MINING, BUSINESS AND STOCKS

ORE FOR EIGHT HUNDRED FEET.

A Continuous Exposure for That Distance Made in Recent Workings of Douglass Mine.

LETTER FROM SUPT. SMITH.

Copper Property Near Yerrington, Nevada, in Which Salt Lakers Are Interested.

The Douglas mine near Yerrington, Nevada, and which was acquired not long ago by A. J. Orem of Boston, Walter C. Orem, J. D. Wood and Frank J. Haggenbarth of this city, and wich has formed the nucleus for the organization of the Nevada Copper company, is responding to development in a most satisfactory manner. In fact, there are most excellent indications that it is going to become a producer of great magnitude.

A letter received today from Superintendent J. H. Smith conveys the information that he has found ore in every opening made on the property up to the present time.

"The Orem winze," adds Mr. Smith, "is down 36 feet, and has never been out of ore. The Kimball drift has been run 51 feet and is also in ore. We have taken the men out of this drift, for with the face in ore and surface all in ore, it seems a useless expenditure of money to prove up what we already know we have. The same may be said of the Woods drift. The Pierce drift is in 68 feet from the main tunnel, with the face showing garnet and some copper. One shift is working here.

"With the numerous pits and surfacing continuing east, this practically gives a continuous ore exposure from the Klondyke to the canyon road—a distance of not less than 800 feet."

It is expected that the Southern Pacific will soon begin the construction of its proposed branch line from Wabuska, a station on the Nevada & California feeder for the system, in the near future and by that time the Nevada Copper, as well as some of the other big companies which have secured a foothold in that region, will have plans well matured for the erection of reduction plants.

Superintendent Smith says the district is very active at the present time, and expressed the belief that in the Mason valley, or Yerrington, region will be developed one of the greatest copper camps in the world.

ON MINING EXCHANGE.

Summer Dullness is on in Earnest—Quotations and Sales.

The hot weather is telling on the stock market. Nearly all stocks are weak as is usually the case during the heated term. During the regular call, Daly West saved a complete whitewash, for that was the only stock recording a sale among the long row of listed stocks. But on the open board, more activity was in evidence. Daly Judge sold down to $11.50, certainly a bargain price, for this well known Park City stock. Beck Tunnel moved down to 80 cents and Nevada Hills dropped to $2.10. New York did not move far away from 29 cents, while Ohio Copper received attention at $1.50.

The closing quotations and sales were as follows:

WORK GOING AHEAD.

Some of the Things Being Done in Development of Manhattan.

Special Correspondence.

Manhattan, Nev., July 8.—The warm weather seems to have acted as a stimulus on mining operations in the Manhattan district, and development work is being carried forward with even more vigor than ever, and some very good strikes have been the result. That the ore in Manhattan goes to the deep is now an assured fact, as several workings are now nearing the 200 foot level, with the ore of a much better grade than nearer the surface.

The double compartment shaft on the Manhattan Consolidated is down 125 feet, and with the aid of the large pump to handle the water, there will be no trouble in carrying on the work to great depth. This property has the distinction of having the first high grade ore in camp, and now with development work, large quantities of the precious metal are being blocked out.

The trend of the ore body of the Manhattan Consolidated seems to go toward and through the property of the Manhattan mother lode, to the southwest. That company is actively engaged in finding the ore shoot by means of a tunnel. Good values have already been obtained.

The shafts on the Union No. 9 claim of the Manhattan Dexter and the Little Gray are now down nearly 200 feet and both have the same vein continuing milling ore, with occasional streaks of high values. This high grade ore is being sacked for shipment, while the balance is being laid to one side awaiting the erection of a mill, which is now an assured fact, contracts having already been closed for a 25 stamp custom plant, to be erected at Central, two miles west of Manhattan.

Word comes from the management of the Buffalo at East Manhattan that a mill will soon be in operation at that point, which will be a decided advantage to the large properties working in that section of the district. The Manhattan Mammoth has good ore at 240 feet in its tunnel, and the Consolidated Manhattan good milling ore at 166 feet. Orders for heavy machinery have been placed by seven companies operating at East Manhattan.

MONTEZUMA A WINNER.

Interesting Developments Taking Place At This Bingham Mine.

Peter Porter, under whose management develop ment work at the Montezuma and Cluster mines at Bingham is being prosecuted, came in from the copper camp last night decidedly well pleased with the showings being made at both of those properties.

At the former, drifting is in progress on a good looking fissure on the 200 level, the width of which is from four to five feet, out of which considerable shipping ore is being obtained and hoisted.

