THE ASSESSMENT AND THE PARTY OF MINING, BUSINESS AND STOCKS.

DALY-WEST WAS WEAKER TODAY

As Low as \$38.45.

BEN BUTLER REMAINS FIRM

Uncle Sam Active-Tesora Sagging-Sacramento Sliding Towards 25 -Ingot Traded In.

Business was not very active on the mining exchange today. The sales, which amounted to about \$30,000, represented the sale of 26,775 shares of stock. Daly-West was again very active today, though prices fell below those of yesterday, Nearly 500 shares changed hands at prices varying from \$38,60 at the opening to \$38,45 at the close. Teso ra was also quite active, though prices fell off to 91 as compared with 97 at the opening. Uncle Sam fluctuated between \$2.07 and \$2.081/2, while Ben Butler remain firm around 211/2. Sacramento released over 3,000 shares at prices ranging from 29 at the opening to 28% at the close, Ajax loosened up 100 shares at \$1.47, while Ingot did a little business at 3. Mammoth hung around \$2.27%. La Reine weakened to 29, with 2,000 Tetro going at 19%. Emerald was traded in at 14. Golden Eagle participated at 11/2, Manhattan sold at 1/4. Closing quotations were posted as fol-

UTAH CAPITAL FOR WOOD RIVER

Sales Were Made on the Exchange | Salt Lake Men Making Examination of Idaho Mines.

TWO DEALS ON THE WAY.

Lower Mammoth Overdraft- Returns From Deep Creek-Electric Ore Precipitator-Notes.

Engineer T. P. Rigney returned this morning from the Wood River cauntry, Idaho, where he made an examination of three mining properties for Salt Lake parties. Mr. Rigney declined to give the name of the parties who are contemplating investment in the mines of that district, but he stated that they are well known in mining circles. He was very much surprised to learn how much Utah capital is invested in the mines of the Wood River country. Mr. Rigney was away ten days and

during that time he looked over about thirty miles of country and examined three silver-lead mines, one of which was turned down. The other two will be submitted to a further investigation and if it proves successful, one or both of them will pass into the hands of 10cal parties. Both of the mines have produced considerable ore of excellent grade, carrying from 150 to 250 ounces silver and 50 to 70 per cent lead. That is, of course, the shipping ore. Large bodies of second class ore are left un-touched in the mine which will run from 30 to 40 ounces silver and 5 to 10 per cent lead. One of the mines is located about five miles from the railroad, the other being much farther. Nothing has yet been done to hardle the low grade ores of the properties, and Mr. Rigney sees big profits for those who are able to mill the second class ores. Everything is favorable to the erection of mills, but lack of capiand enterprise in some cases, is said to be the cause of the present action of mine owners who extract the high grade and do not disturb the milling ores. The veins of the district are fairly large, running from 8 to 12 feet in width. They are quartz in black bi-tuminous lime. There is plenty of wa-

Mr. Rigney says the Franklin syndicate if the city is preparing to start work on the old Eikhorn property, which has produced something like

LOWER MAMMOTH SHIPMENTS. Ore is Higher Grade - Statement

Made Regarding the Overdraft. It would seem from the returns received by the Lower Mammoth Mining company this morning that the ores of the mine are improving. The two cars netted the company \$1,060. It is stated that the grade of the ore is growing better with depth, that is, there is less waste with the ore. The outlook is brighter than it has ever been, but Mr. Bamberger said today that the company is not yet out of the woods, finan-cially. A good deal of speculation has been indulged in as to the amount of the overdraft. It has also been stated on very good authority that the company was accumulating a surplus. This, however, is not true. The "News" is authorized by Mr. Bamberger to state that the company still owes \$10,000 within a few dollars. The prospects of its being reduced speedily are excellent, however. An excellent grade of ore is now being opened up on the 900 level, both in the west fissure, which has just been intercepted and in a winze from that level.

Returns from Deep Creek.

J. P. Gardner, who owns about forty mining claims in Deep Creek country, has returned to town after a trip of two months to the mountains of Clifton While away Mr. Gardner vis ited a large group of eighteen claims, which he owns, located near Col. Woodman's Gold Hill property. A force of five or six men is engaged in Umbering a 150-foot shaft, which has been sunk on some fine looking mineral. Mr. Gardner intends to continue the development of the property, the assays from which are very cheering. The ore carries 4 per cent copper, \$3.90 to \$4.00 gold, 30 to 50 per cent lead and from 25 to 30 ounces silver per ton.

