

DEXTER DISCOVERY.

Strike of Rich Ore in the Property of
New Shaft.

KNOWN WELL IN GOLD AND SILVER.

The Company Developing Bids for a
Mill-Plant Like Samples-Save
From Numerous Sources.

According to the latest reports the
new shaft in the Dexter
property at Tropic, Nev., has struck
at a depth of 135 feet, which as-
says 21 ounces in gold and 45 ounces
in silver.

A News reporter, called on the
stimulus of street rumors, relating to
the company's delay, but found that
the officers thereof were very reticent
in the matter and would neither af-
firm nor deny the report, thus forcing
the newspaper man to the conclusion
that the rumor was about right. The
shaft in question, it is said, will be
pushed on to a depth of 300 feet where
prospecting will commence on the
ore body.

It is understood that bids for a 30-
stamp mill will be opened early next
week and the contract for its erection,
let to the lowest responsible bidder.
The company marketed its twelfth
shipment of cyanide today, which was
an average value of \$11.35 per
pound. It also succeeded in disposing
of a recent deal with an Eastern stock-
holder, a syndicate of stockholders
consisting of Messrs. Smith, Lee and
Gray, Dickson, and Ellis and their
friends have purchased 10,000
shares of stock at a price exceeding
the local market value, thus showing
in substantial form the faith the latter
gentlemen have in the Dexter prop-
erty.

INDEAR LARK SAMPLES.

Had Quite of Copper in Rich Abund-
ance—Stock Withdrawing.

The Denver Lake Mining company
received a number of samples of ore
from its property today, the same
being of high grade and of the best
outside of copper formation of which the
company has a large quantity.
The mine, said Mr. Morris of the
company today, is the first of the kind
found in Utah. The shaft is a com-
plete one, and the red oxide is an
indication of permanent ore bodies.
The intention is to push down to the
300 foot level in the near future, and
a variable copper content. Indica-
tions such as these were found in the
samples in the Dexter property, and
one of the best copper properties in
the entire country. The samples sent
in are made up of the best ore, the
best of the shaft and large quan-
tities from the mine. They will be
taken for value.

Denver Lake stock was taken at the
market yesterday after the sale of 100,
000 shares since May 23. It is said
to be in really better shape than it was
before the sale, and the stock is now
at a price which will allow the com-
pany to sell its stock at a profit, and
to pay the interest on its debt.

MADE SALVAGE TODAY.

Stockholders Go Down to Business
on the Exchange.

This was a busy day in the pit of the
stock exchange and when the brokers
opened, they did so, not with the
usual quiet, but with a great deal of
business. The market was very active
and the stock was selling at a price
which was a great deal higher than
it was a few days ago. The market
was very active and the stock was
selling at a price which was a great
deal higher than it was a few days
ago.
