

UNIVERSITY OF UTAH.

Salt Lake City.—Last night, the president and Mrs. Kingsbury entertained the graduating class of the University of Utah in the upper rooms of the museum building. The guests came at 8 and went home at 11. The evening was spent in handshaking, conversing and refreshments. Organist McCallan had charge of the musical program. About 250 people were present.

Yesterday Prof. Stewart and Miss May went to Richfield to take part in the joint teachers' institute of Sevier and Sanpete counties. Next Saturday, Prof. Stewart will deliver a public lecture at Tooele.

At the recent annual banquet of the Association of Civil Engineers, of Cornell University, President J. C. Schenckman of the institution was to have delivered a toast. He was unable to attend the banquet and Prof. Richard R. Lyman of the U. of U. responded to his toast.

For some time Prof. Toronto has been suffering from an affection of the eyes. To protect them he has worn colored glasses. On Thursday he was unable to meet his classes.

The Varsity engineers met on Monday and put the following ticket in the field for student body officers: For president, John C. Brown; secretary and treasurer, Alma H. Chambers; Chronicle editor, E. E. Meyer; member of the first athletic council, Everett. The election will take place next Wednesday. The art students have not announced their candidates yet.

James R. Smith, President Kingsbury's private secretary, went to Heber City, his home, yesterday evening, where he delivered a farewell address to a party given in honor of Principal Henry M. Aird of the Heber schools. Mr. Aird has taught in Heber City for the past 16 years, but will shortly move to Provo. The farewell party was given by the old pupils. Mr. Aird was graduated from the University in the early '80s.

On Thursday the fourth year Normal gave a reception to the public school superintendents. At 11 o'clock the visitors were received in room 10 of the normal building where they were entertained by a short musical program. From here they went to the kindergarten rooms, where luncheon was served from the department of domestic science. While eating luncheon complimentary speeches were made by some of the pedagogues while others responded to toasts. Supervisor Pollock of the city schools said he considered the University training school to be one of the best in the United States. Supt. James L. Brown of Utah Co., said that this normal class was one of the best he had ever seen. The musical program was conducted by Miss Ruth Dahlquist. Besides the critic teachers and supervisors of the training school, the following school superintendents were present: Dale B. Nelson, of the state schools; D. H. Christensen, of Miss Pollock of Salt Lake City; Wm. Allison of Ogden, W. S. Rawlings, of Provo, James L. Brown of Utah Co., B. W. Whitesides of Salt Lake Co., and E. M. Whitesides of Davis Co.

The Varsity Fine Arts club has perfected its organization. The officers are Don Beauregard, president; Garnet Atridge, vice president; Mr. Tucker, secretary; Oscar Carlson, treasurer; Dale B. Nelson, of the state schools; D. H. Christensen, of Miss Pollock of Salt Lake City; Wm. Allison of Ogden, W. S. Rawlings, of Provo, James L. Brown of Utah Co., B. W. Whitesides of Salt Lake Co., and E. M. Whitesides of Davis Co.

On Wednesday morning, during the absence of Instructor Maeser, the preparatory students met with Principal Goddard's class. The instructor delivered an address on the origin and evolution of the Bible.

During the past two weeks 15 members of the evening missionary class have been tendered farewell receptions in their respective wards and have left for their fields of labor.

Numerous enquiries have already been received respecting the business college summer school, which will open June 14, and will last throughout the summer.

A prominent attorney of Richmond, Ky., recently sent for the business college circulars and catalogue, and under date of March 18 writes: "This is the best and most complete business college I have yet seen advertised."

President Paul is at work preparing the circulars of the Deseret Summer Institute, which will be held at Logan, from June 20 to July 29. This school will take the place of all the summer institute courses heretofore given in any of the Church schools. It is the belief of several well informed professors that the summer school at Logan will be the best ever held in this state.

Instructors Macer and Klenke will have charge of a summer course of instruction, chiefly in drawing and woodwork, at the L. D. S. U. this season. The course will begin on June 13 and will continue for six weeks. It will meet the needs of young people of both sexes by providing first class work in hand training, and will be adapted to those of the seventh grade and upward. Boys and girls who go to school all winter and who are ambitious to learn something of shopwork during the summer will now have that opportunity. Circular letters describing the course are shortly to be sent out.

Next Friday evening, May 6, "A Grand Festival" will give a "Mid-Summer Knights' Feast" in the museum building. Following is the cast: Demetrius, Gertie Strobel; Deep Pitt, Henna; in love with Lyndon.

