### MINING, BUSINESS AND STOCKS

# ANTIMONY IN **GARFIELD COUNTY**

Councilman Bott of Provo Much Impressed With Southern Utah Propositions.

SHIPMENTS TO OAKLAND.

Much Activity in Evidence-New Townsite Laid Out-Smelter Under Construction.

Special Correspondence. Provo, Feb. 16.-The mining of antimony is destined to become an important and profitable industry in the southern part of the state, is the opinion of Councilman J. E. Bott of this city. Mr. Bott represents the Chapman Smelting company of Oakland, California, and has lately returned from Garfield county, where the company is operating antimony mines and shipping the ore to Oakland. Mr. Bott states that his company has about 100 men at work getting out antimony in Antimony canyon, near Coyote. The mineral occurs in pockets and the miners are paid \$65 a, ton for mining it, and they make good wages—from \$3 to \$25 a day.

The company ships the ore to Marysvale, a distance of 40 miles, and pays \$7 a ton for hauling it to the railroad. The greatest difficulty at present encountered in the shipping of the ore is getting cars enough. operating antimony mines and shipping

countered in the shipping of the ore is getting cars enough.

Antimony is used for type metal, for various kinds of alloy, in tanning leather, and new uses are rapidly being found for it, which creates a growing demand, which, in the opinion of Mr. Bott, there is no danger of oversupplying.

Mr. Bott, there is no danger of oversupplying.

A new company, the Utah Antimony company, has recently begun operations in the antimony field and has some men at work. The company is composed of Boston capitalists and was organized by John Patten, who visited Coyote on his recent trip to Utah and started work on the company's property. Mr. Bott expects to take the output of this company for the present and ship it to his Oakland company.

Messus. Romney & Clawson of Salt Lake, are building a smelter near the mines for the treatment of the ore which is expected to be in operation by April 1. They have also laid out a townsite, and every indication points to great activity in antimony mining in Garfield county.

ON MINING EXCHANGE.

#### Brisk Trading During Forenoon Calls -Prices Somewhat Lower.

Brisk trading characterized the foreneon transactions of the Salt Lake
Stock & Mining exchange, with attention centered chiefly upon Tintic stocks.
Star Consolidated was offered freely
and declined, May Day closed slightly
weaker, while Columbus Consolidated
proved to be strong at \$5.25.
The closing quotations and sales

MORRISON ANNUAL.

Officials Chosen Last Saturday-Mine In Good Shape.

The annual stockholders' meeting of the Morrison Mining company was held in this city on Saturday afternoon and resulted in the election of George W. Morgan as president; Joseph Lipmann, vice president; Sidney M. Bamberger, treasurer; the other directors being O. W. Powers and F. M. Smith, the latter W. Powers and F. M. Smith, the latter of Rockford, Ill. R. H. Siddoway was renamed as secretary of the company. The report of President Morgan, which was read to those assembled shows the mine to be in a very satisfactory condition. All of the machinery for the new hoisting works is now on the ground, and it will be but a matter of a short time till it goes into commission. Then the working shaft will be pounded down at a lively clip and the opening of the large, rich ledge, on level after level, will begin.

ANNIE LAURIE SUITS.

Piute County Mine Will Probably be

Sold to Satisfy Creditors. Late Saturday afternoon two suits were filed in the federal court against the Annie Laurie Mining company. One was by the Buhl Kimberly company, and the amount asked for is \$26,388.88, including inerest, for money advanced to the defendant company on June 6, 1906.

advanced to the defendant company on June 6, 1906.

W. S. McCornick sues for \$115,616, principal, and \$513.95 interest, for money loaned to the Annie Laurie on June 13, 1905. It will be remembered that a short time ago the United States district court was asked to appoint a receiver for the Annie Laurie.

The filing of the foregoing suits will probably result in the sale of the well known Piute county mine under the direction of the receiver. In fact, the heavy creditors of the company are pressing a settlement and unless shareholders are willing to stand a heavy assessment, the sale of the mine is the only plan left open to them.

AMALGAMATED MOVEMENT.

London, Feb. 18.—Amalgamated Cop-per had an upward movement in Amer-ican securities at the opening of the stock market today.

MADE A RICH STRIKE. Special Correspondence.

Lehi, Feb. 16.—Messrs. Charles Beck. Charles Johnson, George Beck and Par-ley Johnson have made a rich strike in their mine near the Scranton in North Tintic. A company will be organized to work same immediately.

BALAKLALA MEETING.

Special Shareholders' Meeting Scheduled for Next Saturday.

