LOWER MAMOTH STILL IN DEMAND

Stock Continues to be a Favorite Among Local Investors at Advanced Prices.

NEVADA HILLS GOES TO \$4.

Limited Sales of Unlisted Stocks Newhouse Lower-Closing Quotations and Sales.

Lower Mammoth continues a favorite with the local investor and when called to the front on the mining exchange today advanced from \$2,25 to \$2.30 and closed on the sale of 230 shares at the latter figure. Nevada Hills was also in demand and sold as high as \$4 a share. South Columbus Consolidated displayed considerable weakness, the stock selling as low as \$1.90, which is a drop of nearly \$1 a share over a week ago. Seven Troughs moved up slightly, while Mountain Lake hung around 91 cents, There were some sales of Yankee Consolidated which sold readily at 42 and 41; while Uncle Sam Consolidated went at 43 cents.

Among the unlisted stocks called, 300 shares of Standard Copper sold at \$1.171/4; 1,500 Copper Glance at 29 and 300 shares of Newhouse were bought at \$16.75; \$16.62 1/2 and \$16.50.

Metal Dealers association, in a letter sent by him to the attorney general.

Senator Clark says he has advices from New York to the effect that Noroton and his company are unknown to

the copper world.
"I believe the whole matter a fake started to fluctuate the copper market," said the senator. "The demand for copper is largely in excess of the output of the mines and it is impossible to store or accumulate copper without breaking into regular trade orders which are in course of being filled. It takes 90 days to prepare and refine the product from the time it leaves the mines until it reaches the market and it is preposterous to assert that any of it is being stored. In fact, the en-tire copper product of the country for the next three months is sold. There is not now and never has been, among kopper producing componies off this country, any combination to control or restrict the output of copper."

SMELTER FOR SAN PEDRO. Senator Clark Probably Backing This

California Enterprise. San Francisco, Jon. 31 .- R. O. Hobson who conducted an ore sampling mill at Goldfield, has left here for Los Ange-les to complete arrangements for the construction of a smelter at San Pedro, Cal. He will be the general manager

Cal. He will be the general manager of the new plant.

A company has been organized, with \$700,000 subscribed. The Clark railroad is interested in the project and has donated a section of land between San Petro and Long Beach, where vessels from Mexico may land with ores for fluxing. Power will be secured from Utah coal. Options on large blocks of Nevada ores are said to have been secured.

A. P. WAS WORKED.

New York Jan. 31.—The stories of an alleged meeting of the Northeastern Metal associotion in New York and an appeal by that meeting to Atty. Gen. Bonaparte charging the large copper inbonaparte charging the large copper interests with storing metal to force an increase, which was Int out by the Associated Press on Friday, Jan. 25, and on Sunday, Jan. 27, prove to be wholly untrue and seem to be the result of a cleverly devised scheme to use the Associated Press to affect the stock market. No such organization as stock market. No such organization as stock market. No such organization as the Northeastern Metal Dealers' association exists, and no such meeting was held. It is proper to say the matter was furnished to the Associated Press by the New York City News association, which is accounted thoroughly reliable; that it came in the regular course of business, and that there was nothing about it to arouse any suspicion as to its accuracy. M. E. STONE, General Manager.

RECEIVES MACHINERY. Special Correspondence.

Lehi, Jan. 31.—The Pelican Point Mining and Development Co. has re-ceived a consignment of machinery for its cyanide mill at Pelican Point and it is going right ahead to get machin-ery in shape to mill ores from its claims

EXHIBIT IN NEW YORK. Western Ores to be Displayed in Madi-

son Square Garden. New York City, Jan. 31.—Preparations for the mining exhibitions to take place in Madison Square Garden are going forward rapidly. William M. Porter has the matter in hand and reports that the liberal co-operation met with both here and in the west is most encouraging. The United is most encouraging. The United States geological survey will also very probably extend its aid to the enterprise, so that it is safe to predict a notable success, and mining interests in general will undoubtedly be greatly benefited.

JANUARY DIVIDENDS.

