The Times' Chefoo correspondent my the Liao river is extensively mind, and that 12 stone-laden junks re ready for sinking at the entrance b the river at a moment's notice. The ms of the Russian gunboat Sivoutch are been reshipped.

been made for a mass meeting of ten-ants for the purpose of devising means to fight the increase. It is claimed that the lease-holders brought about the latter by concerted action, and that they have added an average of 25 per cent to their rent rolls, largely for the purpose of increasing the valuation of the property. Some talk of a general exodus of tenement dwellers to the Bronx and Williamsburg has been heard but it is not likely to materialize.

Largest Sale of Tapestries.

New York, April 5 .- Probably the largest single sale of tapestries on re-cord in this country has just been re-ported here. John O. McLean, of Washington, and Cincinnati, was the purchaser. For approximately \$100,000 he has secured a series of eight seven-teenth contury pleas formerly in the teenth century pleces formerly in the Barberini palace. Cardinal Barberini was a devoted admirer of tapestries and had looms of his own. This series was woven for him in Rome from designs by Romanelli, a famous artist. All the tapestries are in excellent con-dition, woven in light colors, and so large that few private houses have the wall space necessary for their display. They were brought from Italy some years ago, having been sold to a resi-dent of Washington by Princess Barberini.

To Form a Poe Society.

New York, April 5 .- A movement to found the Poe society whose object shall be to provide a suitable Edgar Allen Poe memorial and to perpetuate his fame has been inaugurated here. Those in charge of the matter have an-ranged for a theatrical benefit to be held April 23 for the purpose of cre-ating a nucleus of the fund. Several speakers, including descendants of the next way way the several speakers and the several sever poet now residing in Baltimore, dis-cussed his life and works.

TO SAVE NEWSBOYS.

his boy, nor should he tolerate that force as a factor in education at all. "The great question is how to coun-teract that force, and it is not by hav-ing control of the boy for a few hours each day for a certain number of days a week that it can be done. It is by having the boy in charge 24 hours in

each day and every day in the year. The laws of our state are not to blame for the present condition. It takes the blood and the brawn of men and women to enforce even the best laws that exist, and to move the machinery of them.

Boys are allowed to grow up in the streets of Salt Lake City to become a criminal charge on the community. Is it worth while to allow these boys to learn to be men in this way? Street traffic leads to truancy. The hoy al-ways having an excuse for absence from school, truancy leads to idleness: idleness to mischief, and mischief to crime. Boys do not become criminals at once. The boy sees the district mes-senger boy a step in advance of him in the matter of money, and he is led to other wrongs from the example. By taking the boys from the streets the very boys who were emulating their fellows in the matter of commercial suc-cess (and these are the boys who are worth saving), can be saved.

worth saving), can be saved. "Only (wo boys were arrested for truancy during the last fiscal year, and eight for violation of the curfew or-dinance. The truant officers are not to blame, however, for they have no place in which to put boys guilty of such mi-nor offenses as truancy except the re-form school."

Captain Wood proposed three reme-dies, the establishment of a parental school where truants and violators of the curfew law could be cared for: second, the establishment of a corrective institution where first offenders could be detained and surrounded with gentle but firmly reformative influences; third, the classification of prisoners in penal institutions. This last is imperative in order to preserve youth from demora-lizing contact with hardened sinners.

Tragedy Averted.

"Just in the nick of time out little boy was saved," writes Mrs. W. Wat-kins of Pleasant City, Ohio. "Pneu-monia had played sad havoe with him and a terrible cough set in besides. Doctors treated him, but he grew worse every day. At length we tried Dr. King's New Discovery for Consumption and New Discovery for Consumption, and our darling was saved. He's now sound and well." Everybody ought to know.

ing has arisen to indicate that the scheme will not be a complete success. The ground chosen for the experiment con-tains more alkali than the average of the alkali lands in this valley, and it appears now that it will be possible and profitable for even the small farmer to rectaim these lands, by operating on a few acres each year, while it will doubtless be found to be a good business investment for cap-italists to undertake the reclamation of large tracts. Very soon after we began our work at Fresno, Cal., lands that had been valued at not to exceed \$15 an acre were held at \$60 to \$50 an acre."

WILL BE LEFT OUT. Col. Holmes Says This is to be Done

With South Jordan "Obstructionists."