There will be a special meeting of shareholders of the Balakialla Copper company held in New York next Saturday at which time the matter of increasing the capital stock of the company from 490,000 to 600,000 shares of the par value of \$25 will receive consideration. Of the increased reive consideration. Of the increases stock, 100,000 shares will be offered to shareholders of record on March 4 and the rights will run until March

When John Hays Hammond made his examination of the Balaklala copper property, he reported back to his principals, the Guggenheims, upon which report the Guggenheims purchased 600,000 shares of stock at \$9 per share, that there was \$25 per share net in sight in the property on the basis of 400,000 shares of stock and \$1,500,000 bonds, the present capitalization.

and \$1,500,000 bonds, the present capitalization,
Duncan MacVichie, managing direc, for of the Balakhala company, has re-cently completed his third examination of the property, and in reporting to the management, under date of Dec. 15, 1906, which report has been sent 15, 1906, which report has been sent to stockholders, he estimates the total net profits in mining and treating the cre in sight, which he figures at 1.051, 555, tons of "actual" and 1.040,893 tons "probable" ore, a total of 2.092, 449 tons, at \$7,419,276 on 15-cent copper; \$10,330,113 on 18-cent copper and \$12,274,271 on 20-cent copper and \$12,274,271 on 20-cent copper at 35 cents and \$21,54 per share with copper at 15 cents; \$17.56 per share with copper at 15 cents and \$21,54 per share with copper at 16 cents and \$21,54 per share with copper at 10 cents and \$21,54 per share with copper at 10 cents and \$21,54 per share with copper at 10 cents and \$21,54 per share with copper at 10 cents and \$21,54 per share with copper at 10 cents and figuring on the proposed chlarged capital of 500,000 shares in each case.

enlarged capital of 200,000 shares in each case.

The above figures take no recognition of the "possible" ore in sight and to this the report goes into considerable detail showing many points on the property where ore has been exposed but not developed through tunnels, cross-cuts and drifts and by means of the diamond drill which Mr. MacVichle beliaves, with development work, will result in many additional ore bodies.

One values you from 236 person to

Ore values vun from 2 % per cent to 3 % per cent copper with precious meist values of about \$1 per ton on the apprage.

metal vatues of about \$1 per ton on the average.

Mr. MacVichie anticipates the completion of the first unit of the 1,000-ton capacity smelter by June 1. Work will immediately be commenced in expanding the size of the smelter to 2,000 tons.

# MANY DEALS IN SEVEN TROUGHS

Salt Lake and Goldfield Parties Have Acquired Property in This Nevada District.

LAFAYETTE HOLBROOK'S BUY.

Secures Ground at Poker Brown Springs-Contains Rich Outcrops -Other Mining News.

Specal Correspondence.

Vernon, Humboldt Co., Nev., Feb. 14. -The present is passing into history as notable week for mining deals and mining organizations in the Seven Troughs district. Besides the big \$100 .-000 deal at which figure Johnie Harnan and associates of the Portland mine of Cripple Creek, Colo., bought a half interest in the Lookout property here, a series of other deals having had an en-

livening effect during the last few days. William Cutler, the discoverer of the galena and carbonate ore bodies at Poker Brown Springs that caused the recent stampede, sold his fifth interest n the choice group of six or seven claims he located to L. Holbrook of Provo and Mr. Cravens of Salt Lake, on a basis of \$15,000. This is upon ground which no development work has yet been done but which shows ledge outcroppings of remarkably rich and strong in galenas and lead carbonates carrying values in gold and silver.

What is considered a sale illustrating

What is considered a sale illustrating the ascent of mining prices is the deal of a few days ago in which George Romney and associates of Salt Lake became the possessors of a claim and a fraction for \$13,000 and 10,000 shares of stock in the same property. The ground lies west of the famous Seven Troughs mine. The original owners were F. A. Bird, Thorne Dorsey, Dr. Pinniger and J. A. McIntosh,
H. W. Knickerbocker has just consummated a sale in which the Kindergarten Extension passed into the possession of Lester D. Freed, Tom D. Pitt, Thomas Homer, G. R. Cleaveland, W. C. Lockington and others of Salt Lake. This property consists of a group of claims lying south of the Kindergarten mine. The sale has resulted in the organization in Salt Lake of the Kindergarten Extension Mining company. The purchase price has not been made public. made public.

pany. The purchase price has not been made public.

The Vernon group of four claims lying south of the Wonder property, owned by Messrs. Williams and King, were sold to investors from Geldfield. C. W. Watts of Salt Lake, representing investors in the latter city, has just closed a deal involving the purchase of a group of choice claims to the north of the Fine Gold. In practically each instance the purchasing parties intend to conduct active development work so that an unprecedented era of mining activity is promised for the district.

