Bathing in Public Places.

With the present warm weather, the practice of bathing in the river and other places is being again induged in by many boys, whose actions are so indecent as to call forth strong objections on the part of those who are compelled to witness them. There is active ordinance against such conduct, and the City Marshal says he intends to see it enforced. Under existing circumstances, it might be well to see that the application of the ordinance should should be more rigorous than betetofore. The boys have been warned time and again to desist, but the effect of the warning bas been apparent for only a day or two, when the practice would become as offensive as ever. The arrest of every one who violates the law would have a salutary effect.
