ATTEMPTED FIRING OF PINGREE SCHOOL

Panic Averted by the Quiet Dismissal of the Pupils by Principal Thomas.

EVIDENT WORK OF A FIREBUG

Fire Started Under Stairway of Only Entrance to the Building—Police Investigating.

Ogden, Utah, Oct. 18.—Early yesterday morning a fire started in the basement of the Pingree school, but before the flames had made much headway this fire was fortunately discovered, preventing a probable panic which might have caused the death or injury of many children. The Pingree school is situated at the corner of Thirtieth street and Pingree avenue. The question yet involved is whether the fire was incendiary or accidental, but every circumstance connected with it indicates that the attempted firing of the school was the distinctly work of a malicious person who intended to destroy the building and perhaps cause the death of many children. As it was, a panic was only averted by the quickness of Principal Thomas and the teachers of the school.

The junior, Albert Bell, shortly after the opening, had left the building for a little time. On his return he discovered smoke pouring out of the basement and under the front steps. Realizing something was wrong he went to Principal Thomas and informed him of the apparent danger. The principal quickly called the teachers to get the pupils, numbering several hundred, a recess, and in a few moments the pupils were all on the play ground, not realizing the danger they had escaped. A search of the basement was quickly made when it was discovered that a pile of paper and wood had been carefully laid under the steps and ignited, but as the steps were stone little headway was made by the flames which had only spread to the floor and a few old desks. A stream of water was soon playing on the fire when it was extinguished. Had the fire spread rapidly there is no doubt many lives would have been endangered, as there is unfortunately but one entrance to the building, making it very unsafe in case of fire, as in the present instance. It was near this entrance that the fire was started.

The police were notified of the outrageous attempt on the part of someone to burn the building, and Detective Pender was detailed on the case, but so far has not the slightest clues as to the identity of the perpetrator of the outrage. The janitor was closely questioned as a culprit, but he had ever filled the paper and wood up under the steps, but he was positive he had not, hence the only suspicion can be that it was incendiary.

REPUBLICAN CAMPAIGN.

Central Committee Reorganized—All Workers Directed from Headquarters.

Ogden, Oct. 18.—At a meeting of the Republican central committee held last night in the municipal court room the chairman was empowered to secure permanent headquarters and employ his own campaign secretary, G. A. Sebring, who has been secretary, resigned yesterday because of other duties. Several vacancies on the committee were filled, and it now stands: First ward, Henry T. Snyder and R. D. Pincock; Second ward, Dr. H. B. Jones and W. C. Hall; Third ward, David Jensen and Albert Powers; Fourth ward, George Kelly and Fred W. Sanders; Fifth ward, Dr. G. A. Jackson and Charles G. Christman. The committee passed a resolution providing that no candidate would be allowed to employ any worker especially for himself or other candidates; also that the workers must be appointed by the central committee under the direction of the central committee.

JOHN TROMBEL DEAD.

North Ogden Veteran of 82 Years Down Life's Career.

Ogden, Oct. 18.—Yesterday death claimed one of our aged veterans of Weber county, John Trombel, a resident of North Ogden.

Wakeful?

Sleeplessness Is a Sign of Nerve Trouble and Should Be Looked To.

There are three different manifestations of sleeplessness. First, hardly to sleep a wink all night, second, to be awake a long time before falling asleep; third, to fall asleep soon, waking up after several hours and then find it hard to sleep again. They mean that somewhere in the nerve fibers, somewhere in the brain cells, somewhere in the blood vessels that carry blood to the brain, something is radically wrong, and, if not rectified, the end may be worse than death. To right it, take Dr. Miles' Nervine. Some other symptoms of nerve trouble are: Dizziness, Headache, Backache, Worry, Restlessness, Irritability, Nervousness, Lack of Ambition. They indicate diseases which may lead to Epilepsy, St. Vitus' Dance, Nervous Prostration, Paralysis, Insanity. Nothing will give you such quick and lasting relief as Dr. Miles' Nervine. "My husband had been sick for weeks, could not sit up to have his bed made, and all the medical help we could get did not seem to do him any good. He could not sleep at all. Our baby girl was sick and all calls barred, because a child had not a word of talk. I read of a case of nervous prostration cured by Dr. Miles' Nervine. I tried it in a few days he was able to be improved. Nervine saved his life."—Mrs. A. G. HASKIN, Froville, N. Y.

WATER DISPUTE HEARD IN COURT

James Briggs Wants Ogden City Enjoined from Using Waters of Strong's Canyon.