Among the mining companies recently organized or in process of organization are the Gold Prize mining company by Charles Myers and associates to work ground adjoining the Seven Troughs mine on the north; the Seven Troughs Goldfield Mining company by M. A. Smythe and associates in Goldfield to operate the Mizpah claims near the Kindergarten Extension; the Seven Troughs Lookout, by Joseph Hill and associates, and Johnnie Harnan and associates and others.

The district is being flooded lately by

associates, and Johnnie Harman and associates and others.

The district is being flooded lately by incomers particularly from Goldfield and Salt Lake. Among the latter were a crowd of Seven Troughs and Kindergarten stockholders that inspected these properties yesterday. They were W. L. Mangum, John Roundie, A. Craven and W. H. Child and Heber Jex. Among today's arrivals were G. R. Cleaveland of the Cleaveland Commission company, Geo. Silks and Messrs, Burnham and Flynn.

AUSTRIANS MUST MOVE.

Decrees ejecting 17 Austrians from the property of the Bingham Central Mining company at Bingham were rendered by Judge Lewis on Saturday afternoon. The men had built cabins on the ground under the terms of verbal lease and when they were ordered off they refused to leave and it became necessary to bring ejectment proceedings against them. Judgment was also rendered against 14 of them for \$9 each as damages and against two for \$27 as damages and against two for \$27 each and against one for \$18.

THE EMMA COPPER.

Manager Wantland Thinks Future of Mine is Assured.

William M. Wantland, manager of the Emma Copper company's property at Alta, accompanied by John A. Kirby and Waiter Smith, the latter being private secretary to Charles W. Whitey, general manager of the American Smelting and Refining company, reurned from making an inspection of the Alta property last with Mr. the Alta property last night. Mr Wantland, when seen by a "News' representative today, expressed him-self as being highly pleased with pres-ent conditions and believes the future ont conditions and believes the future of the Alta proposition is now assured; aithough there has never been any doubt in his mind as to the eventual result. Mr. Wantland explains that the contact ore body has been encountered in the main tunnel, and that where opened it shows a width of all of 30 feet and it has been driven on to the length 42 feet. While the deposit contains much high goods or. on to the length 42 feet. While the deposit contains much high grade ore carrying values in gold, silver, lead and copper, it will require a little more depth to get where the solid ore makes and with that end in view n winze is now being sunk. It is anticipated that the desired conditions will be found at not to exceed 100 feet depth and at 110 feet the winze would be on the level with the Columbus Consolidated tunnel. The Columbus management is working on the same comiact and some of the high grads ore being shipped from that mine comes from this deposit of which the Columbus Consolidated company owns an extension.

TIES REACH SANDY.

A Suggestion of Early Building of Little Cottonwood Railroad.

The first real evidence of a railroad being built into Little Cottonwood canyon to relieve the mine operators of Alta comes in the shape of the arrival of two carloads of ties, which have been landed at Sandy consigned to the Continental Transportation company.

When asked how soon actual work would be started, Henry M. Crowther, manager of the Continental company, and who holds a lease from the Rio Grande Western on the right of way for the proposed road, declared that his company had not fully completed its plans for the future. However, he says the road will be built.

SPRING DAYS

building. These thoughts call to mind

### FOREST DALE.

We do not suppose ALL of our lots will be sold until early summer is here. But those who buy now have a choice of location that those who select lots later will not have. This is an advantage worth while. You can make soil but not location. So it is to your interest to buy NOW.

The prices have not been advanced, and if you are the right people and will make good neighbors you can pay all cash or buy on installments with deferred payments at 6 per cent interest. No trouble to show the property or to tell you about its advantages.

HEINZE AT PARK CITY. Important Conference With Silver King

.28

Pittsburg Sil. Peak North Star Wonder

Owners Held Today. There has been a great deal of talk indulged in of late about an effort beindulged in of late about an effort being put forth by the controlling interests in the Silver King mine at Park City to dispose of their interests to F. Augustus Heinze. The engineers of the Montanan have been in the big Park City property and they have reported to their chief what it is worth, and it has been made evident by more recent events that they formed a favorable impression.

An important meeting was held

MEATS AND POULTRY.

La

during the day which was attended by Mr. Heinze, Capt, Duncan MacVichie, David Keith and Former Senator Kearns. It is presumed that matters pertaining to the acquisition of the Park City mines by Mr. Heinze and associates received consideration.

CONCENTRATES

Sidney M. Bamberger is expected to arrive home from the east late this evening.

