

tonight at 8 o'clock. A great many students and friends arrived from Provo, and the L. D. S. students will be busily occupied. Committees on decorations, music and college yells have also been appointed.

Wednesday morning the students of the L. D. S. University met in general assembly to listen to a program rendered in honor of St. Patrick's day. The musical selections were furnished by the students' society and consisted of a solo by Miss Belle Bridgman and a solo by Miss Belle Edwards. As an encore Miss Edwards sang a selection from "Flora." The principal feature of the program was a lecture on "Ireland," by Sister Lydia D. Allen, who has traveled extensively in that country. In a very pleasing and interesting manner she narrated her experiences, and described her impressions of the wonderful beauty of Erin's verdant scenery. Of special interest was her account of her visit to the Giant's Causeway.

BRIGHAM YOUNG ACADEMY

Provo—President Cluff will lecture at Draper next Sunday evening. About half the students availed to the fact last Tuesday morning, that St. Patrick's day had arrived. The other half were already awake and wearing St. Patrick's color.

Supt. J. M. Tanner lectured before the parents' class last Wednesday night on the subject, "We Receive to Give." It was one of the ablest of Dr. Tanner's able talks on education. Such was the verdict of those who attended the meeting.

Prof. Hickman finished last Saturday a series of lectures before the Provo county teachers at Castle Dale. During the course of this institute work, the professor gave popular lectures at a number of the prominent towns in the county.

A recent item from a commercial school in Salt Lake City stated that 100 figures had been added by a student in 10 seconds. This record is broken by members of the rapid calculation class in the academy commercial school. Fifty seconds was the time taken to perform that feat.

Arrangements are being made whereby Mr. P. J. Jensen, who expects to graduate from Stanford this year, will become a member of the faculty of pedagogy and psychology in the academy. Mr. Jensen is already favorably known as a teacher, he having been in charge of the sub-freshman school before he went to Stanford.

Under Nuttall, a son of L. John Nuttall, spoke to the students last Monday morning, bearing a strong testimony to the truth of the Gospel. He has been away three and a half years in New Zealand, but did not while away forget not to come to love the school from which he was called to his missionary labor.

Great enthusiasm is manifested in the coming debate between the academy and the L. D. S. university. There will be a trainload of students and visitors to the city next Saturday and we shall have no trouble in filling our hall of Barrett hall next Saturday night.

As an instance of practical patriotism the students of the preparatory school have petitioned to clean up the route on the north of the main building and plant a lawn with trees, flowers and shrubbery, to commemorate this year's attendance at school. Needless to say the petition will be granted.

For three or four days Mrs. Ida D. Sweeney were a troubled look—a look turned for the most part to those columns of the daily papers which described the finishing work of the Levee. Last Tuesday the troubled look gave way to an exhilarating smile. The kindergarten bill had received the signature of the governor.

The board of examiners for Church schools meets next Saturday in Salt

Lake City, to consider questions relating to the curriculum adopted one year ago for colleges and high schools in the Church school system. President Cluff will probably present some suggestions for improvements in the present course of studies.

Hon. Don B. Colton, on finishing his labors in the Legislature, spent one day visiting the academy, where for a series of years he was a familiar figure, first as student and then as teacher. He has not been away so long that hundreds of friends were not ready to greet him and shake his hands. He announced his intention of studying law and his friends predict a brilliant future for him in that profession.

The encouraging news reaches us that Dr. Brimhall is recuperating more rapidly at his new quarters. He is at present undergoing treatment at the St. Helena Sanitarium in southern California. The treatment consists of bathing in the waters of that famous resort, daily massage, and special attention to his health. His friends have renewed hopes of his ultimate recovery.

The kindergarten girls do things in elaborate style. Last week they had a water-crescent out in the eastern suburbs of the city. Think of 22 maidens laughing and frolicking about a huge bonfire, in which six dozen eggs were being cooked. The cloth was spread on planks, the grass not having arrived for that purpose. One or two of the girls caught a cold, but all caught renewed enthusiasm, which is some compensation.

