the *Quillaya Saponaria*, from the bark of which the celebrated botanic dentrifice SOZODONT derives its preservative and purifying properties. Not only does this sterling article beautify the teeth and prevent their decomposition, it renders the gums healthy and perfumes the breath.

THE Rock Island Gangs and Sulky's are made entirely of iron and steel. They have the draft direct from the beam. Can be easily changed to er from the land, set to run any depth, and be either locked, or run loose when working over clods or rough ground. They have no equal for strength and durability.

## Two Noted Grave Robbers.

Our readers will remember the account given in these columns of the robbing of the grave of the Hon. Scott Harrison, in Ohio, last May, the body being found in the dissecting-room of the Ohio Medical College. Public indignation justly brands any man as a scoundrel who will rob the grave of the dead. But there are two noted grave robbers in the country, so far from being the subjects of the people's wrath, are universally lauded for their virtues. The reason is plain. While the former class steal the dead bodies of our loved ones to submit them to the dissecting knife, these only rob the graves to restore the living victims to our hearts and homes. Their names—Dr. Pierce's Golden Medical Discovery and Pleasant Purgative Pellets—are household words the world over. The Golden Medical Discovery cures consumption, in its early stages, and all bronchial, throat, and lung affections. Pleasant Purgative Pellets are the most valuable laxative and cathartic.
