

INDIAN STRATAGEM.

HOW GERONIMO FOOLDED A SQUAD OF UNCLE SAM'S CAVALRYMEN.

A band of Apaches descended into the Raton Pass and lay in wait until the soldiers came up—they are the only Indians that can do it.

I saw Geronimo and a dozen of his Apaches do something in Arizona in 1875 which I never could have believed had I not witnessed it with my own eyes.

The Apaches are unquestionably the most dangerous tribe of Indians on the continent. They are tougher, more enduring and more unmerciful than any other of their race. An Apache never lets up the side of a maulman with the thermometer marking the wage, and when he reaches the top he won't show a drop of extra perspiration, nor will he breathe a whit faster than when he started.

He'll go for days without a morsel of food or a drop of water; he will live on snakes, mice and refuse, or, if the water comes to the west, will shoot his horse and eat what he wants of him raw, set out to pursue a band of Apache raiders, and if they have hard pressed them, separate, each for himself, so that the Indians will be compelled to follow them individually, in which case the Apaches are sure to have the end of the contract. When the hunt is over the dusky savagery will come together at some point twenty or thirty or more miles away.

There were twenty-five of us cavalrymen returning from one of our routine patrols of the terrible Oglalas. Our horses were wet out, and as we were, it was one of the hottest days I have ever known in that burning furnace of a country. We had several miles of lake to cross, still to traverse could meant mud and water, and what we needed most of all—rest.

What but it was hot! Had not the air been perfectly dry neither may our tent could have stood it. The metal work on our guns was so heated that no one could bear to touch it with the naked hand. The air shimmered and trembled as it does over a newly plowed field at noonday of a summer day.

We were trudging along for a distance of several hundred yards. In fact there was a squad of five Indians much farther than the rest. All the animals were plodding slowly through the sand, when I noticed that it was not enough to stop the legs, their heads drooping, while we were simply reducing it, gradually to a standstill, holding out to reach the post.

Was there anything to be apprehended from Geronimo? Could we old campaigners be entrapped? Less, hard sand on every hand. Well, right then to the midst of that flaming plain, with no spot of grass could find root, that frightened chieftain and his Apaches ambushed us. I thought immediately but it is a fact, that Indian it is, after firing a shot.

—I had a small cold, but it was close to lunch, and so I turned in the saddle to see that the squad fortuitous were engaged in a desperate fight with a party of Indians who were on foot, shooting, striking and shouting louder and louder like so many demons.

We instantly wheeled and hurried back as fast as we could to the help of our comrade, but before we could reach him three saddles were emptied, and again across the plain of a greater number of Indians who were engaged in a fierce combat, but it was a fact, that Indian it is, after firing a shot.

—I had a small cold, but it was close to lunch, and so I turned in the saddle to see that the squad fortuitous were engaged in a desperate fight with a party of Indians who were on foot, shooting, striking and shouting louder and louder like so many demons.

THE ARMY.

When Should Men Begin to Bleed in the Service?

"How early in the spring do you prefer to have your boys begin to roar?" was a query solved by the American New Journal of prominent physicians in various sections of the country. Here are some of the replies:

As soon as they leave the cellar.—C. Miller.

As soon as this latitude (Wisconsin).—E. F. French.

Within fifteen and one-half months begin to bleed.—L. C. Taylor.

As soon as police comes in from the fields.—G. M. Donisthorpe.

In our latitudes (Georgia) the last of January.—J. P. H. Brown.

In this latitude (western Illinois) in February.—J. M. Hambrough.

About the middle of April in this latitude (Texas).—George Scott.

As soon as they are removed to the summer seats.—C. H. Dilburn.

No child there is a grasp of settled winter weather.—James A. Green.

Not much, if any, sooner than they can have frequent flights.—James H. Hunter.

I prefer to have them begin in the winter, not wait until spring.—Mrs. J. M. Hunter.

On the 1st of March. I often have two or three cases of blood in February (Michigan).—H. C. Channing.

