BOER DEFEAT IS NOW COMPLETE.

They Destroyed Much Property, but Left a Great Deal.

OPPOSITION IS NOW OVER.

Estimated that 20,000 Police Can Now Restore Order in the Transvant.

New York, Sept. 26 .- A dispatch to the Herald from Lourenzo Marques says; he Boer defeat is complete. By dint of hard riding from Barberton your correspondent overtook, first General Hamilton's division, then that of General Pole-Carew, and finally entered Kematipoort. Not a shot was fired nor was a Boer seen during the march.

The evidence of the enemy's destructiveness was everywhere to be seen. The bridges had been dynamited, the stores, buildings and homesteads looted and burned, as had been also the railway property, all the chief stations being smoking ruins, among them being Kaap Muiden, Hectorspruit and Komalipoort. At the last place there is an enormous area over which the Boers have wrought destruction,

The devastation includes hundreds of wagons, trucks and carriages which ave been burned, together with all nds of stores of clothing, ammunition, kinds of stores of totales, such as sugar, coffee, rice, flour and stationery. Thousands of tons are still burning. General Pole-Carew has secured hundreds of locomotives. The lines of the Selati railway are simply blocked with rolling stock. On my way from Barberton, I saw at

Hectorspruit the burst Boer guns and destroyed stores, a the Crocodile river there were visible literally acres of damaged gun ammunition, wagons, dynamite detona-tors and war stores of every sort.

At Komatipoort there were, besides the burning stores, hundreds of tons of ammunition. The enemy had left tanding many tents, The great waste in the effects of the Boers was evident. Furniture, trunks,

provision, clothing and other articles were lying about in every direction. In the rocky bed of the river were enormous quantities of stores, ammuni-tion rifles, cannon and foodstuff. Any good police force—say one of 20,-0-can do the rest of the work of

iscation for security.
General Buller and the others move en and seize the passes, neither Viljoen, the new commandant general, with Steyn and Schalkburger nor Kuetze with the relief of derelicts from Komaort, can escape through the mountheori, can escape through the mountains toward Lydenburg and Pieters-burg, while to remain in the low veldt not at this season of the year means death for the men and cattle. The Portuguese have disarmed all the Boer refugees taken. Fifty truck loads, with nearly 500 tons have been dumped down the island of Sheffeen, off Lourenzo

Wishing to avoid a conflict and unnecessary bloodshed, the British consulgeneral consulted the Portuguese governor general, Senor Machado, as to the turse to be pursued to attain this He asked that emissaries should be sent up with an address to the Boers pointing out the uselessness of contuing their resistance and the abso-te needlessness of going further. Besides, if they continued to fight there was a fear of the natives rising. Owing to the fact that the Portuguese had been most kind to the Boers and as they had guaranteed their maintenance

Sores and Ulcers never become chronic unless the blood is in poor condition - is sluggish, weak and unable to throw off the poisons that accumulate in it. system must be relieved of the unhealthy matter through the sore, and great danger to life would follow should it heal before the blood has been made pure and healthy and all impurities eliminated from the system. S.S.S. begins the cure by first cleansing and invigorating the blood, building up the general health and removing from the system A CONSTANT DRAIN all morbid, UPON THE SYSTEM.

When this has been accomplished the discharge gradually ceases, and the sore or ulcer heals. It is the tendency of these old indolent sores to grow worse and worse, and eventually to destroy the bones. Local applications, while soothing and to some extent alleviate pain, cannot reach the seat of the trouble. S. S. S. does, and no matter how apparently hopeless your condition, even though your constitution has broken down, it will bring relief when nothing else can. It supplies the rich, pure blood necessary to heal the sore and nourish

the debilitated, diseased body.

SHOT TWO ROBBERS. One Dead, the Other Will Die -

Fought With Two Sheriffs. Spokane, Wash., Sept. 25.—A special to the Chronicle from Addy, fifty miles

nort of Spokane, says:
A desperate battle between officers and two highwaymen took place near here last night. At the end of the fusilade one robber was dead, the other so badly wounded he will probably die. The robbers held up two citizens of Addy last night. Deputy Sheriffs Dud-rey and Salvade pursued and overtook them. The officers ordered them to hole up their hands. The robbers pretended to comply, then opened fire. The offi-cers replied, killing one and crippling and capturing the other. Neither has been identified, but it is suspected one may be the highwayman who held up the Northern Pacific train near Rath-drum last Friday night.

Injunction on Cheap Gas.

