FOR WOMEN.

No medicine is so good for pale, weak

We have about fifty miles of the Alberta Irrigation company's canal to construct; for which half will be paid in cost and balances in excellent produce land, at \$1 an acre, with free water for two years to set actions on these lands.

Lands are to be settled in Town or Ranch lots, which will include sufficient land for raising crops, and the government appropriation pay from 10 to 30 per cent of the expenses and taxes for 10 years.

All lands will be open to homestead entries, and will be subject to all laws of the state.

The class of people that succeed in this country are those that have a good knowledge of the soil, and are willing to work hard.