Let me know when they are fit. They know better than we do when to begin.—Donald & Son.

About the time natural pollen begins to appear, or about June 20 to Feb. 1 in this locality (Texas).—Mrs. Dennis Adley.

Boating Crates in Boxes.

The cut explains a practical method for one man to load grain, such as corn, wheat, etc., in boxes in a basket basket. Two ropes are necessary—one on the bottom of the basket as well as the boating rope.

HENRY WAGNER

SALT LAKE CITY.

\$500 Reward!

WE are giving the \$500 reward for any and all information concerning the capture, conviction, punishment or imprisonment of the men who committed the recent outrages in Salt Lake City, Utah, and who are now at large.

When the offenders are apprehended, we will give \$250 to the first person who gives information leading to their arrest.

As soon as they leave the cellar.—C. Miller.

As soon as this latitude (Wisconsin).—E. F. French.

Within fifteen and one-half months begin to bleed.—L. C. Taylor.

As soon as police comes in from the fields.—G. M. Donisthorpe.

In our latitudes (Georgia) the last of January.—J. P. H. Brown.

In this latitude (western Illinois) in February.—J. M. Hambrough.

About the middle of April in this latitude (Texas).—George Scott.

As soon as they are removed to the summer seats.—C. H. Dilburn.

CAUTION.

Consumers are especially cautioned against purchasing any of the worthless imitations offered on the market put upon the market, resembling PHILIPS OF JAPAN, also known as TIME TEA. See that the article you purchase is genuine and take no other.

FAIRICLE OF PAGEZI

The apple seeds pear leaf blight and cracking of the fruit, the peach and plum fruit rot, the plum leaf blight and black spots, the grape powdery mildew and black rot, the raspberry and blackberry rot, the potato leaf blight and rot may be white or largely prevented when the solutions of copper are properly applied.

Then by the emulsion use of the borax mixture and partly green the above fungi are prevented, the tent caterpillars and cankerworms are killed, and the injury to the apple and pear tree the codling moth and to the plum and peach by the plum curculio, may be largely prevented.

It is the same the plum worm becomes established in the tree the performances do not stop its growth, but that by painting with "vitreous paste" they are destroyed at once.

That the peach foliage is very susceptible to injury from copper solutions, and that these solutions must be applied at from one-third to one-fourth the strength used upon the apple and pear.

NOT Playing.

Mamma—I told you not to play on Sunday.

Little Boy—I haven't been playing. I was down in my Sunday school lesson.

"Am you all in a perspiration."

"I was turnin' handspins between each verse to get it down into my head."—Grandma.

Great Advantages.

City Man—Where? Seems to me it's about as bad in the country as it is in the city.

Southern Host—Yes; but if you get overcome by the heat here and fall in a faint you are in no danger of being clubbed by a polly emu.

"I am not surprised. I have seen them do the same thing myself, but the Apaches is the only Indians that can do it."

Play Your Best Little Prayer!

Mr. Sola in his journal relates the following experience of Mr. William Black, the novelist: "When at work Mr. Black loves quietude and cannot stand the slightest noise. For this reason he always takes a room in the top of the house where he can sit at ease. At one time it was his misfortune to live in what he describes as a formidably noisy house while endeavoring to work in the early part of the morning, as is his custom, to tell of one amazing inconvenience that he was called upon daily to put up with.

The nursery of his next door neighbor was a line with his study, and in this somewhat unromantic family was located.

Every morning as regular as clockwork Mr. Black could hear the shrill voices of the children.

"Now then, you little things, knock down and say your best little prayer!"

Profound silence would follow, and then the nursery was a riot.

Then came a ruckus and clatter, and the shrill voices of the children were heard exclaiming, "We have said our prayers; we have said our prayers!"

A Bad Blunder.

Magazine Office Boys—Oh, there's been an awful time up in the editorial room today.

Editorial Manager—What's the trouble?

Office Boys—The editor made a mistake and put the "Two Administrators" sign to the subscription office and the "Washington" journal in front of the editor's office news.
