tions ever brought into public notice tions ever brought into public nonce in this part of Utah. George is an old-time prospector and spends on-half hills in quest of mineral, says the Sever Valley Sun. More than a year ago he discovered deposits of salf-peter in Greenwich canyon, southwest of Koosharem. He was haughed at by his friends, who advised him to quit all his foolishness. However, he inter-ested several parties in the find-notu-biy Dr. W. Schock, J. W. Manwill and John G. Jorgensen, the latter of this city. L. H. Outzen also viewed the find with favor, securing a bdnd and lease on one particular holding. Mr. Schau-gaard was in Richfield yesterday, on his way to Salt Lake City, where he hopes to find parties who will investi-gate these saltpeter deposits. Mr. Schaugnard said that the hold-ings his company now own are simply a continuous mountain of salfpeter. There is a splendid road through the canyon. The deposits are so easily worked that the saltpeter can be taken out with no other tools than a pick and shovel. One day last week a wonder-ful body of mineral was uncovered, picked samples from which average 30 per cent pure saltpeter. A general average is about 15 per cent. But there are mountains of it just as there in this part of Utah. George is an old-

mountains of gypsum north of Richfield.

Richfield. No saltpeter is mined in the United States, it being imported almost whol-ly from Chili and Peru, in South Am-erica, where from 2 to 6 per cent of purity is considered excellent. It is used in the manifacture of gunpowder and in many other ways. Its market value, when refined is about \$50 per ton per ton.

per ton. Mr. Schaugzard will spend some time in the city and will return here when he succeeds in bringing to the atten-tion of mining men and capitalists these marvelous mountains of saltpeter in Grass valley.

SLOW DAY FOR MARKET.

Sionx Consolidated and East Tintic Development on the Decline.

The market yesterday hit Sioux Con-solidated hard and sent it below the dollar mark. This morning it started dollar mark. This morning it started down and ended up at 95 cents, the lowest that the stock has been since it started to pay dividends. In spite of the fact that it has been positively de-clared that there is more than the reg-ular dividend for the remainder of the year in sight and that many of the ore channels have not been worked as yet, the stock has started toward lower levels. It is believed by market experts that this is due more to the condition that this is due more to the condition

of the market than the intrinsic value of the property. East Tintic Development, which on account of the fine strike made at the property took a jump yesterday, began going lower today. On the regular board the stock went to 12½ cents and 10,200 shares changed hands. Most of the stocks on the board were slow this morning. There was but little to indicate that there is any change in sight. It is certain to come, the brokers declare, but when is the question. It is generally believed that the zinc bearing ores will have a period of pros-perity within the next few months. Ores carrying this mineral it is believed will have a better market than ever before. As a result such stocks will have a better market and prices will be higher. The total number of shares sold on

have a better market and pitces while be higher. The total number of shares sold on the market this morning was 41,553, for which the pocketbook was opened to the extent of \$19,312,90. On the curb market this morning there was less activity than has been shown in some time. Only one stock made its appearance and that was Utah Mine at Fish Springs which was offered at \$1.30.

posite side of the divide from Alta, the long tunnel is now in a full face of ore that promises to be of a good shipping quality. From surveys that have been run and calcalations made, it appears that there is now but lit-tle doubt that the ore encountered is from the famous Grizzly vein from which a large amount of ore has been shipped.

For some time the tunnel which is now in a little over 900 feet has been making its way through a big fault. About three days ago the tunnel came About three days ago the tunnel came up against a horse of lime. Passing through this the contact between the dike and the lime formation was picked up and ore began to make in the roof of the tunnel. As the tunnel advanced it came down and became better. At present it is a full face of ore characteristic of the district. Manager Strickland, ordered the men to go further into the ore before hav-ing assays made and it is believed ing assays made and it is believed that within a few days returns will be made on these samples. From all the existing formations found adja-cent to the strike and the surveys made, there seems to be no doubt but what the company is now in the old Grizzly vein and that a perman-ent ore body is in sight. The ore is making into bedded plains in the lime and runs along with the dike. The ore found on the outside of

