

## BIG BATTLE ON NORTH OF HAI CHENG

Russians Began Abandoning the Place Aug. 2, the Japanese Taking Possession.

### THE OPERATIONS OF JULY 31.

Zassalitch Says They Were Not Decisive—Japs Said to be Halting For Lack of Ammunition.

St. Petersburg, Aug. 4.—A rumor is current that a battle is in progress north of Hailien.

**RUSSIAN LOSSES.**  
Gen. Sakharoff reports that 29 officers and over 1,000 men were killed or wounded in the engagements of July 30 and July 31.

**ABANDONING HAI CHENG.**  
Tokio, Aug. 4, 2 p. m.—The Russians began abandoning Hai Cheng Aug. 2, the Japanese entered Hai Cheng, with-out resistance, at noon yesterday, and the Japanese occupied Newchwang the next day.

**JAPANESE ADVANCING.**  
London, Aug. 4.—A dispatch to a news agency from Anshanban (half way between Hai Cheng and Liao Yang) says:

"The Japanese advance is being continued with great energy against the southern army. The Russian main forces continue their retirement northward, but the cavalry has checked the Japanese threatening flank movement."

**RUSSIAN RETREATING.**  
Washington, Aug. 4.—The Japanese legation today received the following telegram from Tokyo:

"Gen. Oku reports that the enemy is retreating northward continually since Aug. 2. On Aug. 3 our army occupied Hai Cheng and Newchwang, situated 30 miles northwest of the open port of the same name."

**FROM GEN. SAKHAROFF.**  
St. Petersburg, Aug. 4.—The czar has received the following dispatch from Gen. Sakharoff dated Aug. 3:

"In the fighting of July 31 the Russians were not decisive. The action of the Japanese on our east front on July 30 convinced me that they were making an attack with their main forces on our south front near Oushichou, situated between Dapoutz and Pkhailantou."

"From dawn until daybreak July 31 we heard cannonading on our right flank, which obliged me to hurry down the south front. The action of the Japanese was from Lieut. Col. Solomsky, who informed me that he was seriously holding his position, although he had many wounded, ordered at first two companies and then a battalion to reinforce him although he did not ask for support."

"Simultaneously with the attack on the right flank, the central position of the Japanese directed attacks against Gen. Mista's detachment and again at our right flank."

"At the beginning of the fighting showed the superiority of our artillery over that of the Japanese. No only did our batteries silence the Japanese guns previously in position and prevent them paying their positions, but the batteries sustained no loss and were able to develop their fire at leisure."

"At 1 o'clock I received the following telegram from Gen. Solomsky: 'The Japanese turning movement has stopped, the enemy sustaining enormous losses. We have many wounded. Capt. Goltz has been killed. The wounded number two officers and a surgeon. I am making a firm stand.'

"Simultaneously with the receipt of this report it was seen that our detachment had evacuated three crests of the mountain range. It was evident that Solomsky had too strong a force to cope with and had been obliged to give ground somewhat. He continued, however, to hold his position."

"After reinforcing Solomsky with two battalions and afterward with two and three-quarter battalions and ordering to centralize the command of these troops, I dispatched Col. Polozovitch with orders to take command of the troops engaged in that position."

"The fusillade continued on our right flank without becoming threatening. Our artillery continued to crush the enemy's artillery with its fire, although the Japanese had brought mountain and field guns into action."

"At 3:40 p. m. I received a report that a regiment posted at the extreme right flank had retired from its position in the mountains, the Japanese guns turned its flank. Six disabled guns were abandoned. Two officers were killed and two wounded and the commander of a battery was injured."

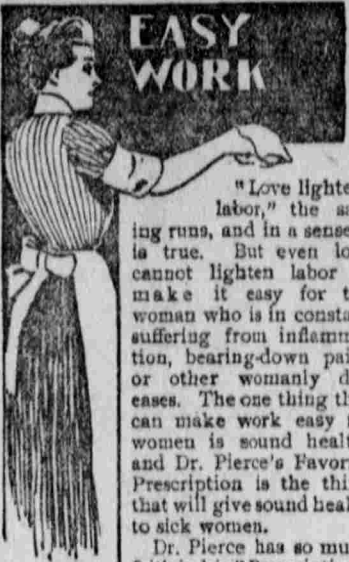

"Before this had happened the Japanese had placed two more batteries on the left of those which had previously taken up their position there, and with their batteries on the right they began to bombard our right flank of our formation. This was the cause of the destruction of our right flank and the serious loss of troops on our right flank."