The 17th of next April is the second anniversary of the day on which the academy expedition started on its travels towards South America. Members of the expedition now in the academy, met the other night, decided to have a reunion on that day, and appointed a committee on program. It is probable that the day will be spent in an old-time camping-out manner, somewhere in Provo canyon.

Last Monday morning the hour for theology was given over to the student body, members of which debated the question, "Resolved, That trusts are necessary to the commercial growth of this nation." The affirmative was discussed by Messrs. Webb and Duncan, the negative by Messrs. Day, Forsyth, and Chamberlain. No result was reached, other than that the students learned many important things and on respecting this product of the twentieth century.

Arrangements have been made whereby a book of Mormon convention will be held in the academy perhaps in the early part of May. Invitations will be extended to students of this ancient record, and all other people, interested in Book of Mormon studies. It is proposed that papers be read by various Book of Mormon experts on questions that are now somewhat in dispute, the object being not only to increase the general stock of information, but to unify the ideas of various scholars on this important subject. A committee was appointed at the last faculty to get up an appropriate program.

Elder Lester Mangum made a return visit to the academy and spoke to the students during devotional exercises Tuesday morning. He related that his first talk in the Turkish language was devoted to an account of the Brigham Young academy. He had succeeded in conveying his ideas to a friend who put them into classic Turkish, which he then committed to memory. Although at the time he did not know what he was saying, his speech evidently made an impression. For two years afterward he met people who were enthusiastically familiar with the far off western institution. A unique feature of the address was a recital of the Lord's prayer in Ottoman, the literary language of the orient.

"The Moeris and Maori Land" was the title of a lecture given under the auspices of the domestic organization last Saturday night, by Elder Ephraim

Magleby of Monroe. Elder Magleby, who has just returned from New Zealand, was one of the most successful missionaries that ever worked among the natives of those islands, having succeeded in entering into the very social life of these people, he was trusted with secrets not readily attainable by the ordinary student. His lecture was therefore unusually fresh and graphic. As auxiliaries he had a fine collection of curios, with which to illustrate his theme; also two native assistants, one a little boy of 10, the other a young lady of 16. Both spoke fluently in their native tongue to the large audience present; and the translation of their speeches by Elder Magleby indicated no small degree of intelligence on the part of these young Maoris. Elder Magleby's lecture is a distinct contribution to our knowledge of Australasia.

BRIGHAM YOUNG COLLEGE

Logan—The students of the college, and the people of Logan were very much surprised on Sunday morning, March 15, to read in the Salt Lake papers an account of the L. D. S. university winning all the games in the league, and not losing a single game. Such accounts indicate a great deal of self-confidence on the part of the visiting team, as they had gone to press before the game here was played last Saturday night. We are still somewhat agrieved that nothing has appeared, at least in some of the papers, to correct such an error.

The basket-ball game was a splendid game, the best we have ever witnessed in Logan, but our boys proved to be too much for the giants from below.

The L. D. S. university basket-ball team has been negotiating with Provo team and the Brigham Young college team to form an organization of the schools to bring the basket ball team from the University of Colorado to Utah, to play a game with each of the three schools, so that the home team might try their strength with those of the outside.

The team here is willing, provided they be recognized with one-third of honor, for bringing such an enterprise as well as one-third of the expenses. Recent issues of the Salt Lake papers seem to cast all the honor on the Salt Lake team. There are other fingers in the pie which are equally important as those in Salt Lake.

The Philomathic Literary society met last Friday night and listened to a very practical talk by Hon. Moses Thatcher.

On Wednesday morning in devotional, Brother Robinson, a merchant of Logan, addressed the students very aptly on the Word of Wisdom. Walter Lamoraux favored the students with a solo.

Principal Jensen of the training school addressed the Saints of the Third ward on Sunday.