Nine Utah Mines Paid Shareholders \$1,143,060 During Present Month.

The January dividends disbursed by The January dividends disbursed by Utah mining companies aggregated a total of \$1,143,000. Altogether, nine concerns made distributions, Utah Consolidated taking the lead with its semi-annual remembrance to shareholders and was the only Bingham mine represented. Daly Judge and Columbus Consolidated paid their initial dividends, the first named representing Park City and the latter the camp of Alta. Grand Central Yankee Consolidated paid their initial dividends, the first named representing Park City and the latter the camp of Alta. Grand Central Yankee Consolidated Alta, Grand Central, Yankee Consolidated, Victoria and Sock Tunnel Consolidated come from the Tintic district, th Utah from Fish Springs and Century from Park Valley. The list is made up as follows:

Columbus consolidated	42,00
Daly Judge	115,500
Century	5,000
Yankee Consolidated	15,000
Beck Tunnel Consolidated	40,000
Grand Central	15,000

EIGHT MILES SQUARE.

Steptoe Smelting Company Has Acquired Large Acreage Near Ely.

quired Large Acreage Near Ely.

In connection with the smelter smoke problem, says the Engineering and Mining Journal, it is interesting to note that the Steptoe Valley Smelting & Mining company, which is now building an immense plant at McGill, Nevada, 14 miles from Ely, to smelt the ore from the latter camp, has acquired eight square miles of territory, together with the water right of the entire section, the object of securing this large area being to prevent the possibility of any damage claims arising from a smoke nuisance or the poliution of water. This certainly is a wise plan, especially where land can be secured so cheaply as in that section of Nevada. The Steptoe valley company is jointly owned by the Cumberland-Ely and Nevada Consoildated companies.

TO HAVE ANOTHER FURNACE.

dated companies

Douglas, Ariz., Jan. 31.-The Calu-Douglas, Ariz., Jan. 31.—The Calumet and Arizona copper smelter is to have another furnace in this city to handle the increasing output of the Superior and Pittsburg. The Copper Queen also is about to construct a glant furnace with a capacity of 1,200 to 1,300 tons every 24 hours. The production cost of blister copper at the Calumet and Arizona has been reduced to about 4 or 4½ cents per pound, so that the profit is enormous All reports indicate increasing prosperity among the copper producers throughout the state,

Today's Metal Quotations. | GOLD BUTTE IS SURE WINNER

Director J. B. Graham Advises Salt Lake Associates That They Have a Bonanza.

NETWORK OF VEINS, HE SAYS.

Is Characteristic Feature About Eureka Hill-Some of Them Are Large Ones.

Good news continues to come from the properties of the Nevada Gold Butte Mines company at Gold Butte, Nevada, and according to a letter received today from J. B. Graham, one of the directors of the corporation who is now on the ground, there is no doubt about the Eureka group near the banks of the Colorado river developing into a gold mine of very generous proportions. The Gold Butte company owns two groups, making in all about 20 full-sized lode mining claims and in addition to this, several placer locations, a splendid millsite on the banks of the Colorado river not more than a mile and a half from the Eureka property, where the company is now concentrat-

where the company is now concentrating all its energy.

"Eureka hill," says Mr. Graham in his letter," is simply a net work of veins and on the crest of it I just passed over a ledge of quartz at least 12 feet wide. On the right of it, the wagon road cuts through a vein four feet wide and the road for 20 feet is paved with cuartz.

quartz.

