

MINING, BUSINESS AND STOCKS

BINGHAM HAS COUNTER-CLAIM

Some Interesting Developments
May Arise Over Suit Filed
By A. S. & R. Co.

ORE FROM GRAND CENTRAL

Is Involved in Controversy—Alleged
No Settlement Has Been
Made.

When the Bingham Consolidated Mining & Smelting company files its answer to the suit begun in the federal court a few days ago by the American Smelting & Refining company, in which the latter seeks to collect a bill of \$27,200.08, the value of a lot of blister copper retained after having treated a certain tonnage of ore from the Cactus and Boston Consolidated mines, a counter-claim will be put in to the tune of nearly \$40,000, and thereby endeavor to show that nothing is owing to the big company which has its offices on the top floor of the McCormick bank building.

Some months ago the American company experienced the need of silicic acid and the Bingham Consolidated, having a contract with the Grand Central Mining company, diverted the necessary ore from the Tintic mines of the latter corporation to meet the necessary requirements of the American's management. It is now claimed that the Bingham Consolidated has never received any compensation for the ore so diverted, and hence puts in the counter-claim.

ON MINING EXCHANGE.

The February Transactions Ran Up to \$640,000.

With the close of trading on the floor of the Salt Lake Stock & Mining exchange today, the totals for the month were rounded out. The records show that 1,335,301 shares were transferred, the selling value of which was \$640,764.54.

During the past week trading has been fairly brisk. Prices advanced materially at the beginning, particularly in Tintic issues, upon the announcement that the United States Smelting, Refining & Mining company had been ordered to the federal court for a modified decree, at the same time making the declaration that its metallurgical had successfully overcome the difficulties which have heretofore stood in the way of congenial relations between the smelting companies and the owners of farms in the southern end of the Salt Lake valley. Until States officials now insist that there will be no further damage done to vegetation through the operation of its lead smelter. This statement has a salutary effect on stocks. But it will be a month, probably more, before the United States company will be ready to receive ore again, as the case does not come up for hearing until March 30. This being the case, there is apt to be lower prices and there was plenty of evidence of it during today's trading. The Knight isles, however, are holding up very well. A feature of today's call was the demand for Nevada Hills which sold up to \$2.20. The closing quotations and sales were:

BOTH Z. B. B. S. and also the DESERET BUILDING SOCIETY were founded to help people get homes. Also to help their stockholders save money.

Men, women, boys or girls can pay monthly any amount from fifty cents to \$5.

THE RESULTS:
A stockholder paying in \$10 per month for 12 months would save out in cash \$22.00.
The stock then matures and he draws out in cash \$22.00.
Smaller or larger monthly payments would have results in like proportion.
Foster if for any reason a stockholder at any time desired to use his money he can get all his principal in cash and also annual interest at 7 per cent to end of the last fiscal year.
For those having monthly incomes who wish to save, I know of no other plan so good.
In March the Deseret Building Society, Office No. 15 East South Temple street, opens a new series of stocks. Subscribe now. All the profits go to the stockholder.
Directors and all officers except the Secretary serve without pay, and the Secretary draws only fair wages for actual work performed.
GEORGE M. CANNON.

BUTTE WHISTLES BLOW.

Mines of Great Copper Camp Will Resume Operation Monday.

Butte, Mont., Feb. 29.—John D. Ryan, managing director of the Amalgamated Copper company, who returned home from the east at noon today, announced that the mines of the company will resume Monday, when fires will be lit in the great Washoe smelters at Anaconda.

One minute after the announcement was made, the mine whistles on Anaconda hill began to blow, which was the first announcement the city had of the decision to resume. The order means the employment of a full force in the various mines and at the smelter.

IN FINANCIAL DISTRESS.

Haldeman Filter Tank Company to Go Into Receiver's Hands.

The Haldeman Filter Tank company is in financial distress. At least that is the inference gleaned from certain documents filed in the district court yesterday afternoon when the Utah Mining & Supply company is named as plaintiff in an action brought to recover \$14,824.21 and praying for the appointment of a receiver for the concern. It is alleged that the company is insolvent and unable to carry on its business and that if the company's property should be sold at sheriff's sale under execution the chances are it would not bring a sum in excess of \$5,000.

The property comprises letters patent upon a process for leaching ores, a testing plant, this city and a mill and equipment for leaching ores at Manning, Utah county, together with certain outstanding accounts, royalties due and to become due on leases, and the eastern end of the Consolidated Mercantile and Supply company.

The Filter Tank company has been operating a lease on the Manning dump of the Consolidated Mercantile for some time past, without achieving a brilliant success.

UTAH MINE DIVIDENDS.

During the month, three Utah mines declared and paid dividends amounting to \$33,000. The Mammoth of Tintic disbursed \$30,000; the Consolidated of Tintic, \$19,000; and Utah of Fish Springs, \$3,000.

