

MINING, BUSINESS AND STOCKS

WEEK ON THE MINING EXCHANGE

Park City, Alta and Tintic Stocks Have Been Eagerly Sought By Some Investors.

LITTLE BELL'S BIG ADVANCE.

May Day Was Tintic's Star Actor While Grand Central and Victoria Find Some Favor.

The week has closed with the sale of 220,181 shares, representing a cash valuation of \$100,379.06. The bulk of the trading was confined to Park City, Tintic and Alta stocks. Of the former, Little Bell has been the most conspicuous, having recorded an advance of more than \$2 a share. Conditions at this property are reported to be very satisfactory and the coming week will witness the arrival of the first shipment of ore. Daily Judge has been in some demand, but closed slightly weaker. Thompson has moved some and brokers were bidding 20 cents for the stock today.

Of the Tintic stocks, May Day has been the most active and the selling has been at prices ranging from 24 up to 26 1/2 cents. The company marketed five cars of ore during the week and will probably do better during the coming one. Beck Tunnel has also advanced. Grand Central and Victoria have participated in the sales some, but to no great extent. It is believed that the coming week will develop something as regards to the pending deals for the control of those properties which the public has been led to believe are about to pass into the hands of the Cole syndicate. If not to the American Smelting and Refining company. There are very good reasons to believe that the latter company has a good chance to land them.

The closing quotations and sales were as follows:

DREDGING THE SNAKE.

Determined Effort Being Made to Save Gold From Idaho River.

A well known mining engineer, who desires his name withheld for reasons best known to himself, but who has been making a round-up of western Idaho camps, brings the information that unusual activity is in evidence along the Snake river, where quite a determined effort is again being made to save some of the millions of dollars' worth of gold contained in the sands of that great stream.

Col. J. L. Weaver, manager of the Utility Power company, has just started a dredge below Glens Ferry, and is working both sides of the river, one side being in Owyhee and the other in Ada county.

The Canton Snake River Gold company, which is composed of a strong syndicate of eastern capitalists, is getting ready to start a dredger near Glens Ferry and will work the Elmore county side of the river.

Messrs. Dunn and Barr are preparing to start another outfit south of Wapiti.

HOLDEN ENROUTE.

Managing Director A. F. Holden, through whose energies the success of the United States Smelting, Refining & Mining company has been largely achieved, is expected to reach the city tomorrow. It is thought the newly elected president will accompany him, yet no one seemed to be able to confirm it.

CONCENTRATES.

Clarence K. McCormick is expected to reach the city from New York today.

George Gunn will leave for the copper camp of Elv, Nevada, early next week.

Don Maguire was in the city from Ogden a few hours yesterday afternoon.

Manager G. D. B. Turner of the West Quincy Mining company is in Los Angeles.

A. J. Davis expects to leave for southern California on mining business some time next week.

Superintendent E. J. Raddatz from a Honerine mine has returned from a trip to Chicago.

Otto Stallman, general manager of the Glasgow & Western Exploration company, has gone to Nevada.

David W. Brunton of the Taylor & Brunton Sampling company, has arrived in the city from Denver.

Manager L. Hanchett of the Newhouse mines, and wife, contemplate a trip to southern California soon.

H. S. Joseph departed last night for the property of the Chiquita Mining company at Good Springs, Nevada.

D. P. Rohlfing and Broker W. H. Tibbals are at the Frisco Contact and Louis properties in Beaver county today.

M. S. Hanauer, the well known assayer, returned yesterday from a trip of a month's duration to southern California.

Manager C. H. Doolittle of the Utah & Eastern mine in Beaver county is expected to return from camp sometime next week.

Treasurer A. A. Ball of the Annie Laurie Mining company, has arrived in the city from camp for a few days' stay at home.

Joseph Ferris and a Paris mining engineer are making an inspection of the Golden Eagle property in Humboldt county, Nevada.

Manager C. W. Whitley of the Guggenheim smelting and mining interests in this state, visited the new Garfield plant during the day.

Charles H. Hoffman, mining engineer from Valadon, Mexico, has arrived in the city and will spend several days in looking over Utah camps.

President Simon Bamberger of the Bamberger-Delamar mines is expected home from the property of that corporation this afternoon.

The compressor plant recently installed at the Montezuma mine at Bingham has been started up and the management is now using power drills.

The late assessment levied on the property of the Tetro Mining company, Tintic, amounting to one-third of a share, will be delinquent next Monday.

The milling plant of the Utah Copper company is being inspected by David Cole, mill superintendent of the Cananea Con. Copper company, operating in Mexico.

