

## A Great Singer at the Jubilee.

The next feature was the singing of Madame Peschka-Lutner, who created a furor of enthusiasm whose like we have never before witnessed. Her voice is of remarkable power, and was distinctly heard in every corner of the vast building. It is full and flute-like in quality, and is almost phenomenal in its extraordinary compass, and the clearness and purity of its extreme upper notes. Her execution, too, is little short of marvellous in the perfect ease and grace with which she renders the most complicated and trying difficulties. She sang an air and variations instead of the piece announced in the bills, and was frequently interrupted in the middle of a cadenza by a storm of plaudits from the audience, who found it impossible to repress their admiration at the astounding vocal resources of this paragon of artists. At the conclusion of her performance the orchestra and audience arose en masse and cheered and applauded till the vast building vibrated and echoed to the tremendous outburst. Mr. Zerrahn impulsively seized her by the hands and warmly congratulated her. We have never witnessed such a scene of frantic enthusiasm as that which greeted her. Again and again were the plaudits repeated until she returned amid a thunder of welcoming cries and applause, and sang the last variation once more. Madame Leutner is beyond all question the most perfect and astonishing vocalist to whom we have ever listened. Her intonation is perfect, her style without a flaw, and her method a marvel in the perfect control she has over the exceptionally high notes of her voice, and the exquisite fulness, purity, sweetness and certainty with which she sings them.—*Boston Post.*

## The Texas Pacific Railroad.

This contemplated railroad begins at Marshall, Texas, about 300 miles west of New Orleans, and runs through Texas, New Mexico and Arizona, on the line of the thirty-second parallel, terminating at San Diego, in California. It has a land grant of 13,500,000 acres. This road has also a large moneyed subsidy from the State of Texas, when it shall be completed to the western line of that State. This road, running about 200 miles south of the Atlantic and Pacific road, may, by southern branches, be extended to the city of Mexico; the Mexican branch would be about 800 miles in length, and when completed San Diego would be brought into direct contact with the trade of the two rich States of Sonora and Sonora. This road is authorized to connect at the Colorado, near Fort Yuma, with the Southern Pacific railroad; thus bringing the Southern and Mexican trade direct to San Francisco over the Southern Pacific road. The Southern Pacific is now being pushed rapidly through the valley of the San Joaquin, is already completed to Visalia, and by September will be at Bakersfield, in Kern county. This point is about 250 miles from the proposed point of junction with the Texas Pacific road. The Texas Pacific road is authorized by Congress to mortgage their lands, and it has already issued construction bonds upon the security of the lands. This company have commenced work on the eastern end, and are compelled by their charter to build 100 miles each year, and upon the western end to construct twenty-five miles per annum after this year. The general line of the road is along the thirty-second parallel. This company is under the management of Thomas Scott, of the Pennsylvania Central, one of the railroad magnates, and he promises to push the matter with the utmost expedition. For 450 miles through Texas the lands are prolific, and will be of great value as soon as they are accommodated by the road. It is safe to predict that this road will be finished in three or four years from this date, and thus open up not only in our State, but in Arizona and New Mexico, an area of territory now almost inaccessible, and make a large reach of it tributary to our State and city, and giving us an independent through line to the Southern States, open at all seasons of the year.—*San Francisco Chronicle.*

The city of Brighton, England, lately paid out \$5,000 for the conviction of a woman for murder, but just as she was nearly off their hands, the doctors pronounced her insane, and the treasury of the town is now responsible for her support as long as she lives.

"It is a sin to steal a pin," even if the pin has a diamond attached to it.

The Cincinnati *Commercial* speaks of "the abominable, enervating and joyless picnic," as one of the American barbarisms that are scarcely tolerated elsewhere.

The Watash (Ind.) *Plainsdealer* says that a certain farmer south of town, setting out a row of cabbage plants, was pursued by an army of cut-worms, and when he had finished the row but two plants were left standing.

A French scientist argues that mankind are not fit to be trusted with steam, and that moral and physical degeneracy will inevitably result from the changes which steam has produced in civilization.

It was my custom in my youth (says a celebrated Persian writer), to rise from my sleep to watch, pray and read the Koran. One night, as I was thus engaged, my father, a man of practical virtue, awoke. "Behold," said I to him, thy other children are lost in irreligious slumbers, while I alone wake to praise God."

The Goshen *Times* says: "There is a certain lantern-jawed youth in this city who will find it convenient to stand when he eats, hereafter, unless he gives up the funny practice of tearing down Republican posters. The immense magnitude of the boot and shoe trade of Goshen will be impressed on his mind forever one of these days.

A close-fisted old fellow, in treating a friend to some liquor, poured out a very small drink. The latter, taking the glass and holding it above his head, remarked, very skeptically: "You say this is forty years old?"

"Yes," replied the host.

"Then," replied our friend, "All I have to say is, it is very small for its age."

The local editors of Detroit are lamenting the departure from that city of a lad named Johnny, who has long been to them a refuge, a solace and a source of paragraphs. Two years ago this boy shot himself; two months after he was choked with a fish-bone; a few days after he set fire to a barn and called out the fire department; he swallowed a top; he was run over by an ice cart; he fell into the river, and once he was lost for three days. Well may Detroit seem dull after his departure.