CONCENTRATES.

One thousand Utah Copper "rites" sold in New York on the basis of 75 cents per rit.

The ore and bullion settlement reported late yesterday by McCormick & Co. were: Crude ore and concentrate, \$5,000; base bullion, \$45,000.

The Utah Mine company has a rich carload of ore at the samplers. It is said to be one of the best that has put in an appearance this year.

The oil drilling outfit ordered for the Virgin field in Washington county by H. H. Clark something like 60 days ago has arrived at Lund, Iron county, and will be forwarded to the scene of action at once.

J. M. McChave, formerly connected with the mine plant operated for a time in North Salt Lake, is now associated with the Colorado Zinc company and is installing a magnetic separating plant at the United Mine mines at Rico, Colo.

The hearing on the petition of the United States Smelting, Refining & Mining company for a modified decree to permit the operation of its lead smelter at Bingham Junction will come up before Judge Marshall on the 30th of March.

TINTICITES SEE GOOD TIMES AHEAD

Work Being Rushed on the New
Knight Smelter Which Will
Be Ready in May.

AJAX MAY RESUME AGAIN.

Property Has Been Closed for Several
Months—Other News from
Juab Camp.

Special Correspondence.

Eureka, Feb. 28.—Things are beginning to "pick up" in the Tintic district and there is every reason to believe that within a short time the camp will be back to where it was at this time or later last year. It looks like two or more smelters will soon be calling for Tintic ores, and that the local property interests are now closed will resume shipments. Among them are Uncle Sam, Colorado, Beck Tunnel, Mammoth, Lower Mammoth and others. "Uncle" Jesse Knight was in Tintic during the week for the purpose of looking over his interest in the Tintic property. He is building and is learned from him that if the United States company is able to run its smelter and will give him the right kind of a contract, he will immediately open up his mines and resume ore shipments.

Of course, these shipments would be only for a short while, for as soon as the smelter is ready, which will be about May 1, not much more than would cease shipping to the Salt Lake valley smelter and turn the entire output of his properties to the Tintic plant. The strike made in the new shaft of the Colorado mine, near the Tintic plant, places this company in a position to mine from two different points. Mr. Knight is pleased with the new strike, and with the outlook for the future. He thinks that the Salt Lake valley smelters will soon be calling for Tintic ore, but the conditions there will not interfere in the least with the Tintic smelter, which he is building, and which is being rushed to completion. The report that he will experience trouble in getting coal and coke, or at least the right kind of prices thereon, does not seem to worry him in the least.

There is a rumor among Mammoth that the Ajax will be started up again shortly. It is also rumored in Mammoth that there is some kind of a deal being consummated between the Tintic and Golden Chain companies, the nature of which has not been disclosed.

At a meeting of the Nevada Ferber Mining company held at Mammoth Monday it was decided to continue development on its Nevada property.

Three carloads of ore were sent out this week from the Ridge and Valley. This shipment was merely a clearing of the ore bins, and according to the statement of the superintendent, Jackson McChrystal, the company is not in a position to resume the steady shipment of ore.

A report was circulated in Salt Lake and Eureka this week to the effect that the Grand Central company would soon start the reworking of its main work shaft. The shaft, which is being run by the Grand Central company, is in the mountain to cut the vein at a depth of about 125 feet.

NEVADA HILLS.
A telegram from the west to H. J. Wile conveyed the information that six feet of high grade ore had been struck in the Nevada Hills mine. Inquiry was made at the company's office and President Wile said he really knew that he had received nothing authentic to indicate that any important developments had been made but was looking for a report from the mine about any hour.

The mine continues to look better all the time. Mr. Rice declared, "both on the 150 and 200 levels, where work is now in progress. We are making new shafts and the mine is showing no change of any special importance. But I ought to know something by Monday." The report of the find started several brokers to buying to cover up their losses and to make a profit on the strength displayed by the stock during the day's calls of the mining exchange.

SALT LAKE BANK CLEARINGS
For the week ending Feb. 29, 1908.
1908. 1907.
Feb. 24, \$52,134.92 \$99,709.24

LIVESTOCK.

Chicago, Feb. 29.—The wheat market opened active and strong because of heavy demand from commission houses and pit traders. The opening prices today were 2 cents above the closing of yesterday. Wheat was somewhat lower. May wheat opened 1 1/4 lower at 1 1/4, and sold up to 99 1/2. The strength of wheat and corn held the oats market steady although trading was very light. May oats opened unchanged to 1/4 lower at 52 1/2, and sold up to 53 1/2. The provisions market was strong on a 10 cent advance in the price of live hogs and a big demand for pork. May pork opened 1 1/2 to 1 1/2 cents higher at 17 1/2, and sold up to 17 1/2. Lard was 5 cents higher at 7 1/2 and sold up to 7 1/2. Ribs were 1/2 cents higher at 6 1/2 and sold at 6 1/2.