The ore and bullion settlements reported last night yesterday by McIntosh & Company were, as follows: Crude ore and concentrate, \$32,250; base bullion, \$27,000.

L. W. Mayer, connected with the Guggenheim staff of engineers, is over from Colorado for a few days. Mr. Mayer was a classmate of Sidney Bamberger at Columbia.

P. W. Madsen, who has been making an inspection of the property of the Century Gold Mining company's property in Park Valley, is expected to reach home this afternoon.

Charles D. Rookledge has returned from a trip to Nevada. While away he visited the camp of Manhattan and took a run over to the properties of the Nevada-Superior Mining company.

The late assessment on the stock of the Copper Ranch Mining company becomes delinquent today. Stockholders, it is said, have responded quite promptly and the delinquent list will be small.

The work of excavating for the numerous buildings that are to go up in the immediate future at the new smelter town of Garfield will be under full headway next week under the direction of James Anderson.

The annual meeting of shareholders of the Utah Consolidated Mining company has been fixed for April 17 at the offices of the company in New York. All shareholders of record on March 27 will be permitted to participate in this gathering.

The Manhattan-Utah is the name of a new company just formed to operate in the new Manhattan, Nevada, mining district, with a capital stock of 1,000,000 shares of the par value of \$1 each. James E. Clinton is named as president. Walter G. Flier, vice president, who, with Laurence Green, G. B. Holmes and Josiah Barnett constitute the board of directors. All of the officials of the company are Salt Lake residents.

The Butler-Liberal shipped a carload of lead ore running 15 per cent Wednesday, the first output of the new and energetic development since the property has been taken over by the Oren syndicate. The Jacobs tunnel is showing up most promising with development and leasers who have been working westward have encountered ore stragglers three feet wide, with every outlook for early production.—Bingham Bulletin.

YANKEE CONS. WATER SUPPLY.

Company Has Developed Enough For Use in Operation of Concentrating Mill.

CRUSADER PATENTS CLAIMS.

High Grade Lease Ore From the Bullion Beck—West Tintic Mines To Ship Soon.

Special Correspondence.

Eureka, March 24.—The work of sinking the shaft of the new Yankee Cons. mine at Homansville has been discontinued at a depth of 30 feet, owing to a strong flow of water being encountered. The shaft was being put down for the purpose of securing sufficient water to operate the proposed concentrating plant, and should the flow of water now obtained prove to be sufficient, no further effort will be made to develop a supply.

The output of ore this week has been decreased considerably, owing to the bad condition of the wagon roads.

The Crusader Con. Mining company's directors have levied an assessment of one cent per share for the purpose of paying off their indebtedness incurred in patenting the property and to do the annual assessment work on several unpatented claims.

On Wednesday, Conrad Kopman, a leaser in the Bullion-Beck mineshipped a carload of ore from his lease, which makes a little over 80 tons of good ore he has shipped this month. The ore bodies in the lease are holding out splendidly, and the gentleman expects to make regular shipments hereafter.

The shaft on the American claim has already attained a depth of over 40 feet. The ground which the miners are now working is very loose and will require timbering.

As soon as the roads are in better condition, several West Tintic properties will commence making shipments. The Old Scotia mine has a large quantity of good ore on the dump, which will be marketed at a good profit notwithstanding the long haul to the railroad. As soon as the weather clears up and the roads improve, the working force at this mine will be increased.

TINTIC ORE OUTPUT.

Bad Condition of Roads Interfered With Shipments Somewhat.

The bad condition of Tintic roads is responsible for the light shipments from that district this week. The management of the May Day succeeded in getting out five cars of ore all told. The following constitutes the week's record:

GOES TO GUGGENHEIMS.

Control of Groux Con. Optioned to Big Smelter Magnates.

A message received over the private wires of James A. Pollock & Company today contains a confirmation of the story printed in the "News" recently to the effect that an option on a controlling interest in the Groux Con. mines company has been given to the Guggenheims. The prospective purchasers want the Nevada properties of the corporation in connection with the plan to develop a big copper camp of which the Groux, Cumberland-Ely and Nevada Con. mines are to be the nucleus.

In case further investigation of the Groux properties result favorably and the option is exercised, it is likely that these three companies will be at once consolidated and their production increased.

TO OPEN OREGON MINES.

Construction of a Railroad to Districts Now Without Transportation.

The mining districts of southern Oregon, where some Salt Lake capital has been invested, are to be opened by a new railroad. A correspondent writing from Grant's Pass says a line to the Waldo copper district is an assured fact and the actual construction will begin in six days.