It is expected that the lime contact will be reached within the next 20 feet, when Mr. Porter expects to find some interesting conditions.

At the Cluster mine the tunnel has just broken into another lode, containing lead ore, at a distance in of 180 feet. This tunnel has already passed through a lode 100 feet wide, containing low values.

THE NEW COMSTOK.

The New Comstock Mining company is the name of a corporation organized to operate the Clark group of claims in the Ramsey, Nevada, district, which were recently taken over by A. H. Mayne of Goldfield, W. H. Child, H. B. Cole of this city, L. D. Gordon and E. H. Nead of Round Mountain. The Ramsey district is situated about 15 miles out from Virginia City.

FOUND FORTUNA IN GOOD SHAPE

Manager Sidney Bamberger Reports Several New Strikes in This Bingham Mine.

MAY HAVE AERIAL TRAMWAY.

Thinks it Preferable to the Surface Kind—Work at the Bingham Mary.

Sidney M. Bamberger, under whose direction the Fortuna mine at Bingham is being developed into a producer of considerable prominence in the camp of Bingham, returned from the diggings last night and reports having found conditions there in a very satisfactory shape.

Since his previous visit to the property Supt. Rasberg had opened up new ore bodies in three or four places; one on the upper level being of considerable significance. Here a big shoot of lean ore had been cut into and a shipment of about 100 tons received in the local market during the past week, netted the company between $40 and $50 to the ton.

After looking over the ground thoroughly, Mr. Bamberger has about reached the conclusion that an aerial tramway will serve the purposes of the company in moving ore down to the Rio Grande tracks better than anything else and has about abandoned the idea of building one on the surface. Engineer Vail will go out to camp in a few days to look over the situation and make surveys. The aerial system would not need to be over a mile long and Mr. Bamberger states that the Rio Grande's new high line could be easily connected with on what is known as Dalton flat.

The work of pushing the tunnel through the mountain to the Bingham side of the mountain is being pushed and, it is estimated, that it will be necessary to drive it forward at least 2,000 feet to reach a short cut for employes to reach the town of Bingham and avoid the stiff climb over the hill. It will also be the means of reaching some known ore bodies, some of which have already been intercepted.

At the Bingham Mary mine the shaft is going down rapidly and is nearing the 250-foot point. In the meantime a drift is being run on a promising lode from the 120 level.

KIRBY COMES TO TOWN.

Will Leave Management of Montana Tonopah August 1.

John A. Kirby, one of the Salt Lakers who has cleaned up a snug fortune from the Nevada Hills property at Fairview, Nevada, came in from the west last night and expects to remain in the city several days, when he will return to Tonopah to clear up his desk preparatory to turning over the keys to his successor as general manager of the Montana Tonopah mine, which event is scheduled to take place on the first day of next month. Just who his successor will be, Mr. Kirby states, he has not been informed, although it is very likely the directors of the company have probably agreed on a choice.

Owing to the pressure of so much personal business, Mr. Kirby served notice on the directors of the company that he desired to be relieved, and set Aug. 1 as the date.

NEVADA CONSOLIDATED.

Company Making Great Record in Opening up Copper Mine.

A Boston letter was received in this city today in which the writer dwells to considerable length on conditions as they exist at the property of the Nevada Consolidated at Ely Nevada.

The following article appeared in the July 7th edition of one of Boston's leading financial weeklies:

NEVADA CONSOLIDATED.

"Steady progress," it states, "is reported from the seat of operations at this company's properties and it is evident that the management is working with the object of making a handsome showing. The company's record so far has been an enviable one and the proposition has attracted considerable attention since the New York & Nevada and the White Pine companies, operating in the Ely camp of Nevada, were re-organized and combined into the Nevada Consolidated Co., about a year ago, with an authorized capital of 1,200,000 shares of which about 900,000 shares were originally issued. About 850,000 shares went into the hands of the owners of the two properties above mentioned, the remaining 250,000 being issued to the public at about $5 per share. The stock is now quoted on the New York curb around $17½. At the same time, $1,000,000, worth of bonds were issued at 80 to pay for the completing of a railroad to Ely, these bonds being convertible into stock at $5 per share. The management has not been contented with making a good showing in respect to its mining properties, but at the same time work on the above mentioned railroad has been steadily pushed. The scarcity of labor which has been noticed at various points in the west during the present season, has probably retarded the work to a certain extent, but in spite of this encouraging progress has been made. By the end of the present week, it is expected that the road will be completed to Cherry Creek, a distance of some 90 miles, which will leave from 40 to 45 miles more to be constructed. The entire road, judging from present indications, should be completed by August 15.

