## FORMER WAS ACTIVE TODAY | QUINCY IS ON THE IMPROVE

#### Exactly 40,000 Shares Changed Hands -Ben Butler Unchanged - West Morning Glory Firm.

Business was very good on the mining exchange during the past week. Over 416,000 shares of stock changed hands for the sum of \$276,666.63. The sales today amounted to \$75,561 rep-resenting the sale of 52,900 shares.

The present week closes on a very interesting stock market, caused by a remarkable stiffening up in the prices of several stocks notwithstanding the excessive heat, which usually demoral-izes the stock business. Ben Butler, Ajax and Century furnished the most important features of the week on the exchange. Ajax, which opened at \$1.49 on Monday, sold up to \$1.83% today on news of a decided improvement on the 1,000 level. Exactly 40,000 shares changed hands today at prices varying between \$1.68 and \$1.83%. Ben Butler has changed hands at better than 21 this week owing to encouraging reports of the mine. In the beginning of the week it was traded in at 12% per share. Cen-tury was offered at \$2.69 on Monday. but it has since strengthened to \$3.00. West Morning Glory has also been a favorite this week, though no special change is reported at the property. Early in the week it sold at 5 cents, but it has since sold up to 8%. A lot of 3,000 shares was dropped today at 7%. Yankee Con also put on a spurt and sold up to \$5.12, as compared with \$4.90 earlier in the week. Daly-West has been active under \$43.00, while Star Con. has been stronger around 50. Eagle and Blue Bell is a little weaker, at \$1.10 per share, while Uncle Sam has moved up to \$1.80, after opening around \$1.65 in the beginning of the week Northern Light sold up to 5% today. Dexter continues very weak, while Lower Mammoth has sold as low as \$3.65. South Swansea is unchanged. Ontario weakened to \$9.60. Daly is not so strong, while Silver King hangs somewhere between \$79 and \$83 per share.

Smith, H. G. Whitney and the State Bank of Utah, the last named institu-tion having also bought 1,000 shares. As these parties are all closely connected with the Sugar company, most of them being officers, it is evident that the prevailing nervousness among the new-er investors is not shared by the "in-

One of the officers of the Utah Sugar company said to a "News" representa-tive this morning that the troubles on the coast were simply the annual recurrence of what has been going on for ten years when the California beet sugar came into the market and came "1t in contact with the cane sugar. "It cuts but little figure with the Utah factories," said this gentleman. "None of them have a pound of sugar on hand, and wont have for two months. The coast troubles are usually adjusted long before that, and if they are not, there is a freight rate of three-quarters of a cent a pound between the coast and here, and that alone gives 'very substantial protection." Mr. Joseph Geoghegan, the sugar

broker, says there is no change in the price of the product. Sait Lake quotations are, for beet sugar, \$5.65 per 100 pounds; San Francisco, \$4.90. Mr. Geoghegan says the latter rate is only 40 cents more than the cost of raw sugar, and if refined were reduced below that point, the Trust would be doing business at a loss. Mr. Geoghegan rightly says that the Utah factories will have nothing to complain of, it even the present prices maintain, to say nothing of the chances of an advance before their product is ready for market.

Ogden Sugar stock fell to \$180 from the same influences that effected Lehi, but as the capital of the former is much nore closely held than that of the latter, transactions were fewer. Following are the latest quotations

#### BONDS.

Springville, the estimates run as high as 14 tons to the acre. The agents are instructed to be most conservative in tive, though not as active as it would have been had it been possible to have secured a sufficiency of brick. It is re their estimates and their figures are regarded as being rather low than high. It can be seen that if the averported that there are now 169 buildings in the course of erection, and of these age tonnage is only 10 or 12 to the acre, the total will be the greatest in the history of the Utah Sugar company. S have just got the foundations in and ire held back for want of brick. The shortage was caused, in a large measure by the big rain which flooded Salt Lake in the middle of last May, milduced by the company in the ten years it has been in existence has also been lions of brick being destroyed. Prices of brick have advanced \$2 and \$4 higher than they were at the beginning of the Pounds var, and now range in price from \$8

Unfavorable Possibilities About the Future the Cause. SOME ORDERS CANCELLED.