Chicago, Sept 25 .-- Nathan M. George a Connecticut man, owning 100 shares of stock in the People's Gas, Light & Coke company, today filed his bill in the United States circuit court, asking for an injunction restraining the People's Gas company from selling gas at 40 cents per 1,000 feet.

The injunction comes as an incident of the gas war on the north side of the city, where the price has fallen from \$1 to 40 cents per 1,000 feet. Mr. George avers that the rate cutting endangers the dividends of the People's gas and demands that the former rate, \$1, be maintained in all parts of the

STRIKE LEADERS **OBJECT TO TROOPS**

Say Their Presence Was Unnecessary and Tyrannical.

MINE OPERATORS GOT THEM

No Present Probability of an Early Settlement of the Great Strike in Pennsylvania.

New York, Sept. 26 .- A special to the Times from Hazleton, Pa., says:

It is said that labor agitators have inspired the strikers to join in a march to Lattimer to persuade, if possible, and to drive out, if necessary, all the working miners at that place. The strike leaders furlously resent the introduction of troops as a needless and tyrannical interference with them in the exercise of their rights.

There is no doubt that the mine operators have desired the presence of the troops. They know that with the troops here many men could be got to work who might otherwise be intimidated. It was only necessary that there should be repeated midnight demonstrations by the strikers to provoke disorder. The strikers appear to have been unable to restrain excessive zeal on the part of their missionaries, and have contributed to bring about the condition they should have striven to

Hazleton continues to offer about the only considerable opposition to the strike that is found in the entire district. Whether the strike shall spread or dwindle depends altogether upon the acts of the miners. As the judgment of the miners is generally surrendered to the mine workers' unions, with President John Mitchell as a mouthpiece, and he remains determined to keep the miners out until the minerages presented have been regrievances presented have been re-dressed by the operators, while the operators are resolved to have no deal-ings with any organization, the situation may remain as it is.

Pottsville, Pa., Sept. 26.-The strike leaders are now turning their attention to the collieries south of Broad Moun-tain. Many of the mines of this dis-trict are close to this city, and it is these collieries that produce most of the coal mined in the Schuylkill regions. Naturally, therefore, this district be-comes the center of operations against the mine owners

North of Broad Mountain few miners were working. In the Mahanoy Valley not a colliery is in operation. The miners who, a day or two ago, ex-pressed a desire to work, are now hedging and say they are not at all in a hurry to go back to the mines. The pleadings and arguments of the strike

pleadings and arguments of the strike leaders have had their effect.

The fact is, the strike in the Schuyl-kill regions is one of sympathy pure and simple. They have no grievances and Supt. Veith of the Reading company said that not one of the company's 27,000 men had come to him or to any of the other officials of the company, previous to the strike, with a

single grievance.

In the district south of Broad Mountain there were two collieries, Eagle Hill and Silver Creek, which were working yesterday, while several that were working on Monday did not resume yesterday. The Wadesville colliely, near Pottsville, one of the largest of the Reading company's mines, is tied up, the officials say by reason of a broken shaft. At Forestville, those familiar with the situation declare that the strike is almost certain to include all of the seven thousand men still at

ork south of Broad Mountain. In the Panther Valley the Lehigh Coal and Navigation company has about seven thousand men at work, and in all probability these will also go out. At the extreme west end of the Schuylkill region, adjoining Dauphin county, where are located the Lykens Valley Coal company's mines, are three collieries which continue to produce daily about 200 cars of coal. These collieries are the Brookside, Good Spring and Lincoln, and it is asserted that there will be no strike there as the men are thoroughly satisfied.

In a number of cities adjacent to this coal region, notably Reading, the coal supply is getting low, and many families have been unable to purchase even small quantities. It seems an extra-ordinary state of things for this section of the country, where ordinarily tons of coal can be picked up along the railroads.

PLENTY OF CONTRADICTIONS. They Relate to the British Cabinet and to Chinese Affairs.

