

Friday, July 11, 1873.

GEORGE Q. CANNON,
Editor and Publisher.

THE COURTS.

The Courts of Law, Courts of Justice, some people frequently and erroneously term them, in this country, at least in many portions thereof, are not regarded with that profound respect and deference which they are among other civilized countries. There are reasons for this, one of which is that the courts, in many instances, unfortunately do not prove themselves worthy of profound respect, and another is that the democratic "one man is as good as another, and a great deal better" doctrine has an influence on the people which leads them to regard authorities lightly. The courts are the arbiters of life and death, as well as of property and liberty, and the supreme majesty of the whole nation is, or should be, represented, reflected, or embodied in them. The officers of the court ought to be of such metal as to be without fear and without reproach, and it is due to their talents and vastly importantness of their office that they take a course which is calculated to preserve them, not only unspotted but, if possible, unsuspected. That the contrary is frequently the case, is too painfully patent, and has hitherto been widely known in many ways, besides the lack of respect and deference with which such looseness inspires the people at large.

Stories on his last conviction, indulged, in open court, in disrespectful and漫骂反射的 reflections, and actually became engaged in bandying words with the judge, the latter, especially, a circumstance which, one would readily suppose, regard to the dignity of the court, would have prevented, as the evidence was fully convincing of the occasion, and naturally enough elicited the surprise of foreign journalists.

More recently another instance of a similar character at Cincinnati, was narrated in the Indianapolis Journal and other papers. A negro named Kelly, convicted of grand larceny, was taken into court for sentence, and on being asked why such should not be passed, he said he was disappointed, he expected a motion for a new trial would have been urged and his case appealed to the Supreme Court. No motion for a new trial being found on file, the prisoner asked time for his lawyer to file such motion. This the Court (Judge Mardock) refused, as it was the instant of sentence, and the counsel had already, in time past, been sentenced to the penitentiary for seven years, when the following colloquy ensued—

"Kelly—if there were any higher punishment you could not put it on me."

"Kelly—I believe the safety of the community demands it."

"Kelly (to the Judge)—If I live to get out, I will kill you."

Judge Mardock—That shows what I have said is true—that the safety of the community demands your imprisonment. The Legislature has limited me to seven years. You ought to have more."

"Kelly (to the Judge)—It is a pity you could not give me a term of life."

Judge Mardock—It is a pity, because the safety of the community demands it."

No judgment so primitive as the dignity of the court by engaging in any such colloquy with a condemned criminal. After sentence is passed, the convict should be immediately removed, and the Judge ought to preserve a demeanor which would give the convict no opportunity for the latter to draw the former into a wordy argument or colloquy, the time for argument or colloquy having passed and that of execution having commenced. If a prisoner or convict manifests any leaning towards such an inane exhibition in court, the Judge, at least, ought to have sufficient discretion to nip the affair in the bud.

THE AERIAL VOYAGE TO EUROPE.

More than a quarter of a century ago Prof. Wise argued the feasibility of a balloon voyage over the Atlantic to Europe, and in 1840 he petitioned Congress for aid to demonstrate the feasibility of the project. He made a voyage from St. Louis, Mo., a distance of 1,200 miles, nearly half the way to Europe, in nineteen hours.

The city of Boston, Mass., had consented to furnish the Professor the means required to make the experiment, but the great fire postponed the fulfillment of the experiment. This led the New York Graphic Company, after consulting the best scientific authorities on the subject, to offer to furnish the means for attempting the project. The cost of \$10,000 was estimated at \$5,000, but in order to cover all contingencies had to insure success financially \$10,000 is the amount since named. The Domestic Sewing Machine Company offered the use of one of the flags of their organization standing at the corner of Bowery and Fourth streets, for preparatory purposes, and also volunteered to do the sewing work (about 1,000 thousand yards, or four miles) at their own expense.

The following is a copy of the agreement entered into by the parties concerned, as it appears in the Graphic:

This memorandum of agreement made at the City of New York, the twenty-first day of June, 1873, by and between The Graphic Company, proprietors and publishers of The Daily Graphic, party of the first part, and John Wise, of Philadelphia, party of the second part, witnesseth,

The New York Graphic Company will send a flag, one thousand yards long and thirty yards wide, and one hundred feet in diameter, to be fully equipped and provide the same with a grommet, rope, car and gallery, life boat or raft, and all other appliances necessary for its erection. It is agreed that the construction of the same shall be done as rapidly as possible, and before the 25th day of August next, if practicable, and at a cost of not less than \$10,000, and the sum of \$10,000, to be paid to the New York Graphic Company, for the use of the flag, for the four days, except charter, and the grommet, rope, car and gallery, and women, three dollars. The minimum sum of regular monthly dues is ten cents from each member.

First—that the said John Wise and Washington H. Donaldson shall generally represent and direct the interests of the members to the extent of their ability to-morrow night.

MOONLIGHT EXCURSION.

ALLIANCE was made in last evening's issue on the moonlight excursion which it was anticipated would be made from Lake Side to Lake Point and return on Monday evening, August 1st. The public are informed that the excursion is to be a select one. We are decidedly opposed to such night excursions as this now advertised, and think them unsuitable for this community to participate in. We are told that this is to be a select party, but advertised as it cannot be selected.

Second—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Third—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fourth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Sixth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Seventh—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Eighth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Ninth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Tenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Eleventh—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twelfth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirteenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fourteenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifteenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Sixteenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Seventeenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Eighteenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Nineteenth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twentieth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-first—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-second—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-third—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-fourth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-fifth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-sixth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-seventh—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-eighth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Twenty-ninth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirtieth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-first—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-second—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-third—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-fourth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-fifth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-sixth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-seventh—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-eighth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Thirty-ninth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fortieth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-first—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-second—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-third—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-fourth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-fifth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-sixth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-seventh—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-eighth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Forty-ninth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fiftieth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifty-first—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifty-second—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifty-third—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifty-fourth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.

Fifty-fifth—That the said John Wise and Washington H. Donaldson shall, on a moonlight excursion, make a starting point to be followed by The Graphic Company and making such arrangements as they may desire, to any point or points of the eastern air current, there to remain until land shall have been made on the eastern side of the Atlantic Ocean.