> Labor Troubles Will Not Curtail Retail Distribution of Goods, Unless of Long Duration.

New York, July 19.-R. G. Dun & Co.'s

RATHER ANXIOUS.

Wekly Review of Trade tomorrow will say: "Anxiety regarding unfavorable possibilities in the future rather than any actual present misfortune, depressed securities and caused cancellation of some orders for merchandise by western dealers. Retail distribution of goods will not be curtailed by the labor controversy unless it is of long duration, as the men have saved money during the recent period of full employment at high wages. Similarly, in some agricultural districts where there is fear that little corn will be harvested preceding bumper crops at good prices, have put farmers in such prosperous condition that their purchases will not fall off materially, while the greatest crop of wheat on record has not brought a return to the low prices of previous heavy yields.

"Beyond advancing price of steel sheets and depressing the market for tin, quotations have not been affected by the strike of the Amalgamated association. Pig iron furnaces are not dis-turbed, although record-breaking production will bring accumulation of stocks if the rolling mills are kept idle for any length of time. In the branches not directly concerned there is no change of conditions, orders frequently running months ahead. An early settlement is confidently expected, and there is much relief over the general collapse of the machinists' strike. In anthracite coal regions, work has also been interrupted, but the recently exceptionally heavy output assures abundant stocks for some time, "Woolen mills are generally more ac-

tive than at any time this year, or-ders for heavy weight goods arriving

n large numbers. The light weight

eason will soon open, and although it

s expected that concessions of from a

to 10 per cent from last year's prices

will be made, there is prospect of profit

in operations unless the raw material should advance. Some uncertainty is

seen in the wood market, sellers mak-

ing fullie efforts to secure better terms and utimately accepting bids at form-

er figures. The tone is distinctly firmer

ompany (Nast mine) arrived last Monday, Superintendent lke Hazelgrove wil have to take a day off and denude day. them of whiskers, grown since they ordered.

W. R. Smith, superintendent of the Parnell (Highland Boy Con. group of mines), Tuesday carried some goodlooking samples of black oxide of copper'to the city for assay, also pieces of ore between which the oxide oc curs that will no doubt show 4 or 5 per cent conver. The samples came from the Andy tunnel, which has now been driven 600 feet and is expected to encounter a large ore chute in about 100 feet. The tunnel, lately turned to crosscut the vein, has run 20 feet in the

same kind of mineral as the samples. and the breast is still in it. Superintendent Under charge of Superintendent Thompson and with the machinery looked after by C. A. Smith the Shaw-

mut mill was limbered up Tuesday af-ternoon and Wednesday made its first regular run of the scason, taking pow-er from the Teluride Power company's line. Very fine-looking concentrates were made, from U & I ore, which will be delivered daily to mill bin by team from the upper level. The power service was most satisfactory, all parts of the mill behaved well, and apparently a start is being made that will be followed by a profitable season's run.

Another shipment consisting of three cars of excellent ore, was sent out from the Rogers & Wilbur Commercial lease early in the week. The fourth car goen out today, and others will regularly fol-low. As stated by The Bulletin two weeks ago, the boys are working from surface with privilege of 50 feet depth on one of the Commercial's fissures.

which has thus far given up to them nearly 500 tons of shipping ore, while there are upwards of 200 tons of sec ond-class on dump and they are taking out as little as possible of anythin that will not pay handle in crude state. A second 100-ton bin, built at the mine this week, was completed Wednesday.

#### South Swansea Shipments.

Claude Wheeler, who returned from the South Swansea of Tintic a day or two ago, reports the usual force emcipally. Some ore is being taken out but the company is still awaiting the but the company is still awarding the arrival of the new pump which was shipped on the 12th inst. On its ar-rival the company will resume sinking The intention is to explore the lower levels and ship only such one as may according to a support and accord be necessary to pay expenses. Accord-ing to Mr. Wheeler's statement ships-ments from the South Swansea will not be heavy for several months. The com-pany had four more cars of ore on the market today.