"The battery was shattered, but at the beginning of the action our soldiers in saving four guns, while four others were left on the field disabled. Of the four saved, two had to be spiked and abandoned, owing to lack of horses."

"With the view of distracting the attention of the Japanese from our right flank I directed Col. Lepovitch at 6 o'clock when the heat was diminished to order the soldiers to take off their equipment and assume the offensive."

"To support this offensive movement I ordered our batteries to open a fire on the ridges held by the Japanese. The fire of our guns which had previously been directed at the point, was turned against the Japanese again and many were killed or wounded."

"Our attack in open order astonished

"Love Lightens Labor," the saying runs, and in a sense it is true. But even love cannot lighten labor or make it easy for the woman who is in constant suffering from inflammation, bearing-down pains or other womanly diseases. The one thing that can make work easy for women is sound health, and Dr. Pierce's Favorite Prescription is the thing that will give sound health to sick women.

Dr. Pierce has so much faith in his "Description" of the United States for any case of Leucorrhoea, Female Weakness, Protrusion of Uterus, or Womb which he cannot cure. All he asks is a fair and reasonable trial of his means of cure.

"I suffered from female weakness for five months," writes Miss Belle Hendrick of Nye, Putnam Co., W. Va. "I was treated by a good physician but he never seemed to do me any good. I wrote to Dr. R. V. Pierce for advice, which I received, telling me to take his Favorite Prescription and Golden Medical Discovery. When I had used the medicines a month, my health was much improved. It has continued to improve until now I can work at almost all kinds of housework. I had scarcely any appetite but it is right now. Have gained several pounds in weight. Dr. Pierce's medicines have done wonderfully well here. I would advise all who suffer from chronic diseases to write to Dr. Pierce."

"Favorite Prescription" makes weak women strong, sick women well. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send 21 one-cent stamps for the paper-covered book, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

lyed all beholders. Our men in this formation advanced swiftly across the principal mountain range, rushing on both sides with fixed bayonets on the Japanese who were unable to sustain the shock and quickly evacuated the three crests they had occupied. I am informed by Maj. Lordkumizaki that those who remained were bayoneted."

"After this brilliant affair, I ordered Col. Lepovitch to stop and push no further."

"At 7 o'clock I received an order to retire in the direction of Hai Cheng. 'According to the report of the commander of a Cossack regiment which reconnoitered the valley of Dapoutza during the battle as well as organized the delivery of ammunition and the removal of wounded, these divisions of Japanese were observed moving through the town of Hapoutza.'

"Our losses on July 30 and 31 have been 29 officers and 1,000 men, and 29 officers and 1,000 men killed or wounded."

**JAPS SHORT OF AMMUNITION.**  
St. Petersburg, Aug. 5.—(15 a. m.)—The fact that there is no further news from the front beyond Gen. Zassalitch's account of the fighting at Hailien on July 31 leaves out the Association Press' explanation that the Japanese are halting to bring up supplies, especially ammunition, of which a modern engagement entails an extraordinary expenditure.

The official estimate of the loss of more than 1,000 men, and without which it would be impossible even for a victorious army to follow up its success. The official estimate of the loss of more than 1,000 men, and without which it would be impossible even for a victorious army to follow up its success."

The receipt of Gen. Zassalitch's dispatches was generally known today and gave rise to many extravagant rumors of further fighting around Hai Cheng, and several press dispatches were sent off describing a fresh battle between the forces of Gen. Zassalitch and Gen. Oku.

There is no apparent justification for such reports. The best informed military authorities declare that there has been no fighting since the Russians fell back to Lianliandian, Anping and Anshanban.

**KUROPATKIN IN A FIX.**

Newchwang, Aug. 4.—Gen. Kuropatkin with 100,000 men is now on the route for the front to witness the battle. Japanese troops ships are expected here tomorrow.

The Russian troops at Port Arthur have been back the last line of their defenses. The Japanese attacking force has 350 guns in action.