Mason Valley sold on the curb today at \$2.40. One block of 500 shares went at that price.

L. Hanchett, manager of the New house mines is at the Cactus mine in Beaver county today.

Manager J. B. Risque of the Utah Consolidated company is spending the day at the Highland Boy smelter. Matt Connolly, former superintendent of the Ontario mine at Park City, has gone to Oregon and will try his luck at

The annual meeting of shareholders of the Daly West Mining company will be held in Denver, Colo., this afternoon at 4 o'clock. General Manager Ernest Bamberger will be in attendance,

The ore and bullion settlements ported late Saturday afternoon by Cornick & Company were: Crude ore and concentrate, \$70,000; base bullion, \$65,600; gold bullion, \$19,200. The total settlements for the week amounted to \$824,200.

For more than 25 years hydrated nickel magnesium silicates have been known to occur in Piney or Nickel Mountain, near Riddle, in Douglas county, Or., and it has been hoped that development would prove the presence of these minerals in sufficient quantity for economic purposes. There seemed to be reason for this hope, since the deposits are quite similar in mineral con-tent, in modes of occurrence, and in their associations to the deposits of New Catedonia, whose mines are the second largest producers of nickel in the world. But as yet no commercial ores have been produced.

#### LOCAL MARKETS.

Today's markets are marked by the receipt of several cars of oranges, ranging from \$2.25 to \$3 per box, and of excellent quality. There are no bananas to speak of in the local commission houses today, but there will be a car or two along in the morning. A car of fine lemons was received today, by a wast First South street commission. car of fine temons was received today, by a west First South street commission house. Final shipments of finnan haddles are reported as being received, though one house claims shipments will be received by express for a while yet. Express consignments are on hand of Florida tomatoes and pine apples; also, the renewal of receives of vegetables is the renewal of receipts of vegetables is reported from the coast where operations have been tied up by the rains. Poultry is reported scarce, but with turkeys promised from Kansas. Apples are becoming fewer, with tendency toward higher prices. The figures obtaining in the markets today, are as follows:

MEATS AND POULTRY.

COPPER STOCKS WERE QUIET WEAK

Spread to Others and the Whole List as a Consequence Was Carried Down.

TRADING RATHER NARROW.

Some Railroads Forced Down-Dullness Broken by Increase of Selling Orders.

New York, Feb. 18 .- The average level of opening prices of stocks was not ma-terially changed from the closing on Saturday. Only a few moved widely and transactions were very small. Illinois Central rose ?, New York Central and Anaconda fell 1. Fractional additions to the opening advances were made before the list began to sag, under the weight of the copper stocks. Anaconda rebounded to 300 after its initial loss, but again relapsed over 4 points. Amaigamated felt

relapsed over 4 points. Amalgamated felt back to % below Saturdays' closing. The weakness of the copper stocks spread and free selling carried the whole list down. Anaconda dropped \$½ and Amalgamated 1½. The market steaded at noon.

Bonds were irregular.

Trading operations were restricted and the market remained at about noon level. Atchison and Northwestern were forced down 1 and Great Northern preferred 1½. The protracted duliness was broken within half an hour of 2 o'clock by an increase in the selling orders. These were most effective in stocks which had previously not given great evidence of weakness. The active list generally ruled a fraction lower than before. Northwestern sagged 2½.

PRODUCE.

CHICAGO.

CHICAGO.

Chicago, Feb. 18.—Prices in the wheat pit were easier this morning because of a moderate decline at Laverpool, which was based upon the weekly statistics, which were inclined to be bearish. Northwestern receipts were also liberal. May opened 14014 lower at 7714 to 7754 and sold at 7754.

Trading was not active in corn, but prices were firm partly because of an advance at Laverpool and also because of light offerings. Commission houses were the best bidders. May opened 4 higher at 4674 to 47.

Oats were quiet and prices firm. May opened a shade lower to a shade higher at 4674 to 48.

Provisions were weak because of general selling which was based upon liberal receipts of live hogs. May pork opened 10 to 1214 lower at 17.15 to 17.1214; lard was down 714 to 125, at 9.50 to 9.55. and ribs were \$67.14 lower at 9.30 to 9.55.

Reports of an increased export demand coming from New York and Kansas City caused the market to gain in strength. The close was steady with May 24 higher at 7514.

Corn—The market held steady at a slight advance until the close, which was at 4794124 with May up \( \frac{1}{2} \) \( \frac{1} \) \( \frac{1}{2} \) \( \frac{1}{2} \) \( \frac{1}{2} \) \( \frac{1}{2} \) \( \frac{