#### Planet Company's Plans.

In addition to drifting on the voin on the 150 level and crosscutting the vein on the 150-foot level, the directors of the Planet Mining company of Park Valley have decided to run a tunnel a distance of 150 feet to intercept the Rover yein which is said to pass through the property. In running this distance J H. Clive says a depth of about 450 feet on this vein will be obtained. The vein has been stripped on the surface and tome very fair values have been found the management is also considering he proposition to extend a 750-foot tunon the main vein on the property as to make connections with the chaft at a depth of about 275 feet.

#### Oil Locations Near Promontory.

Ex-Mayor Robert Lundy, who returned recently from Colorado, where he has been attending to his mining

A report from Secretary Smith of the Rocco Homestake at Eureka, Nev. states that since May last the manage ment has marketed 553 tons of ore which netted \$16,500. A great deal of ore is broken down and the outlook is very encouraging.

The directors of the May Day Mining company were scheduled to meet this morning. Owing to the absence of DIrectors Larson and Darmer no meeting was held. It was stated that if Mr. Larson did not put in an appearance this afternoon an adjournment would be taken until August 1, at which time a dividend would be declared, payable on August 10. Manager Hunt says the ompany is in a condition to pay one any time

A dispatch from Phoenix, Ariz, states that a mining case of exceedingly large proportions was begun there yesterday when George Mitchell, superintendent of the La Cananea min northern Sonora, began suit against Wil liam Melczer of this city for \$500,000. Melczer is the main owner of the La mine, also in northern Mexico Mitchell claims that he had an agree ment with Melczer, whereby he was to receive 10 per cent of the stock of the Copete mine for operating that property, which he says he has not received.

## WOOL.

About a half a million pounds of wool was sold in southern Utah during the early part of this week. This, say the local deaters, about clears up the entire Utah clip. It came principally from Garfield and Wayne counties and brought from 9 to 912 cents a pound. These are low figures compared with what the wool of the northern counties of the state has brought. The reason s accounted for in the fact that south ern Utah wool is never as good as the northern product.

## FLOUR AND GRAIN.

The market demand for wheat is very firm at prevailing prices, which have moved up from 1 to 1½ cents a bushel during the week. The figures quoted today are 57 to 57½ cents for the best article, carload lots. New wheat has scarcely got on to the market yet. Its nearest nominal value is quoted at 50 cents per bushel.

Flour has fallen a little since the last neeting of the Salt Lake Millers' association one week ago. The prices then were \$1.80 for high patent, \$1.60 for straight grade and \$1.50 for baker's No. 1. Today it can be bought for \$1.70, \$1.55 and \$1.45 respectively. Utah is still dependent upon eastern

importations for oats and corn, The prices are the same as have obtained for weeks past. The demand is quite marked. HOLIDAY EXCURSIONS

## Via Oregon Short Line,

Between all points in Utah at one fare for the round trip. Tickets to be sold July 23rd and 24th, limited for return to July 29th

IN UTAH COUNTY.

-----

-----

Assistant field Superintendent Heber Austin has just returned from a thorough inspection of the beet crop of Utah county and reports that the crop generally speaking is in a very encouraging condi-tion, although in a few instances the water is falling short, especially in those districts depending on the Spanish Fork river, as the river is even lower now than it was last season at this date; yet notwithstanding even in these cases, the beets are in a very healthful condition, free from all disease and insects. This state of the crop, togethe with the excellent way it is being ooked after by the farmers will go a long way to offset the drouth. Then supply of water up until recently has been fairly good and a large per-centage of the beets have matured far to niake nough good

with what water the farmers have at their disposal.