Forbes, in love with Demetrius. Fuzzy Moore, King of the Fairies. Miss Hopkins, Queen of the Fairies. Auntie Marshall, Mustard. K. Hamilton, Two Bands of Fairies. Judd Judd, Quince. Buck Tucker, Buttermilk. Tommie Thomas, Fudge. Bumper Johnson, Sour. Jack Farrester, Starving.

After the performance the fellows will give a dance. The price of admission is 25 cents. The proceeds will go toward paying off the Chronicle debt.

SALT LAKE CITY SCHOOLS.
Supervisor Dwyer read a paper on "Theory and Development of Manual Training" before the principals at their regular weekly meeting. He showed

the steady growth of the movement, quoted liberally from the reformers and other mediaeval educators, all of whom sought for the recognition of the importance of work with the hands. In conclusion the statistics on manual training work, or sloyd, in Sweden and in the United States were given.

All exhibition work of the Salt Lake schools will be ready for shipment by May 15. Six hundred square feet of space, consisting of four cabinets, is the Salt Lake City schools' allotment at the exposition.

Prof. Thompson of the Ogden High school visited the High school last Thursday.

Notices of re-appointment for the ensuing year reached the teachers this week. Early replies have been requested by the board.

Mr. J. T. Harwood, who has been spending some time in the art galleries of Paris, resumes his former position as instructor in art at the high school next year.

An animated discussion took place at the regular principals' meeting when the superintendent asked for expressions regarding the relative aptitude of boys and girls in each of the grades and in each of the branches of the curriculum. Various and almost diametrically opposite opinions were given, hence no conclusion was reached.

Principal Cross has been succeeded as treasurer of the Pithnall's association by Principal Dwyer.

Miss Pollock will supervise the Primary exhibit, Mr. Pollock, the music; and Mr. Parrott, the drawing.

The campus of the West Side High school was the scene of a neat exhibition by the four companies of H. S. cadets last Friday afternoon. At a recent competitive drill the boys of the East Side won the honors.

Mr. Garrett gave his second stereopticon lecture at Bryant Thursday morning. He took the school on a tour around the world.

Miss Quattrone recently gave a comprehensive talk before students of the East Side High school on "Greek Art."

Mrs. Munn of the Lincoln has on account of her ill health been forced to retire from the school room indefinitely.

The sum of \$75 has been presented by the French and German clubs of the high school to that institution for the founding of a gymnasium.

Eighth grade and high school graduating classes will hold forth at the theater for their commencement exercises.

L. S. D. UNIVERSITY.

Salt Lake City.—The school takes an excursion to Provo today.

Prof. Stephens sang in practice with the school at devotional on Wednesday.

George A. Fisher, manager of the Gold and Blue, is spending a few days in Heber City.

Miss Marian Jones is at school again, after an absence of one week, due to sickness.

Ezra T. Clark, a bookkeeping student of 1901, gave us a pleasant call during the week. He has just returned from a mission to the Eastern States.

The class in correspondence will study endorsements and simple contracts next week, then a short course in local geography will be given.

On Wednesday morning remarks concerning the good record and the death of Student Alfred Peterson were made by Instructor Maeser, President Paul, and the preparatory class president, N. H. Bullock.

On Thursday morning, during the absence of Instructor Maeser, the preparatory students met with Principal Goddard's class. The instructor delivered an address on the origin and evolution of the Bible.

During the past two weeks 15 members of the evening missionary class have been tendered farewell receptions in their respective wards and have left for their fields of labor.

Numerous enquiries have already been received respecting the business college summer school, which will open June 14, and will last throughout the summer.

A prominent attorney of Richmond, Ky., recently sent for the business college circulars and catalogue, and under date of March 18 writes: "This is the best and most complete business college I have yet seen advertised."

President Paul is at work preparing the circulars of the Deseret Summer Institute, which will be held at Logan, from June 20 to July 29. This school will take the place of all the summer institute courses heretofore given in any of the Church schools. It is the belief of several well informed professors that the summer school at Logan will be the best ever held in this state.

Instructors Macer and Klenke will have charge of a summer course of instruction, chiefly in drawing and woodwork, at the L. D. S. U. this season. The course will begin on June 13 and will continue for six weeks. It will meet the needs of young people of both sexes by providing first class work in hand training, and will be adapted to those of the seventh grade and upward. Boys and girls who go to school all winter and who are ambitious to learn something of shopwork during the summer will now have that opportunity. Circular letters describing the course are shortly to be sent out.

