community in the same of the s Mammoth was the star stock in the pit today, as the result of the two strikes reported on Saturday afternoon. When the news leaked out the stock strenghtened considerably. On Saturday evening it went to \$2.35, but opened today at \$2.40 and sold up to \$2.44%. Some venture to say that the stock will go to \$3.00. This it may do when the value of the strikes are more fully determined, but there are those who do not expect it to advance much above

the present price.
Daly-West made a sale today at \$19.00 while Eagle and Blue Bell participated at 90%, a slight advance over the last few sales. A further advance is ex-pected when connection shall have been completed with the old workings and the shaft on the 260 level.

Northern Light was traded in at 5½. Sunshine brought 13½ and Emerald sold at 3 in spite of the loss of the shaft house by fire since Saturday. Four Aces sold from 3½ to 3½.

Bulls and Bears Have a Close and Persistent Struggle.

Efforts to Advance Stocks Meet With Reverses-Live Stock and Prods nce Stendy.

New York, April 23.-Wall Street: Prices were generally lower at the start but the tone was very feverish and changes extremely uneven. Support was evident in the iron stocks. Sugar and a few other stocks showed some small gains. On the other hand large offerings were made of stocks throughout the general list, losses of a point or over occurring in many prominent stocks. Those that have recently been the subject of speculation for a rise were especially affected. The liquida-tion was very large in the early dealings, but the support was powerful and determined. Heavy offerings were steadily absorbed and general rallies were made, some of the railroads getting back to Saturday's level. Steel and wire was lifted to 25%, and the preferred to 78. When sugar was railed to the market bearments of the market bearments. down 2½, the market became unsettled again, the grangers, Pacifics, trunk lines and New York tractions being excial sufferers. Prices of prominent pecial sufferers. Frices of prominent railroad stocks were 1 to 2 points un-der Saturday's final prices, and steel and wire and Federal steel yielded over a point from the best. The market railied quite vigorously before 11 o'clock. Trading became rather quiet at the advance and the pressure to real ize relaxed in a marked degree. and there a stock showed strength, but the buying seemed to slacken when support had achieved a check to the de-clining tendency. Bonds were weak.

### A FRIENDLY DISCUSSION.

It Finally Results in the Arrest of Two Young Miners.

A couple of young miners from British Columbia named H. D. Campbell and William Fitzgerald got full yesterday and engaged in a fistic combat. When Officer Pack arrived on the scene the men were pounding each other for all they were worth and it was with

## WAS A BATTLE ROYAL MAY MINE GOLD FROM STEAMSHIPS

Gov. John G. Brady Talks About the Situation in Alaska.

COUNTRY'S COAL OUTPUT.

Over 17 Per Cent Increase Lust Year -The Copper Queen - Great Improvement in the Lucky Boy.

A New York dispatch today says: Gov. John G. Brady of Alaska is in the Washington in the interests of the Alaskan bill, which he hopes Congress will pass this session. He will return to Washington today. In the course of a conversation had with him at the Fifth Avenue hotel last night, Gov.

From present appearances the discovery of gold in the Cape Nome dis-trict promises to be one of the most mportant finds in Alaska. At first pee pic were sceptical of the reports that gold existed in the district in paying quantities, but results have proved that there were no grounds for doubts. At the end of the season the value of gold produced was \$2,250,000, one milion baving been taken from the beach and the remainder from the gulches, something new in gold mining, and the question is now as to the extensiveness of that field. It is believed that the deposits run out beneath the water, possibly even beyond the three mile limit, so that it may come about that before we shall see the unique spectacle of gold being mined from steamships. The latest news that has come out is that the Tundra, the lower ground between the sait water and the mountains is gold bearing, and sufficiently rich to pay handsome returns.

ay handsome returns.