"To the left of the big vein on the Heiper claim, which shows a width of at least 40 feet, an open cut is being run, nearly all in quartz, all showing good values; while back of the 14-foot shaft (where we recently got a sample which assayed \$128 in gold to the ton), recent at the back here, run eight feet. an open cut has been run eight feet all the way in ore, with the exact width of the vein yet to be determined. All of the ore being taken from this vein looks to me like it will carry good

looks to me like it will carry good values.
"In the drift being run from the bottom of the 80-foot shaft the vein is widening and looks like the whole face will be in ore by tonight, and really some of it looks good enough to eat. It was from this vein that an average sample taken across 28 inches of the vein gave returns of \$20 to the ton. Tell anybody interested, that Gold Butte is opening up into a big mine, and no mistake. Just make up your mind that we have got it, and big, too."

too."
Mr. Graham says in another part of Mr. Graham says in another part of his letter that by running a 300-foot tunnel, the ore bodies can be cut about 250 feet under the dumps and a gravity tramway can be operated from there down to the millisite on the river, at comparatively small cost. Measurements taken at the river last year show the altitude at the millisite to be 812 feet and the tunnel site is probably 1,-200 feet. Mr. Graham says the weather is delightful and vegetation is starting. He expects to return to Salt Lake about Feb. 20.

PRODUCTION OF COPPER.

Reasons Expressed for Present Extraordinary Prices for Metal.

The reason for the present extraordinary price for copper is easily determined, says the Engineering & Mining Journal. The production of North America in 1906 was only 3.2 per cent Journal. in excess of the production in 1905, while consumption increased at a considerably greater rate (just how much it is not yet possible to say), and at the beginning of 1906 the American market was bare of stock of refined metal, except the comparatively insignificant quantity that is always neces-sarily on hand.

The present outlook is for a prolonged

continuance of the high level of price. Consumption shows no diminution, so far as can be judged from trade reports, and there is no great prospective in-crease in production. Arizona and Michigan both produced in 1906 to their full limit. Montana cannot do much more until the new smelting capacity, now under construction, is completed. Utah is troubled by the smelter-smoke question, and the new dressing works question, and the new dressing works will hardly be completed before midsummer. The Balaklala, of California, will scarcely be producing before that time. Ely, Nev., will not begin to produce until 1908. Alaska will probably show a considerable increase in production, and Idaho will forge further ahead. At present there is no good ground for forecasting a larger percentage of increase in 1907 than there was in 1906.

was in 1906.

In 1908, when the disseminated ores of Bingham, Utah, and Ely. Nev., will be yielding copper, when Shasta county, Cal. will be producing at its maximum, when the smelting capacity on the Pa-cific coast will be greatly increased and larger supplies of ore will be coming from Alaska, we may expect an import-ant gain in the production; but who can say what the consumption will be

We believe that during the next 10 years the copper of Alaska is going to be a great factor in the production. The reports of reliable engineers on its The reports of reliable engineers on its deposits, with which we are conversant, are strongly optimistic. According to the statistics which we published Jan. 5, the production of Alaska increased from 4,702,600 lbs. in 1905 to 6,250,000 lbs. in 1906. However, the latter figure did not give the territory its full credit in not give the territory its full credit, in-asmuch as much of its ore goes to Van-couver Island smelters and appears in the Canadian production. Making al-lowance for that, the production of Alaska in 1908 was about 8,000,000 lbs.

MAY FIND A TREASURE.

Vancouver, B. C., Jan. 31.—The recent bonding by the Guggenheims of several copper claims on Sooke harbor and Leech river has revived a story of several years ago regarding a large treasure said to be buried at Leechton, near the creek. It is suggested that if the Guggenheims prospectors should overrun the district they may yet stumble upon the treasure. It seems that a dying man in San Francisco confessed to a jailer who had befriended him that many years ago he had stolen \$60,000 and buried it at a spot marked on a man buried it at a spot marked on a map of the Leech river in British Colum-bia. All attempts to locate the treas-ure have so far been in vain.