When I say that the street dress of the majority of respectable women of New York to-day is disgusting, I but feebly express my emotions. I say the respectable women and yet, save to them who know them to be such, their appearance leaves a wide margin for doubt. The clown at a circus wears not a more parti-colored costume; in fact, his has the advantage of being sufficiently "taut," to use a nautical phrase, not to interfere with locomotion; while theirs—what with disgusting humps upon their backs, and big rosettes upon their shoulders, and loops, and folds, and buttons and clasps, and bows upon their skirts, and striped satin petticoats, all too short to hide their clumsy ankles—and more colors and shades of colors heaped upon one poor little fashion-ridden body than ever was gathered in one rainbow—and all this worn without regard to temperature, or time or place—I say this presents a spectacle which is too disheartening to be comical. One cannot smile at the young girls who are one day—Heaven help them—to be wives and mothers.—*Funny Fern.*

140,000  
SINGER SEWING MACHINES

WERE SOLD DURING THE PAST YEAR.—*Scientific American*, June 10, 1871

## The Singer Manufacturing Company,

AT THE

## WORLD'S FAIR,

Constituted by the homes of the people.

Received the Great Award of the Highest Sales! and have left all

Rivals far behind them! As the following article shows:

## "SEWING MACHINE SALES FOR 1870.

The magnitude to which the manufacture of sewing machines has attained is shown by the "SWORN" returns (to which anyone can have access) of the manufacturers for the year 1870 to the owners of the leading patents, on which they pay a royalty. According to these returns the number of machines sold by each manufacturer in 1870 is as follows:

		Difference.
The Singer Manufacturing Company.....	127,831.....	
Wheeler & Wilson Manufacturing Company.....	83,203.....	44,625
Howe Machine Company.....	75,156.....	52,677
Grover & Baker Sewing Machine Company.....	57,402.....	70,431
Weed Sewing Machine Company.....	35,002.....	92,831
Wilcox & Gibbs Sewing Machine Company.....	28,890.....	98,943
American Buttonhole & Overseaming Company.....	14,573.....	113,260
Florence Sewing Machine Company.....	17,660.....	110,173
Gold Medal Sewing Machine Company.....	8,912.....	118,921
Ætina Sewing Machine Company.....	5,806.....	122,027
Empire Sewing Machine Company.....	3,569.....	124,273
Finkle & Lyon Manufacturing Company.....	2,420.....	125,413
Parham Sewing Machine Company.....	1,763.....	126,067
Wilson.....	510.....	127,333

And several other Companies who sold a few Machines.

It will be seen by this table that the popularity of the Singer Machines far exceeds that of all others, their sale being one-half greater than even that of the famous "Wheeler & Wilson" Machine. This is owing to the fact that the Singer Company have lately commenced making, besides their old and well-established manufacturing machine, what is known as their "New Family Machine," which is selling at the rate of nine to one better than the old style. Their total sales for 1869 were 86,781 machines against the 127,831 of 1870, showing an increase of one half in the latter year.—*New York Sun.*

The total sales of "Singer" Machines are very nearly

## THREE QUARTERS OF A MILLION!!!

Two Thirds of which were Sold within the Last Three Years, and all are in

## SUCCESSFUL DAILY USE!

And still there are Agents, for even the poorest Machines, who persist, in the most "unblushing manner," in deceiving ours, as if it were possible for the "Overwhelming and Rapidly Increasing Majorities of Singer Purchasers" to be mistaken.

We are not so vain as to suppose that these large sales are due to superior business capacity so much as to the superior merits of the Singer Machines, as well as the

## OBSERVATION OF THOSE WHO BUY AND USE,

And are personally interested in comparing the merits of the different Machines before making a selection.

THE

## 'NEW FAMILY SINGER' SEWING MACHINE,

WITH ATTACHMENTS FOR ALL KINDS OF WORK.

We claim and can show is the cheapest, most beautiful, delicately arranged, nicely adjusted, easily operated, and smoothly running of all the Family Sewing Machines. It is remarkable not only for the range and variety of its sewing, but also for the variety and different kind of texture which it will sew with equal facility and perfection, using silk twist linen or cotton thread, fine or coarse, making the INTERLOCKED-ELASTIC STITCH, alike on both sides of fabric sewn.

The only STITCH that is Universally Approved, or is at all adapted to FIRST-CLASS WORK.

Thus, beaver cloth, or leather may be sewn with great strength and uniformity of stitch, and, in a moment, the willing and never-wearying instrument may be adjusted, even by a child, for fine work on gauze or gossamer tissue, or the tucking of tulle, or ruffling, or almost any other work which delicate fingers have been known to perform.

All Machines Sold Guaranteed to give Entire Satisfaction!

## Terms to Suit All!

OTHER MACHINES THOROUGHLY REPAIRED AT REASONABLE RATES!

WE MAKE NO CHARGE FOR CARTAGE WITHIN SALT LAKE CITY!

BEWARE of Spurious Needles, Poor Silk, Twist, Linen and Cotton Thread,

Bad Oil, etc., Which may render the Best Machine Useless. The Singer

Company manufacture their own Needles, Silk and Twist; furnish

Linen and Cotton Thread and Oil—all of Superior Quality—

but which can be relied on only when obtained through their

Principal or Branch Offices.

THE SINGER COMPANY have, for the past three years, been unable to supply the demand for their machines, though much has been done to increase their manufacturing facilities. Much more is being done at home and abroad in enlarging their present manufacturing, building new ones, availing of the best machinery, and the services of the most skillful artisans, in the hope of being able to accept propositions for agencies, where such are not already established, though they are now tolerably well represented throughout the civilized world.

Be Sure to get the Best. Before you Purchase be sure to see the "Singer" at the Central General Agency, Singer Sewing Machine Depot Z. C. M. I., EAST TEMPLE ST., second door South of Eagle Emporium, SALT LAKE CITY.