"But the main thing that is agitating us just now is that we want Congress to do something for Alaska, It is impossible for us to get along without law courts for one thing. It is unfair to expect General Randall, with a few troops to Keen in order the 25 000 or 20. troops, to keep in order the 25,000 or 30,-000 people who are expected to go to Alaska during the coming season. The bill, which is now before the senate. Would give us much needed relief from the unsatisfactory state of things which we now have to contend with. It would give us a civil code, three full district courts, with competent jurisdiction over all persons and maritime and mining questions. If Congress should fall to give us these laws and these courts, it would be a calamity, because fully 25,000 people are reported n be already booked for Alaska by the transportation companies when the season opens. Alaska has been kept in the back-ground all these years, and, something should be done for it now, because the more we know of it the more valuable to the country it be-

We wish to organize Alaska into a Territory, but it is impossible for us to do so until Congress gives us ade-quate land laws. We already have mining laws, and there is no trouble about getting title to a mine, but you cannot get a title for a home, and therefore those who wish to make their homes in Alaska have no incentive to settle there, because they cannot obtain a title to their land. There are many people who went into Alaska soon after its transfer who have continued to live there year after year, constantly nop-ing that they would get the wished for title: but they are hoping yet. The want of these land laws has retarded the growth of Alaska more than any-thing else. For instance, Alaska would be glad to receive the large number of immigrants who are coming from Fin-land to this country. They are just the kind of people who would build up Alaska. They would be at home in the climate there, and the resources they would have are undoubtedly much bet-ter than those of Finland. These people would soon become prosperous, but we cannot invite them to come and settle upon land to which they cannot acquire With no permanent guarantes to them, the people would be unable to stand taxation to support a teritorial form of government. Congress imposes upon us the licensing system and all the money that has been derived from that source has been turned into the United States treasury without any provision being made for any part of it being devoted to any specific purposes in Alaska. Congress should provide lib-erally for the schools, and if the sug-gested bill is enacted part of this money will be allowed to the municipalities or ganized under the law."

### COUNTRY'S COAL OUTPUT.

Tonnage for 1899 is 17.5 Per Cent More than in the Previous Year. According to returns representing between 80 and 80 per cent of the total tonnage, the production of coal in the United States in 1899 is estimated by Edward W. Parker, statistician of the United States geological survey, to have amounted to 230,838,973 long tons, equivalent to 258,539,650 short tons.

As compared with the production in 1898, when the product amounted to 196,405,593 long tons, or 219,974,667 short tons, this indicates an increase of over 24,090,000 long tons, or 17.5 per cent. These figures exceed by 15,000,000 short tons the outside estimates heretofore made on the coal tennage of 1899. The production of 220,000,000 short tons in 1898 was nearly 20,000,000 in excess of that in 1897, and both of these years It is impossible that these figures

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue Pain in the Side, TORPID LIVER. They Regulate the Bowels. Purely Vegetable.

.. ...... Small Dose. mall Pricefor 1899 as estimated may be somewhat reduced by later and more complete re-

turns, and, in fact, this may be pre-dicted as probable, but even a reduction of £,000,000 tons would not amount to 2 per cent of error in the total. The total value of this enormous pro-duction is estimated at \$259,435.412, an increase of over \$51,000,000, or practi-cally 20 per cent over the value of the product in 1898.

Another interesting and unusual feature of coal production in 1899 was the fact that there was an advance in price. the first instance of the kind in ter-years. The production in 1898 and th estimated output for 1899 is shown in a table, in which occurs the following:

### NORTH TINTIC MINES.

An Eighteen InchVein of Good Ore in the Klondike-Gold in Taylor Group

Assays from an eighteen-inch vein in the Klondike show 54 per cent lead, nineteen ounces sliver and \$4 gold, says the Tintic Miner, Manager Holdaway

went to Salt Lake yesterday, and further particulars could not be learned. The property lies west of the D. & B. group in North Tinctic, about five miles northeast of town.

At the Taylor group in the same vicinity the quartz ledge in which the shaft is sunk has given gold values all the way down, which have increased to \$15 per ton at a depth of thirty feet, shaft. North Tintle, so long neglected, is rapidly coming to the front. is rapidly coming to the front.

### THE COPPER QUEEN.

Nice Grade of Lead Carbonate in the Stockton Prospect.