**NEW WAY TO BREAK STRIKE**  
A Train Load of Immigrants Is Brought from Ellis Island.

Chicago, Aug. 4.—The packers today introduced a distinct novelty in strike-breaking—a trainload of immigrants said to be direct from Ellis Island. The immigrants were smuggled into the yards in groups of 10 or 12 to the various departments and put to work.

In a statement given out tonight by the packers the report that negotiations are in progress to bring about another conference between the packers and the labor leaders is declared to be unfounded. The packers assert that there is not the slightest possibility of further conferences with the strikers.

According to this statement the progress making at the plants is satisfactory to all the packers; more men are employed daily, all contracts and current orders are filled, and there is a normal supply of beef, mutton and provisions at all plants in the United States, while sales are made at lower prices than before the strike began.

In a table accompanying the statement it is shown in the total number of men employed tonight at the plants is more than 25,000. With this number of men at work the packers say they shipped 331 carloads of fresh meats from all plants yesterday.

Beyond trying to enforce the order forbidding the delivery of ice to retailers who have been hauling meat from the stockyards themselves since the teamsters' strike, the strikers did little today. Up to date the ice supply of 100 retail markets has been cut off.

## SECRETARY WILSON TALKS TO STOCKMEN

Is in Denver as Representative of President to Learn What is Agitating the Cattlemen.

### WANTS PLEASANT RELATIONS.

Destruction of Trees Has Cost Government and People Countless Thousands.

Denver, Aug. 4.—Secy. James Wilson of the department of agriculture and Dr. D. E. Salmon, secretary of the bureau of animal industry, arrived in Denver today and met with the special land commission and the representatives of the National Livestock association for discussion of the grazing land and forest reserve question.

The morning session was almost entirely taken up by remarks from Dr. J. M. Wilson of Wyoming, in welcoming the delegates to the meeting and in an address by Secy. Wilson. The discussion of the forest reserve question was then resumed and concluded. This, with all other subjects, will be referred to the resolution committee. The attendance today was greater than yesterday, there being about 200 delegates present.

In his address Secy. Wilson said he had come to Denver as the representative of the president, to learn what was agitating the cattlemen, and declared it to be the purpose of both his department and the administration to bring about more cordial and pleasant relations between the official government and the stockgrowers of the country.

The following committee on resolution of the problems his department has had to deal with: of questions pertaining to the breeding of horses; of the need of water; the rights of stockmen in the necessity of forest reserves. He pointed out that the building of great levees along the Mississippi river near New Orleans was the outgrowth of the wiping out of the forests in the country higher up.

The destruction of the trees, he said, had removed the only means for holding back the snows and rains in the hills, with the consequence that great deluges resulted, and these had cost the government and people countless thousands in the destruction of property.

Visiting stockmen were entertained at luncheon by the Denver chamber of commerce and board of trade, Secy. of Agriculture, Secy. of Interior, W. H. Gifford Pinchot and Prof. E. H. Newell were the guests of honor.

The afternoon session of the conference of stockmen and the federal land commission was devoted to discussions on grazing on government lands and the necessity of the enactment of laws regulating or governing the same. Addressing the meeting were Secy. of Agriculture, Secy. of Interior, W. H. Gifford Pinchot and Prof. E. H. Newell were the guests of honor.

The following committee on resolution of the problems his department has had to deal with: of questions pertaining to the breeding of horses; of the need of water; the rights of stockmen in the necessity of forest reserves. Visiting stockmen were entertained at luncheon by the Denver chamber of commerce and board of trade, Secy. of Agriculture, Secy. of Interior, W. H. Gifford Pinchot and Prof. E. H. Newell were the guests of honor.

**STOCKMEN HAVE THEIR TROUBLES.**

Denver, Aug. 4.—The Denver Record-Stockman, the official newspaper of the National Live stock association and other western live stock interests, today prints an interview with President Hagenbarth of the National Live stock association on the report that the western cattlemen, now in conference in Denver with government officials, would attempt to break the Chicago butchers' strike. Mr. Hagenbarth is quoted as saying: "We have troubles of our own, and while we wonder and see the strike settled, there is nothing for us to do in the matter."