New York, Sept. 26 .- A dispatch to the Tribune from London says: The rumor mongers are still at work on the cabinet while the canvass is in progress. Lord Lansdowne had a long interview with Lord Salisbury before was the second time within a week that they have been closeted together. the second time within a week the political gossips were convinced that they themselves were on the right scent in determining a successor to the

There is at least a strong probability that Lord Salisbury in leaving the for-eign office will desire to find a locum tenentem who will consult him at every turn of affairs, and the personal rela-tions between him and Lord Lansdowne suggest this selection of a substitute. Dispatches from the far East present an astonishing medley of contradictory

reports. The empress and Prince are reported to be in full flight and also to be raising armies and preparing to capture Pekin. Li Hung Chang is pro-viding a peace offering to the powers by the heads of the leaders. Additions are constantly made to the lists of massacred missionaries, and fresh details of the maneuvers of the allied forces are tele-

The empress is alternately coaxing and intimidating the allies by display-ing zeal in punishing the Boxers with the death penalty at an hour's notice, and displacing officials distrusted by the consuls and preparing to resume mili-tery operations against the invaders, while the powers are conducting nego-tiations over moves for position.

Russia has been adopting a system of stern reprisals in occupying Man-churia, burning villages, destroying temples, and slaughtering the Manchus along the banks of the Amoor river.

TRADERS' FIRE INSURANCE

New York Official Makes a Racy Report Thereon.

Says the Concern Has Been Violating the Law-Criminal Prosecution Probable.

Albany, N. Y., Sept. 26 .- Superintenlent of Insurance Hendricks has made public the following statement concerning the Traders' Fire Insurance comany of New York:

"Under date of August 8, 1900, the superintendent referred to a preliminary eport on this company to the attorey ceneral and that official, on the strength of such report, made application to the courts for the appointment of a reselver, Harry A. Hanbury of New York, was appointed to act in that capacity. At the time of referring the preliminary report above mentioned the attormy general was advised by the superintendent of insurance that the department would make a further examnation into the company's affairs, prinarily for the purpose of verifying the orrectness of its annual statement for he year ending December 31, 1899.

"Such an examination was completed under date of Sept. 21, from which is shown the following discrepancy be-ween the company's statement and he findings of the department exam-

The inquiry discloses the fact that te statement issued on Dec. 31, last, as worn to by William A. Halsey, presi-ent, and Theodore Sutro, secretary, as grossly false in every essential par-cular. The cash returned as being in ank at the close of December, the tatement gives at \$4,679. This sum was excess of the true balance in the id not be stated definitely, as a close incation of this item from the comany's books was rendered almost imossible, owing to the slovenly manner which the same were kept.

The amount due the company on acount of gross premiums in course of collection on policies issued within three months of December 31, was given in the company's annual statement at \$123,758. The true amount of this item

shown to be \$84,838. is shewn to be \$84,838.

'In reporting its liabilities, the company gave as being the amount of the outstanding losses December 31, \$44,811 on account of net losses and claims unpaid. The net losses then outstanding were \$84,840. Uncarned premium fund was reported to be \$79,122 on December 31. It is found that this Item was \$189,-067. The sum stated as due for re-in-mrance, \$3,170, is erroneous. The amount

surance, \$5.77. is erroneous. The amount actually due was \$20.730.

"Summing up the company's condition as of December 31 last, it appeared that they were in possession of total assets amounting to \$327.437. Total liabilities, except capital, \$320.256. Capital stock paid in, \$200.000. Aggregate liabilities, \$528,258. Impairment of capital, \$198.819.

Thus it will be seen that instead of having an unimpaired capital of \$200. other liabilities amounting to \$10,818, as reported, on December 21, 1899, the company's capital was impaired to the ex-tent of about 190 per cent of the same," Supt. Hendricks, under sections 611 and 614 of the penal code, brought the matter to the attention of the district attorney of New York county, furnish-ing that official with certified copies of all the documents in the premises to be-gin criminal proceedings thereunder.

The Traders' Fire Insurance company of New York was formed in February, 1898, with a capital stock of \$200,000. Most of the directors of the company had been underwriters at Traders' Fire Lloyds, which had operated since 1892 under a so-called Parsons charter. Iv 1896 the State insurance department and the attorney general of the State began proceedings, attacking the valid began proceedings, attacking the validity of the Parsons charters, the case being argued on its merits before Justice Russell, of the New York supreme court, in December, 1897. The decision was handed down in June, 1898, and was adverse to the charters. Previous to that time, however, most of the Lloyds organizations operating under Parsons charters had either gone into iquidation or been converted into joint

tock fire insurance companies.

Adams, Lockwood and Forman, attorneys for the underwriters at Traders Fire, Llayds, became the managers of the Traders' Fire Insurance the fraders Fire insurance company, which was formed largely through the efforts of Charles Measurran. The com-pany re-insured all of the outstanding risks of the Lloyds, and for this re-insurance received a premium of about