A visitor from Stockton says that a very promising prospect named the opper Queen is being worked near the wegon road between Terminus and Stockton. A comparatively small amount of work has yet been done, but some excellent lead carbonate ore is being extracted as the resultof a recent being extracted as the resultof a recent strike. The tunnel is in about 100 feet and the ore is being mined at less than sixty feet below the surface. The vein is blue lime formation running east and west. The ore streak is said to be patchy but promises well for the future. About a carload of ore has been mined already. The property is being worked by Edmunds and company under lease and bond.

### PARK CITY ITEMS.

Strong Vein of Jasper Quartz Carrying Gold-Ore Shipments.

In its review of the week the Record of Park City says Secretary Snyder made what promises to be a very rich discovery this week of a strong vein of jasper quartz carrying gold and silver about ten miles southeast of the city. He brought in several specimens of the rock, when the character of the ore was discovered. It strongly resembles the rich gold and sliver rock of Cripple Creek, Colo. Metallic gold and noodles of eliver can plainly be seen in the specimens, and it will without doubt run very high in both metals. The vein can be traced for a considerable distance, the footwall being of phorphy ry and the hanging wall of lime. He will return at once and locate the property, and, no doubt, if it turns out to be what is now expected, will create considerable excitement. The quartz resembles only and agate, but a man furnillar with this character of rock pronounces it jasper quartz without question.

Quite a number of needed and valuimprovements have just been completed by Foreman Kescel at the Anchor mill. A new classifier has been put in, the trummels have been raised thirty inches, two new settling tanks one thirty feet long and one fifty feet long, have been added and are now operating, new launders put in, and other improvements. The mill is work-

other improvements. The min is working very satisfactorily.

The Record is informed that while
the deal for the transfer of the Kennedy group, mentioned some time ago,
did not materialize, another one is
pending which oromises to come to a uccessful head any day. J. P. Sweeney was in Salt Lake the

first of the week. Sweeney expects to begin work in a short time on a group of claims located by him in the Park Valley district. He will probably superintend the work.

The Steamboat company expects to commence work in the old tunnel on their property at the head of Spake creek in a very short time. Water power, Burleigh drills and other ma-

chinery will be put in and other work carried right along.

A carload of lubricating oil—sixty barrels—arrived the first of the week for the Ontario Silver Mining company. for the Ontario Silver Mining company. Superintendent Rhoden of the Quincy was down from the mine Thursday evening. He reports that the new cage has been put in the shaft and is working satisfactorily. The shaft has now reached a depth of 400 feet and is going that the down Thisting on the 200 level. steadily down. Drifting on the 200 level is also being pushed, and the drift from this station is now in twenty-five feet. The character of the rock coming to the surface seems to be satisfactory to the

letter received by the Record from G. H. Safford, now at Wardner states that he is just making his first shipment for this year, consisting of sixty tons. He has ten men working for him paying \$3.50 per day, and says he is rushing the dump for all there is in it. He states that he has plenty of water at present, which he thinks will last at least another month. ORE SHIPMENTS.

Following are the shipments of ore rom the Mackintosh sampler for the

A GOLD STAMPEDE.

### Gold Assays Obtained From at a

Ledge Near Bancroft, Idaho.

Bancroft has been having a genuine gold stampede, though on a small scale, says the Montpeller Examiner. Recently Tom Moore accidentally struck a gold lead near that place which showed, by assay, good values in gold and some silver. The find is about seven miles from Bancroft and is described as being a "big lead, traceable for 10 or 15 miles." On the strength of these reports quite a number from here went down there last week. They found some good out-crops, and the here went down there last week. They found some good out-crops, and the possibility of good paying mines being developed is very bright. Severa as soon as the weather will permit con-siderable development work will be done. This last strike is not the same as the one made by Mr. Moore last fall. That is something like twenty miles from Bancroft. It was while making a trip to the latter place that Tom run on to the new lead.

### THE NORTH MAMMOTH. Will Use Power-Face of Tunnel

Shows Values.

Christensen, under whose direction work is being pursued at the North Mammoth claims at Tintic, came In from camp today to attend a special meeting of the directors. The management is considering the proposition \*\*\*\*\*\*\*\* AN HONEST ARTICLE WILL STAND AN HONEST TEST. ROBINSON'S

\$3.00 SHOES FOR MEN HAVE BEEN TESTED THOROUGHLY AND STOOD IT.