DEFAMATION SUIT CONTINUED.

Mysterious Trunk Delivered to the Crittenden Home—Kelsey Case Is Remanded.

Ogden, Oct. 18.—The case of James Briggs vs. Strong's Canyon Water company and Ogden City was taken up by Judge Huxell this morning. Plaintiff claims that he, with others, has a primary right to the waters of the canyon for irrigation and domestic purposes, but that on Dec. 21, 1888, he entered into a contract with the city of Ogden, in consideration of the city purchasing the water and conveying part of same to his premises, they would have the use of said water during November, December, January, February and March, and all surplus water during the other months. Plaintiff alleges that on June 1, 1905, defendants took up the pipe line without his permission, and therefore demands \$200 damages, \$50 for misappropriation of water and a permanent injunction against defendants.

In the matter of the estate of Hyrum S. Wood, deceased, Fred S. Garner has filed a petition asking that he be appointed administrator of the estate, which consists of a tract of land in South Ogden, with a house thereon, the whole being valued at \$500. The heirs are a wife, four sons and two daughters.

SENTENCE SUSPENDED.

Mrs. Maud Malan was arraigned before Judge Armstrong today on the charge of larceny, to which she entered a plea of guilty. The court suspended sentence during good behavior, it being developed that the woman had a large family of small children.

WEDDING BELLS.

Miss Laura B. Hore today became the wife of Thomas Y. Stanford, the ceremony being performed in the Salt Lake Temple.

JONES FAMILY REUNION.

The family of the late Thomas E. Jones held their reunion at the old homestead in Hooper, Oct. 11. The members of the family came from far and near. The day was spent feasting and in various social amusements.

In the evening a concert was given by the members of the family in the meetinghouse which was attended by the public, and the excellent program was much appreciated.

BRIEFS AND PERSONALS.

The board of trustees of the State Deaf and Blind school went to Salt Lake yesterday to confer with Simon Bamberger, on the proposed route of his car line through the canyon, which passes over a corner of the school property.

W. B. Hardesty, the man who was arrested on suspicion of burglarizing the Peoples Restaurant, was found guilty of vagrancy and sentenced to days but sentence was suspended for him to leave town.

George H. Greenwell, the well known contractor and builder, has been selected by the Democrats as candidate for the Second ward, on their ticket to fill the vacancy caused by Sidney W. Bardon refusing to run.

Sam Devere's show company will play at the Grand Opera House Friday night.

Dr. A. S. Condon went to Logan yesterday on the school commission to visit the Agricultural college.

Mrs. Hattie Brown, very ill at her home on Madison avenue.

A FINE OLD TOAST.

(Harpers Weekly.)

In these piping days of agricultural prosperity, let us not forget the fine old farmer's toast not uncommonly printed on English drinking vessels in golden type:

"Let the wealthy and great Roll in splendor and state, I envy them not, I declare it, I eat my own lamb, My chickens and ham, I cheer my own beer, and I wear it, I have lawns, I have bowers, I have fruit, I have flowers, My lark is my morning alarm; So my jolly boys now, Here's God speed the plow, Long life and success to the farmer."

PROVO DEPARTMENT.

The "News" is delivered by carrier in Provo at 75 cents per month. R. J. Dugdale, Agent.

HAPPY WEDDING BELLS.

Burglary at Pleasant Grove—Arranging for County Fair Grounds.

Special Correspondence.

Provo, Utah Co., Oct. 18.—Marriage licenses have been issued to the following couples: George V. Watkins, 21, of Midway, and Cassie Kirby, 20, of Provo.

Ferdinand Crojas, 21, and Hattie Jensen, 21, both of St. Johns, Ariz. and John Sorenson, 23, and Elsie Nersine, both of Spanish Fork.

Henry Williams, 22, of Lake View, and Alice Martin, 22, of Provo, were married by Judge Booth.

PROVO COMMERCIAL CLUB.

At a meeting of the Provo Commercial club, held last evening the committee reported that the prospects for obtaining a lease on land from the First Ward Pasture company for county fair grounds were favorable. Only three or four members of the pasture company had refused to sign and they not positively. A county fair company will be organized and a county fair held next year if this site is secured for buildings, etc.

PLEASANT GROVE BURGLARY.

The Pleasant Grove Mercantile company's store at Pleasant Grove was broken into Monday night, and some shoes, clothing and jewelry taken.

GARDEN CITY NOTES.

Miss Zina Johnson of Salt Lake has come to Provo to take the position of matron of the Provo General hospital.