"The next important operation to be carried on will be the construction of the 5,000-ton plant, the foundations for which have already been excavated. There are said to be 25,000,000 tons of ore exposed and measured up and the property has been developed to a depth of about 700 feet, the ore having shown signs of improvement with depth, running about 4 per cent copper at the lower levels. The improvement will be apparent when it is learned that when the proposition was first brought out, there were reported to be 5,000,000 tons of ore in sight, averaging about 2½ per cent copper. The fact that the Guggenheim interests have obtained control indicates that the interests at 71 Broadway believe in the future of the property. The new board representing the Guggenheim management is to be chosen in the course of the next few weeks.

UTAH MINE DIVIDEND.

The directors of the Utah mine at Fish Springs met late yesterday afternoon and posted a dividend of 2 cents a share, or $2,600, payable on the 17th to all shareholders of record on the 14th inst. The company has another car load of high grade ore in today's market.

CONCENTRATES.

Lewis A. Jeffs expects to look after mining interests in Alta next week.

President MacNeill of the Utah Copper company is in New York, but is expected to reach Salt Lake about Aug. 1.

C. H. Getach of Park City is preparing to leave for Idaho to take charge of the properties owned by J. D. Wood of this city.

W. H. Jones, a member of the board of directors of the Nevada Gold Butte mine at Gold Butte, Nev., has returned from a business trip to Idaho.

A. J. McMullen, manager of the Skylark Copper Mining company, is in Chicago today on business of interest to the shareholders of that corporation.

Secy. Lambourne of the Daly Judge company returned from Park City last night and reports conditions at the property of that corporation very satisfactory.

The ore and bullion settlements reported late yesterday by McCornick & Company were: Crude ore and concentrate, $25,000; base bullion, $59,000; gold bullion, $5,500.

Harry S. Joseph and D. H. Peery are scheduled to leave for Nevada this afternoon on mining business. They will visit the new camp of Chlorine, Fairview, and possibly Goldfield and Tonopah.

General Manager H. L. Siegel of the Siegel mines at Siegel, Nevada, has gone to camp again. With the completion of the Nevada Northern railroad to Cherry Creek the wagon haul has been cut down to about 25 miles.

The mine owners of the Wood River district in Idaho have been granted a new tariff on ores shipped to the Salt Lake smelters. On ores having a value of $30 a ton or less the rate is $3. From $30 to $35 the rate is $4; from that up to $60 a ton, $5.50, and from $60 up, 8 a ton.

"The final payment on the Hobo and Lion claims was made on Friday by the Fairview Mining & Investment company, acting for Ed McCarrick of Salt Lake City, to M. E. Pinney. These claims are a little to the south of the townsite company's line, and have been the center of a good deal of Mr. McCarrack's attention on his visits to the camp."—Fairview Miner.

A Bellingham, Washington, correspondent says: The Mount Baker mining district is agog over the discovery of an immense bed of coal along the banks of Glacier creek, in the southwestern part of the district. The find consists of a vein 30 feet thick and, as yet, of unknown length. Its discoverers, G. A. Alexander and L. Darrow, found it exposed for a distance of 70 feet. They are staking claims and intend to form a company to develop the coal.

One hundred De Forest Wireless stock at $3.00 Must be sold at once, so give us a bid, E. M. West & Co., Tel. 165. 327 D. F. Walker block.

STOCKS PERSIST IN GOING DOWN

Better Prices in London Had no Effect on the New York Market.

Later on There Was Some Mending Of Prices But Was Nothing Startling.

New York, July 13.—Prices of stocks started downward at the opening today without regard to the advance in London before the opening hour. Reading, Northern Pacific and C. & O., were the only important stocks to show slight advances, the gains in the last named running to ⅝. Chicago, St. Paul, Minneapolis and Omaha and United States Rubber fell 2. Great Northern preferred 1½, Amalgamated Copper, Smelting and Brooklyn Transit a point and St. Paul ⅝.