Charleston, W. Va., Jan. 31.—The mangled and dismembered bodies of at least 30 of the 80 or more victims of Tuesday's disaster in the Stuart mine near Thurmond, W. Va., were piled about the foot of the shaft when the rescuing party reached the mine level last evening. On account of a broken eage it was impossible at that time to begin their removal, that work being did run made by all of the Idaho factories in 1906. Rooms 512-513 Templeton Bldg. 'Phone Bell 57. ed late yesterday by McCornick & Company were: Crude ore and concentrate, \$35,000; base bullion, \$65,000. Charles D. Rooklidge, manager—the Yeriagton Copper company, expects to leave for Yerington, Nevada, during the latter part of the week. Manager W. M. Wantland reports excellent results coming from the proper-ty of the Zenoli Mining company near Palisade, Nevada.

inst evening. On account of a broken cage it was impossible at that time to begin their removal, that work being left for today, and only one body was in condition for removal with the bucket that was at first used. Instant death appears to have overcome all the miners and a thorough investigation will be necessary to determine the exact cause of the disaster. That none of the 90 men who were in the mine when the disaster occurred escaped death, now seems certain, and the rescuers are looking for more bodies as they advance farther into the mine.

The arrival of 60 coffins and an order for 25 additional gives an idea of the company's estimate of the probable death list. The rescuing parties continued at work through the night, but the taking of bodies from the mine was delayed until the mine cage, which was wrecked by the force of the explosion, can be repaired. The body of John Quack was taken from the shaft in the bucket and the coroner's inquest will probably be on his remains. In addition to the investigation by the coroner's inquest Chief Mine Inspector Paul and Deputy Henry are making an independent investigation.

WESTERN MARKET LETTER.

charles D. Walcott, who has occupied the position of director of the United States geological survey since 1894 has bene chosen secretary of the Smithsonian Institute at Washington, D. C. During his term the work of the survey has been greatly extended by the addition of the irrigation and water investigations, but it has met the increase promptly and creditable. His administration of the control of the property and creditable. Special Correspondence.

Kansas City Stock Yards, Jan. 26.—The proportion of cattle from the range country is growing smaller each week. Within the past week we have had some Idaho feeders at 4.76, stockers 4.25, Oregon hay fed beef steers at 5.09, Colorade stockers 4.25, Colorado medium to common cows today at 3.00, panhandle cows at 2.75 to 3.10, stockers around 4.00. Prices on all classes of cattle are at the top figure of the winter just now. Supply is 9,000 head today, small for Monday, and the market is strong to 10 cents higher, most strength being snown by cows and heifers, with stockers and feeders a close second. Receipts will run about the same as last January this month, but the tendency seems toward smaller runs for February. Fed cattle are all making money for the feeders, and it is only natural that there should be a phenomenal demand for stuff to go back to the country. Black reeders sold at 5.00 today, and bulk of feeders is at 4.00 to 4.80, stockers selling at 3.59 to 4.50.

The mutton market closed last week without any great change in prices, but with a weaker feeling on wethers and ewes. The supply today is 10,000 head, lambs steady to a shade lower, sheep weak to 19 cents lower. Run last week totaled 30,000 head, which is several thousand short of corresponding week last year, and the supplies for January will show a shrinkage of more than 20 per cent from January a year ago. With no prospect of any increase in receipts, the market should strengthen, rather than not, during February. Lambs are selling today within the narrow range of 7.25 to 7.50, 71 lb. pea fed lambs from Monte Vista selling at the latter price. Western Meat company ewes sold at 5.20 Briday, wethers at 5.70, which was a reduction of 5 cents in each case from sales of the same stuff earlier in the week. Wethers sold at 5.60 today, light yearlings at 6.55, medium to common ewes at 4.85. Special Correspondence. promptly and creditably. His adminis-tration has been thoroughly successful from the beginning. from the beginning.

The Copper Giant Mining company filed articles of incorporation Wednesday in the county clerk's office. The capital stock is placed at \$50,000, which is divided into shares of 10 cents each. There has been 100,000 shares set aside as treasury stock and the remainder has been subscribed. The company counts averal claims in Boxelder county. owns several claims in Boxelder county.
The officers are: W. E. Headings, president; L. D. Seager, vice president; G. A. Livingston, secretary and J. H. Kidd, treasury. The local markets are well supplied this week with all kinds of provisions, particularly fruits. The receipts include four or five cars of oranges, which are becoming ther as the season progresses, a car of lemons, a car of Idaho apples, with broken but good sized shipments of vegetables of all kinds from Los Angeles, and lettuce not only from southern California, but also from Moapa and Texas. Large shipments of finan haddies and smoked hallbut, also Florida pine apples are among the receipts. Maryland and New York oysters are on hand in plenty, with purchasers giving Jersey oysters a wide berth. There is a good supply of poultry reported, though fish is not as plentiful as usual on account of storms off the northwest coast, Pacific coast lobsters (crawfish) are now on the market, Cucumbers from California are on hand at 25 cents cache.