HAS GREAT FAITH IN FRUITLAND, N. M.

Thomas Evans Enthusiastic Over The Possibilities of Prosperous "Mormon" Settlement.

HAS UNLIMITED RESOURCES.

Outlook for Transcontinental Railroad In the Near Future Makes Situation Very Promising.

Thomas Evans, one of the leading spirits of Fruitland, N. M., a prosperous "Mormon" settlement of the south, is in the city for a few days. The gentleman has nothing but words of the highest praise for his section of country, and says it is one whose undeveloped natural resources are a surprise to all who behold them.

Fruitland has its location at the entrance to the widest and most fertile part of the San Juan river valley in San Juan county, and lies 12 miles west of Farmington, the present terminus of the Denver & Rio Grande railroad. At this place the San Juan river, tired of its peripatetic course through this mountainous and foot hills of Colorado, has made a broad valley nearly 100 miles in length. It has carried out the fertile soil from the mountains and made it one of the garden spots of the continent. The river also furnishes an abundant and never failing supply of water to the irrigating ditches along its course. It has never been known to become dry and can supply water for many times more acreage than has as yet been brought under cultivation, the making of the country today. Mr. Evans addressed himself to a "News" reporter as follows:

"Giving to its isolated position heretofore only the most adventurous home-seekers have come to this beautiful valley. The result of their labor now in evidence, in the shape of large orchards and broad fields of alfalfa and grain attest to the fact that, like the Franciscan fathers in California, 'where they settled they made no mistake'."

SPLENDID CLIMATE.

"Fruitland, located at an altitude of 4,700 feet, especially appeals to those who find their climatic conditions unsuited to them. It enjoys the almost perpetual sunshine of the southwest without its disadvantages. On the southwest the Cottonwood range of mountains, heavily timbered, acts as a break to the high winds and sand storms so disagreeable in other parts of the southwest. The prevailing winds, following the Cottonwood range, from the coast country of California and acquiring high velocity over the arid plains of Arizona, are broken by the mountains. At the same time the dry heat of the plains has caused the formation of clouds which bring from the Pacific to ascend and remain in suspension until precipitated by contact with the cold air surrounding the La Plata mountains on the north side of the valley, causing light showers to fall during the heated term and a mild and equable climate all the year round. The nights are invariably cool. The thermometer indicates usually 90 degrees Fahrenheit at 6 a. m. and gradually ascends to 75 F. at 12 m. in the summer months, seldom rising about 90 degrees on the hottest days.

AS TO ACREAGE.

"Under the Coolidge ditch there are 5,000 acres of land that can be cultivated, about 50 per cent in cultivation now. The Riverside and Enterprise ditches cover about 5,000 acres, mostly all being cultivated. There are from 800 to 700 acres in orchard in the valley, about 1,500 acres of alfalfa, 1,000 in grains and the balance in various other crops.

WATER SUPPLY.

"The water supply is said to be one of the very best in the west. All canals take their supply of water from the San Juan river, which is fed by the Pine, Animas, Florida, and La Plata rivers and numerous other streams, making it one of the largest rivers in the western country with a large flow of water even in low water season.

"For home consumption and culinary use we have good surface wells and springs to supply our wants.

ALL KINDS OF PRODUCTS.

"Products are so numerous that it would be difficult to mention them all, as everything that grows in a semi-arid climate thrives here.

"Apples of all varieties and superb quality thrive and yield abundantly. All kinds of peaches, pears, plums, apricots, nectarines, cherries, quinces, strawberries, blueberries, gooseberries, mulberries, currants and grapes are produced and their delicious flavor and beautiful color can not be surpassed in the country and in but very few other places we have more beautiful sunny days than any other country can boast of, it being truly 'the Sunny San Juan.' Almost every vegetable known can be grown and our melons rival, if they do not excel, the famous 'Rocky Ford.' To grow these various kinds of fruits and vegetables rich soil must necessarily be had. We have it from light sandy loam to heavy clayish soil. Wheat, oats, barley, corn and cattle all grow and produce favorably compared with other renowned districts.

"Here is without question the place to make a home, as land can be bought cheap, both improved and unimproved land is for sale very cheap, everything considered.

THE COAL INDUSTRY.

"The annual report to the secretary of the territory, by Joe E. Sheridan, U. S. A. mine inspector for New Mexico, for the fiscal year ending June 30, 1904, truthfully says:

"There are, at and near Fruitland, about 2,500 acres of coal lands, the deposits of which are a prominent feature among the most profitable resources of this territory."

