Army Reports. Washington, 27.—Acting Surgeon-General Baxter, of the army, has submitted his annual report to the Secretary of War. The report shows for the army a year of exceptionable freedom from disease, although it has been one of unusual hardship and activity for the troops stationed on the southwestern frontier. The Surgeon-Gen-eral says it is a matter of congratula-tion that not only the admission rate and the sick report for the troops, but also the death rate has fallen to a point lower than at any time within the history of the medical department and comparisons with the ratios of admission and death for all years of peace since 1839 will show a progressive and apparently permanent im-provement in health. The losses to he army from discharges for physical disability have also decidedly decreased, though not to the extent shown by the death rate. It is shown that a greater proportion of invalids was furnished by the troops under 31 years of age, while up to the age of 25 the rate proved so much show the the rate proved so much above the mean for the whole army that the Surgeon General says it may be fairly questioned whether the services rendered by those young men are equal to the cost of their maintenance. The men of Irish birth furnished the high-est mortality, the rate of the English

stood next and the Germans third.
Colonel G. N. Lieber, acting Judge-Advocate-General of the Army, in his annual report recommends that to commissioned officers within certain narrow and welldefined limits, be en-trusted the power of summary punishments, such as is conferred by the English code. The lack of power in the court-martial to punish civilian witnesses who refuse to testify, is said to be likely to lead to an entire failure of justice in some cases. The English code and the articles of our navy confer this power, and its extension to the army court-martial is recom-

Congress last year authorized the establishment of a light house and fog signal at Cape Meares, Oregon, a light house at San Luis Obispo, California, a new supply steamer, etc., but made no appropriations therefor, so that the board was powerless to act in the matter. The board recommends that steps be taken to prohibit the establishment of private lights and buoys in navigable waters, and that the board be authorized to pro-vide temporary lights in cases of emergency. An appropriation of \$150,000 is also asked for the completion of the ighthouse on Northwest Seal Rock, California. The estimates for supplies, salaries, repairs and other general expenses of the service for the next fiscal rear amount to \$2,239,000. Estimates or special appropriations amounting to \$1,280,750 are also submitted. These

The Soldiers' Mome. WASHINGTON, 27 .- From a report of the board of commissioners of the Soldier's Home, it appears that 310 persons were admitted at the home during the year; ninety-three inmates discharged at their own request; five dismissed, thirty suspended and forty-one died. There are now 894 regular and 52 temporary ismates at the home. The number is larger than ever before accommodated. The cottage formerly occupied by the President as a summer

residence has been assigned to the in-

mates of the home for occupancy. The Tariff. Boston, 27.—Some weeks ago the Globe sent letters of inquiry to the leading Democratic congressmen, asking what action Congress should take

on the tariff question in the coming session. Nearly all the replies favor the revision of the present laws, though they differ as to the means by which it should be accomplished. The fol-lowing is an abstract of the re-plies which the Globe will print to-Congressman Collins says: attitude of the majority should be to press some scheme of reduction and

Congressian Lovering writes from Washington: "Some measure of relief from onerous taxes by revisios of the tariff should be given to the country at the coming session of Congress, but went to Paris and on this journey bell went to Paris and on this journey but with the majority of seventeen in the present House (as shown by its vote in the spring) against any consideration of the subject, il am not much eration of the subject, if am not much encouraged to took for any measure of practical relief on so important a question by the present Congress, nor can I see much to encourage the belief that the Fiftieth Congress will do any better, and I will venture the prediction that if any attempt by it is made to retain the surplus revenue, it will be the surplus revenue, it will be the surplus revenue, it will be the surplus revenue.

R. T. Miles, of Texas, says: "The Democratic party ought to, and will, push the fight this winter for the reduction of the tariff. The people engaged in this fight are enlisted for the war." A. J. Warner, of Ohlo, says: "I think the majority of the party should favor the tariff on all products in the roduction of which there is competiion between this and other countries,

tion between this and other countries, sufficient to cover the difference in the cost of production arising out of the difference in the cost of production arising out of the difference in the conditions under which their production is carried on. Here and elsewhere I have been pleading with the leaders of my party to assume a more aggressive policy."

