the tunnel can positively be drained by the present mathod though it will take some little time. Up until the present the main drawback in the take some little time. Up until the present the main drawhack in the work has been bad ground, and when-ever before a hole has been sent through the drift walls into the tunnel it has filled up, clogged, caved in, or in some other way proved unsatisfac-tory. Monday, however, connection was made with the tunnel by a hole which has stayed in hard ground all the way through and which will doubt-less hold. The flow of water through this is also large in volume and great in force and with two or three more of them drawing water from the tunnel the tedious work in the "big ditch" will be at an end. If is not now a mat-ter of being able or in a position to open the tunnel, but one alone of time. The water has been tapped and there, is no reason why there should be any further delay in completing the task, other than it will take some time, 40 days perhaps to draw the water of and get everything in condition again so that from the portal of the tunnel to No. 3 shaft there will be no obstruc-tion. the

OHIO KENTUCKY CON.

New Nevada Corporation to Operate Mines at Pioche.

Mines at Pioche. The Ohio Kentucky Mining company has been re-incorporated under the laws of the state of Nevada and will be known hereafter as the Ohio Ken-tucky Sonsolidated Mining company the latter to asborb all the interests of the first named corporation. It will now be necessary for holders of stock in the original company to present their certificates for transfer into the new. The Nevada corporation has been ciganized with the same ounder of shares as the old. It is understood that a majority of shareholders are favorable to an increase in the capital stock to 60,000 shares of the par value of \$10 u share and steps in that direction will probably be taken in the near future. The matter will be board of directors.
