### TRYING TO FIND GOOD FISH SCREEN

Protective Association Encounters Unwilling County Officers In its Efforts.

WOULD EVADE STATE LAW.

Commissioners Universally Claim That Present Screen Patterns Prevents The Free Flow of Water.

are the fishermen of Utah worthy of nough consideration at the hands of ounty commissioners, to secure the proection of the fish streams from wanton waste of gume fish?

This question assumes marked importonce just at this time on account of the ractical refusal of county commissioners generally to put in screens, as the law provides, at the head of big ditches coming out of canyon streams, to spill their ater and fish on the lucern fields of Utah vaileys. County Commissioner John Mackay is typical of that generally

C. Mackay is typical of that generally prevalent through the counties. In the first place the ancient right of an unobject that the place the ancient right of an unobject that have a supported that the farming classes. They would rather lose all this fish that ever swam in all the creeks that ever flowed than in the slightest degree obstruct the flow of water through their ditches. This principle is a settled one, and in the last legislature secured hearing enough to have a clause secured hearing enough to have a clause in the law inserted against any screen that obstructs the flow of water.

DON'T LOVE THE LAW.

with a primary desire to evade the law, the clause gives a good excuse, and pracigally every county in Utah has been a screen that no objection could be made his clause as excusing them from acting the interests of the fishermen.

Another item is that the farmers are the constituents of the commissioners, and hold the whip hand over them, while he fishermen are a few brown coated invaders, who come from nowhere, to have fun and trespass on farms adjoining the greams. To protect their interests at an apparent cost to bonafide residenters doesn't appeal to the officers, hence the difficulty of obtaining a hearing, except where a commissioner happens to be a might of the fly and reel.

HUNTING A SCREEN. HUNTING A SCREEN.

Appreciating this fact the Utah Fish and Game Protective association was formed this spring, and its most practical work all summer has been to perfect Kid Murphy," was struck by an autota Hundreds of streams are screened now, and farmers manage to get along with the screens, but this is where they want them, and not where they serve an alien interest.

To overcome objections which they real-To evercome objections which they realthe will be technical, and which they extext to see pressed to the last limit, the
association offered a prize for the most
racticable fish screen. Three have been

Eighth South street, in a ditch flowing

MEETING TONIGHT.

of their natural purpose through the

some hope of making the filling for the
little red jug.

BARTHOLDT PLEASED WITH PEACE CONGRESS'S WORK.

New York, Sept. 5,-Congressman Richard Bartholdt of St. Louis, chairman of the American delegation at the recent Peace conference at London, and who arrived here yesterday, said he was greatly pleased with the work of the conference and that every friend of peace might congratulate himself on the splendid results. He said: "We Americans may flatter ourselves

that we have done our share of the work. The two main propositions work. The two main propositions which were put forth at the conference at Brussels by the American delegates were ratified at London. The first proposition provided that The Hague tribunal should formulate a plan for a general arbitration treaty to be submitted to the powers for adoption. The second proposition provided for an international congress to codify international national congress to codify international law and discuss international affairs and meet at regular intervals, probably

at The Hague,
"When the proposition was first subwhen the proposition was list sub-mitted to me at Brussels there was much skepticism over it. It was thought to be too far-reaching for Europe. These propositions were re-ferred to commissions, and they re-ported favorably on them. It is indeed gratifying to me to see that William Jennings Bryan's proposition is identi-cal with article II which I drafted. That article was that even when differences arise on questions which are thought to be such that they cannot be arbitrated, but settled only by the sword, there should be an investigation."

At the close of the conference Mr. Bartholdt was one of three speakers at the reception held at Crystal palace. His subject was "National Security by International Agreement Instead of by Military Establishment."