IRREGULARITY MARKED STOCKS

No Very Urgent Selling Pressure **But Demand Was Languid** On Advances.

READING AND U. P. ATTACKED.

Decline Followed, Character of Buying Impressed Shorts and They Bought to Cover.

New York, Jan. 31 .- The opening dealings in stocks were quiet and price changes were small as a rule, but irregular and confused. Among the principal gains were Union Pacific Canadian Pacific and American Tobacco preferred which rose large fractions. Among the losses Reading and New

York Central were down large fractions.

Much irregularity characterized the dealings. There was no such urgent seiting pressure as yesterday, but the demand was very languid on advances. Successful attacks were made against stocks which have a predominating influence on the market, such as Reading and Union Pacific.

the market, such as Reading and Union Pacific.

Pretty much all of the listed remained on a level with yesterday's closing or below. A few isloated advances were recorded, including 1½ in Great Northern preferred.

The decline reached the average level of prices before, but the character of the buying impressed the bears and they bought freely to cover shorts. A substantial recovery ensued which carried Union Pacific 1½, Canadian Pacific, Sugar and Amaigamated Copper a point over last night.

Bonds were heavy.

last night.

Bonds were heavy.

Some additions were made to the recovery that was in force at midday before the market began to gradually slide
back again. The recessions, however,
did not exceed half a point and were
attended by dullness.

WOOL. ST. LOUIS.

St. Louis, Jan. 31.—Wool, steady, Territory and western mediums, 23@28; fine mediums, 18@22; fine, 15@17. LONDON.

London, Jan. 30.—The first series of the 1907 wool auction sales closed today. The feature was the active competition in which American buyers were prominent, especially when cross-breds and merinos of good style were offered. Final quotations compared with those of the December sales, unchanged to 5 per cent higher, with the exception of coarse, heavy cross-breds, which declined 46. During the sales \$7.000 bales were taken by home buyers, 60,000 for the continent, 13,000 for America and 3,000 were held over for the next series.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago, Jan. 31.—The wheat market opened active today and prices were strong on a good demand. Offerings were light. The principal bullish factors were a sharp advance at Liverpool, and small receipts in the northwest. May wheat opened ½0½ to ½ higher at 75½ to 75%/6/79 and sold at 75½.

The corn market opened, active and strong because of a decided advance at Liverpool and fresh reports of damage to the Argentine crop by dry weather. Commission houses were good buyers. May opened a shade to ½40½ higher at 40% to 46% and sold at 47.

Prices in the oats market were firm and trade was fairly active. May opened ½ to ½ higher at 55% to 39, and sold at 3944.

Provisions were quiet and prices were

2914. higher at \$5\structure{8}\$ to \$1\structure{4}\$ higher at \$5\structure{8}\$ to \$2\structure{4}\$. Provisions were quiet and prices were strong, chiefly because of a 5-cent advance in live hogs. May pork opened 10 415 cents higher at 17.27\structure{6}\$ and advanced to 17.27\structure{6}\$ and advanced to 17.27\structure{6}\$ to an advanced to 17.27\structure{6}\$ and ribs were 5677\structure{6}\$ cents higher at 9.67\structure{6}\$. SUGAR AND COFFEE. New York, Jan. 31.—Sugar, raw, quiet. Fair refining, 231-32; centrifugal, .96 test, 3 15-32; molasses sugar, 22-32.
Refined—Steady, Crushed, 5.50; powdered, 4.90; granulated, 4.80.
Coffee—Steady, No. 7 Rio, 7.
