account today of a valuable smoke consumer recently invented by Hyrum S Woolley of this city. It stated that Mr. Woolley had been in Washington, D. C., for the past month securing patents on his device, and that a telegram had been received by one of his financial backers here, which was the cause of much excitement in that he had been offered \$1,000,000 for a half interest in the patent by Senator Clark and other big financiers in the east. The article further stated that successful experiments had been made in Washington, and that the persons most

were Silver Bros., Heber J. Grant, Jerry Langford, N. W. Clayton and D. Wool-ley of Kanab; that next to the inventor, Silver Bros. were the heavies stock holders, and that they had made a number of machines and that one these was now working in the Cannon meeting house, and that it was the de-termination of Silver Bros, to sell none of the consumers at all, but to put them

out and charge royalties on "Now, that is a beauti a beautiful story Now, that is a beautiful story," said the largest backer of Mr. Wooley today. "It is all true-every word of it, except that no telegram has been re-ceived from Mr. Wooley; no experi-ments have been made in Washington; Senator Clark or other big financiers have not been spoken to about it, and have not been presented with either have not been negotiated with, either by telegram or letter; no such offer has been made for half or other interest in the patent; a number of the machines the patent: a number of the machines has not been made, in fact, it is not a machine at all, simply a furnace! But I think this will suffice for the measure? present.

The fact of the matter is, however, that Mr. Woolley recently built a fur-nace along such lines as to make it an absolute smoke consumer. The salv-age of this kind of furnace, it is also laimed, amounts to about 25 per cent The government has become interested in it, and Mr. Woolley and friends expect shortly to secure patents.

MOTHER SAVED HER FRIDAY,

Friday afternoon Ruth and her mother walked down the Ninth street hill from Penn to Washington. They saw Taylor approaching them on Washing-ton street. They kept their eyes on him, and Taylor lowered his head, nulled his beit down over his aves and pulled his hat down over his eyes and passed on. The mether and daughter did not lose sight of him until he disappeared from view. Taylor says he had a knife and intended to kill Miss Nol-

lard then, but changed his mind be-cause her mother was with her. Stil he bided his time. Yesterday afternoon he saw Ruth and her sixteencear-old sister, Louise walking east on Ninth street and he took up his position In the window of his room. The girls walked on until they were directly op-posite the window. They were on the opposite side of the street, but he did not fire then. The younger sister was on the side nearest him and obstructed his aim. The window where Taylor sat

with a 44-calibre Marlin rifle on his knee was in the second story and was the third from the west end of the building. He waited until the girls had pased on, until they had reached the corner of the alley known as Bank street. Ruth's back was now fully exposed to him. He took deliberate aim

and fired three shots in rapid success sion. The young woman screamed and fell, plerced by two of the bullets. The younger sister bent over her and a crowd assembled quickly. A thick cloud f blue smoke floated gently under the window and showed where the shots were fired. A mob gathered and cried for vengeance on the murderer. The police arrived, dragged Taylor from uhder a bed where he had concealed him-self and fought their way to the patrol which conveyed Taylor to the police station.
