

EVENING NEWS.

Tuesday, May 15, 1883.

FLOATING FRAGMENTS.

The gardens are blooming.

Parties interested in the Pleasant View Irrigation Company, see advt.

The regular weekly meeting of the City Council will be held to-night.

Mr. Joseph Hyrum Parry has received Frank Leslie's Popular Monthly for June. Price 25 cents.

Deputy U. S. Marshal Compton, with the ascender Hill in custody, is expected to arrive to-night.

The members and officers of the Tenth Ward Primary Association have been enjoying themselves at Fuller's Hill to-day.

"Man should always be graceful," says Dr. Armitage. The doctor evidently never wears a collar with a saw edge, nor tried to walk gracefully with one unsupportive broken.

There is an Indian scare in Ogden, Idaho. It is reported that an Indian named Pangchut warned the settlers that the Bannacks intended shortly to begin raiding upon the Whites.

When Alexander Gun, an ex-convict from the State Prison, was dismissed from his employment, the following entry was made in the books of the office: "A Gun discharged for making a false report."

One-tenth of the money which has been expended in bringing John Howard Payne's remains home would have been sufficient to have induced him to remain in this country.—Philadelphia News.

Make the resolve and stick to it, that when the yard about the house has been cleaned up this spring it shall be thus kept all through the season. Carry the system to the roadways, and the fence corners.

The following method of preserving eggs is highly recommended. First put the eggs lightly with fresh, sweet lard, and then pack them in finely powdered charcoal. The charcoal has great affinity for oxygen and arrests the process of decay.

A few days ago we published the details of the murder, at Rock Springs, of a barber named Leighton. A man named Lee has been committed to await the action of the grand jury on a charge of doing the deed. The evidence, though circumstantial, is said to be strong against the accused.

A rural type, in setting up a farm, made it read, "The temperance of the soul depends upon the morality of the body." The editor came with his wet boots on and lifted the wretch out into the soil of the adjoining pig pen, he had time to reflect upon the difference between soul and soil.

The following is said to be an excellent recipe for testing eggs: Dissolve three and three-fourths ounces of common salt in one and three-fourths pints of water. An egg put in this solution on the day it is laid, will sink to the bottom; one a day old will not reach quite to the bottom of the vessel; an egg three days old will swim in the liquid; while one more than three days old will swim on the surface.

James Edwards, a highway robber and convict, was on his way from Miles City last week, in charge of the Sheriff of Custer County, Montana. He suddenly slipped his hands and feet out of his manacles, bounded through a window and sped away like a deer. The officer fired twice at his retreating corpus and missed him. He reached the woods and escaped. He had been sentenced to fifteen years imprisonment.

A writer in Knowledge gives these directions for boiling eggs: "Take a saucepan holding a pint of water, and add the latter to the boiling point. Then put an egg in the boiling water, put the saucepan on the hearth and leave it there with the egg in it ten minutes or more. An egg so cooked will be tender and delicate, evenly so throughout, no part being harder than another part is semi-raw and slimy. The same process, we suppose, applies to a number of eggs and additional water."

The Glendale correspondent of the Butte Miner informs that a fatal accident had occurred at Lake City, adjacent to Glendale, on the first of last. Thomas Coleman was riding a loaded car down the grade at the usual high rate of speed, when the car ran through a switch and jumped the track, throwing Coleman against the side of the shed and crushing his body between the car and the timber. Both legs were broken, his thigh crushed and mangled and several ribs broken.

LOCAL AND OTHER MATTERS.

Seventies' General Meeting.—The Seventies will please take notice that their regular meeting will be held at the Council House, to-morrow (Wednesday) the 16th inst., at 7 o'clock.

ROBT. CAMPBELL, Clerk of First Coughill of Seventies. Salt Lake City, May 15th, 1883.

Local Authorities Sustained.—At the regular Sunday evening meeting in the Tenth Ward, last Sabbath the ward ecclesiastical authorities were presented to the people, for their votes. The expression to sustain them was unanimous. Among the officers presented were Elders Bishop and Counselors, Teachers Dillman and the officers of the several associations.

Primary Fair.—This afternoon the Eighteenth Ward Primary Association, presided over by Sister Fanny Y. Thatcher, with Sisters Viola Young and Ellen Grove as counselors, was having a fair in the Chapel, the articles exhibited being the products of the ingenuity and skill of the little folks. We understand no charge was made for admission.

Improvements on the Square.—Messrs. Pitts & Watson are running the work on the 8th Ward Square. From present appearances, should the weather prove favorable, they will nearly complete the filling for the bicycle track, which will be twenty feet wide and one-seventh of a mile, inside measurement, this week, and probably also finish the draining and leveling for the base ball and cricket grounds. The earth which they are taking out of the cellars, is eminently suitable for the filling of the track, and will be supplied with a finer quality of material from City Creek, and rolled down level and solid.

Missionaries.

We are indebted to Bro. W. C. Spencer for the names of the following missionaries who left for their fields of labor to-day:

For Scandinavia—Ole Sorenson, Pontus Greer, Daniel K. Brown, Levan; Nellie Peterson, Bloomington; Martin Christensen, Salt Lake City; August Swenson, Spokane; Lars P. Swallow, Guntah.

Norway—Charles J. Christenson, Ephraim.

Germany—Gottlieb Hirochi, Rockville.

Great Britain—Henry Norman, H. W. Atkey, John A. Druse, Salt Lake City; Wm. D. Williams, Benson.