"There are, at and near Fruitland, about 2,500 acres of coal lands, the deposits of which are a prominent feature among the most profitable resources of this territory."

"There are, at and near Fruitland, about 2,500 acres of coal lands, the deposits of which are a prominent feature among the most profitable resources of this territory."

and which burns into a fine quality of lime, at and near this coal district, demonstrates that this basin was at one time an inland sea. This also accounts for the vast deposit of coal along the coast. The San Juan river which has a flow of 3,000 cubic feet of water per second at this point and runs through this coal district (the flow being westerly with a fall of 25 feet to the mile, and the line of the coal deposit being toward the east or in opposite direction) would give a dip of about 14 degrees under the natural surface of the land, considering that 5 degrees is the incline under a level line.

"This coal, which has been pronounced by mill men to be superior steam and heating product, must contain a high percentage of fixed carbon, judging by its heating power and the light residue of gray ashes. It is bituminous, of the dry, heavy variety, often showing the peacock blue.

"Only two claims in the whole district have so far been developed to any extent, the most prominent being the Young mine, operated by Mr. Evans, which has furnished coal for years to the towns of Farmington and Gallup, and is the valley as far west as Jewett and Shiprock.

GAS AND OIL.

"Both gas and oil having given evidence of their presence in the vicinity of Fruitland, it is reasonable to conclude that the investment of capital would surely result in remunerative development.

BUILDING MATERIAL.

"White sandstone of the purest and finest grit that commands such high prices in the large cities of the east and has to be hauled such long distances, is at Fruitland within easy reach of anyone and at small expense.

"The best kind of brick is obtained at 3 to 5¢ a thousand, and burned within the limits of the town.

"Time that will analyze 50 per cent, is also a product of Fruitland, and is actually furnished to Farmington builders at one a hundred delivered.

Extensive beds of fire clay exist within a radius of Fruitland. What else in the shape of natural resources can be named that Fruitland cannot furnish? We give it up.

COUNTRY'S POSSIBILITIES.

"The possibilities for the future growth of Fruitland and vicinity are very great. It may interest the farmer to know that a California student has bought the Coolidge ditch. This ditch, later will be widened to 20 feet and made to cover more fully the average already supplied together with the whole of the desert valley, thereby laying some of the finest land in all out doors.

"The man who contributes his mite to ward the maintenance of 'Frenzied Finance' and the woman who worries with empty lamp chimneys, may be pleased to know that in the near future a great power house will be in our midst, generating power whereby the flash of the electric spark will gleam where now the feeble oil lamp sends its flickering rays.

"Here will be generated the power which will light the way for the seeker of 'lucky diamonds,' the power which will make the desert blossom from the means of transportation between sister cities that are destined to dot this section of country.

"A common sense and multifold facilities could reach remote prediction for the future. With unlimited quantities of water adjacent to boundless fields of coal it needs but the magic wand of the capitalist, with nature so freely doing her part, to bring about the realization of our predictions.

"With cheap fuel and power the possibilities are boundless. Do we exaggerate in saying that the future holds in store such industries as woolen mills, sugar factory, canneries, creameries and all industries kindred to such?

"Are not our hills dotted with herds of countless sheep? Does our thrifty neighbor the Navaho yearly dispose of countless tons of wool which is shipped back to eastern markets to enrich other localities?

"With increasing facilities for irrigation and thousands of acres for beef culture is it a pipe dream to tell of sugar factories?

"The adaptability of the canavero root which grows there in abundance has been fully exploited in the past and needs no second introduction.

"Numberless tanneries can be supplied with it and as for material, the woods are full of it. Deposits of iron and lime and other commodities in great quantities are sure to build up industries and whereas wealth usually accompanies industries we may be pardoned for predicting great wealth for the country.

"Last, but not least, the chances are exceedingly good for having a through trunk line to our various resources. The Southern Pacific has a survey line of the Gulf of California to Puget sound is not among the remotest possibilities."

CALIFORNIA EXCURSIONS.

October 18th, 19th, 20th, 21st, & 22nd.

Via Oregon Short Line. Following rates will be in effect to San Francisco and Los Angeles from Salt Lake City: Salt Lake to San Francisco and return (via Portland one way) \$31.50 Salt Lake to San Francisco and return (via Portland one way) \$4.00 Salt Lake to Los Angeles and return (via Ogden and S. P.) \$4.00 Salt Lake to Los Angeles and return (via Ogden and S. P.) \$2.00 Tickets good for return to November 20th. Proportionately low rates from other O. S. L. points.
