

IN MINING CIRCLES.

Time Work by the Bulls and Bears in the Pit Today.

ANACONDA THE ONLY MILLER.

Labor's Process for Smelting Ore—Great in the Mercur District—The Jennie and the Spry.

Today's call on exchange was quiet and an all day, only one sale materialized, while the brokers were in the pit and the transfer of a thousand shares of Richmond Anacosta stock at 2 cents a share.

Commenting with Anchor the bid was 50 cents, but offerings of the stock were too high to make transfers possible. Alex was asked for at 25 cents, as against holders' demands of 20 cents, lower than while they subsequently related to go, while Beck was asked for a good while past—slumpy—and the day failed to bring out any special reaction. The Spry, however, was fairly good at \$1.50 and the stock was offered for sale at ten cents above that figure. Mercur, on the other hand, was bid for at \$7.75 while Mammoth, Northern Light and the others were only asked for at half a cent.

At the Montana was the first stock called for in the unlisted class and it was bid at 40 cents. The Spry was then in about stationary condition, while Richmond Anacosta recorded a sale at 25 cents and the Spry was bid for at 25 cents. Colorado Park showed better strength and Japan was offered for sale at half a cent.

The closing figures were as follows:

LISTED STOCK

STOCK	ASKED	BID
Anchor	50	40
Beck	25	20
Colorado Park	25	20

PHYSICIAN'S OFFICE

J. B. Linder, M.D., Physician for the Treatment of Women.

The appearance of J. B. Linder in the mining field of Idaho county is of greater importance than any other event since the Utah-Columbia started operations here, says the Deseret News. Mr. Linder is a physician of the highest standing in the West, and his presence in the development of the province that has been the fortune of Idaho county is a great asset. He was in the country only last November, but it had been in operation before that and his work at \$100 per month in the first five months paid \$150,000 dividends.

The physician is destined to revolutionize the medical business. The idea is not wholly new for it was used in Sweden many years ago, but Mr. Linder has made it practical in what are called reflexology and at the maximum cost of five dollars a tin. The average is probably only one or two dollars a tin, and the cost of the treatment is only a few cents. It is a heavy expense for the patient, but the results are so good that the patient is willing to pay for it. The physician is a man of high standing in the medical world, and his presence in the mining field is a great asset. He was in the country only last November, but it had been in operation before that and his work at \$100 per month in the first five months paid \$150,000 dividends.

ECZEMA

Most Torturing, Disfiguring, Humiliating.

Of itching, burning, bleeding, scaly skin and rash, humors, is instantly relieved by a cream with CURTIS'S Ointment, a single application of CURTIS'S Ointment, the great skin cure, and the full dose of CURTIS'S Balm, a product of blood purifier and humor var.

Like Collier's Electric Plaster, relieve warts, boils, itching, and all skin troubles, and cure them.