dike. The ore found on the outside of the fault now turns out to be an off-shoot of the main vein. The vein which is now being explored is declared to be the main artery of mineralization. This being true, it proves up an enormous territory from which ore can be taken. The tunnel is about 1,000 feet below the collar of the shaft and is in ore characteristic of that taken from the shaft. The tunnel has about 1,000 feet

to go before getting under the old work-ings from the shaft, and with the 1,000 feet of depth, it shows up a triangle of large proportions. The shaft was sent down 350 feet and

some fine ore was encountered. Then it was decided to send the tunnel into the mountain along the contact. At present the tunnel is following the vein

between the lime and the dike. The ore bodies are showing up stronger with each round of holes.

"It should be good shipping copper and silver ore," said Mr. Strickland this morning. "We have had no assays made as yet, but we are certain that it will come up to standard. The strike is the most encouraging thing we have had at the property thus far, I am certain that the vein we have encoun-tered is permanent and the main veln."

Private Wires GOLD STAMPEDE New York, Chicago, Boston, San Helena, Mont., Aug. 25.-Blue 🙎 Francisco, Kansas City, Minneapo-Cloud Gulch, four miles west of this city, is the scene of an oldfashioned gold stampede as the consequence of a strike made by Fisk and Potter, Helena resi-Bonds

dents. They contended that the early day placer miners worked a false bottom and genuine bedrock was never reached, and sunk a shaft 25 feet lower, with the resuit that gravel was again en- 🕹 countered. At its top, this runs 🟆 15 cents to the pan, and perforce on the bottom will be far richer. Mining experts declare the strike means a million dollars for the discoverers and there is great activity in locating old ground, leasing patented claims and prospect-ing for gold above and below the discovery.

A subsequent rally of a point in Reading had a steadying effect but trading was very small on the recovery. Inability of the bulls to bring about a rally when the selling stopped en-couraged the bears to attack prices furiously again, and a number of professionals became changed on the short side. Considerable stock was thrown on the market from all quarters and prices were beat down steadily with the 2 bid. Harriman stocks, New York Central and Reading the storm centers. Unlon

CONCENTRATES.

William A. Farrish, a mining en-gineer from New York, is making a thorough examination of the Ely Central Copper property at Ely.

Waiter E. Stewart is said to have secured an option on several mining properties in behalf of Sait Lake and eastern capitalists in the Pack Creek mining district, Grand county.

The Inspiration Copper company now begins to believe that it has a large deposit of low grade copper ore that can be utilized with a steam shovel. A number of churn drills have been set to work on the property. A drill hole 200 feet from the Joe Bush shaft en-countered the 2 per cent copper ore at 65 feet from the surface.

recovered a point, but the market be-came dull at the recovery. The market showed such stability on last rally that outside orders com-menced to flow in and prices rose briskly on effective dealings. Union Pacific rose 2 points above its low-est, Reading 214. Southern Pacific and New York Central, 1½ and the list generally a point. The market closed easy. Another setback was checked before it had The new strike at the East Tintic Development is getting larger with each round of shots. Already a 30-ton shipment of ore has been taken out in the development in this rich body of lead galena. Manager Ralph Kellogg believes that in 30 days he will be able to sink a winze on the ore body and

cated it to be his policy to maintain the wheat market during early trading today. The bearish factors weak cables and generally favorable weather for harvesting and mreshing in the northwest. Prices at the opening were a shade to % @ 12 lower. September us ing at 57% to 57%, and December at 94 to 94%. Buying by shorts carried the price of September up to 97% @%, but additional liquidation forced it back to 97%. De-cember sold off to 92%. Wheat-A heavy tone prevailed the greater part of the day although oc-casional rallies were made on covering by shorts. The low point for September 84%, The close was steady with both September and December a shade lower at 97% and 94% respectively. Corn-Additional reports of raims in Kansas and lowa caused a still further decline. September selling off to 65%. The close was weak at the low bolt. Seattered showers in the corn belt caused a sharp break in corn during early trading, initial quotations showed to 55% to 65% and sold later at 65%.