Mr. Gardner says that things appear to be rather quiet out there, though the usual number of prospectors are workmany of them in a desultory sort

Electric Ore Precipitator for Utah. Mr. J. S. Leaver of the Butter's Laboratory in the Dooly block has returned from sampling the tailings dump at the Mammoth mine in Tintic. He is now making tests and says it will probably be two or three weeks before he will be able to give out the results of the present tests. A new Seiman-Halkse electric precipitator is now being in-stalled at the laboratory for the purase of making tests on the extraction f the values from various ores by electricity instead of zinc shavings as in the case of most cyanide mills. The ore precipitates on the cathode of the electric machine. The present one will be able to handle several tons of ore at once and will be a valuable ad-dition to the already very complete plant of Mr. Butter's, the owner.

The "Loose Separator."

The Denver Post refers to the recent tests on the Big Indian ores by Warren Loose of Provo as follows: A new method of treating ore has been applied, and apparently with fine success, upon the products of the Big Indian mine n Utah. It is called the Loose separavice the carbonates of copper occurring in the form of malachite, azurite, etc., are converted into a metallic copper, after which the metal is separated from the gangue: the crude ores are reduced to an eight mesh, mixed with a small percentage of powdered charcoal and fed into a hopper, from which it is passed into revolving tubes of wrought on and subjected to a heat of 1,800

From these tubes, in which the ores are cooked, they pass by gravity into a tank of cold water, the bath protecting the ore from exidation by contact with the air, and releasing the metal disintegration of When taken from this bath the product is identical with that of the crude ore mined at the Calumet and Meela of Lake Superior, the metallic copper ap-pearing in shot-like form in the black-ened silicia. The product is then ready for the sixty-mesh, and is passed over | ment of this city.

tables, by which the kernels of bright copper are separated from the gangue and converted into pigs ready for mar-ket.

Report of Galena Company.

A statement has been issued to the shareholders of the Galena Mining company of Fish Springs covering the operations of the past three months. In that time the company has marketed ore valued at \$2,884.64. This cuts the overdraft down to \$8,427.91. The ex-pense of running the property for the above period was \$3,265.49. The management recently opened up a nice chute of ore in a winze from the 690 level. Connection will shortly be made with this chute on the 700 level. A large quartz vein, spotted with lead has also been found on the 600 level, which is expected to develop into something good. Manager Joseph says the ore shipments have more than paid ex-penses during the past two months.

Seven Devils Mines Active. The Weiser (Ida.) Signal says the

Blue Jacket hoist is now in operation and the machinery is working smoothly. The company has sunk 200 feet since the 1st of May and has on three full shifts-8 hours each. In about 60 days the 30-ton smelter contemplated by the company will be in place near the hoist. A reverbratory furnace is planned and can be very cheaply operated, wood sprayed with crude oil being the fuel. The oil is inexpensive, and is con-sumed in very moderate quantities. At the Decorah the force is being to creased and matters are being shaped for a steady output. A huge ore bin has been constructed and a new chute built, down which the ore is pouring all day. A series of bins are planned, a new one being added as fast as they are required. Decorah ore will probably be all stored in this way until it can be taken to the smelter by rail.

MINING NOTES.

Dexter sold at 86 on the curb this

The Uncle Sam Con. had a car of ore on the market today.

A car of ore reached the market to-day from the Carisa of Tintic. The Shawmut of Bingham reported today with a car of concentrates.

An important strike was reported today in the Tiewaukee of Bingham. A car of ore was on the market to-day from the Rough Wrestler of Bing-

The Sunday mine in American Fork canyon had a car of ore on the market

The Tiewaukee of Bingham reached the market today with a car of con-

Col. Bruback went out to Tintle today to inspect the Silver Bow and Argenta Mining company's properties, Frank Lohring of Denver has re

turned from an examination of Park Valley, with which he is well pleased. The Taylor-Brunton sampler reported 5 cars of ore from Bingham, 2 from Tintic and 1 from American Fork can-

yon today. Glen R. Bothwell went out to Mercur this morning to look over the Sacra-mento. He will probably bring the July

clean-up to town on his return, The decline in Daly-West is not due to any change at the mine, which is looking first class. Somebody being

forced to realize is said to be the explanation. Col. Milner, who is interested with Sam Glison in coal lands near Price, says a shipment of 3? tons of coal has been made to the Colorado Fuel and Iron company for experimental pur-

Messrs. Lathrop and Effinger returned today from the examination of a gold mine in Idaho, news of which is promised in a few days. Mr. Effinger showed a bottle containing a fine lot of free gold, the results, he said, of one panning.

The Boise Statesman says E. B. Beggs, proprietor of the stage line from Boise to points in the Boise Bason, will naugurate a regular stage and pack train service from Boise to Thunder

Suit has been commenced by Frank E. Wilson against S. H. Dunning & Company to recover \$1,178.53 alleged to be due on certain transactions in May Day and Ajax mining stocks, complainant asks judgment on four causes of action.

The Detroit Journal says the United Steel company has bought a block of stock in the Ophir Mining and Milling company of Utah. The steel company company of Utah. The steel company is said to have bid for the entire block of treasury stock recently offered-250,-000 shares.