Miss Oliver played a selection on the piano in chapel on Thursday last.

The summer school circular for next summer is now being worked out.

WEBER STAKE ACADEMY

Ogden, Utah, March 19.—Today the school was honored by a visit from Prof. George M. Marshall, of the University of Utah. The school joined with the English literature class to hear a very interesting lecture on Alexander Pope. The class is studying Pope and his works, and this talk was a great aid to them.

The Book of Mormon class, under Prof. Nelson, is considering the sign of Christ's death, dwelling to some extent upon the fulfillment of prophecy. The students manifest great interest in the study.

IN SEARCH OF THE POLE.

Captain Edwin Coffin will be in command of the next expedition to the North Pole which will be sent out by Ziegler in May next. Captain Coffin is confident that he will be able to bring his voyage to a successful conclusion.

The students in physics, under Prof. Lill, are enjoying their experiments with electricity.

The class under Miss McKay in grammar and classics has just completed a very careful study of Scott's "Marmion." The students are all anxious for the return of their teacher, who has been absent for the past week on account of sickness, but it is thought she will be back next week, as she was able to take a ride today.

The ladies' basketball teams are practicing and have fair prospects of having a good team. The boys are taking interest in baseball and began to practice tonight. Tomorrow they will organize teams for work.

Prof. S. H. Clark, of the University of Chicago, will be in Ogden on Sunday, March 22, en route to Logan, where he will give a recital the following day. He will return on Tuesday, March 24, and give a lecture at the university in the afternoon. In the evening he will give one of his famous readings from the play, "Cyrano de Bergerac." This is the sixth number on the lecture course and will be one of the best of its kind given in Ogden.

One of the largest audiences that has listened to any of the five lectures given by the academy were highly entertained by the lecture of Prof. George M. Marshall of the University of Utah, on Westminster Abbey. For two hours he carried his attentive audience throughout this famous church, and all felt re-

paid for the time spent. The next lecture of the course will be given next Tuesday afternoon and evening at the stake tabernacle by Prof. S. H. Clark, of the University of Chicago.

BEAVER BRANCH B. Y. A.

Beaver, March 18.—Mr. B. S. Young, of Salt Lake City was unable to fill the appointment as lecturer before the student body last Friday evening, and in lieu of this the regular bill was given and was very much enjoyed by the students.

Mr. Young will be with us this coming Friday and in addition to the lecture, choice musical numbers will be given by the members of music "D."

A baseball game was played between the academy team and Beaver nine on Saturday, the score at the end of the seventh inning being equal.

Petitions are now coming in from members of the preparatory department and also from the High school, asking that they be considered as candidates for graduation.

More snow! Athletics are not thriving much just now.

Miss Cathie Muir has been appointed editor of the White and Blue for the Branch in place of Nell White, resigned.

The graduating class has its program under way for commencement exercises. The preparatory department is pre-

paring to entertain the Polytechnical society in the near future.

Miss Bushnell of Meadow who was called home on account of illness in the family, has returned again.

We are now on the latter half of this semester's work, and examinations were had in the various classes last week.

AGRICULTURAL COLLEGE.

Logan—Prof. Jensen of the mechanical arts department is at work on the details of the extension contemplated to the buildings.

President Kerr and Dr. Engle were at Ogden last night in attendance at the reception given by the city teachers.

The students in the senior civil engineering class are checking the design of the Richfield water system. Prof. Swenden is consulting engineer in this project and has given the work to the class as one of their practical exercises.

Prof. Peterson has assigned the members of his class in geology topics for special investigation and report. After careful preparation each student will be given a recitation hour for report.

The law club met on Friday and discussed the question of postal savings banks. Messrs. Porter and Parkinson upheld the affirmative, and Messrs. Fredericksen and Kerr the negative.

A farmers' institute was held at the fifth ward last Tuesday evening. Several members of the station staff delivered addresses.

Prof. Merrill and Clark held a very successful institute at Greenville on Wednesday evening.