Russia—John Wink, Salt Lake City.

Canada—George W. Beckstead, West Jordan.

Northwestern States—James A. Anderson, Hyrum.

Southern States—Christian F. Christenson, Kanab; Minor Willcox, Park; Victor D. Kanaab, Kanab; C. Parker, Victor D. Kanaab; C. Parker, Victor D. Kanaab; C. Parker, Victor D. Kanaab.

A few of the missionaries for Europe went by the D. & R. G. line the bulk going by the U. P.

Track Torn Up.—By mutual understanding between the C. P. and U. P. Railroads, the Denver and Rio Grande laid a third rail on the U. P. track at Ogden, on the west side of the hotel. This was to enable the narrow gauge line to deliver its freight and passengers on arrival at that city. On Sunday night, however, the Denver and Rio Grande, in addition, laid a track along the space between the two depot tracks of the C. P. The U. P. men promptly appeared on the scene with an engine, and attaching some chains to the new track, pulled it up and piled the materials. We understand that the U. P., C. P. and U. C. roads jointly occupy the depot grounds, and by mutual arrangement no other line can be laid on them without the consent of the three companies, and that the track between the east and west ones of the C. P. was put down without this having been obtained.

Singular Statement.—While Under Sheriff Mulvenon was at Flagstaff, Arizona, John Reese, of that place, consigned to his care for Dr. Ainsworth, an extraordinary specimen of petrification, being nothing less than a human right hand, which, through some strange agency, had been changed to stone. The hand and part of the wrist is perfect, with the exception that the thumb is lacking. The four fingers are partially closed, and hold what appears a bunch of petrified grapes. The hand is large, but delicate, and apparently belonged to a person accustomed to performing manual labor. The nails are perfect in shape, as are also the veins and tendons, and the wrinkles across the knuckles are as distinctly defined as those on the hands of a living person. Neither the delicate texture of the skin in the least in, nor paired by the strange transformation of flesh into stone. This singular freak of nature was picked up by Mr. Reese on Cataract Creek, where exist extensive tracts of petrified forests.—Weekly Miner.

Victimized.—One of our fellow citizens whose name we might as well state is Heber H. Ashworth, was the victim this week of a curious piece of misplaced confidence. It seems that he has been employed for several months past a man whose assumed name is Rice, as a teamster, the man generally giving the utmost satisfaction. About a month ago, however, he sent Rice to Bullionville, Nevada, with a load of lumber to sell. This errand he performed, but neglected to send the proceeds back to his employer, and staying there went to work for about ten days with the team and wagon and then taking a load of bullion as freight to Millford, disposed in some way of the team and wagon at the latter place left the country on the east leaving Mr. Ashworth not only minus his quota of the earnings of his employee, but his team and wagon also. Rice leaves a wife and four children behind him. Beaver Usonian.

Bicycle Business.—The Salt Lake Bicycle Club met last evening pursuant to announcement. Four applications for membership were received. The Club resolved to hold their next races for the gold and silver medals on the new track of the Eighth Ward Square, in conjunction with the base ball game, on the 30th inst. Several dark horses with good metal in them have never yet entered these races may be expected to come to the front. There will also be a race for a watch by boys under 12 years of age, and one for a silver cup by all under 8 years of age, prizes to be furnished by the Club and open to all.

Boys intending to enter for either of the last two races are requested to enter their names at the office of Barnes & Davis.

The Building Association.—A meeting was held at the Shoe Factory last evening to further consider the desirability of organizing a Building Association. There was a good attendance. The by-laws committee reported progress through their chairman pro tem, Brother Francis Cope. The draft of the constitution and a portion of the by-laws were presented, and after some discussion the constitution which was read by sections was adopted. The Society receive the name of "Zions' Beneficent Building Society." The committee on by-laws were granted further time to complete their labors, and the meeting adjourned till Monday evening, May 28th, when it is hoped the Society will be ready for the election of officers.

A Balloonist.—Prof. P. A. Van Tassel, an expert of Stockton, California, is in town. He has, in his aerial career, made nineteen ascensions, and claims to have gained an altitude above the earth's surface at one time of 14,270 feet, and traveled a distance in one trip of 80 miles. If he finds sufficient encouragement among the citizens he will make an ascent from this city. The plan he adopts generally is to get up a subscription among the citizens to defray expenses, not collecting anything until after the aerial feat has been accomplished. He has some idea, should the right kind of an ascension exist, of taking a trip over the Wasatch range eastward. A balloon ascension would be a d-d-d novel novelty here.

Sanpete Stone.

A new trade has been opened in this city with Sanpete, in the shipment to this point of the beautiful white sandstone that abounds in that part of the Territory. Brother E. L. Parry, master mason of the Manti Temple, is forwarding the material, and Mr. Elias Morris, of this city, is acting in the capacity of agent for its disposal here. The latter is using it himself, and so are Watson Bros., contractors and builders. Several carloads have already reached the city. It is beautiful rock, not excelled by any other of the same class in this region, and is just the thing for caps, sills and corners of buildings.

The members of Stephens' former adult class meet this evening at the Council House, at half-past 7 o'clock.

This afternoon we received a pleasant call from W. N. Babcock, Esq., General Agent of the Chicago and Northwestern railroad, and Geo. D. Williamson, Esq., Traveling Agent for the same line. The headquarters of these gentlemen are at Denver, Colorado.

The members of Stephens' former adult class meet this evening at the Council House, at half-past 7 o'clock.