**CLIFF DWELLERS.**  
Their Descendants Said to be Living in Northern Mexico.

El Paso, Tex., Aug. 4.—Dr. Bush, a well known archaeologist, has returned from a trip 700 miles into the interior of northern Mexico into the Sierra Madre mountains, and says he discovered a race of people that prove to his satisfaction the perpetuation of the cliff dwellers. The language of these people is different from any other he ever heard and the hieroglyphics on stones corroborates his theory. He also found mummies exactly like those unearthed in cliff settlements and living persons about the same size. Their huts are partially underground, on mountain sides, and everything indicated a connection with the cliff dwellers.

**Am. Federation of Catholics.**  
Detroit, Mich., Aug. 4.—T. B. Minahan of New York, was elected president of the American Federation of Catholic societies today. Several changes in the constitution were made. The most important of these is one permitting Catholic parishes and institutions to become members of the federation, as well as Catholic societies. A cablegram was sent to the pope congratulating him upon his first anniversary as supreme pontiff.

On the school question the resolutions were:

"We propose the solution of the educational problem so far as we are concerned. Let no public money be paid out for religious instruction in any schools; let the educational per capita tax be disbursed for results in purely secular studies only in our Catholic schools, our teachers receiving their salaries as other teachers receive theirs; to ascertain the results let our schools be submitted to state or city examinations. Thus, on the great principle of our government, 'no public money for sectarian purposes,' be preserved intact."

**Forest Fires in Montana.**  
Butte, Mont., Aug. 4.—Advices received from throughout the state the past week depict a serious state of affairs on the big ranges in eastern and northern Montana, and unless heavy rain is soon forthcoming considerable loss of stock will ensue. The northern Montana ranges in many localities resemble a desert, former watering holes and springs being dry and parched. Many of the ranges have had to be abandoned and the stock driven long distances for water in order to save the lives of the animals. So bad have the conditions become that the state humane officers have interfered and compelled stockmen to drive herds into localities far removed, where some grass and water still remain, though even there the supply is scanty.

Stock shipments have been almost

## Turning Gray?

Why not have the early, dark, rich color restored? It's easily done with Ayer's Hair Vigor. Nearly everybody uses it. Ask your own friends. Probably they know how it always restores color, checks falling, and keeps the hair rich and glossy.

"I have used Ayer's Hair Vigor and have found it a great remedy. It checked the falling of my hair when all other remedies had failed."—Mrs. G. A. Morrison, Millinocket, Me.

100¢. All druggists. J. C. AYER & CO., Lowell, Mass.

entirely suspended as a result of the strike of the packing house employees. The Great Northern Railway company is meeting with difficulty in the operation of its trains throughout northern Montana as a result of the inability to secure sufficient water to keep its tanks along the road replenished.

**Cortelyou Sees President.**  
Washington, Aug. 4.—Republican National Chairman Cortelyou arrived here today from Chicago. He called on President Roosevelt for an hour. The conference related largely to the details of the opening of the campaign headquarters in Chicago and the political situation in the western states.

Chairman Cortelyou declined to be interviewed for publication regarding the campaign or any of his recent observations. He expressed pleasure that the national executive committee, the personal of which he announced two days ago in Chicago, had met with general approval.

Mr. Cortelyou will not announce perhaps for several days yet the composition of his campaign advisory committee. That committee will consist of prominent Republicans from various parts of the country. Its number is not limited and it may include thirty members.

**To Reinspect Grand Republic.**  
New York, Aug. 4.—At a meeting between the management of the steamship and federal authorities today a decision was reached whereby the steamship Grand Republic will be inspected.

The inspection will be conducted by a committee of inspectors-General. The inspection will be conducted by a committee of inspectors-General. The inspection will be conducted by a committee of inspectors-General.

Mr. Cortelyou will not announce perhaps for several days yet the composition of his campaign advisory committee. That committee will consist of prominent Republicans from various parts of the country. Its number is not limited and it may include thirty members.

**Conspiracy to Defraud Railroads.**  
Chicago, Aug. 5.—Chicago-St. Louis lines have just discovered a conspiracy to defraud the railroads through the manipulation of exposition tickets. It is declared that instead of taking up return coupons and turning them into the company, conductors have been selling them to scalpers.

In many instances when tickets to St. Louis and return were presented, conductors are said to have taken up the whole ticket, giving the passenger a return coupon that already had been used.

