my endeavor to do good, and learn as well as teach the road to salvation."

The Godling Moth.—The following article on the Godling Moth was read before the Horticultural Society by Mr. John Reading, and was recommended by that Association:

"The 'Godling moth,' or the apple worm, seems to attract considerable attention, and well it may, as it seems to have made great progress in the destruction of fruit, and unless some steady and effective measures are taken, the chances are that we will have a very poor show for fruit in the future.

"Considerable has been published already, giving descriptions and modes of prevention and destruction, so that any more said in that direction might seem superfluous. But if we are to take sure and effective measures to prevent the spread of the moth, we must continually keep the matter before the public, and recommend the most sure preventive measures to effect the object in view.

"The first operation should be to scrape the trunks of the trees where the bark is scaly, and wash over afterwards with whale oil soap or strong lye wash, to kill the eggs on the trunks. The scrapings should be collected and des-

troyed by burning. Another plan is to place bands of hay or paper, funnel shaped, around the trunks of the trees, say about two feet from the ground, to prevent their upward travel, changing every day or two and burning them. But the most effective plan is to place barrels or tubs of water in the evening, with lights placed on the surface, so low down as to prevent the wind from blowing out the light. By this means the moth is attracted to the light and either is burned or drowned. These lights should not be more than five rods apart. Another mode is to have the inside of the barrels covered or covered with something else of a mucilaginous nature, and that would catch all that come in contact with it. It seems that the months of May and June, or when the trees come into bloom, is the best time to put these plans in operation, as at that time the moths are on the wing.

"As Salt Lake City is the most afflicted with the Godling moth, I would recommend that there be an organization made for the purpose of effectually putting these plans into operation, and that the work be done with a will and untidely. If this be done, I do not doubt that the progress of the moths will be considerably stayed, and by such means we shall be able to secure to ourselves an abundant supply of good, sound fruit."

City Council.—At the meeting of the City Council last night the following, among a number of other matters, were attended to: Petition of W. B. Hibbard, asking that the ordinance, requiring special license to be taken by telegraph companies be repealed, was not granted.

The year's license fees of the W. U. T. were remitted.

Petition of W. Willis for leave to number the buildings of the city, was reported on adversely, and not granted.

Petition of D. A. & M. Society for the control of the waters of springs near Union Square, with which to irrigate Agricultural Park, was reported on favorably, and granted, on certain conditions.

Petition of G. Rushout and others for privilege of opening 8th West Street, between North Temple and 9th South Streets, was reported on favorably, and granted, on condition that Salt Lake County make a road on that street.

Petitions of John Proctor and others, and M. Bergstrom and others, asking that certain portions of the public streets be repaired, were reported on adversely, and were not granted.

The committee on municipal laws was instructed to draft an ordinance to provide for the numbering of houses, in accordance with the petition of General E. M. Barnum.

Personal.—We had a pleasant call to-day from Mr. Charles Miller, who is here in the interest of the firm of Messrs. J. W. Butler & Co., wholesale paper dealers, 18 & 186 Monroe St., Chicago. After remaining here a few days, Mr. Miller purposes proceeding to California. The firm with which he is connected is one of the most extensive in the line, as well as one of the most reliable in the country.

Incognizable.—The complaints about boys indulging in the dangerous practice of shooting those little birds that are flying around so thickly at this season are frequent and emphatic. A gentleman called to-day and showed us one among a number of small bullets which were shot at some of those birds and which struck a front window of Mr. Le Grande Young's house, South Temple St., endangering the lives of the inmates.

Apparently there is no other way to stop this practice than to have the parties engaged in it arrested and punished. Talking about the matter does not seem to effect much.

Still More of It.—The present snow storm is now said to be the heaviest of any in this city for ten or twelve years. About three to four inches more fell from last night till this afternoon, making a depth of probably twenty-one to twenty-two inches on the level. On the surrounding benches it is deeper.

The Temple Block snow plow has been doing good work in clearing some of the sidewalks, and a contrivance of the same character has been clearing the street railroad track.

