ide-awake activity of its officers, the nterest of its members and the deep oncern of our Bishop and counselors the religious and moral advancement f the young., Friday evening last witnessed a fine

program rendered by the Sunday school all taking their part with com-mendable preparation. Elder Samuel Cushing, the superintendent and his elds are enthusiastic workers among the young and the results of their labors are manifest in a steady progres-sive movement of all the classes. Professor Childs, principal of the Leschools for many a year past, and

one of the stanchest and most pro-cressive of teachers, delivered a very nteresting address to a large parents' lass and a larger number of young boople at the L. D. S. meeting house. Foturday evening last. Preceding his remarks, however, Mr. Elmer Tietjen a son of Representative Tietjen, and Miss Jessie May Johnson, both men-crs of the ninth grade did themselves ligh credit in their review of the hisory of Egypt, without manuscript, nterspercing the speeches was good

inging by pupils from the classes of fr. James Hickman, Miss Iverson and Miss Devy. Another notice has been posted by the school trustees inviting the people to meet tonight in order to reach an agreement on a school site. The grounds upon which our antiquated uilding is now on is favored by many, while others are much inclined toward another locality. It is somewhat loubtful whether an agreement can be

eached as a two-thirds majority is required by law. The question of consolidating the school districts of the county into one chool district encounters considerable opposition from many because of its centralizing tendency and its prospectwe effect in taking from the people that direct control of the school by residen rustees. Others view it as a needful hange, inasmuch as all children in the enlarged district will be placed under one control and receive, in consequence equal educational advantages in terms

of school, apparatus, school room fa-clitties, etc., which at present are very unequal.

Mrs. Pinkham Tolls How Ordinary Tasks Produce Displacements.

Apparently trifling incidents in woman's daily life frequently produce cements of the womb. A slip on the stairs, lifting during menstruation, standing at a counter, running a sewing machine, or attending to the most ordinary tasks may result in displacement, and a train of serious evils is started. The first indication of such trouble should be the signal for quick action. Don't let the condition become chronic through neglect or a mistaken idea

you can overcome it by exercise or leaving it alone. More than a million women have regained health by the use of Lydia E. Pinkham's Vegetable Compound.

If the slightest trouble appears which you do not understand write to Mrs. Pinkham, at Lynn, Mass.; for her advice, and a few timely words from her will show you the right thing to do. This advice costs you nothing, but it may mean life or happiness or both.