Bulletin No. 101 on irrigation investigations is in the hands of the printer.

Prof. Clark and family have moved to the Spofford house in the Fifth ward.

Miss Love spent Sunday and Monday at her home in Salt Lake.

President Kerr has asked members of the station staff to prepare plans for the dry farm experiments so that the work may be gotten under way at an early date.

Senator Barber was a visitor at the college on Wednesday.

The president and faculty are busily engaged on the matter for the new catalog.

Representative Richards and wife from Iron county visited the college on Wednesday. They took lunch with the president and members of the faculty in the domestic science dining room. Mr. Richards expressed himself as greatly pleased with the work he saw here.

The Sorosis girls are putting the "finishing touches" to the "Midsummer Night's Dream," which they present next Friday evening.

Misses Amy D. Erickson, Cora Woolley and Bertha Jensen, and Messrs. J. W. Jensen, J. U. Hicks, Horace Clark and C. Larsen of the L. D. S. U. visited the college during the week. They were taken with the matchless view from the windows of the large reading room.

Miss Etta Edwards, a former student, visited the college on Tuesday.

Miss Moench will begin work with a class in fencing at an early date.

The young ladies in elocution are preparing to give a recital early in April.

The second year manual training girls are comparing the food values and the different methods of cooking beef, mutton, veal and pork.

The domestic science department has had a "run" on pies for the past two weeks which they were unable to supply.

The delicious graham bread baked by the girls in the domestic science department is a very convincing argument concerning the nature of their work.

The English debating club on next Tuesday will discuss the question as to whether taxpayers only should be permitted to vote in municipal elec-

SHE MADE A CHANGE.

A Charleston Mother Did so With Advantage to Herself and Children.

A mother living in Charleston, Mass., the happy possessor of four children, writes: "Every fall and winter I have laid in a stock of cough remedies, croup mixtures and throat medicines for my children, for somehow or other they never seem to be free from colds, coughs or sore throat."

"This fall I made a change in the usual program. I had myself been cured of an obstinate catarrh, from which I had suffered for years, by Stuart's Catarrh Tablets, and as they were pleasant to take I determined to try them with my children. Our family physician told me he knew them to be perfectly safe and nothing better could be used for catarrh, coughs and colds."

"So I gave them to the children and have continued to do so ever since, whenever there is the least sign of croup or sore throat and I no longer dread the approach of cold weather as I once did."

"Stuart's Catarrh Tablets not only cured me of chronic nasal and throat catarrh but they have saved me many an anxious night with my little ones. The children like the taste of them and it is really wonderful how quickly they will break up a croupy cold or an obstinate, deep seated cough."

"People who have used sprays, inhalers, salves or washes for catarrh and have found how useless they are, will be greatly surprised at the results following the use of a pleasant, convenient, internal remedy, in tablet form. Druggists everywhere admit that Stuart's Catarrh Tablets which sell for 50 cents full sized package, is the safest, most effective and popular of catarrh medicines."

"The affirmative will be argued by M. C. Merrill and N. P. Paulsen, the negative by C. Snow and L. Hendricks."

BRANCH NORMAL.

Cedar City.—The program for Ladies' society tonight consists chiefly of poems and sentiments from Ella Wheeler Wilcox.

The domestic science class is now doing some practical work in serving. Some of the girls take their parts as hostesses very well.

After Mr. Ward's chapel talks this week we must certainly feel the necessity of "living today rather than tomorrow."

The school showed its first outbreak of college spirit Saturday evening when news reached us that \$20,000 had been appropriated toward erecting a new building. Bonfires were built, and a general parade was led by the band. It ended with a dance.

Special choral practices are being called, and other preparations are going on for the musical, which will be given a week from Saturday evening.

Ladies' society has been postponed from the usual time of meeting, Tuesday night, to Wednesday.

It seems that there is a general awakening of the students, throughout the whole school, as all the classes are now fully organized.