ROBINSON BROS', CO., SHOE BUILDERS. . 124 Main St.

to put in an air compressor and other machinery. A meeting was to be held

this afternoon to consider the cost of steam and electricity. The tunnel is now in more than 260 feet and the face is said to show valwhich, while small, are very encouraging.

### AT THE LUCKY BOY. Enlargement of the Stamp Mill and the Cyanide Plant. The Lucky Boy mine at Custer City,

Idaho, is rapidly improving, judging by the recent developments at the mine and the amount of buillion that is being sent out every month. "The recent strike on the 800 level is showing up very well," sald Manager Treweek today. "The ore body is bigger on this our deepest working than it is above. Another lot of men, probably half a dozen, will go up this evening, and in a very short time we will be dropping twenty-five stamps instead of towenty as at present.

This will give a capacity of about 1,800 tons per month. It is the intention of the management to increase this to 2,000 tons as soon as possible. Be-sides these improvements Manager Treweek says that the cyanide plant will be enlarged. The capacity at pres-ent is 1,400 tons a month, but it will be found insufficient to handle the tail-

ings.
The Lucky Boy is a gold and silver proposition. Some of the silver and a large percentage of the gold is saved on the electro copper plates, anothe saving is made in the treatment of the Wlifley tables and canvas plant, and lastly process being the cyanide.

The Conklin sampler reported ten cars of ore today from Tintic.

A car of ore was on the market today from the South Swansea, of Tintic.

The Centennial-Eureka, of Tintic, had nine cars of ore on the market today.

Four cars of copper ore were on the market today from the Ajax, of Tintic. John Forgie, operating near Milford, had a car of copper ore on the market

Five cars of ore were on the market today from Jesse Knight's Uncle Sam at Tintic.

The Mammoth, of Tintic, marketed three cars of concentrates and three cars of crude ore today. The Taylor-Brunton sampler reported fifteen cars of ore today from Tintle and one car from Milford.

J. D. Wood and R. G. Wilson will leave for Tintic tomorrow to inspect several properties in which they are in-

Halley Times: J. Q. Packard arrived from Salt Lake Friday, and was driven out to the Tiptop group of mines, of which he is the owner, President McIntyre of the Mammoth is out at the mine, so that no further particulars are obtainable regarding the

strike reported on Saturda

R. C. Reever has arrived in the city after spending several months in the Deep Creek country where he is interested in a group of claims. The shaft house of the Emerald Min-

ing company at Tintle was destroyed by fire yesterday morning. The loss is said to run close to \$4,000. Directors Charles Van Alstine, Charles Crismon and E. M. Weller, of the Utah Mining Company, left town this morn-

ing for the mine at Fish Springs. C. C. Crismon, who has been acting as assayer at the Utah mine at Fish Springs was slightly injured at the mine a short time ago by which he lost sev-eral teeth.

The Sacramento, of Mercur, reported at the rooms of the Consolidated Kansas City Smelter and Refinery Company, today with about 275 pounds of gold cyanides.

Anaconda Standard: Judge John W. Surton of Salt Lake, partner of Congressman King, who succeeds Roberts, is in the city. He is interested in the Copper Cliff mine with Gov. Smith and Sam Ritchey, and will visit the mine to-

### -+++++++++++++++++++++++ PINE APPLE SHERBET.

We served pine apple sherbet at the soda fountain Saturday and we never had anything that brought forth quite so nice words from our patrons.

We're told that it was better than other makes. We don't know how other people make theirs. But we do know ours is made right. Mr. Schramm says: Don't put

anything into our soda or sherbets that's not the best and pur-And he pays the bills. Don't you think it'll pay you to keep your thirst until you get here?

Burlington

out being too utterly dainty, I am excredingly particular about my meals,
and about the way they are served.
For breakfast all I want is eggs, rolls,
and coffee. In a Burlington dining car
I am able to get just what I want, just
what I would have at my own table,
and for the small sum of fifty cents.
The exquisite neatness of the napery
makes a good meal taste all the better."
—Interview with a Denver merchant.
