#### STOCK ACTIVE ON EXCHANGE

Iron Blossom Weaker-So Was Sloux Con.-Today's Quotations And Sales

Mountain Lake displayed much strength on the mining exchange today and according to information received from the mine early in the forencon. there is every reason to believe that the main tunnel did not reach the contact reported last week, but that the granite disclosed there is nothing more than an Intrusion. Developments of the past two days clearly indicate this, and officials at the mine express the belief that they are going to get a big ore body yet in the avenue which has been driven into the mountain for about 5,000 feet. Evidently there are a good many others who share in the same opinion, as reflected by today's market. The stock was in good demand and during the open board call, transfers were made from 67 up to 75 cents. Iron Blossom weakened; while Sloux Consolidated opened with a sale at \$1.10, advanced a point and closed at the starting point. Utah Consolidated moved up to 251-5 and seemed to be in favor when the caller's gavel dropped at the end of the open board session.

Pioche, Nev., June 29 .- A large force of men is at present engaged in erecting the new 600 horsepower boiler plant at the Day mine in Jack Rabbit. In the meantime no ore is being shipped and this fact has caused some to believe that Pioche was losing ground; but as soon as the new plant is installed, greater activity will be witnessed in Jack Rabbit district than has ever been known.

now being operated in the bottom of the shaft. Ore shipments can be made from this property in short time as large bodies are already blocked out and some of the richest ore in the district comes from this mine, averaging \$50 and up per ton.

The Boston-Pioche shipped a carlicad of high-grade ore on the 29th. This ore is expected to run nearly, if not quite, \$100 per ton, and there is more of it on the dump as well as a large quantity in the stopes. The 400 foot station sets are being placed and a small compressed air holst will be placed, at this level with which the muck can be hoisted from the shaft and dumped into a large pocket at this level. The new 100 horsepower gasoline engine is working satisfactorily and will furnish ample power for air compression for some time.

Foundations are being made for the new 100 horsepower engine at the Prince Consolidated and when installed, much greater activity will be manifested at this browners. much greater activity will be man ed, much greater activity will be man-ifested at this property. Already there is a large quantity of low grade ore on the dump and nearly 100 bush-els of the high-grade awaiting ship-ment.

#### MINING MAN HERE.

E. L. White Arrives to Look After Local Interests.

President E. L. White of the Bing-ham Consolidated company has ar-rived from Boston and when seen today declared that he brought no news with him regarding the future plans of that organization, other than what has already been published. He also stated that he had no information to give out relative to affairs of the Ohlo Copper company. Mr. White is one of the leading spirits in the Western Utah Copper company which owns the Gold Hill mine in the Deep Creek region and it is just possible that his presence in these parts at this time may be with the view of placing this proposition on the active list again. The Gold Hill was the scene of a vigorous campaign of development last year, and the mine was blossoming into a full fledged boday declared that he brought no news or development last year, and the mine was blossoming into a full fledged bonanza when the financial panic upset the plans of the Heinze organizations. Mr. Heinze is the owner of a large blockof stock, it is said, in the Western Utah company, but does enot control it; the latter being vested in Mr. White, Capt, Duncan MacVichie and a few of their friends. their friends.

their friends.

The Gold Hill mine contains a vast tonnage tof developed copper ore; the showing amply justifying the erection of a smelter. With the exception of fuel, there is every element right on the ground to make it an ideal smelting proposition and with the Western Pacific within easy reach, it would not be a very difficult matter to make the Gold Hill mine pay even under the present condition of the metal market.

#### COURT ORDERS SURVEY.

Judge Marshall in the federal court has granted the application of N. Tre-week and J. Leonard Burch to surweek and J. Leonard Burch to survey certain underground workings of the Silver King Coalition Mines company at Park City. This is in-connection with the suits instituted some time ago by Treweek and Burch, who allege trespass and unlawful extraction of ore from certain mining claims owned by them.

#### CONCENTRATES.

Charles Woolf has accepted the posi-tion of assayer at the Scranton mine in North Tintic.

The San Francisco stock exchange is taking a recess this week, which accounts for the receipt of no quotations on Nevada mining stocks. M. M. Johnson of the Newhouse en-

gineering staff, has returned from the northwest. He visited the Dominion Copper company's properties while away.

S. S. Sorenson, former superintendent of the Utah Consolidated smelter near Murry, is now connected with the Step-toe Snielting company at McGill, Nev., in a similar capacity.

W. T. Janney, who has been con-nected with the metallurgical staff of the Consolidated Mercur Gold Mines company for some time past, has re-signed and left yesterday for Manhat-tan, Nevada, to enter the employ of the Canyon Mining company.

W. C. Thomas left yesterday for British Columbia to start up the smelt-er of the Dominion Copper company of which he is superintendent. After getting things to going in a small way he will return to Salt Lake, which will be in about two or three weeks.

Vice President Silas W. Eccles of the American Smelting & Refining company was in the city for a few hours yesterday and left in the after-noon by special train for Ely over the Western Pacific railway. Mr. Eccles says Daniel Guggenheim wil be re-elected president of the big smelting company at the next annual meeting of shareholders.

Capt. J. P. Thomas resigned the position of superintendent of the Nevada Consolidated mine at Ely, Nev., to accept a more lucrative position with the United States Steel corporation in the east. E. E. Vanderhoef, formerly of Bingham, who went to Ely some time ago to take charge of the steam shovel operations of the company has succeeded Capt. Thoms,

# STOCKS IN DEMAND WERE SOME HIGHER

New York, July 1-The few opening transactions in stocks moved prices but slightly from last night's level. Insignificant gains and losses were mixed.
Stocks for which there was any de mand brought higher prices, notably Union Pacific and Reading, which gained 1/2. Otherwise the list was neglected but the undertone was steady.

There was a demonstration of strength in the New York Traction securities. The dullness of the general list was unrelieved, but the tone was firm. Cen-tral Railroad of New Jersey sold at an

advance of 5.

Bonds were irregular.

The market closed almost stagnant.

Price changes were scarcely distinguishable in the final hour and transactions were few and far between.

#### PRODUCE.

CHICAGO.

Chicago, July 1.—Wheat was firm at the start today on strong cables but eased off on liquidation based chiefly on favorable weather over the wheat belt. September opened ½ higher at 86½ and sold at 86½, but declined to 85. The corn market was inclined to weakness due to good weather for the growing crop. September opened ¼ ½ % lower to a shade higher at 70½ to 32 and held within that range.

Crop damage reports caused a firm tone in oats, but the volume of trading was restricted. September opened ½ higher at 29½ and sold at 33½.

Provisions were easy due to a 5-cent decline in hogs. The market was dull. September pork was off 5c. at 14.85. Lard was 7½c. lower at 8.25, and ribs were unchanged to 2½c. lower at 8.45② 8.47½.
