DANGER IN DISGUISE!

Summer Epidemics Unchecked: The Causes Explained and Some Timely Advice About How to Avoid It.

It is well known that hot weather brings sickness, and that few people go through the summer without unpleasant symptoms. The month becomes dry and parched, the tongue furred and white, the pulse irregular, the head feverish, the body cramped and the limbs swollen and tired. Ladies especially, with their natural delicacy and tendency to female troubles, find the hot weather almost unbearable, while Little Children are dying every day from exhaustion and because of neglect and incautiousness. A prominent and well known physician of New York asserts as his positive belief that more than three-fourths of all so-called summer complaints arise from disordered secretions, and that these secretory organs, which, by being out of order cause so much trouble, are the kidneys and liver. These organs are the great filters of the system, and by their movements the other parts of the body are regulated. The brain controls the life, but the liver and kidneys control the body.

There is one, and only one, known remedy that will positively regulate the secretory organs, the kidneys and liver, and thus prevent the many diseases of the summer. This is the famous **WATER'S KIDNEY AND LIVER CURE**. It is a pure, pleasant, and absolutely certain in its results. It keeps those who take it in perfect health, and it is the only remedy that is not dangerous. For all urinary complaints of either sex, it is infallible. For all bilious troubles it is certain. For this reason it is in demand, and it should be kept in every household. It is the only remedy that is not dangerous. For all urinary complaints of either sex, it is infallible. For all bilious troubles it is certain. For this reason it is in demand, and it should be kept in every household. It is the only remedy that is not dangerous.

EVENING NEWS

Friday, Nov. 10, 1890.