It is estimated that in this manner Chicago-St. Louis roads have been defrauded out of \$200,000.

**Largest Special Train.**  
Portland, Ore., Aug. 5.—What is said to be the largest special train ever sent on a transcontinental journey will arrive here next Wednesday morning enroute to San Francisco, bearing 267 Knights Templar from Pittsburg on their way to the Twentieth triennial convocation, which is to be held in the California metropolis early in September. The train will consist of 100 Pullman sleeping cars, 10 Pullman dining cars, 10 Pullman baggage cars and a 60-foot commissary car, built especially for the Knights on their trip. The train will come over the northern lines and will return by way of Los Angeles and the south. The party will include some of the most prominent men of Pennsylvania.

**War Affects Russian Credit.**  
New York, Aug. 5.—The first effects of the war in the far east are beginning to be felt on Russian credit at home, which is already considerably shaken, says a Russian correspondent of the Times.

In the first place, many important orders for military stores are not being paid for with ready money, but by bills of two years' date. Moreover, although the amount of paper money issued in Russia is partially covered by gold, it is believed that the sum is three or four times as large. Russian credit both at home and abroad is based entirely on the presence of a large gold reserve, and the government is sparing no efforts to keep gold in the country. The moment it begins to flow out, the national credit will collapse.

Already it is declared to be doubtful whether the Imperial bank will discount bills on the Nizhni Novgorod fair this year, as it always does before, for everything in the business world is now very uncertain, and the bank wishes to run no risks.

**New York Rhodes Scholar.**  
New York, Aug. 5.—The trustees of the Rhodes scholarships have accepted the credentials of Warren Schutt of Cornell university, who was appointed as the Rhodes scholar from New York at a meeting of the committee on award held recently at Columbia university. He has been admitted to Brasenose college. While at Oxford he was specialist in history and international law.

**Suspended in Mid Air.**  
Philadelphia, Aug. 5.—Hanging to the foot of a great cross that surmounts the church, 300 feet above the ground, Frank Eickeroth, a young rigger, was held by a rope "choking" in the block of a tackle, his life in constant jeopardy, for nearly an hour.

Eickeroth had been gliding the cross, which is 12 feet high and 8 feet broad. When he started to descend he found the fact by which he was suspended would not work and he found himself unable to move up or down. There was danger that the rope might break and the rigger falling to the foot of the cross. He could not make these things his hear and finally he withdrew one hand from the cross. With this hand he took from his pocket his knife, a bit of rope and a pencil. Slowly and with difficulty he scrawled upon the paper "Rope is choked. Send up another tackle quick." Opening the blades of the knife with his teeth Eickeroth

shut them down upon the slip of paper and threw the knife to the ground. His fellow worker quickly climbed up the inside of the steeple and pulled up a second block and tackle, by which Eickeroth safely descended.

**Refugees from Port Arthur.**  
Chefoo, Aug. 5, 10 a. m.—Thirty more refugees arrived today on junk from Port Arthur which place they left Aug. 1. The departure of all civilians from Port Arthur is said to be owing to the exhaustive preparations for a final stand against the Japanese. Chefoo is being tasked to provide for the usual influx of travelers. The only good hotel in the city is assigning three or four to a room and the overflow is compelled to accept squalid quarters elsewhere.

**Pygmies from Africa.**  
St. Louis, Aug. 5.—One of the most remarkable trips in connection with the exploitation of the world's fair was completed when the Rev. S. P. Verner, the Presbyterian missionary, who brought eight pygmies out of the African jungles, arrived in St. Louis.

His journey included 20,000 miles, 800 miles of which was traversed on foot through the wilds and deserts of Central Africa. The trip lasted eight months.

Mr. Verner was reported killed several times and contracted a tropical fever from the effects of which he has been ill in New Orleans for several weeks.

Dr. W. J. McGee, chief of the anthropological department of the world's fair, who talked with Mr. Verner immediately after his arrival here, declared that the missionary's trip had been of inestimable value to science.

He brought his watch in to have it repaired. When he called for it he said the charge of \$2 was too much. Two weeks later he called to compare time and found his watch had varied but three seconds.

He was then pleased and forgot the cost. So does everyone.
