Today is Weber county day at the Fair. There are also some Salt Lake people on the grounds, likewise scores of residents of practically every coun. ty in the state, with strangers from the outside thrown in to make good meas-

the total attendance reached 11.972. Today bids fair to run that total close. The conference visitors are beginning to be greatly in evi dence, in fact the advance guard arrived on the fair grounds by 9 o'clock. A number of them, brought their luncha with them apparently bent on spending the day. From now on the fair can he said to have caught its stride and in marching on after the double record of the best yet and the biggest attendance in the history of the Desered Agricultural & Manufacturing Society. In every department the judges have got down to work with the exception of the poultry exhibit which has been delaved owing to the non arrival of the judge. It is anticipated, however, that grards will be made in this department

The department of domestic arts in general, and the handwork in sewing in particular, as taught in the Salt Lake public schools, is attracting consider-able attention, among the educations-al exhibits. This work is taught the girls from the sixth grade up, and from the evidences of progress shog. It is easily seen that very practical instruc-tion is being given by Miss Corbett, the supervisor. The girls begin with the very first principles in plain sewing, and as they gain an adequate knowledge of these, steps upward are taken, and the more complicated work is taught. At the close of the granmar school life, the pupil is able to do fancy sewing, darn and mend any kind of goods, and are well fitted to do any kind of work required in the domestic circle. Chicago, Oct. 4 .- 'I would rather be John D. Rockefeller today, divested of his wealth and with his loveable persomality, than any of the crew, saints r slaners, who are attacking him." The foregoing is a quotation from an sterview published today by Dr. D. K. Pearsons, a Chicago millionaire, nation

ally known as a philanthropist. Mr. Pearsons continued:

"To the popular mind, excited just 10W by socialistic outcrys, there is no wealth that is untainted. This cry of 'tainted money' is no jest. It is unfair and not American. It has become the fullying cry of the socialist, the drone ud the discontented member of socie-y who hates those whose talents of ealth exceed his own. Mr. Pearsons, after talking in this

train with vigor for some time, showed recent letter which he had received com Mr. Rockefeller, Divested of per-

New York, Oct. 4 .- John A. McCall, president of the New York Life, was again called to testify before the specal legislative committee investigating the life insurance companies of this state when the sessions of the committoo were resumed today.

For the first time since the investigation began, James McKeen, associated with Mr. Hughes as counsel for the ommittee, conducted the examination. Mr. McKeen, who has been studying the technical and of the life insurance business opened by outlining to Mr. Mc-Call the power and scope of the commit-

tee and said its report to the legislature will in no way be limited by the testimony taken at these sessions.

Mr. McCall in answer to questions by Mr. Keen, when described in detail the system used in making reports to state insurance departments and also explained the mortality tables followed by the new York Life Insurance company

Mr. McCall was questioned as to surrender values under the Massachusetts laws and also as to non-farfeiture laws. He said the first non-torfeiture law was known as the law of 1861 and was the result of a general demand that a pol-

result of a general demand that a poi-icyholder should be remunerated for premiums paid if the policy was sur-rendered before its expiration. Mr. McCail seld a company surplus is earned by a less mortality than that assumed to be probable and also by securing a rate of interest on money and invertible better then the court and invertments better than that counted upon in the actuaries tables. Asked as to the difference between govern ment supervisore in England and state supervision in New York, Mr. McCall said there was practically no government supervision in England. The only thing of this nature, he said, was the filing of a statement by the insurance ompanies with the board of trade. Mr. McCall then went into a history of life insurance in this state, telling of the greater number of companies start-ed from 1875 to 1880, and of the failure of most of them through extrava-gance and incompetence. Mr. McCall said that the increasing compensation to agents was a tempta-tion for agents to rebate, but Mr. Mc-call said under the "Nylic" system the agents contracted not to do so and for-

violated their agreements. He then went into a detailed statement of gen-

During the testimony in answer to a uestion by Mr. McKeen, John A. Mc-all denied that the New York Life

Insurance company discriminated against American soldiers in the Span-

nore liberal terms with Spanish polloy-holders who might serve as soldiers than it did with Americans in similar

ircumstances. Mr. McCall said that the New York

law of 1899 did not wholly prevent re-bating but it had done much good and that the New York Life Insurance com-

pany had done as much as possible to make the law effective. He had dis-charged many agents for rebating. After explaining the tontine and de-ferred dividend plans of insurance. Mn

Generally speaking the judging this year has given the best of satisfaction. Usually there has been a numben of protents. To date there has been but one, there being some disagreement among the exhibitors of dairy products. This matter, however, was adjusted satisfactorily this morning and the incident closed. John H. White also failed to produce the pedigrees of his registered stock on demand of the judges and was given until this afternoon to do so.

THE DOG SHOW.

When it comes to a howling success, listen to the dawgs. Neatly groomed and full of ginger they arrived this morning-a great many of them in automobiles if you please. Since that time the brach show has been the liveliest place around the grounds. The smaller the dog the bigger the noise. One little brown fellow has put in the entire morning and part of the afternoon sitting down on his absurd little tail and howling his little throat out. Others have been trying to commit suicide by jumping off the bench and hanging by their chains, while still others have been industriously engaged in pleking quarrels with their neighbors and trying to tear down the partitions dividing them from the chance of a lifetime in the way of a gory finish fight.

San Francisco, Oct. 4 .- Acting United States Atty.-Gen. Purdy, with refer-ence to the naturalization frauds now being uncarthed here, has decided that being uncerthed here, has declined that an allen cannot file notice of a deter-mination of becoming an American citi-zen and subsequently serve in the ca-pacity of a seaman on a foreign vessel and be admitted as a citizen of the United States. The statute requires a continuous residence of five years with n the limits and under the jurisdiction of the United States before his admis sion and this requirement is not ful-filled by service on board a foreign ves-sel. If the courts were to recognize such service, he says, as fulfilling the requirements of section 21,70 of the recleed statutes, all that it would be recessary for an allen to do to be-ome an American citizen would be for him to file his declaration of intention and thereupon accept service on board a foreign vessel and remain outside the jurisdiction of the United States un-til the period of five years had expired,

and then come into court and be admit-ted as an American citizen. The opinion which was mailed to the local United States district attorney in response to an inscrimt attorney in response to an inquiry on the subject has an important bearing on the cases many masters and mates holding sitions on vessels sailing from Paulfie oast ports.
