GET THE DIVIDEND BENEFIT NOW

by buying at once preferred stock in Utah Idaho Sugar Company, In six months the stock has increased in market value over 15 per cent besides paying regular dividends of 17% cents per share per quarter. (Far value of shares is \$10). We will furnish what you want at the lowest price obtainable the day your order reaches us. It is poor financial policy to sell such stock at present prices but now is the time to buy.

GEORGE M. CANNON COMPANY. Rooms 512-513 Templeton Building. Phone-Bell, 57.

Manager Lafayette G. Burton Leaves To Start Mill Construction.

Lafavettee G. Burton, general manager of the Titah-Arizona Gold & Cop-per Mining company, and John O'Rourke, a well known mill man, leave today for the properties of the fore-going named corporation, which are lo-cated in the Weaver mining district, Arizona Arizo

Mr. Burton stated that the matter of mill construction is to be taken up right away and that a plant with a battery of at least 10 stamps will be installed. The dams, from which the mill is to be supplied with water, have been comsupplied with water, have been com-pleted, and it is expected that the pipe line to the mill site will be completed by the time the new plant is ready for operation, which ought to be anywhere from 60 to 90 days. In the Utah-Arizona properties is a

large developed tonnage of ore aver-aging \$20 per ton, on which Manager Burton figures there will be a profit of at least \$15 per ton when the mill is

CONDITIONS IMPROVED.

Machinery Houses Report Business Steadily Getting Better.

Local machinery houses have report-ed a decided improvement in business during the past three or four weeks which is evidence of the change for the better in the mining camps. Consid-rable new equipment has been shipped to Pioche as well as to other Nevada, amps; while the resumption at several camps, while the resumption at sevenit of the leading producers in Tintic, the construction of the new Tintic smelter, etc., has created a demand for that quarter. Bingham and Park City com-panies have also been sending in their orders.

a in the light of the experience of r fellow producers. 'And why is this the popular atti-de? The state of mind of the aver-e ore seller is very simple. In an readible number of cases he signs a contract offered him without care-lly analyzing it. He neglects the mple precation of figuring some of e former settlements on the basis of e new contract, before he signs it; precaution which will promptly indi-te whether or not the new contract ll be an improvement on the old. He es not study the metal deductions, does not study the metal deductions, rate of payments, and treatment charges in their relations to the gross value of the ore in some of bis

ypical shipments, in order to learn the percentage of division of that gross value between the smelter and himself. value between the smelter and nimself. He is often ignorant of the detalls of the contract form, and will sign what is offered him rather than make tacht admission of his ignorance by asking the smelter representative to explain the terms to him. I know of one mana-ger who was offered contracts by com-pathon smelting commandes. The first get who was offered contracts by com-peting smelting companies. The first offered to pay him for 65 per cent of the sliver contents at 65 per cent of the New York price; the second com-pany offered payment for 65 per cent of the contents at the New York price; and he failed to see any difference in the two items until a hypothetical case was fingred out for him.

the two items until a hypothetical case was figured out for him. "The state of mind of the ore-buyer is equally simple. He knows his busi-ness, and before presenting contrast terms he talks with his man in a gen-eral way and finds out how much his opponent knows. Then he weaves around his unsuspecting victim his in-triaste web of nercentrases deductions around his unsuspecting victim his in-tricate web of percentages, deductions, treatment charges, and confusing legal verbiage, until to the proffered con-tract, more often than not, there is meither objection nor aven protest made. He is not required by any rules of business conduct to show his op-ponent either the fine points, or even the obvious ones, and the seller is too proud of his own ability to admit ig-meance. There are engineers and managers who show in every word that they are thoroughly alive to the im-portance of reducing the cost of their product: whose every thought is for

CONCENTRATES.

The ore and buillon settlements re-ported late yesterday by McCornick & Company were: Crude ore and concen-trate, \$10,000; base buillon, \$25,000; base buillon, \$25,000.

M. M. Johnson, chief of the New-house engineering staff, has returned from Nevada. He came from Goldfield.

buying demind. July wheat opened & to 14 Jower at \$974 to 90, and sold at 9072 (990%). The corn market was strong because of firm cables and wet weather in the corn belt which interferes greatly with planting operations. May corn opened 14 higher at 75%, and sold at 76. July orn was unchanged to 34 higher at 65% to 65% and sold at 66%. Oats were firm, chiefly because of the strength of corn. July oats were un-changed at 46% and sold at 47. A decline of 10c, in live hogs caused an easy market in provisions. July pork was unchanged at 13.62%. Lard was to lower at 8.42%. Ribs were off 214@5c at 7.32%. The wheat market held firm for the remainder of the day. The high point for July was 90% @90%. From this point prices reacted slightly on profit.taking but the close was firm with July '4 6% higher at 90% @90%. From this point prices reacted slightly on profit.taking but the close was firm with July '4 6% higher at 90% @90%. From this point prices reacted slightly on profit.taking but the close was firm with July '4 6% higher at 90% @90%. EVAPORATED FRUITS.

Where the proposed advance in rail-road rates is part of the scheme to ad-vance the market or not remains to be seen. Such an advance under existing conditions would certainly be very poor poley. The public hostility to rail-roads is just beginning to abate; the extreme depression in freights will not last, and the advance would be a bur-den upon the producer and consumer when he is least able to bear it. No doubt the railroads have a grievance: but they must do as others are doing, out expenses to the limit, endure a cem-porary shrinkage in profits, and await the resumption of traffic that will sure-ly come in time. Any other policy will certainly revive public hostility and react unfavorably upon the railroads themselves. They had better accept their share of adversity the same as other people, and devote themselves to economy and keeping down expenses until business revives. EVAPORATED FRUITS. New York, May 22.—The market for evaporated apples is steady, but quiet, with fancy quoted at 10@10%; choice 8% 09%; prime, 7@7%; common to fair. 5% 09%; prime, 7@7%; common to fair. From 5% 0916 for Oregons. Apricots unchanged; choice, 18@12%; extra choice, 14% 14%; fancy, 15% 16%; Peaches are dull, with choice ouoted at 9; extra choice 0%; fancy, 10% 16%; extra choice, 14% 14%; fancy, 10% 16%; extra fancy, 11011%. Stocks of raisins at distributing points resulted in being small. Musca-tols are quoted at 5% 0%; seeded, 5% 0%; London layers, 1,25% 1.35.

BANK STATEMENT.

New York. May 23.—The statement of clearing house banks for the week shows that the banks hold 355,485,375 thore than the requirement of 25 per cent reserve rula. This is a decrease of \$5,-D. T. McCabe, vice president of the