STATE BRANCH NORMAL.
Cedar City.—At student's chapel last Friday Jennie Corry sang and Albert Anderson gave a talk on the negro.

Miss Eastwood and Miss Spencer entertained a number of their friends at the domestic science department Friday afternoon.

The first year students had a class party last Saturday night.

Chapel exercises have been suspended while the stage is being erected in the auditorium.

Mr. Driggs is taking a number of pictures of the different rooms, from which cuts will be made for next year's annual.

Mr. Docker's physical geography class will take a trip up Cedar canyon Friday, returning Saturday. The purpose is to study the geological formation of that vicinity.

The Branch Normal track team will contest with the normal department of the mother institution May 13 at the University campus. This will be the first time the Branch Normal has contested with a northern institution; and

the team, which is now doing systematic work, will no doubt make a good showing in the coming meet. Instructor Milne is enthusiastic in the training of the boys and confident they will give a good account of themselves.

BRIGHAM YOUNG UNIVERSITY.

Provo.—Miss Alice Reynolds lectured last night before the Polytechnical society of the Beaver Branch.

Prof. Maw's students in chemistry are engaged in making qualitative assays of the city water supply.

Tom Higgs and Eugene Roberts, both of whom have been teaching, are back for the remainder of the year. Mr. Roberts has been engaged to attend the World's Fair in the capacity of the reporter for one of our Provo papers.

Tuesday evening there was a general meeting of the High school and Normal graduates, in which instruction was given relative to credits and the place of this class determined in the program of commencement exercises.

Dr. Byron W. King proved himself worthy of the eulogium given him in President Brimhall's introduction: "He is a king of his art." During his second lecture College hall was crowded with students and visitors.

President McQuarrie of the Eastern States mission, stopped off in Provo to visit the University. The students very much appreciated his half hour talk on matters connected with his work in New York.

New furnaces for assaying purposes are among the things arranged for in the science department next year. The completion of the new preparatory building will also relieve the High school building, and thus give more room for this part of the curriculum.

Prof. E. S. Hinckley returned Wednesday from a two weeks' trip in southern Utah, during which it was his pleasure to meet with the graduates of the Kanab district school. Part of his time was devoted to geological investigations in the grand canyon of the Colorado.

Considerable satisfaction is expressed among the students and patrons that there will be opportunity next year for taking a course in blacksmithing and general iron work. The new course in millinery is also meeting with much favor, and it looks as though there would be a large class next year.

President Brimhall declares that the demand made upon him for well equipped teachers is far greater than the supply. A noticeable feature, however, is the requirement that applicants must have had a complete normal course, which means among other things a course in normal training.

One of the memorable features in the hall given last Saturday night, on the occasion of opening the new school of arts and industries, was the splendid decorations. Streamers hung from the ceiling and the walls were beautified with the art work of Prof. Eastmond's and Miss Young's classes.

The staff of the "White and Blue" have looked forward with pleasure to meeting their compatriots, the staff of the "Gold and Blue" today. The two armies of the pen and scalars have carried on an interesting rivalry during the year concerning matters athletic, literary, and otherwise; but underneath it all has been a spirit of mutual respect and admiration.

Monday evening the students of the commercial school marched through the principal streets full of hilarity and a desire to let the people of Provo understand that they "were the stuff" in other words, that they were victorious in the inter-class contest held on the L. D. S. U. This was a victory well earned and not begrudged by any of their fellow students.

Prof. William M. Stewart was introduced to the students at devotional exercises on the morning of one of the students' educational enthusiasts. The professor responded fervently by turning around to President Brimhall and saying, "You're another," while the students gave vent to their appreciation by vigorous applause. They enjoyed Prof. Stewart's 20-minute address, and trust that he will not fail to give them one of his inspiring talks whenever he comes around.

Prof. Eastmond delivered a well timed homily last Wednesday morning at devotional exercises on the question of respect for things beautiful and artistic. "Ninety per cent of you students need not be reminded," said he, "that the value of art is as it reacts in culture and refinement. What I have to say applies to the one in every hundred whom the gods have chosen to endow with talent. He then related several instances of vandalism, characterizing the same in scathing terms.

Wednesday morning the campus committee called for volunteers to build a fence around the new grounds so that gate receipts might be charged today. The work is progressing at these notes are sent in. Judging by the enthusiastic response, it is safe to prophesy that this necessary part of the work will be done in time for the meet with the L. D. S. U. this afternoon. The quarter-mile track is in excellent condition. Some work, however, remains to be done.