The railroad is to be built by the California & Oregon Coast Railroad company, which already has an option on the right of way, terminals and

station grounds, and has made complete surveys of the route from here to the smelter of the Takilma company at Takilma, within five miles of the Waldo district. J. O'B. Gunn of San Francisco is president and manager of the company, and Colonel Wainwright Morgan Draper is chief engineer. These gentlemen are also heavily interested in the Waldo Smelting and Mining company, which owns several mines near the smelter. They will be backed

by New York people and by Colorado capital, the latter of which will be largely represented by the holders of stock in the Takilma Smelting company, which is a Colorado corporation, and of which Charles Tutt of Colorado Springs is manager. Stock in the new company, or bonds for stock, to the amount of \$30,000 has been subscribed by Grant's Pass mining men, and this will be in the nature of a bonus and to assure the company of hearty local support in the completion of the enterprise.

The new road will cross Rogue river at Grant's Pass and Applegate river six miles west of here. The route will then lead south over the mountain divide between the Illinois and Applegate river, running through one of the finest sections of timber land in Oregon, as well as through the richest copper belt. It will then drop down into the Illinois valley and cross the Illinois river

at the old mining town of Kirby. The present terminus of the road to the south will be Takilma, where the smelter is situated, but the line of survey tends on over the Skikyou into Del Norte county and across Del Norte to Crescent City, where it will ultimately connect with the line from the south and form a new railroad along the coast from Grant's Pass to San Francisco.

STRAY DOG MANHATTAN MINING COMPANY!

ORIGINALLY INCORPORATED AS THE MANHATTAN GOLD HILL MINING CO.

Property Situated in Manhattan, Nye County, Nevada.

Owens the Great Stray Dog Claim and Sweet Home Fraction on Manhattan's Famous Gold Hill.

Offering of Part of First Allotment of Treasury Shares of

"The Richest Gold Mine IN ALL Manhattan" AT 55 CENTS PER SHARE.

STRAY DOG MANHATTAN MINING CO.

(INCORPORATED UNDER NEVADA LAWS.)

Capitalization - - - - - 1,000,000 Shares
Fully Paid. PAR VALUE \$1. Non-Assessable.
Treasury Stock - - - - - 350,000 Shares

OFFICERS AND DIRECTORS:

JOHN D. CAMPBELL - - - - - President
Formerly Chief Engineer and General Manager on Staff of Chas. M. Schwab and John McKane.
L. M. SULLIVAN - - - - - Vice-President
Capitalist, Goldfield, Nevada.

H. A. McCORNICK - - - - - Director
Banker, Salt Lake City, Utah.
THOMAS S. ROBINSON - - - - - Director
Director of Jumbo Mining Co., Goldfield, Nevada.

THE STRAY DOG IS THE BIGGEST SHIPPER OF "HIGH GRADE" IN MANHATTAN. FIVE LEASES HAVE BEEN LET ON THE PROPERTY AND ALL ARE IN SHIPPING ORE. FOUR LEASERS ARE SHIPPING ORE REGULARLY AVERAGING FROM \$250 TO \$1,000 PER TON. UPWARDS OF \$15,000 HAVE ALREADY BEEN NETTED FROM SHIPMENTS OF "HIGH GRADE." A VEIN SIX FEET WIDE HAS BEEN OPENED UP AT DEPTH AVERAGING \$150 PER TON. THE STRAY DOG claim is itself the center of a network of great mines. THE STRAY DOG is bounded by the Union No. 9 claim of the Manhattan Dexter Mining Co. and by the Jumping Jack, Crescent, and Riley Fraction, all of which are shippers of high grade ore. THE STRAY DOG is, beyond any question the most talked of and most frequently visited property in Manhattan, and from it the richest ore yet taken out of the ground in Manhattan is being lifted to the surface. Its production at this time is upwards of \$800 per day, and development work has only just been begun. Specimen rock from the Stray Dog's five shafts give assays as high as thirty thousand dollars per ton, and no shipment made to the smelters to date has netted less than \$250 per ton.

STOCK OFFERINGS:

A limited number of shares is offered for public subscription at 55 cents per share. Application for listing on the San Francisco Stock and Exchange Board will be made as soon as these are disposed of. Reservation of shares should be made at once. Allotments will be made by priority of application. Notification of acceptance or rejection will be given without delay on receipt of reservation, remittance for which must be forwarded promptly after notice of allotment.

James A. Pollock & Co.,
6 WEST SECOND SOUTH STREET., SALT LAKE CITY.