The Excelsior Gold Mining and Mill-The Excessor Gold Mining and Milling company has been organized in this city, with a capital of \$25,000, in 10-cent shares. W. A. Hodges is president; Eugene Hodges, vice president: Ethan J. Jeremy, treasurer. Fred Hodges, secretary, and William Cowan is the other director. The company owns the Homestake group of seven claims, located in Park Valley district.

Twin Lakes (Colo.) News: The Shumache property in Echo canyon, owned by D. K. Orner of this city, T. H. War-ner of Salt Lake City and M. M. Warner of Broomington, Ill., has been leased to Mart Orner of this city and James Schitzius and Bruce Stevens of Pueblo, who have also leased the Thomas mill, in which Mr. Orner is a part owner. A large amount of development work has been done on this property and the vein has been opened up with a tunnel so that stoping commenced on Monday and the mill is now running full blast, turning out \$100 concentrates,

STRUCK NATURAL GAS.

Good Flow Encountered by Weir's Salt Plant Workmen.

A strong flow of natural gas has been struck while boring for water on the property of the Weir salt works, which have been installed at the point of the mountain beyond Garfield beach. When the engine house on the property was first erected the water for the generation of steam was brought along a ditch from a spring about a mile away. It was found, however, that during its flow it picked up alkaline salts which would in due season have the effect of corroding the botlers. It was accordingly determined to sink an artesian well. This was done, and at the depth of 300 feet a stream was encountered which proved to be salt water. The well was accordingly abandoned. Yesterday it was found that the water was very much disturbed and upon inves-tigation a heavy flow of natural gas was encountered. Steps were immediately taken to cap the well. Should the volume of gas prove to be up to expec-tations it will mean great things for the Weir company, and the undoubted establishment of manufacturing plants the vicinity. The fact that the gas belt has been apparently struck on what will be the main lines of the Oregon Short Line, the Southern Pacific, and the San Pedro through to Califor-nia will mean much for the develop-

MARKET SLIGHTLY MIXED.

U. S. Steel Little Affected by the Strike Order Issued Last Night.

Union Pacific Depressed, as Were Several Other Railroad Stocks Livestock and Produce.

New York, Aug. 7.- The issuance of the general strike order by the Amaigamated association was without much effect on the prices on the United States Steel stocks, the common and preferred losing % each on sales of 6,000 and 5,000 shares respectively. The general market was slightly mixed but changes were not important. Trading became semi-stagnant, but the tone was firmer for a time and active stocks made small gains. Sugar was marked up 2 points against the shorts, but other industrials were neglected. Offerings of the United States Steel issues were well taken during the first half hour and their opening losses were wiped out. They dropped to the lowest again when Sugar, St. Paul, Manhattan, New York Central and Union Pacific were depressed a point each. Reports of dissatisfaction among mine workers caused some selling of the coal roads & Hudson 14. Lackawanna slumped 74 on one transaction. General Electric fell 31/2. The market otherwise showed a hardening tendency. The earlier low point influenced purchases for both accounts and some good recov-

Bonds were dull and irregular. A rise to 53% in Southern Pacific and a return to the highest by St. Paul and Atchison infused additional firmness to the railroads.

Situation as to Money.

New York, Aug. 7 .- The Herald says: According to the best information the advance in demand sterling was due to the necessity for demand bills against receipts of Klondike gold, falling at a time when there is a notable dearth of

bills in the market. The purchase of demand bills to remit to England the proceeds of the gold coming into the country from the Klondike and British Columbia adds a new phase to the present corious ex-change market and is apt to put a different aspect upon the gold receipts from these sections than that which has been ordinarily placed upon them by Wall street where gold from British Columbia, the Kiondike and Alaska has been regarded as adding so much new wealth to the country.

As explained by foreign bankers prac-tically all the Klondike and British

Columbia gold and some of that from Alaska is produced either by mines owned largely by British subjects or through processes of getting the gold to the assay offices the financial oper-ations are carried on through the Canadian bank agencies so that the final proceeds are due to foreign interests.

If the United States was still the pos sessor of credit balance abroad the products of the mines would go toward the reduction of the credit and offset some of the innumerable international transactions between this and foreign countries. At present the various agen-cies of the mines and banks are simply buying demand bills for the amounts on the gold receipts and remitting the proeds in that way.

This has contributed considerably to the recent strength of exchange though the principal cause still appears to be the purchases of sight sterling to meet maturing long bills and the dearth of bills at the present time which is at-tributed to London's sales of stocks delayed cotton shipments and the decreased corn exports. Exchange has acted very crratically. The same divergence of opinion exists as to the pos-sibility of gold shipments as before.

The amount paid out by the sub-treasury on Klondike gold recently has been quite heavy, amounting to \$948,000 yesterday and \$758,000 the day preceding, or \$1,706,000 for two days.