Liquidation among the specialties stiffened the standard stocks and a slight rally in which Union Pacific, St. Paul went above yesterday's close, the market became notably weak again. United Steel sold down to 32⅝, and the lowest price of the year and Amalgamated Copper made a new low record also at 52½. The decline elsewhere reached 3½ in Great Northern preferred, 2⅜ in Locomotive and Anaconda and 1⅝ in Toledo, St. Louis & Western preferred, and United Railway Investment, 1⅝ in Northern Pacific and L. & N., 1½ in Tennessee Coal, 1⅜ in St. Paul and Missouri Pacific and a point in Atlantic Coast Line, Erie second preferred, Kansas & Texas, Southern Pacific, Colorado Fuel and Central Leather. The market had a vigorous rally at 11 o'clock, some of the leaders again rising to above last night. The rally restored prices generally to near last night's level with the exception of some belated declines. Minneapolis, St. Paul and S. S. Marie fell 2, American Woolen preferred 1, Lead 1¼ and L. & N., Erie first preferred, Republic Steel, Pressed Steel Car and Distillers' Security 1, Illinois Central gained 1¼ and Northwestern, St. Louis and San Francisco second preferred and United States Pipe prefered about a point. The demand became extremely dull at the recovery.

Bonds were irregular at noon.

Operators on the long side of the market managed to establish a gain of a point in Union Pacific, Southern Pacific and Reading, but the subsequent demand was not sufficient to hold them or the rest of the list at the best.

The overnight advances were cancelled and the market went back, but prices still remained considerably above the low prices of the day. Around 2 o'clock the market began to mend and the Pacific, Reading and Smelting got back to near the highest. Northwestern improved 3.

LIVESTOCK.

CHICAGO.

Chicago, July 13.—Cattle—Receipts, 2,000; market strong. Beeves, 4.10@6.30; cows and heifers, 1.25@5.20; stockers and feeders, 2.60@4.50; Texans, 3.90@5.35; calves, 5.00@7.00.

PRODUCE.

CHICAGO.

Chicago, July 13.—The wheat market opened strong today with commission houses buying actively. The strength of the market at Liverpool and fresh reports from the Canadian northwest that rust is spreading in the fields caused the firmness. September opened a shade to ½@¾ higher at 79 to 79⅛, sold at 78⅞ and then advanced to 79⅝.

Minneapolis, Duluth and Chicago reported receipts of 331 cars.

The corn market was easier on reports of rain throughout the corn belt. A quick reaction followed on covering and the market became steady. September opened unchanged to ¼ lower at 52⅜ to 52½ and sold at 53.

The oats market was steady in sympathy with wheat and corn. September opened ⅛ lower at 35¼ to 36, and sold at 35⅝.

A sharp break in September pork due to realizing sales was the feature of the early part of the provision market. On the decline the market was well supported by local packers and most of the loss was regained. Lard and ribs were steady. September pork opened 17½ to 22½ lower at 17.05 to 17.30, and sold up to 17.35. Lard was 2½ lower at 9.10. Ribs were down 2½ at 9.45.

Cash: Wheat—No. 2 red, 79@80¼; No. 3 red, 77@78½; No. 2 hard, 77@78*; No. 3 hard, 75@77; No. 1 northern, 80@82; No. 2, 79½@81; No. 3 spring, 76@78.

Corn—No. 2, 52½@52⅝; No. 3, 52¼@52½.

Oats—No. 2, 37½; No. 3, 36½@37.

Close: Wheat—July, 77⅝; Sept., 78½@78⅝.

Corn—July, 52¼; Sept., 52⅛@52⅜.

Oats—July, 36⅜@36⅝; Sept., 35⅛@35½.

Pork—July, 18.75; Sept., 17.40.

Ribs—July, 9.47½; Sept., 9.42½.

Rye—July, 55½.

Flax and Clover—No sales.

Timothy—Sept., 4.25@4.50.

Barley—Feeding, 32½@40; No. 3, 43½.

SUGAR AND COFFEE.

New York, July 13.—Sugar, raw, steady. Fair refining, 3 7-32; centrifugal, 96 test, 3 23-32; molasses sugar, 2 31-32. Refined—Steady. Crushed, 5.40; powdered, 4.80; granulated, 4.70.

Coffee—Steady. No. 7 Rio, 7¾.

WOOL.

ST. LOUIS.

St. Louis, July 13.—Wool, steady. Territory and western mediums, 24@28; fine medium, 18@22; fine, 16@20.

When The Hottest Day Comes

Let it remind you of the comfort you'll have next winter using "That Good Coal."

BAMBERGER,

161 Meighn Street, U. S. A.

The man behind the dollar is the man who ought to know something about the rates and advantages to the insured that are offered by the HOME FIRE INSURANCE COMPANY OF UTAH.

Here are a few points worth considering:

We are the only local company.
We keep Money at Home.
We adjust and pay our losses promptly.
We have unsurpassed facilities for taking care of your business.

Heber J. Grant & Co.