Supervisor Dwyer read a paper on "Theory and Development of Manual Training" before the principals at their regular weekly meeting. He showed

STUDIES IN WHICH THE BOYS LEAD; IN WHICH THE GIRLS EXCEL.

N what subjects do the girls in the Salt Lake City schools excel the boys; and in what do the latter excel the former?

That is a question which has been given some thought of late by City Supt. of Schools Christensen and the principals of the schools. There is considerable difference of opinion on the subject. Oftentimes where the girls as a majority excel in a study, a boy will be found who is exceptionally bright in that particular study and who will far outshine the leaders, and in many instances a girl will be far in advance of the boys in studies in which they are classed as the leaders. That fact makes it very difficult to determine definitely which sex should be given the credit of supremacy.

It is an interesting fact that for the first three or four years, or during the time the children are in the primary grades, there is practically no difference in the work of the girls and boys in the majority of the studies, but after that period and all through the grammar grades and the high school, it is not very difficult to see that one or the other of the sexes excels in certain studies. But often in college and higher educational work it happens that the girls are leaders all through the grammar grades and the high school, and vice versa. It seems to be the opinion of the majority of those engaged in school work in the city that the girls in our schools surpass the boys in reading, spelling, writing, grammar and music, while the boys excel in arithmetic, algebra and drawing.

In reading, there is no perceptible difference between the boys and girls for the first two or three years, but later

er in school life the girls easily outclass the boys. This is due partly to the change of voice which takes place in boys, which makes them self-conscious and embarrassed and greatly retards their progress in reading. The same may be said in regard to music, in which study there is no material difference between the sexes during the first few years, but after which the girls take the lead. In the primary grades the boys spell equally as well as the girls, but in the grammar grades the boys drop behind and the girls easily outstep them. The home training of the girl is responsible for her superiority in writing, in which she leads the boys all the way through school. At home they are taught from infancy to be accurate, precise and neat in everything they do, hence it is no difficult thing for them to surpass the boys in the work the chief attributes of which are accuracy, precision and neatness.

The girls also lead in grammar and hold their supremacy in that subject until after passing the high school. In college life, however, and thereafter, it is held that the boys as a whole lead in grammar.

It is conceded that the boys have a safe lead over the girls in arithmetic, algebra and drawing. In the first two subjects it is often the case that a girl will be found who is far in advance of the boys, but she is a rare exception. In the eighth grade graduation a number of girls are invariably given the minimum mark in arithmetic, while the boys have to be given the minimum in grammar. The supremacy of the boy in arithmetic and drawing is due in part to his outdoor training in the matter of distances and measurements, which makes it easier for him to make calculations, and develops the eye so that he can more accurately draw objects which he comes in contact with in his outdoor life.

done on the baseball ground and the places for other athletic events.

Everything was fair in the late exhibition of art and manual training save the weather. A cold wind blew from the north and the sky was overcast. The students of the university were dampen the enthusiasm of the 2,000 youngsters that marched behind school banners through the streets of Provo, and gave vent to class yells and cat calls. The students of the university were well warmed to receive the visitors, and every opportunity was given them to make the most of their day out.

Superintendent A. C. Nelson visited the university the other morning and was introduced to the audience as the "four-S" man. He looked bewildered, and the students waited in suspense until the president explained the meaning of this epithet, viz. (1) Sevier county, (2) student Brigham Young academy, (3) Sanpete county teacher, and (4) superintendent of schools. The burden of the superintendent's remarks was the need of Utah boys preparing to get their share of the civil service patronage, only 30 per cent of Utah's part now comes to us.

President Brimhall spent the theological study morning with Professor Partridge's class, which is composed of young people, many of whom are not members of the Church. His theme was the growth of love. He showed that the requirements of the growth of love are not of attention and interest, with reference to any matter of human investigation. He showed that the best criterion by which to judge any man is a consideration of what he loves. Asking the students to imagine to cut away one object of love after he found that all agreed that the last love they would sacrifice would be the love of truth.

BRIGHAM YOUNG COLLEGE.

Logan.—Two friendly games of basketball and perhaps the last games to be played here this year, were contested last week by the classes of 1903 and 1904. The first game was won by the other class won the second, so at present the two classes stand even as regards basketball.

The April number of the Crimmon is out, and it contains a great deal of interesting material, reflecting a great deal of interest on the Crimmon staff.