H. Hartt of Crawfordsville, Indiana, says: "Soon after the inauguration of President Cleveland, I was convinced that his policy was going to run in the same channel with the Republican party. They are identical on finance and tariff and on the land question. Cleveland's policy is in opposition to any regulation of railroad freights, and, in a word, is a simple subletting of Republicanism under Democratic colors. With such a policy, the great

Philadelphia, 27.— Considerable mystery eavelopes the affairs of the First National Bank of Glen Rock, York County, Pennsylvania. Within a short time the president and cashier have been deposed and new officers elected. The reason for this action was not made apparent until the issuance of warrants last evening by Henry Ed-munds, United States commissioner, for the arrest of William Herbst, late president of the bank, and Henry Herbst, late cashier, and Jacob and William Herbst, sons of the president. The Herbsts compose the firm of Herbst & Son, of Glen Rock. United States Marshal Kerns caused the arrest of the parties simultaneously this morning. Chicago, 28.—The Inter-Ocean has information that a deliberate attempt was made on Thursday night to assassinate flarry Gilmer, a witness who gave evidence at the recent trial of the Anarchists, directly implicating Speis and Schwab in throwing the flaymentat homb. Gilmer was shot at market bomb. Gilmer was shot at while on the threshold of his home and the bullet passed between his legs lodging in the bottom of the door. The shot was fired at a distance of less than ten feet from the living target, and the assassin's precepitance was the only thing that saved the citizen's life. Gilmer lives at Np. 50, North Ann Street

It was not generally known until to-day that Henry Janesen, who made early on Friday morning was a member of the north side "Groupe," and one of the most rabid Aparchists in the city, and that on the night of the bomb explosion, he was within a few feet of the place from which the deadly missle was hurled into the ranks of the marching policemen. The knowledge resulting from his identification has led to the discovery of what may be a definite clew to the bomb thrower. The night the bomb was thrown Jensen left his wife about 7 o'clock, stat-ing that he had an important Affarchist meeting to attend, and intimating that not return until after 4 o'clock the following morning, and in reply to his

wife's question as to where he had been, significantly replied, "I told you there would be trouble." His statements never went beyond this until about 10 days ago, when in an affectionate and confidential mood that he saw it thrown, and knew the he about the size of the Irish World man who threw it. This was, it is be-lieved, his reason for the attempt to get her out of the way, because he repeated of having revealed as much as he did, and was afraid his disclosures might eventually lead him into greater trouble than merely killing his wife. Home Defense WASHINGTON, 28.—Admiral Porter has submitted to the Secretary of the Navy a report embodying suggestions for promoting the efficiency of the Navy. He says that in rehabilitating the Navy there is no subject worthy of more consideration than that of home defense. He considers it of vastly more interest, at the present moment, than the construction of cruisers and

ironclads now laid up at certain points.
"We require for the navy," the Admiral said," the following classes of vessels, which will at least enable us to show that we have a system, even if our a few hours a speed of 19 knots. Vessels of the second class to serve as flagships on foreign stations. The third class should be vessels of 3,000 tons, able to make for a few hours a speed of 18 knots." The Admiral remarks that it is proposed to construct a 13-knot gunboat carrying four guns. This vessel, he says, could not overtake anything, and a powerful Chinese gunboat would be more than a match for her. It is said ore than a match for her. It is said

that European powers have built iron clads without regard to future uniformity-so that it would be a difficult matter to make any formal lines of The United States is making mistakes of the same character, by build-ing so many different classes of vessels at the outset, without knowing whether any of them will meet the requirements of a cruiser of the present day. No nation, he says, can dispense with ports, but it is better to depend upon the navy to protect our coasts instead

of maintaining so small a force of iroleids as we have at present. Every year we should construct three or four double turreted monitors, no matter if we do not build any cruisers in the meantime.

Turning his attention to the subject of torpedo boats, Admiral Porter says that he has seen enough of torpedoes to know that two or three hundred pounds of gun cotton exploded under a ship, no matter what her size, is bound to sink her, or place her hors du combat. Yankee ingenuity, if stimulated by the prospect of a sufficient reward, would no coubt soon give us a superior torpedo. He commends the Erickson torpedo and says what we Erickson torpedo, and says what we require to fire such a torpedo is the fastest vessel in the world. Some-

hing that torpedo destroyers can't The report treats of the reorganiza-tion of different branches of the navy and especially of the Navy Depart-ment. This reorganization he insists must take place sooner or later, and whoever achieves so great a victory will deserve the thanks of the country. The Admiral takes strong ground in layor of government encouraging the private ship yards of the country by giving them all the word possible to republic improvements. Monuments, Mantels, Iron enable themito improve their plants, so that in time of war they can aid the government in building and repairing vessels.