The South Jordan canal "obstructionists" will be left to their own devices and ignored hereafter in the project for general irrigation improvement by the proposed arrangement with the general government. In referring to the matter, Col. Holmes says:

Holmes says: "It is too big a thing, there is too much at stake, to permit it to be blocked by a few persons who have in some way been blinded to their own in-terests. The South Jordan company will henceforth be left out of our calculations. except that their rights in the premises will probably have to be adjudicated by the courts, and the amount of water which it is decreed that they are entitled to-whether it is 50 or 0 second-feet-will be set aside for their use. With such men as F. S. Richards and others who are ad-vising the committee, to assist in formu-lating a plan, there is no doubt that mat-ters can be adjusted so that justice will be done to all concerned. There is no talk of abandoning the scheme. On the other hand, we are now getting down to the real work of placing it upon a basis which will admit of the government proceeding with its work."

The general committee will most again Thursday to adjust matters according to the present understanding.

Advisory Board Appointed to Assist Prof. Cummings at World's Fair.

At a special meeting of the state board of education yesterday afternoon in Supt. Nelson's office an advisory board was appointed to assist Prof. Cummings in getting together Utah's educational exhibit for the St. Louis fair. The board consists of seven prominent educators of the state as follows: D. R. Allen, secretary of the state uni-D. R. Allen, secretary of the state uni-versity; J. E. McKnight, principal of the normal (raining school; Prof. L. A. Ostien, of the Agricultural college; Prof. W. I. Brown, Salt Lake high school; Principal D. H. Adams of the Ogden schools; J. C. Brown of Provo, superintendent of schools in Utah county, and A. L. Larson of Ephraim, superintendent of schools in Sanpete county. county.

An estimate of the cost of the exhibit was submitted by Prof. Cummings which comes within the \$4,000 appropri ated by the Utah fair commission. The board decided to ask the county and city superintendents to secure photographs of the leading schools in the state, and also interior views of the same for use in the exhibit.

ELECT OFFICERS.

St. Mark's cathedral parish held its annual meeting last night, when these officers were chosen for the ensuing year: Senior warden, Morris L. Ritchie; it's the only sure cure for Coughs, Colds | junior warden, Graham F. Putnam vestry, J. L. Franken, R. L. Brown, S. L. Oswald, R. F. Haywood, R. D. Rhodes, C. H. Anderson and P. R. Fer-

diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay \$500 in legal money of the United States, or any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb, which they cannot cure.

ductive by draining them of alkall. The expert says: "When we began our tests last spring it was found that the 40 acres on which we were working here contained, to the depth of four feet, 6,000 tons of al-kall. After the drenching we gave it, through the tiling laid the year before, it was found that 5,610 tons of the alkall had been washed out, or that only 15 per cent remained. This spring we shall begin cropping this land, favoring cereals which will aid in the leeching process by devel-oping a strong root system. So far nothto her, the boy is gambling it or spend-ing it in ways equally injurious. Any boy allowed to run the streets with money to spend without guidance is in danger. This street life does not make men of the boys. It may educate them in one way, but it is not the way to make true citizens of them. The life of

County Commissioners Order Force of Men to Work in Big Cottonwood.

The county commissioners have in. structed Road Supervisor Thomas Mc-Ghie of Big Cottonwood, to put a force of men at work clearing out the snow slide in Big Cottonwood canyon. The slide is a large one, the snow being about 40 feet deep, and for the present the wagon road will be built over it so that the ore wagons and other vehi-cles may pass up and down the canyon. The mine owners will assist in making the road passable. Work will also be commenced on the slides in Little Cot-tonwood as soon as the weather will permit.

SOCIAL AND

PERSONAL.

ways. Men do not like a mannish woman. The sight of flowers often tranquilizes a woman's nerves and the perfume sootlies the temper. In America wrinkles are the greatest drawbacks to beauty that we have to fight. It seems dam Ave., New York City, Treasurer of as if we even see wrinkles in the faces of our very young girls. Life in the open air assists people to keep young. By living in stagnant air in a close room night or day the beauty of the complexion is spoiled. "Many people im-agine night air is dangerous," says Dr. Pierce, the great specialist in woman's diseases. "They exclude it from the sleeping rooms as far as possible by keeping doors and windows closed. This is a mistake. Young women are apt to hover about the register or stove, spending too much time in the warmth