As a result of a meeting of the board of trustees at the college last Friday, President Joseph F. Smith, Bishop Preston, President Joseph Morrell, and Lyman R. Martineau were present on the rostrum in devotional exercises on Friday evening, and gave some very good advice to all present. We felt much honored in having the presence of these brethren and if the people of Logan had known of their presence there would have been a greater attendance at devotional exercises that morning than there was. Bishop Preston was the first speaker and he told the students that they would never have greater opportunities than they

have at present. He advised them to learn with good will, how to do and what to do on all occasions. Trustee Lyman R. Martineau was the second speaker. He advised the students to cultivate courage. Courage is a quality that can be used on all occasions, President Smith spoke next. He expressed an interest in the college and other church schools. He warned the students to be courageous in the cause of truth. "The tendency of the world is for self, and it does not require courage to go with the tide, but it does require courage and manhood to do good even if we suffer wrong in doing so. Have courage to act so that when you die, you can be said to you, 'He was a man of God.' Never be fearful. Be modest and leave others to judge of your merits and good deeds. It can be said, in short that President Smith's talk was one of the very strongest that has ever been made from the rostrum of the Brigham Young college.

Prof. Mosiah Hall reports having had a most profitable and enjoyable time while conducting the institute in Garden City last week.

The Usona society met on Tuesday evening and rendered a very interesting program.

The students of Hyrum stake met Thursday evening.

A committee of the Alumni association is busy getting material ready for the alumni number of the college bulletin to be printed in May.

T. N. Curtis, a special student in music, entertained the school on Wednesday morning by playing the piano in chapel.

Sister Zina Young Card, addressed the young ladies in a separate meeting on Thursday.

Through the courtesy of Senator Reed Shout from Utah the college library has just received 107 volumes of very valuable government reports.

Considerable business was transacted at a meeting of the board of trustees, held at the college on Wednesday, May 1, corner where the creamery is located, was purchased. The building will be used in the future for domestic arts. The Thatcher house, purchased last summer, will be used by the music department.

The college authorities are always glad to have members of their faculty prepare for the very best work that can possibly be given in various lines. A. B. Wright was given a leave of absence two years ago, and although he was a leading artist when he left here he has made more than ordinary progress and will return next fall to continue his work at the college. Instructors Ridges and Henderson were granted leaves of absence for one year, at the last meeting of the board.

President Linford will address the graduates at Clifton on Friday.

On account of quarterly conference to be held in Logan on Sunday and Monday, school will be dismissed on Monday so that the teachers and stu-

dents will have an opportunity of attending the meetings.

The class of 1905 will give a party in the gymnasium on Friday evening.

The first game of the Cache valley baseball league was played last Saturday on the A. C. campus by the teams of the A. C. and our college team. Our team was successful in scoring a victory by a score of 14 to 2.

WEBER STAKE ACADEMY.

Ogden.—There was no school Monday on account of conference of the Weber stake. The school attended in a body.

One of the pleasing features of conference on Monday was the singing furnished by the academy choir at both sessions.

The principal perpetrated a cruel practical joke upon the students at devotional Wednesday morning by informing the school in a matter-of-fact way, that "preparations were under way to take the school to the world's fair." This intelligence was received with enthusiastic applause, which, however, was of short duration because of the words that followed: "The photographer will be here on Friday at 2 p. m., to photograph the student body, the building, and some classes and classrooms; this will be the means of our going."

Last week the physics class paid a very profitable visit to the street railway power house on Washington avenue. The members of the class are much indebted to Manager N. C. Fygar and the engineers for the many courtesies shown them, and for the valuable information gained.

The class in botany has finished the text and laboratory work and will devote the remainder of the year to the collection and analysis of flowers. The class took its first field trip Wednesday afternoon and secured a large number of species on the bench east of the city.

The class in physics has just finished the subject of electricity, and is now giving the subject a thorough review, through the kindness of Manager E. W. Wade, the class visited the electrical power house at the mouth of Ogden canyon Tuesday afternoon. Much interest was exhibited in studying the great dynamo and the method of generating electricity by means of a dynamo. Much valuable information was given by Mr. Nimms, in charge of this machinery, who took great pleasure in explaining to the visitors the details of construction and operation of the machinery.

Principal D. O. McKay visited Farmington last Sunday at the invitation of the stake board of Davis stake, and addressed the teachers in union meeting on the important subject of "How to Prepare a Sunday School Lesson."

Professor Terry was sustained in conference last Sunday as first assistant to the stake superintendent of Religion Classes.