## THE BANNER DISTRICTS.

Referring to Springville and Provo ocalities, which are the Utah Sugar 'o.'s two largest districts (Lehl excepted) having in the neighborhood of two thousand acres. Mr. Austin says the tonnage will even exceed the yield of any past season, as they have plenty of water to mature the crop. Lehi has always been as short of water as any other district in the county; at this time of the year, however, while the water a little short here, all other conditions have been very propitious thus far, and from present indications the beet yield will be good.

## IN SALT LAKE COUNTY.

Supt. James H. Gardner has just returned from Salt Lake counwhile there inspected r of beet fields and and ty, number also conversed with a number of farm-ers on the cutlook for beets. It is his opinion that opinion that the beet crop generally speaking in that county, will be above d while the water supply the averag lequate, those parties s quite ng beets, are applywho water at their com-crop; the beet crop is ing all mand on suffering to the extent inferred by people not therefore that mia acquainte Mr. Pa the situation Austin has also just returned f ited ever

ley: he promising for the first season no The farm ing quitsted in the beet industry and a doing their utmost to make a good showing in this their first sca-

The last reports received by the Utah Sugar Co. from Sanpete and Sevier counties say that while the grasshoppers were playing havor with crots and lucern in those the cercal districts, they did not seem to interfere much with the beets, and as the conditions generally speaking have been most favorable to the beet crop in most favorable these southern counties this season is expected that the tonnage will far exceed the yield of last year.

BUSINESS AND REALTY.

The feature of the week in local stocks has been the fluctuation in the price of Sugar. The press reports of a probable war between the Western Trust (Spreckles) and the coast beet sugar interests (Oxnard) made some local holders of Sugar nervous, and they threw their stock upon the market in considerable quantities, with the consequence that the price broke several points; sales were made at \$16.75, \$16.50 and \$16.25. It was noticeable that the sellers belonged to the new element of investors in Sugar stocks, and that the old timers, those who have been with the Sugar company from the beginning. were not only doing no selling, but that they bought in rapidly whatever

was offered below last week's prevail ing price of \$17. The main buyer The main buyers during the week have been W. S. Meornick, who purchased 1,000 shares:

Plans have been prepared by Arch ect J. A. Headlund for a \$2,500 brick ottage north Second West street or J. A. Hagman. He will also make alterations and additions on Angus

lanach's house on Cannon farm, to the

Salt Lake City continues to bear aloft he banner of increased business per-eniage as shown by the bank clearings of the country. In the matter of in-crease it leads every city in the land. The figures for the week ending Thurs-day as shown by Bradstreet's official ompilation are \$64,850,638 or an increase of 95.3 over the corresponding week of last year. New York, the great financial center of the world, comes next with an increase of 93.3 as compared ith the same week of last year. Our ncrease over that of Denver is some-hing astonishing, both in amount and percentage increase. In the actual vol-ime of business transacted we are sevral hundred thousand dollars ahead of he Colorado metropolis whose business only 1.3 per cent greater than it Was. ast year for the same week. We lead

Les Angeles by more than a million and three-quarters of dollars and, all of the other cities popularly believed to to in the same class as our own Today's bank clearings were \$487,849. 47. compared to \$246,889.48 for the cor

respanding day last year. The week's clearings amounted to \$4,312,587.67, while the same week last year \$2,240,347.50 was recorded.

#### Bank Clearings.

The bank clearings throughout the United States and Canada for the week nding Friday, July 19, 1901, were as follows:

Inc. Salt Lake City ..... \$4,850,628 95.2 

BEARS OFFERED STOCKS.

Bulls Tried to Bid Them Up, but Their Efforts Ptoyed Unavailing.

Profit Taking Caused Fitful Rallies-The Closing Was Active and Rather Weak.

New York, July 20.-Some depression was manifest in the opening stock market but it was offset by gains in a number of stocks, Atchison fell 1% and United States Steel declined 14, but rallied 15. Buying orders for 3,000 shares of Southern Pacific lifted that stock to 56%, an extreme rise of %. Trading became almost lifeless until the professionals began to work up the principal stocks to discount the expected good bank statement. St. Paul, Missouri Pacific, Southern Pacific and Texas Pa-
