

MINING, BUSINESS AND STOCKS

PROSPEROUS IS TINTIC DISTRICT.

Manager Sullivan Getting Ready For Active Campaign at Raymond and Illinois

EMMA JANE SHIPMENTS.

Eureka Hill Lenses are Doing Well—West Mammoth and Golden Ray—The Week's Shipments.

Special Correspondence.

Eureka, July 7.—At the Raymond-Illinois mine, the machinery and property are being put into condition preparatory to starting work in a couple of weeks.

James Eastles, who owns the Emma Jane group of claims, about three miles west of this camp, shipped a consignment of ore from that property to the smelter and the returns were very satisfactory.

Timothy Morrison, a Colorado capitalist returned this week from the Eureka district, where he went with William Stuffering to inspect the workings of the property of the Flying Dutchman, with a view to making an investment.

The lease taken in the Eureka-Hill property by David Mills, et al, is being very profitably mined.

T. P. King, of Salt Lake, who has a head and lease on the West Mammoth and Golden Ray property, owned by Capt. Hugo Deppren of this city, will have a wagon road built to the property.

The ore shipments from Tintic district are smaller this week owing to the fact that all the properties closed down for three days to allow the employees ample time to celebrate the glorious Fourth.

The grading for the switch to the Eagle & Blue Hill mine by the Rio Grande Railway has been completed and the rails will be laid as soon as possible.

The prospects for the McKinley Mining company look encouraging. The tunnel, which is now in a distance of 641 feet, gives the working a depth of over 300 feet, and the tunnel is being driven forward at the rate of two feet per day.

WEEK ON THE EXCHANGE.

Business has been dull and Mining Stocks show shrinkage. The holidays cut into this week's business on the mining exchange and the transactions contained 6,000 shares for which was paid out the sum of \$1,100,000.

UTAH COPPER SAMPLING.

It is expected the work will continue several weeks longer.

The examination and sampling of the Utah Copper mine, which was begun several weeks ago by Chester A. Healy, in behalf of the American Securities company, proves to be the most

productive undertaking of the kind ever attempted in this state, says Charles T. Hays, in the Bulletin.

Sup't. McDonald this week commenced work on the old Soldier tunnel, located just below the Boston Tunnel, for the purpose of exploring the ground in that vicinity.

EIGHT MONTHS IN NEVADA CAMPS.

K. R. Casper Writes About His Observations and Experiences at Tonopah and Elsewhere.

GOLDFIELD IS SURE TO GROW

In the Bullfrog District—How the Montgomery Shoshone Was Discovered—On the Amargosa.

K. R. Casper, a newspaperman who for several years, off and on, has been on the staff of the "News" has returned from an eight months trip to the mining camps of Nevada.

Beginning with Tonopah, which is the oldest and best developed of any of the new Nevada camps he says that there is no longer any doubt about its permanency and that in his opinion within a very short time it will become another Virginia City without the wild speculation which made the latter camp so conspicuous in its day.

The town has nearly doubled in population since last fall and contains 5,000 or 6,000 people all of whom seem to be prosperous. He was informed by Sam Dunham, the able editor of the Miner, that the ore in sight had practically been doubled within the past 60 days.

While the leading mines are making regular shipments of high grade second class ore is being piled up awaiting the completion of the standard gauge line from Reno to Tonopah.

Mr. Casper says he is not on every hand in the region regarding the present and future of the Nevada camps. He says that Goldfield has seen its best days.

GOLDFIELD'S POPULATION.

The town of Goldfield is being built up in a most substantial manner. It boasts of a population of 6,000 or 7,000, and where 18 months ago there was nothing but sagebrush and the wild living things, occasional jack rabbit or a band of wild horses, today there are handsome stone and frame buildings which have been built to stay.

BULLFROG COUNTRY.

Seventy miles south is what is known as the Bullfrog country. Less than a year ago there were but a few dozen people within a radius of 50 miles—today there are several thousand and the towns of Bullfrog, Rhyolite and Beatty are bustling active places.

OTHER DISCOVERIES.

Following these discoveries came the National Bank, the Laid & Benson, the Denver, the Boston, the Chicago, and a number of others, all of which have large bodies of ore which will run from \$20 to \$200, and more per ton, but which the present lack of facilities for transportation is holding back.

WAITING ON RAILROAD.

While the leading mines are making regular shipments of high grade second class ore is being piled up awaiting the completion of the standard gauge line from Reno to Tonopah.

MINES ABOUT RHYOLITE.

Rhyolite, four miles away, is situated right in the heart of the mines, and is a very rich one. About six weeks ago the real estate boom was at its height, and lots which could have been bought three months ago for from \$100 to \$500, sold for \$1,000 to \$1,500.

CONCENTRATES.

F. J. Westcott was a passenger to Park City this morning. Supt. Frank P. Swindler of the Bamberger Delamar mines is in the city again.

SALT LAKERS IN IT.

The famous Sandstorm in which Judge W. A. Sherman and Capt. A. H. Wayne of Salt Lake are interested, a few days ago struck another rich streak of ore in the vicinity of the Sandstorm.

LIDA TO THE FRONT.

To the south and tributary to Goldfield the old camp of Lida is being reworked and attempts to disappoin the doubting Thomases. An entirely new district has been discovered within the past three months.

MAKES AN ASSIGNMENT.

New York, July 8.—The Zintcan Mining and Smelting company, engaged in mining ore in Mexico, has made an assignment to William E. Ellis, William Higgins is president, and Henry A. Dickinson secretary. The company was incorporated on October 28, 1901, under New York laws with a capital stock of \$500,000.

EVERYBODY WILL BE MADE WELCOME AT SALT LAKE WEDNESDAY, JULY 12, BECAUSE IT IS "CAMBRIAN DAY."

PRICE CHANGES RATHER SMALL.

Trading at Opening Was Listless, Gains Predominating Over Losses. U. S. STEEL WAS IN DEMAND. Bank Statement Was Disappointing And Caused Realizing.

U. S. COMPANY'S PLANS.

More Details Concerning Purchase of the Delamar Refinery. It has been part of the plans of the United States Mining management, since the purchase of the Delamar plant, to enter the refining business when it had sufficient bullion output to warrant the building of a unit in copper refining, or gold and silver.

THE UTAH APEX.

Lower Tunnel Going Ahead at Rate of Forty Feet Per Week. Manager W. C. Orem of the Utah Apex mine of Bingham returned from a trip to camp last night. He says work is progressing very satisfactorily with the driving of the lower, or main, tunnel, and that it is being pushed into the mountain at the rate of about 40 feet per week.
