AS TO NATURALIZATIONS. Sumber Who Have Become Citizens of The United States Since Statehood.

In looking up information in regard to naturalization frauds for United States District Attorney Lippman, as indicated in a letter to that official from At-

torney-General Knox, published in full in yesterday's "News," County Clerk James has compiled some very interesting statistics on the number of na turalizations in this county since state hood. The total number admitted t citizenship in the county since Janu ary 7, 1896, is 974. Of that number 377 or more than a third, were from Grea Britain: 259, more than a fourth, were from Norway and Sweden.

The largest number in any one year was in 1900, the year of the last presi-dential election, when 560 new citizens were admitted. The cierk in his search ound that no Armenians nor Syrians he nationalities complained of in nauralization frauds, have been admited in this county since statehood

Again Bombarding Fort San Carlos-Diplomatic Circles Are Much Aroused by the News - No Advices of the Bombardment Received in Berlin.

London, Jan. 22 .- The British governnent is entirely in the dark regarding he reasons for the aggressive action of the German naval authorities in again bombrding Fort San Carlos at the enrance of Lake Maracalbo. The foreign office is apprehensive of the result of the bombardment. They say no deision has yet been reached on the question of the suspension of the blockade. It was hoped that matters would have progressed further before now, but this

was largely based on the belief that Minister Bowen would reach Washington earlier than by did.

The only press comment on the sec ond bombardmen) appears in the St. James Gazette, which repudiates the aggressiveness of the Germans, and says it trusts "the Americans will un-derstand that the German proceedings tre as little approved by the British as

The diplomatic circles are much aroused by the news of the bombard-ment, but the officials of the various mbassies seem as ignorant as the refr sign office regarding its cause. The belief prevails that the step taken by the German commander will seriously delay the settlement of the questions in dispute. There are many indications that the blockade will not be raised for the present, and that the negotiations at Total 974 present, and that the new with perhaps Washington will proceed with perhaps a modified form of blockade or some similar arrangement as the preliminary

NO NEWS IN BERLIN.

Berlin, Jan. 22 .- Neither the foreign office nor the navy department has received reports of the bombardments of the Fort San Carlos, At both places It was declared that no orders were given to bombard the fort. The naval officials admit they knew the Vineta was proceeding to Maracaibo, but they did not anticipate a bombardment. The foreign office regrets extremely that it is unable to publish a report on the subject due to the fact that it is wholly without information, through defective methods of communication by way of

erything depends upon the disposition of the Venezuelan government. Should the forthcoming negotiations with Minister Bowen satisfy the powers that Venezuela is determined to do every-thing possible to meet her obligations, the powers will terminate the blockade at the earliest possible moment. The belief is expressed that President Castro's offer to set aside the customs as a guarantee may prove to be a work-able basis for a satisfactory solution of the present difficulties.

NEWS IS CONFIRMED.

Washington, Jan. 22,-A cablegram has been received here from Mr. Rushas been received here from Mr. Rus-sell, American charge at Caracas, con-firming the press report to the effect that three German warships began to bombard Fort San Carlos yeaterday. The cubiories does not indicate ablegram does not indicate the result at the bombardment, and, in fact, con-

ains no other detail. There is a singular relicence on the part of the state department officials, suddenly developed in connection with

the Venezuelan situation and espec-lally with reference to the German bombardment which may be significant of the gravity with which they view the situation. There is no longer any talk of exerting friendly influences to prevent the bombardments, but it is difficult for the department to answer congressional callers, who are seeking for a reasonable explanation. An annoying feature of the situation is the probability that there may be a seriprobability that there may be a scri-cus interference with Minister Bowen's mission, in which the United States though not officially concerned, is deeply interested. There were many rumors alloat to the effect that the state department had taken steps to point out to the foreign offices at Lon-don Herlin and Rome its view as chidon. Berlin and Rome its view on this subject but this could not be confirmed and today it was stated that at the present the attitude of the United

States must be one of patient waiting. Secy. Hay still remains at his home nursing a cold. Such business as Mr. Bowen has to do with him is transacted at his house. The minister was up at an early hour this morning and disappeared from his hotel so it was said, as cards were refused save to the German charge, Count Qaudt, who returned unexpectedly from New York last night. He had been awaiting the ar-rival from Europe of his family. So it