The newly elected Justices, Amos Workman and Will Reed, took the oath of office, in chapel Tuesday morning.

In our last students' society Zeila McQuarrie read the students' paper which was very humorous, and amusing to all. Miss Mattie Hunter sang a beautiful solo, accompanied in the chorus by the Young Men's Glee club, Laverne from also gave a reading entitled "Smiling the Rock."

All are looking forward with high anticipations to the grand ball which will be given by the Ladies' society of the Branch Normal, March 21, 1903.

The "602" gave a rousing party last night at the residence of President U. T. Jones, celebrating St. Patrick's day and all kinds of Irish stories were told.

CASTORIA

The Kind You Have Always Bought and which has been in use for over 30 years, has borne the signature of

Chas. H. Fletcher.

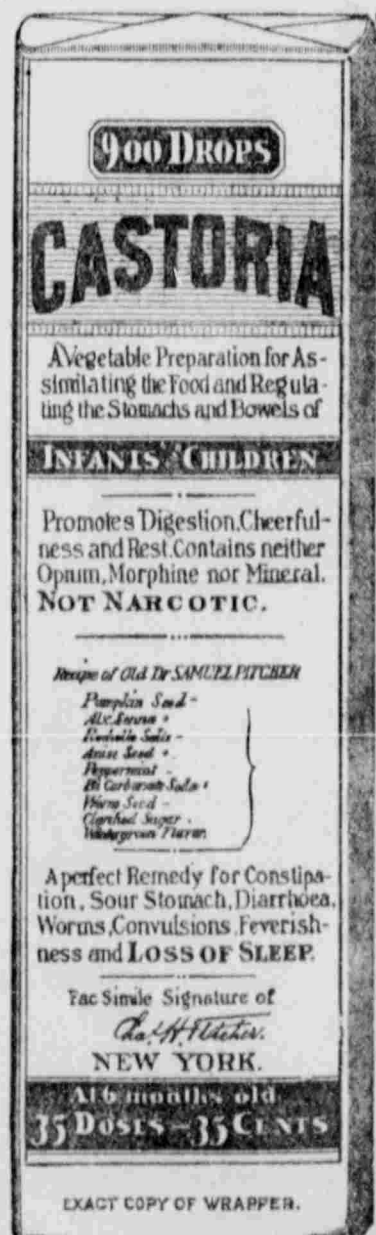

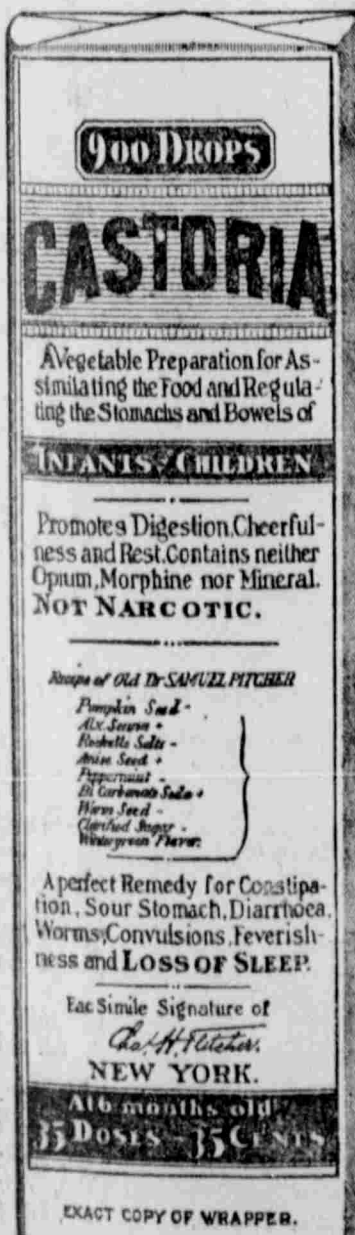

WHAT IS CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—the Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

The Kind You Have Always Bought. In Use for Over 30 Years.