The "shovel brigade" have had a lively time of it, clearing the snow from the roofs of buildings and awnings, as well as from the sidewalks in front of places of business.

Traffic on the street still continues to be greatly impeded.

Calico Ball.—We have an invitation to attend a Calico ball to be given at the 14th Ward Assembly Rooms, on Friday night, by the Alert Hose Fire Company. Wetzel's band will supply the music, and the general arrangements are in the hands of a good committee.

Theatre.—Last evening, notwithstanding the storm, and the lowering through the snow, a large audience assembled at the Theatre to witness the first appearance of Miss Katherine Rogers on the Salt Lake boards. The play was "Romeo and Juliet." The lady was well received when she appeared on the stage, and her hold on the audience increased to the close of the play. She was loudly called for at the end of the fourth and fifth acts, and in response she appeared before the curtain. Her performance throughout appeared to afford great satisfaction to the audience. Miss Rogers has many personal advantages. She is not tall nor large physically, but is of medium height, shapely, neat and elegant. Her voice is good and pleasant, and is agreeably and artistically modulated, although in the lowest tones it is not quite so satisfactory, and in them requires careful management. We do not say she is the best "Juliet" on the stage. That is saying a very great deal. But she is a very excellent one, and possibly, perhaps with the exception of Miss Neilson, is the best young "Juliet" we have seen. Acting would satisfy a very

talented and many charms and graces which help her much upon the stage, but to accord to her the possession of the imperial power of genius is what we can scarcely do to-day.

Mr. Sawtelle played "Romeo" creditably. Mr. Lindsay "Mercutio" passably. Mr. Crosbie always amuses.

This evening Miss Rogers will appear as "Leah," in the great drama of "Leah, the Forsaken," Mrs. Adams as "Anna," Mrs. Rea as "Dane Liza," Miss Cogswell as "Dane Groshen," Mrs. Crosbie as "Roma," Mr. Sawtelle as "Rudolph," Mr. Lindsay as "Butler," Mr. Crosbie as "Dr. Ludwig." The performance will conclude with the farce of "Turn Him Out." Mr. Crosbie as "Knucklebone Johnny," Mr. Vinson as "Sylvester Moke," Miss Adams as "Mrs. Moke."

On Thursday, Miss Rogers as "Julia," in the "Hunchback."

Will Meet.—The members of the Horticultural Society will meet this evening, at the usual place.

The Cause.—Some of our subscribers did not get their papers last night, the cause being that some of our carriers gave out in struggling through the deep snow before they got round their beats.

From Provo.—Mr. S. S. Jones, of Provo, arrived in town yesterday. He is here for the purpose of purchasing goods for the Provo Co-operative Institution.

Lecture.—This evening Mr. Frank Lee Chauvin will deliver his lecture on "The Reminiscences of a Rambler," at the 14th Ward Assembly Rooms, commencing at 8 o'clock. Before beginning the lecture he will recite "Shamus O'Brien," "The Gambler's Wife," and Sheridan's "Ride."

Admission free.

Caution.—It is an invariable evidence of cowardice for persons to attack those who are known to be weaker than the assaulting party. This is what a gentleman thought yesterday when he saw a number of dastardly fellows pelting a defenceless Chinaman with snow-balls. It is not excusable in boys to be guilty of such meanness, and how much more inapplicable therefore when indulged in by a lot of grown up, laxy "boobies," who should be arrested and fined for such inhuman conduct. They call such conduct fun, but if it is, it is very onerous.

Troops in Utah.—The number of United States soldiers at present maintained in Utah, is larger than the entire military force between Omaha and San Francisco, outside of that at Fort Leavenworth, Kansas, and Beaver there are stationed twelve companies of infantry and one of cavalry, each of which is full. These troops were placed there by order of President Grant, on the representations of Parson Newman. There is no need for them in Utah. The Mormons are law-abiding citizens, unless their peculiar institution of polygamy may be said to be in conflict with law. This army should be disbanded, and a million dollars or so saved to the Treasury.—N. Y. Sun.