Night school held its last session of the school year Wednesday evening. Brief summaries of the work done in the Book of Mormon and doctrine classes were given by Ashby Hoyle and Leonard E. Nelson, respectively.

Prof. McKendrick made a report of the school from which we glean the following: Number regular students enrolled, 31; number missionary students enrolled, 25; total, 56. These students were distributed in the following classes: Book of Mormon, 35; doctrine and principles of the Gospel, 43; arithmetic (courses A and B), 28; English (courses A and B), 31. Number of sessions held during the year 45. After a brief report of the work done in English by Prof. Bradford, the school was addressed by Principal McKay, who commended the students for their "stick-to-it-iveness," and urged upon the missionary students, many of whom are soon to depart on missions, the necessity of gaining a testimony.

Algebra I is taking a thorough written review of the ground passed over during the semester, preparatory to entering fractions.

The class in plane geometry has finished the text and will devote the rest of the semester to review and the solution of practical problems. Throughout the course, practical work has been emphasized and when the semester has closed, it is expected that supplementary work will have been done to the extent of nearly 600 practical problems.

Efforts are being put forth to have the academy represented at the fair. The work already submitted from the domestic arts department reflects great credit upon the girls.

Mrs. Evans went on a business trip to her old home at Lehi last Friday. She returned to her work in the academy Monday morning.

The class in pedagogy completed Chicago's History of Pedagogy about March 1. Since that time it has considered Parker's "Democracy and Education," and also his chapter on reading, "School and Society," by John Dewey, is now being read.

The students of the psychology class

have just completed the text book (Haleck) and they will spend the remainder of the year in review and in the consideration of "Habit," by James.

Prof. McKendrick lectured to the theory class on Thursday on the subject of "Nick Names in Arithmetic." "Number is an idea and therefore abstract." "Traction is the ratio of the part to the whole and integer is the relation of the whole to the part." "A factor is the exact measure of a given quantity. A multiple is a quantity that is exactly measured by a given factor." The above were some of the points emphasized.

Mrs. Evans delivered a lecture on domestic art before the Child's Culture club at the home of Mrs. Smurthwaite Friday at 3 p. m.

AGRICULTURAL COLLEGE.

Logan.—The board of trustees met at the college last Saturday and completed arrangements for next year's work. They were especially pleased with the work being done and the prospect for the coming year. They took dinner between the sessions with the domestic science department. President Kerr's report showed a registration of 623 students during the year, representing 23 counties of Utah, and 14 states including Canada. Practically the entire faculty was re-elected. Mr. Jardine was employed as assistant in the station and college in agronomy; and Miss Grace Fisher a student at the University of Michigan for a number of years a graduate of the general sciences course of the college last year and a graduate student this year, was elected as instructor in history to fill the place made vacant by the resignation of Mrs. Ogden. Prof. Wilson of the department of modern languages, was granted a two year's leave of absence for study in Europe.

Mr. Horace Kerr returned from Salt Lake last Monday, much improved in health.

Stitch work was done on the athletic field last Monday by 23 loyal students who worked with rakes and shovels to get the track in shape for spring practice.

Dr. Engle, chairman of the committee on the new school has returned the proof to the printer and expects to have the circulars ready for mailing at an early date. The distinctive work of the college such as domestic science, agriculture, mechanical arts, nature study, and in addition courses in nature study and educational psychology and methods will be given by men especially trained in these lines. Students will obtain credit on the college records for all work done.

Bulletin No. 57 by Prof. Hall on the codling moth is now being mailed.

Eight varieties of mother beets for the production of seed, and 21 other varieties for the production of mother beets have been planted on the farm. The water is to be measured and all the factors are to be carefully controlled in the growing of these, as it is a co-operative experiment with the department of agriculture for the production, if possible, of a variety of sugar beets especially adapted to our soil and climate.

Misses Gardner and Hale give one of the series of high teas at the college dining room today.

Dr. Yoder is busy in the chemical laboratory with some sugar beet analyses, and the usual summer work of soil moisture experiments.

The senior girls in household economics are studying house-cleaning and applying their chemistry to the matter of renovating carpets, furniture and tapestries.

The third year manual training girls are, we presume, hoping that some one will faint as they are studying emergency work and first aid to the injured.

The sophomore girls in the theory of cooking are studying the comparative food values of the different kinds of breads including white, graham and whole wheat.

Pirating Foley's Hokey and Tar.

Foley & Co., Chicago, originated
