FIFTH WARD REUNION.

The Fifth ward had a most pleasant reunion Thursday evening and Friday afternoon and evening. The affair was granged by Bishop John Watson and his counselors. Thursday evening was set apart for the older members of the ward to meet together and spend a few hours in enjoyment. At about 6:30 in evening the ward meeting house swell filled, and Bishop Watson filled them to order and after the sting exercises of singing and prayer short address of welcome was p. The basement of the institute adjoining the r the Bishop. emeating house was arranged with three tables the full length of the spacious hall and after the opening exercises one hundred and eighty of the guests were taken to the basement of the Institute. where they partook of a sumptuous re-past, which had been prepared by the ladies of the ward. During the time they were eating the remainder of the immense assemblage remained in the meeting house and listened to some sweet vocal and instrumental music. When those at the first tables had been satisfied with the bounties of the land they were ushered to the dancing hall of the institute, where they enjoyed dancing while the remainder of the people sat down to the spread of the good things of the land. After suphose who desired to dance stayed is the hall, while those who preferred singing, etc., adjourned to the meeting louse, where an excellent program was

Friday afternoon the little folks of ward were given a dance and diner in the hall, and Friday evening the ung men and ladies of the ward med in an evening of festivity similar to Thursday evening's program.

The affair as pronounced by all who participated in it, there being about 1890 in all, as one of the long to be remembered enjoyable occasions of their lives.

WATERWORKS QUESTION. At a joint meeting of the waterworks committee of the city council and the citizens' advisory committee held at the council chamber last evening, Daniel Hamer Introduced the following resolu-That it is the sense of this com mittee that it advise the city council to neither build nor condemn the water works system, but that the council proceed to take steps to procure passes of said waterworks system from the present owners on the basis heretofore

The resolution was adopted, il to 2, as follows: Ayes—J. X. Allen, George Smuin, J. C. Simmons, A. T. Wright, I. L. Clark, McLaren Boyle, Daniel Hamer, John Watson, Job Pingree, Joseph Georger M. S. Bereick McLaren Royle, 2082 ph Scowcroft, M. S. Browning; nays-Sidney Stevens, James Caffin.

The mayor presented to the meeting a written opinion from Judge Hiles, to the effect that the city would not be liable for the bonds, and that its judgment against the waterworks company would

not be merged.
Councilman Brown represented resolution to build new waterworks, while President Thomas presented a resolution to condemn the present sys-tem, exercising the right of eminent domain, but in view of the opinion of Judge Hiles, the committee took the action above noted.

The question then came up as to the injunction suit filed against the council by Councilmen Jones and Carr, and how to get rid of it. A committee, consisting of A. T. Wright, McLaren Boyle, Jo-seph Scowcroft, Daniel Hamer, R. L. Clark and John Watson, was appointed to confer with Messrs. Jones and Carr, and endeavor to induce them to withdraw their opposition.

Mr. Jones was seen and notified of the action of the committee, and asked whether he would accede to the committee's request. He replied that I would not, that he stood now where h did at the beginning of the case, and furthermore believed that as the matter was already before the court, it should be legally adjusted before any further action was taken.

DR. DEWEY'S LECTURES.

A Rare Treat Offered the Educators of the St.te.

Funeral of Mrs. Wm. Roylance-Suit for Damages Resulting from an Assault-Weddings.

Special Correspondence.

Provo, Utah Co., June 15 .- Professor E. S. Hinckley delivered a most interesting lecture last evening before the summer school on geology. He held the close attention of the audience throughout, and at the close was given an en-thusiastic volley of applause.

DR. DEWEY'S LECTURE COURSE. The Academy faculty and the students of the summer school, and many others interested in education are looking forward with pleasurable expectation to the course of lectures to be given by Dr. John Dewey of Chicago in college hall next week, commencing Monday afternoon at 2 p. m. It is understood that his lectures will cover a wide field and that his subject may be given common expression in the term. "How to Train the Child." a problem of vast interest to parents and teachers,

and of the greatest importance to the nation and humanity. Dr. Dewey has been known for many years among educators, as a prominent teacher, author and lecturer. He is known as the author of one of the leading text books on psychology, and his name, today, is a household word in institutions of higher instruction. He has at all times been greatly interested in experimental work. The changed life of our time, "brought about through the great industrial revolution," says Prof. Dewey, "has given us much that is desirable in the education of man; yet, much that is of great value has been left behind. To be sure, no one would wish the return of the day which demanded the man. ested in experimental of the day which demanded the manu-

facture of clothing in the household, but in other ways we must supply the discipline of mind and heart, afforded by occupation." Hence, Dr. Dewey is the great advocate of instruction in manual training, and cookery, even in the public schools.

In accordance with this thought and many others largely original with Dr. Dewey, an experimental school has been established in connection with the University of Chicago. Here the doctor has put his theories to the test, and comes to us with the result of his own work. His lectures are of a clast that will appeal to all. Mothers' especially, who are training their childeren, in the home, should understand

the moral value derived from such manual training.
It is a rare piece of good fortune to the citizens of Provo, and to the people of the state of Utah that they should so soon have among them one nent in the educational world. Every year many students go from all parts of the United States to Chicago to hear Dr. Dewey: they may now hear him in our

CROP OUTLOOK.

The cool weather has somewhat de-layed having in this part. A few farmers have begun on their lucern fields but there is considerable complaint about worms eating the lucern leaves. Some apprehend they will be compelled to battle with grasshoppers for the second crop. It seems the unfavorable spring has retarded the growth of the lucern until the yield will be lighter than was anticipated.

The beet crop promises fair although little late. Most farmers have their eet fields blocked over and cultivated. Quite a number of our people are fre-quenting the banks of Provo river to herass the finny tribe on their annual migration up stream.

concert in the opera house tonight to replenish its depleted treasury. If circuses are evidences of prosperity we are having plenty of it. Lehi had one on the 13th inst, and one is billed for American Fork July 4th. BANK STATIONERY
